

INSTABANK ASA

INTERIM REPORT Q3 2022

INTERIM REPORT Q3 2022

Key highlights & developments:

- ★ **Profit before tax of 24.6 MNOK, after-tax 18.4 MNOK**
Impacted by loss on securities of 4.5 MNOK and legal advisory cost of 1 MNOK
- ★ **Growth in net loans of 93 MNOK**
Adjusted for NPL portfolio sales growth was 159 MNOK
- ★ **Mortgages volume growth of 195 MNOK**
Mortgages represent 37 % of total net loans and 55 % of net loans in Norway
- ★ **Rate hikes temporarily put pressure on the net interest margin**
Six-week notice period on loan interest rates increases

We value progress

INTERIM REPORT Q3 2022

About Instabank ASA

Instabank is a Norwegian digital bank with offices in Oslo, Norway and has been operating since 2016.

Instabank operates in Norway, Finland and Sweden, offering competitive savings, insurance, point of sales (POS) financing, credit cards, mortgages and unsecured loan products to consumers who qualify after a credit evaluation. Instabank also offers deposits in Germany through a partnership with Raisin Bank.

The bank's products and services are distributed primarily via 26 agents, various retail partners and directly on the bank's website and mobile app.

At the end of Q3-22, Instabank had 40 full-time and 13 part-time employees.

Instabank is listed on Euronext Growth at Oslo Børs, ticker INSTA.

Operational Developments

The Norwegian central bank introduced several rate hikes in the third quarter of 2022 to fight inflationary pressure. Higher interest rates have substantially increased our funding cost, putting pressure on our net interest margin in the short term. Our loan interest rates have also increased following the rate hikes from the central banks. As there is a six-week notice period in Norway, the rate increases in August and September were not effective in Q3-22.

As in the previous quarters, we experienced strong demand from homeowners for our second-priority mortgage product and from customers that want to lower their costs by refinancing unsecured loans into a mortgage. Instabank experienced increased competition in terms of pricing in the quarter but considers it a temporary situation and expects increased interest rates going forward. However, mortgages had a strong growth in net loans of 195 MNOK in the quarter.

In the third quarter, we sold two non-performing loans (NPL) portfolios in Norway and Finland, representing a net value of 66 MNOK reducing risk, improving capital ratios and with a positive P&L effect as the prices we achieved were higher than the booked value. Non-performing loans (NPL) volume was 305 MNOK at the end of the quarter, down from 404 MNOK at the end of Q2-22, representing only 6.7 % of total gross loans.

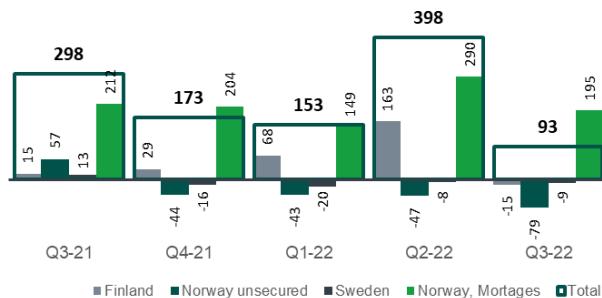

In Q3-22, Instabank achieved a total growth in net loans of 93 MNOK. Adjusted for the sales of the NPL portfolio, growth was 159 MNOK.

The growth comes from solid performance throughout the organisation, successfully delivering on the strategy, effective operations, distribution, and product offerings meeting customer demands. The mortgage product increased to 55 % of net loans in Norway and 37 % of total net loans, up from 51 %/ 33 % at the end of Q2-22, and Instabank continued its path towards becoming a well-diversified bank with lower credit risk.

Balance Sheet

Net loans to customers increased by 93 MNOK in Q3-22 to 4,427 MNOK at the end of the quarter.

Net loan balance growth (MNOK):

Deposits from customers decreased by 39 MNOK to 4,703 MNOK at the end of the quarter.

Common equity Tier 1 Capital ratio was 19.7 %, and the total capital ratio was 22.5 % at the end of Q3-22, up from 21.7 % at the end of the previous quarter, 1.9 % points above the total regulatory capital requirement of 20.6 %. The countercyclical buffer requirement increased to 1 % for exposures in Sweden at the end of the quarter.

Total assets at the end of Q3-22 were 5,546 MNOK.

At the end of Q3-22, the bank had 74,044 customers, of which 52,577 were loan customers and 21,467 were deposit customers.

Profit and Loss

Instabank reports a profit before tax of 24.6 MNOK, and after-tax profit of 18.4 MNOK in Q3-22, up from 17.8 MNOK after-tax profit in Q2-22.

Total interest income increased to 98.9 MNOK from 94.8 MNOK in the previous quarter and 85.7 MNOK in the same quarter last year, representing a growth of 13.2 MNOK/ 15 %.

Interest expenses came in at 18.5 MNOK, up from 15.2 MNOK in the previous quarter following increased deposit rates.

Net interest income came in at 80.5 MNOK, up from 76.2 MNOK in the same quarter last year and 79,5 MNOK in Q2-22.

Net other income was negatively impacted by an unrealised loss on securities of 4.5 MNOK and came in at 5.7 MNOK, down from 9.9 MNOK in the same quarter last year and 8.4 MNOK in the previous quarter when there also was a loss on securities holdings.

Total income came in at 86.2 MNOK, down from 87.9 MNOK in the previous quarter and unchanged from the same quarter last year.

Total operating expenses came in at 38 MNOK, down from 40.2 MNOK in the previous quarter and up from 33.2 MNOK in the same quarter last year. Off the increase in operating cost of 4.9 MNOK from the same quarter last year, 1 MNOK came from legal advisory costs related to the Lunar legal proceedings and 1.6 MNOK from increased marketing costs.

Losses on loans came in at 23.6 MNOK or 2.1 % of gross loans to customers, down from 24.0 MNOK/ 2.2 % the previous quarter. The sales of the two NPL portfolios in the quarter positively impacted losses on loans.

Outlook

We expect continued high demand for our lending products in all markets. Still, there is uncertainty regarding how the macro situation will affect demand and credit assessments. Instabank is resilient to changing market situations with a proven track record of an agile approach, quickly adapting to changes whenever required.

For more than two years, the mortgage product has contributed considerably to growth in net loans, reduced risk, and increased diversification. We expect continued strong demand as inflation, driven by the war in Ukraine and high electricity prices, is expected to increase demand from customers seeking to refinance unsecured loans to a mortgage and thus decrease their loan costs.

Instabank operation has been impacted by the acquisition process by Lunar as we have yet to be able to develop the bank as we otherwise would have done in 2022. Instabank has been unable to execute the capital plans for 2022 and all other aspects of such a process. Although legal proceedings against Lunar are ongoing from the shareholders of Instabank, Instabank is now able to execute on the strategy and plans.

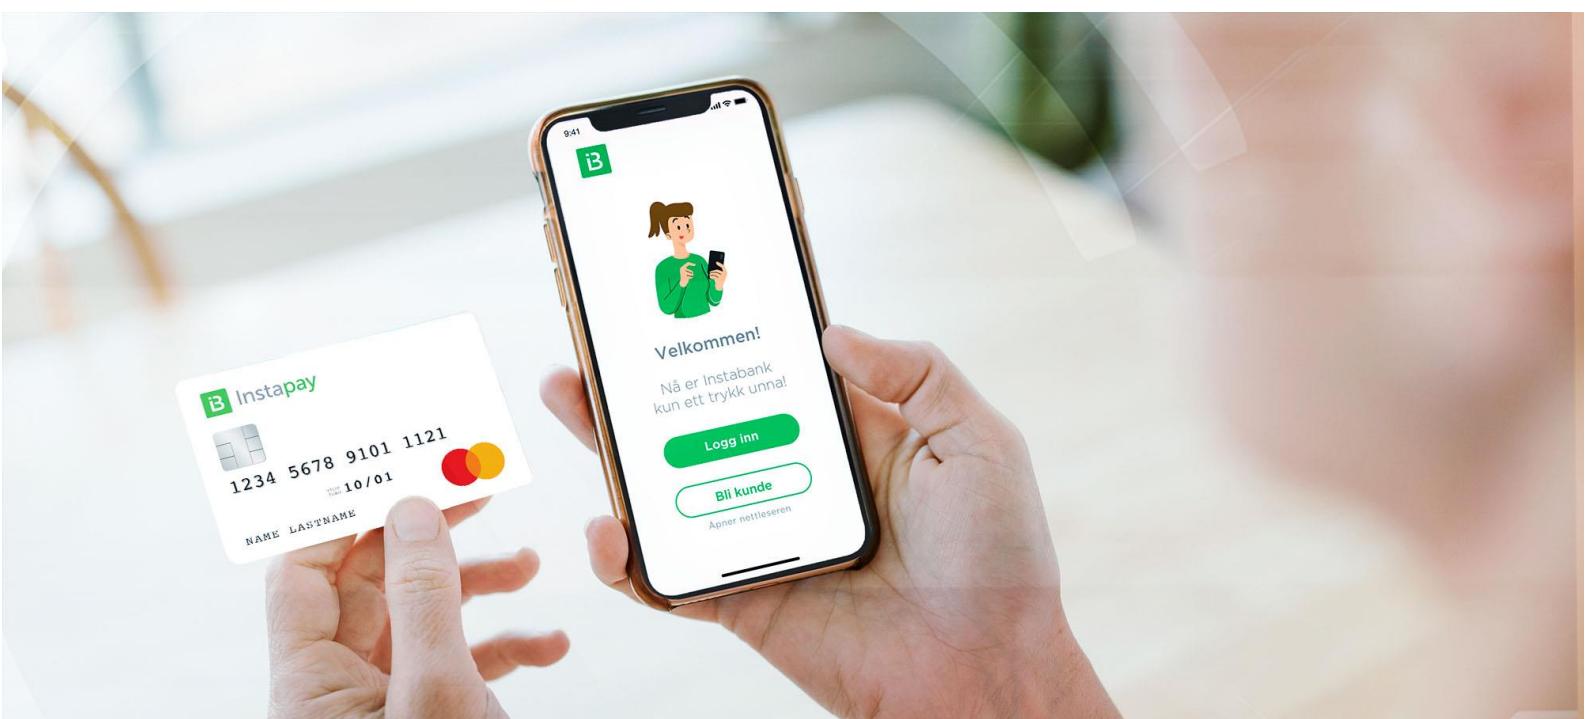

After the balance date on November 2nd, the board of directors decided that the bank would change to the standardised approach to establish the risk-weighted volume for operational risk, resulting in a positive impact on the capital adequacy by 0.7 % points based on the situation pr. 30.09.22

The bank's liquidity and capital situation are expected to remain satisfactory. It should be noted that there is typically uncertainty related to assessments of future conditions.

Other Information

Regarding capital requirement, there has been a limited review of the accounts in accordance with ISRE 2410 as of 30.09.22 by the bank's auditors and the result after tax is added to retained earnings in full.

Oslo, November 2nd, 2022
Board of Directors, Instabank ASA

Expected Credit Loss

Instabank apply the IFRS9 framework and methodology consisting of three stages of impairment when calculating Expected Credit Loss (ECL). The three stages include Stage 1 which consist of non-impaired exposure, Stage 2 which consist of exposure where credit risk has significantly increased since origination and Stage 3 which consist of observed impairment exposure following a 90 days past due definition. The overall staging criteria is based on a combination of observed events, past due observations and submodels predicting the probability of default (PD), exposure at default (EAD) and loss given default (LGD). Predictions follow a 12-month accumulation in Stage 1, while Stage 2 and 3 follow a lifetime approach.

Significant increase in credit risk

Stage 2 consist of exposure where credit risk has significantly increased since origination following several different criterias, including early past due observations (30 - 90 days), current forbearance history and increase in probability of default (PD) between origination and the reporting date. The latter predictive model employs historical behavior data in order to predict the probability of default in the next 12 months, where default is defined as 90 days past due. The below table show the trigger thresholds that define a significant increase in PD origination and the reporting date.

	Secured Norway	Unsecured		
		Norway	Finland	Sweden
Low Risk at origination	200 %	300 %	300 %	300 %
High Risk at origination	150 %	150 %	110 %	110 %

Macroeconomic input to ECL model

Instabank has employed one macroeconomic models for each country in measuring ECL in accordance with difference macroeconomic scenarios, including a pessimistic, baseline and optimistic scenario. The models explain historical correlation between macroeconomic indicators and portfolio default levels and future projection of the macroeconomic indicators in turn adjust PD according to model correlations and the model variables. The macroeconomic projections are based on the NiGEM-model developed by UK's Institute of Economic and Social Research and the model parameters vary per country due to differences in goodness-of-fit between macroeconomic indicators and the portfolio default levels and its development. In addition, macroeconomic indicators are evaluated in terms of economic logic towards probability of default. In the Norway model, "Employment Rate" is the ratio between the Employment and the Population Working Age and in the Sweden and Finland model, Consumption is shown in millions and employed as the increase of the Consumption being an indicator for improving economic conditions and incomes with a further expectancy of a decrease in probability of default.

NORWAY	Pessimistic scenario			Baseline scenario			Optimistic scenario		
	31.12.22	31.12.23	31.12.27	31.12.22	31.12.23	31.12.27	31.12.22	31.12.23	31.12.27
<i>Employment rate</i>	77,78 %	77,85 %	78,15 %	78,51 %	78,49 %	78,66 %	79,11 %	79,51 %	79,57 %
<i>3-Month NIBOR</i>	0,65	0,65	1,23	0,65	0,65	1,44	0,65	0,65	1,73
FINLAND	Pessimistic scenario			Baseline scenario			Optimistic scenario		
	31.12.22	31.12.23	31.12.27	31.12.22	31.12.23	31.12.27	31.12.22	31.12.23	31.12.27
<i>Unemployment rate</i>	10,36 %	8,16 %	6,90 %	8,29 %	6,97 %	6,38 %	7,52 %	6,51 %	6,20 %
<i>Consumption</i>	8 386	9 005	9 402	8 609	9 141	9 666	9 097	9 328	9 942
SWEDEN	Pessimistic scenario			Baseline scenario			Optimistic scenario		
	31.12.22	31.12.23	31.12.27	31.12.22	31.12.23	31.12.27	31.12.22	31.12.23	31.12.27
<i>Unemployment rate</i>	9,69 %	8,72 %	7,03 %	8,96 %	7,55 %	6,77 %	8,04 %	7,24 %	6,57 %
<i>Consumption</i>	172 738	179 067	187 452	177 352	183 687	199 208	182 963	189 817	212 466

ECL sensitivity between macro scenarios

The weighting of the scenarios was unaltered at [30 % pessimistic - 40 % baseline - 30 % optimistic] during Q2-2021 after an update in Q2-2020 of future projection of macroeconomic indicators, including short- and long-term effects of COVID-19. The projections reflect a worsening in all employment and consumption-based indicators, especially in shorter term, and in addition cause ECL per scenario to differ to a greater extent. These macroeconomic projections were utilized during 2021 due to uncertainty and volatility, especially regarding the net effect of worsening macroeconomic conditions and the numerous governments supports at different levels, hence the equal probability weighting of the pessimistic and optimistic scenario occurring in the final ECL.

NOK 1000	Norway	Finland	Sweden	SUM
Pessimistic scenario	93 040	74 284	12 661	179 986
Baseline scenario	85 918	71 654	11 610	169 181
Optimistic scenario	81 374	68 865	11 012	161 251
Final ECL	86 692	71 606	11 746	170 044

Note 4: Financial instruments

Financial instruments at fair value

Level 1: Valuation based on quoted prices in an active market.

Level 2: Valuation is based on observable market data, other than quoted prices. For derivatives, the fair value is determined by using valuation models where the price of underlying factors, such as currencies. For certificates and bonds, valuation is based on market value reported from the fund and asset managers.

Level 3: Valuation based on unobservable market data when valuation cannot be determined in level 1 or 2.

Note 5: Leasing obligation

The bank has a right to use asset for lease of offices in Drammensveien 175 in Oslo. The leases liability is 4,4 MNOK and expires 30.06.2024. The right of use asset is 4,1 MNOK and is measured at amortised cost using the effective interest method and is depreciated using the straight-line method. Instabank has applied IFRS 16 using the modified retrospective approach and therefore the comparative information has not been restated.

To the Board of Directors of Instabank ASA

Report on Review of Interim Financial Information

Introduction

We have reviewed the accompanying interim condensed statement of financial position of Instabank ASA as of 30 September 2022, the condensed statements of profit or loss and other comprehensive income and the statement of changes in equity for the three-month period then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of this interim financial information in accordance with the accounting policies described in note 1. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (ISAs), and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information does not present fairly, in all material respects, the financial position of the entity as at 30 September 2022, and its financial performance for the nine-month period then ended in accordance with the accounting policies described in note 1.
