

Kongsberg Automotive appoints new Executive Vice President for the Flow Control Systems business area

Zurich March 1, 2024: Kongsberg Automotive (KA) has appointed Eduardo Pamies as the Executive Vice President (EVP) for the Flow Control Systems (FCS) business area, effective March 1, 2024.

Pamies has served as the interim head of FCS since August 2023.

“I am happy to announce the official appointment of Eduardo Pamies as the EVP of the FCS business area,” says Linda Nyquist-Evenrud, KA’s President & CEO, adding, “His strong focus on business and customers, extensive product and application knowledge in both passenger and commercial vehicle segments, in-depth knowledge of automotive assembly and manufacturing operations, combined with his successful interim leadership of FCS since August 2023, makes Pamies the ideal candidate to lead FCS. I am confident that his deep knowledge of the sector, commitment, and vision will support KA in achieving its long-term goals.”

“I am honored by this appointment,” says Pamies, adding, “As the EVP of FCS, I will continue to lead the business with support from the team on our path towards profitability and growth by delivering innovative solutions to our global customer base.”

Pamies joined KA in 2011 as a General Manager in Epila, Spain. In 2016, he took on the role of Vice President of Fluid Transfer Systems (FTS), Sales and Marketing, and was appointed VP of FTS, Europe in 2017. Before KA, Pamies held several senior leadership roles in Johnson Controls and Valeo.

He holds a Master’s Degree in Industrial Engineering from the University of Zaragoza, Spain, and has also completed an Advanced Management Program from IESE Business School in Spain.
