

Environmental preparations for Engebø operation started

Nordic Mining has started a monitoring program for migrating smolt (juvenile salmon) in adjacent rivers of the Førde Fjord. The program will cover two migration seasons, 2021 and 2022, and secure valuable information of smolt migration prior to production at Engebø. Advanced monitoring equipment has been installed at two representative locations in rivers surrounding the fjord.

"The monitoring program will provide valuable information for production planning to secure minimum impact from operations. This is the first part of a program to monitor that the operation will be in good harmony with the surrounding environment," says Project Manager Kenneth Nakken Angedal.

Production of rutile and garnet at Engebø is scheduled to start in 2024.

For questions, please contact Project Manager Kenneth Nakken Angedal, telephone +47 926 40 645.

Nordic Mining ASA

Nordic Mining ASA (www.nordicmining.com)

Nordic Mining ASA ("Nordic Mining" or the "Company") is a resource company with focus on high-end industrial minerals and metals. The Company's project portfolio is of high international standard and holds significant economic potential. The Company's assets are in the Nordic region.

Nordic Mining is undertaking a large-scale project development at Engebø on the west coast of Norway where the Company has rights and permits to a substantial eclogite deposit with rutile and garnet. Nordic Mining also holds 14.3% of the shares in Keliber Oy, which is developing a lithium project in Finland to become the first European producer of battery grade lithium hydroxide.

In addition, Nordic Mining holds interests in other initiatives at various stages of development. This includes patented rights for a new technology for production of alumina and exploration of seabed minerals.

Nordic Mining is listed on Euronext Expand Oslo with ticker symbol "NOM".
