

MARCH 2024

Democratizing access to sustainable energy solutions

We are SunSpear, founded for championing sustainable energy access through tech

01

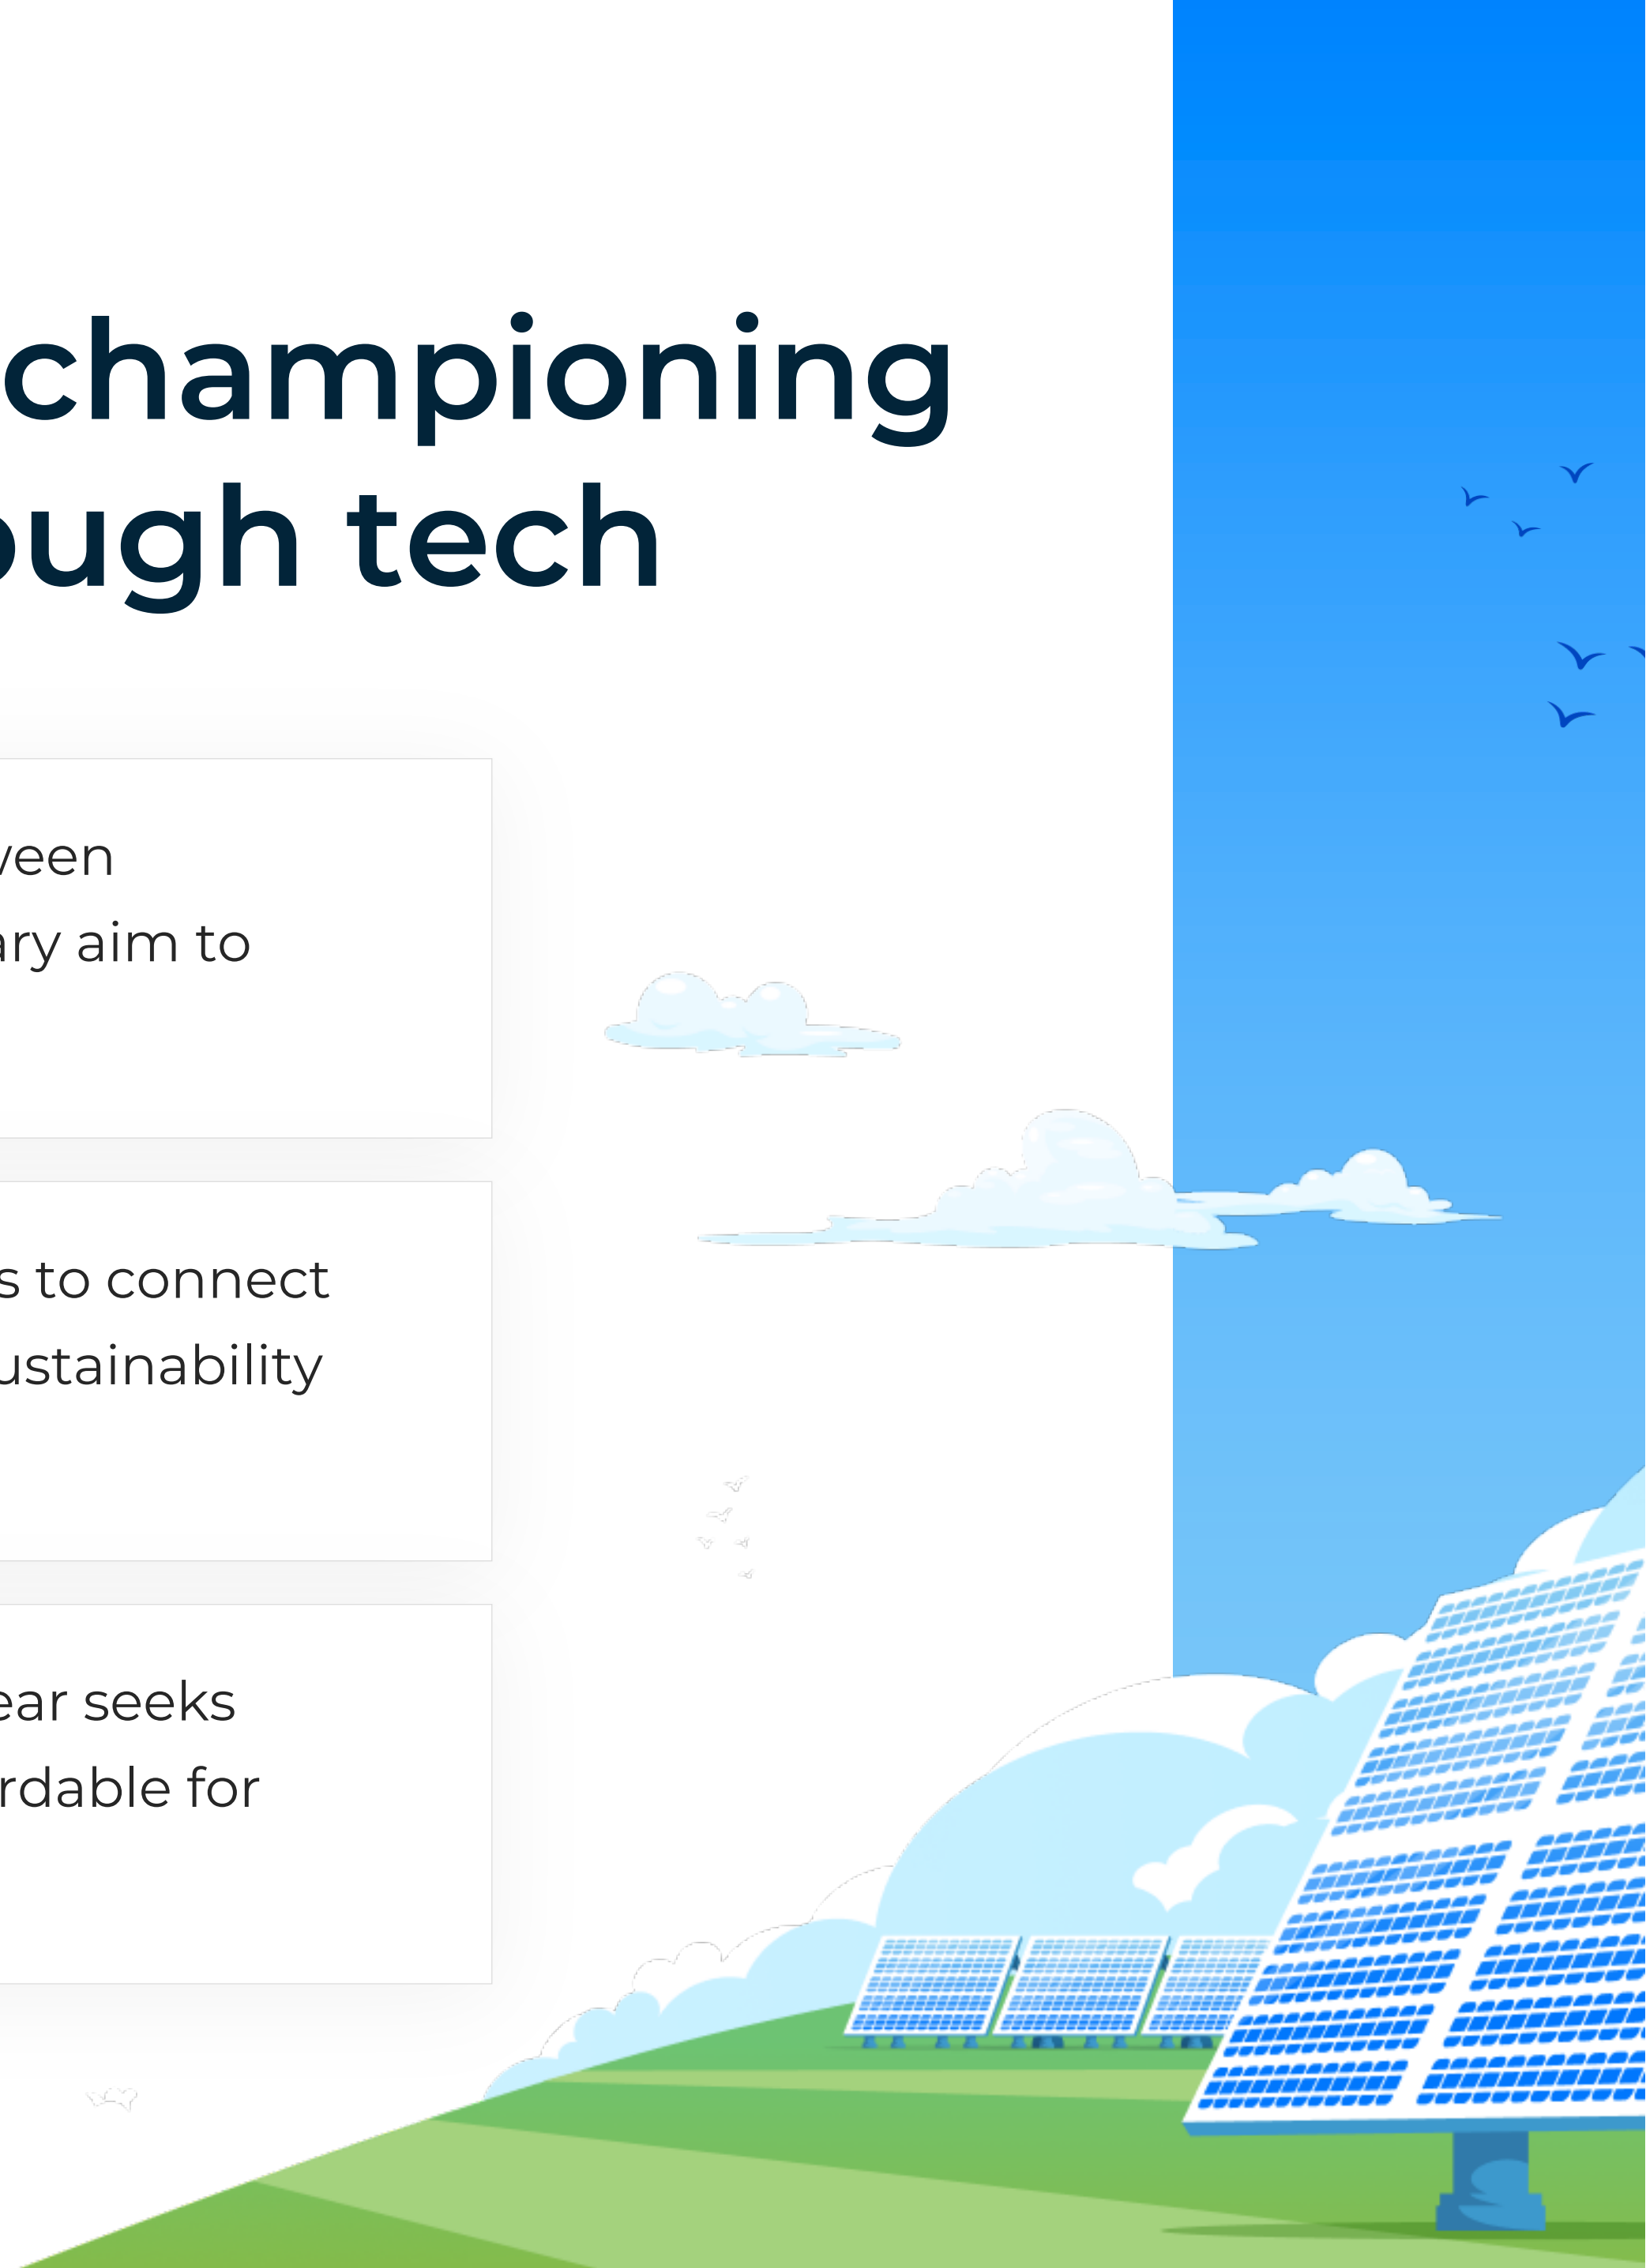

SunSpear Holding AS is a pioneering Joint Venture established between Norwegian Block Exchange (NBX), Hagal and Suniqon with a visionary aim to democratize access to sustainable energy solutions globally.

02

With a focus on solar panel and battery technologies, SunSpear aims to connect people worldwide to energy projects that promote environmental sustainability and energy independence.

03

Through the integration of solar panel and battery solutions, SunSpear seeks to revolutionize the energy landscape, making it accessible and affordable for everyone.

OPPORTUNITY

The world is one step away from having solar energy owned by all

Community solar are gaining traction

Solar power has become the lowest cost energy

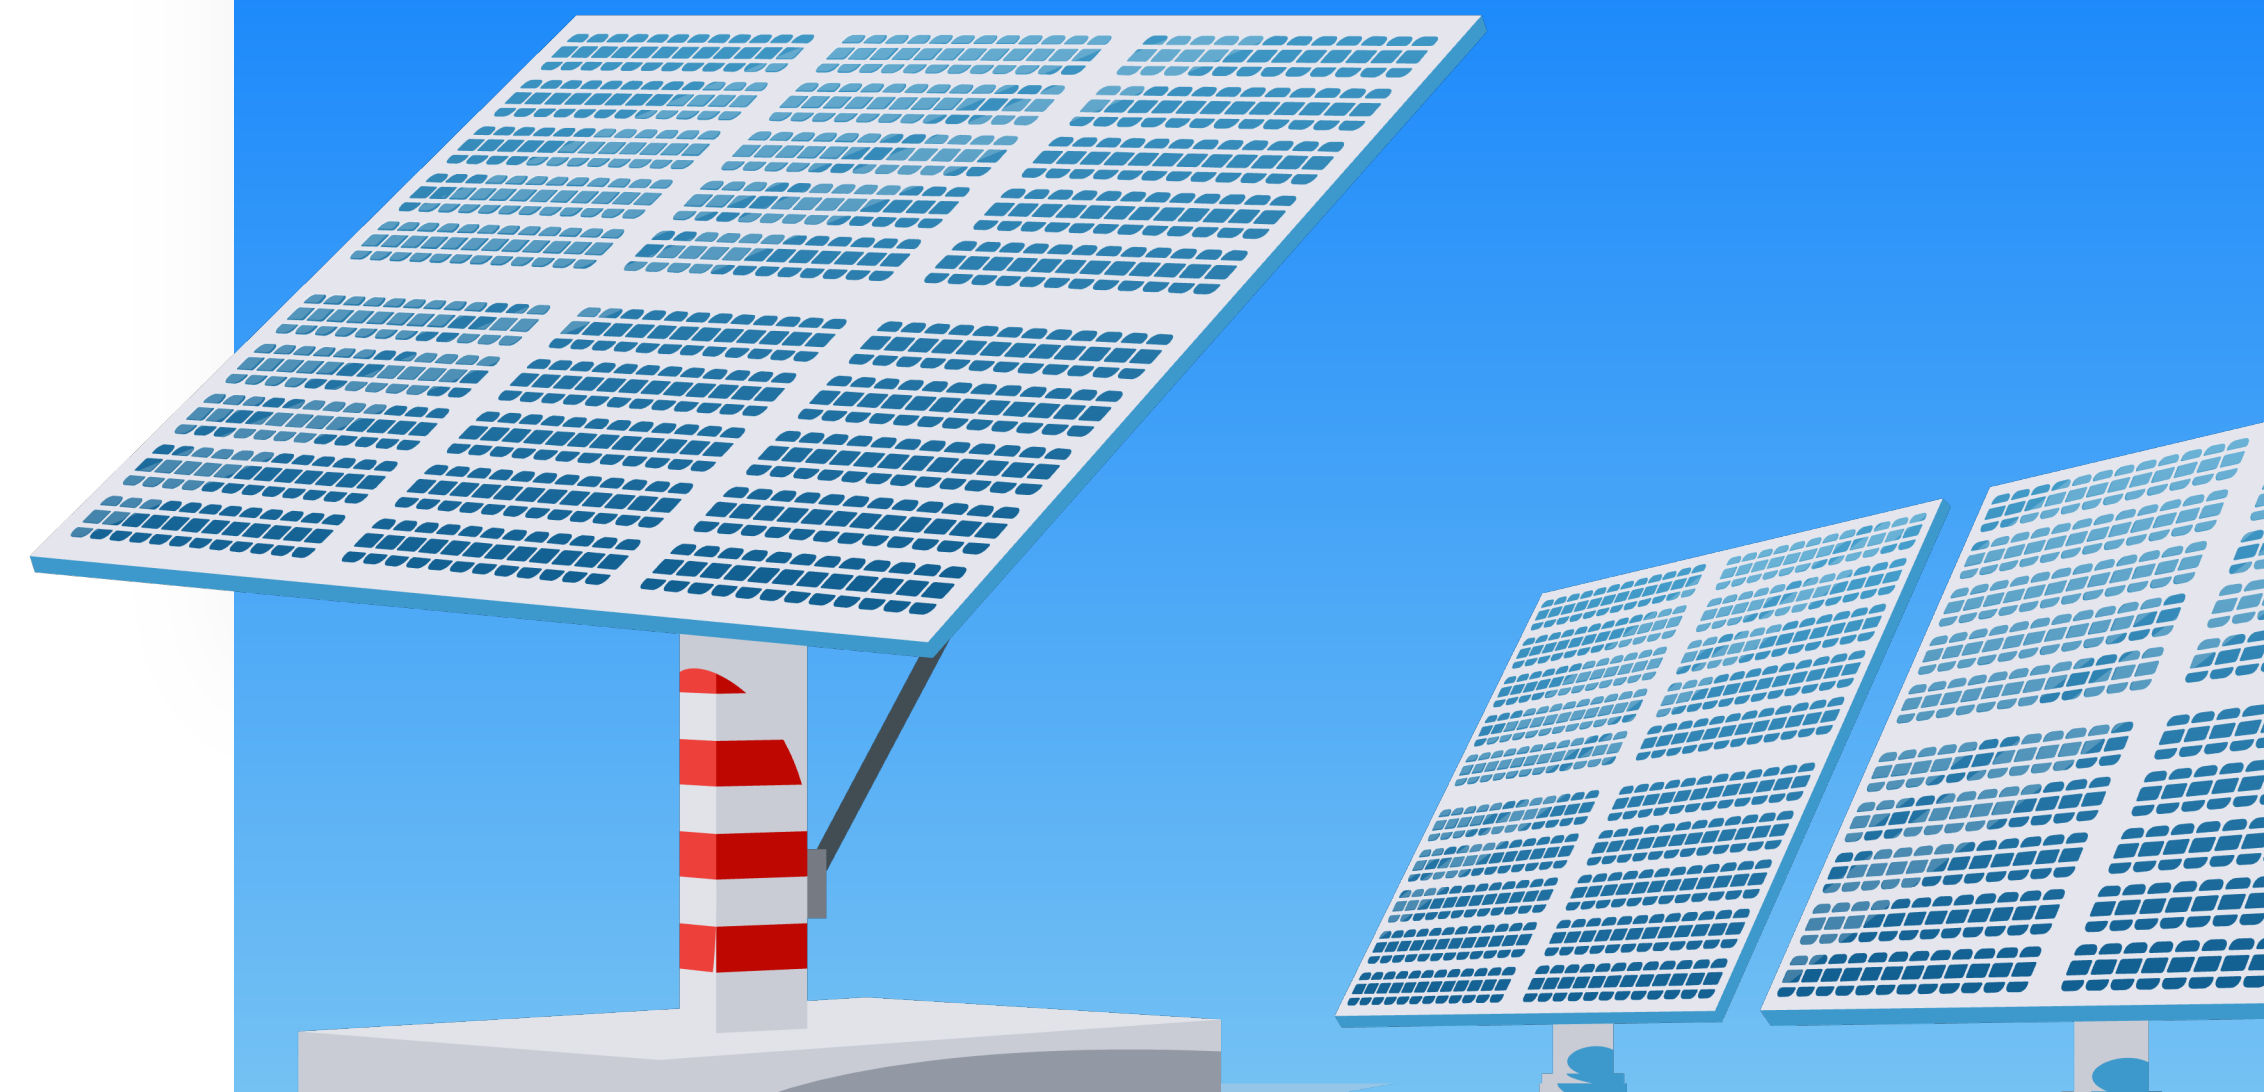

Global access to solar ownership projects

Tokenisation of solar panels

App-based personal solar utility

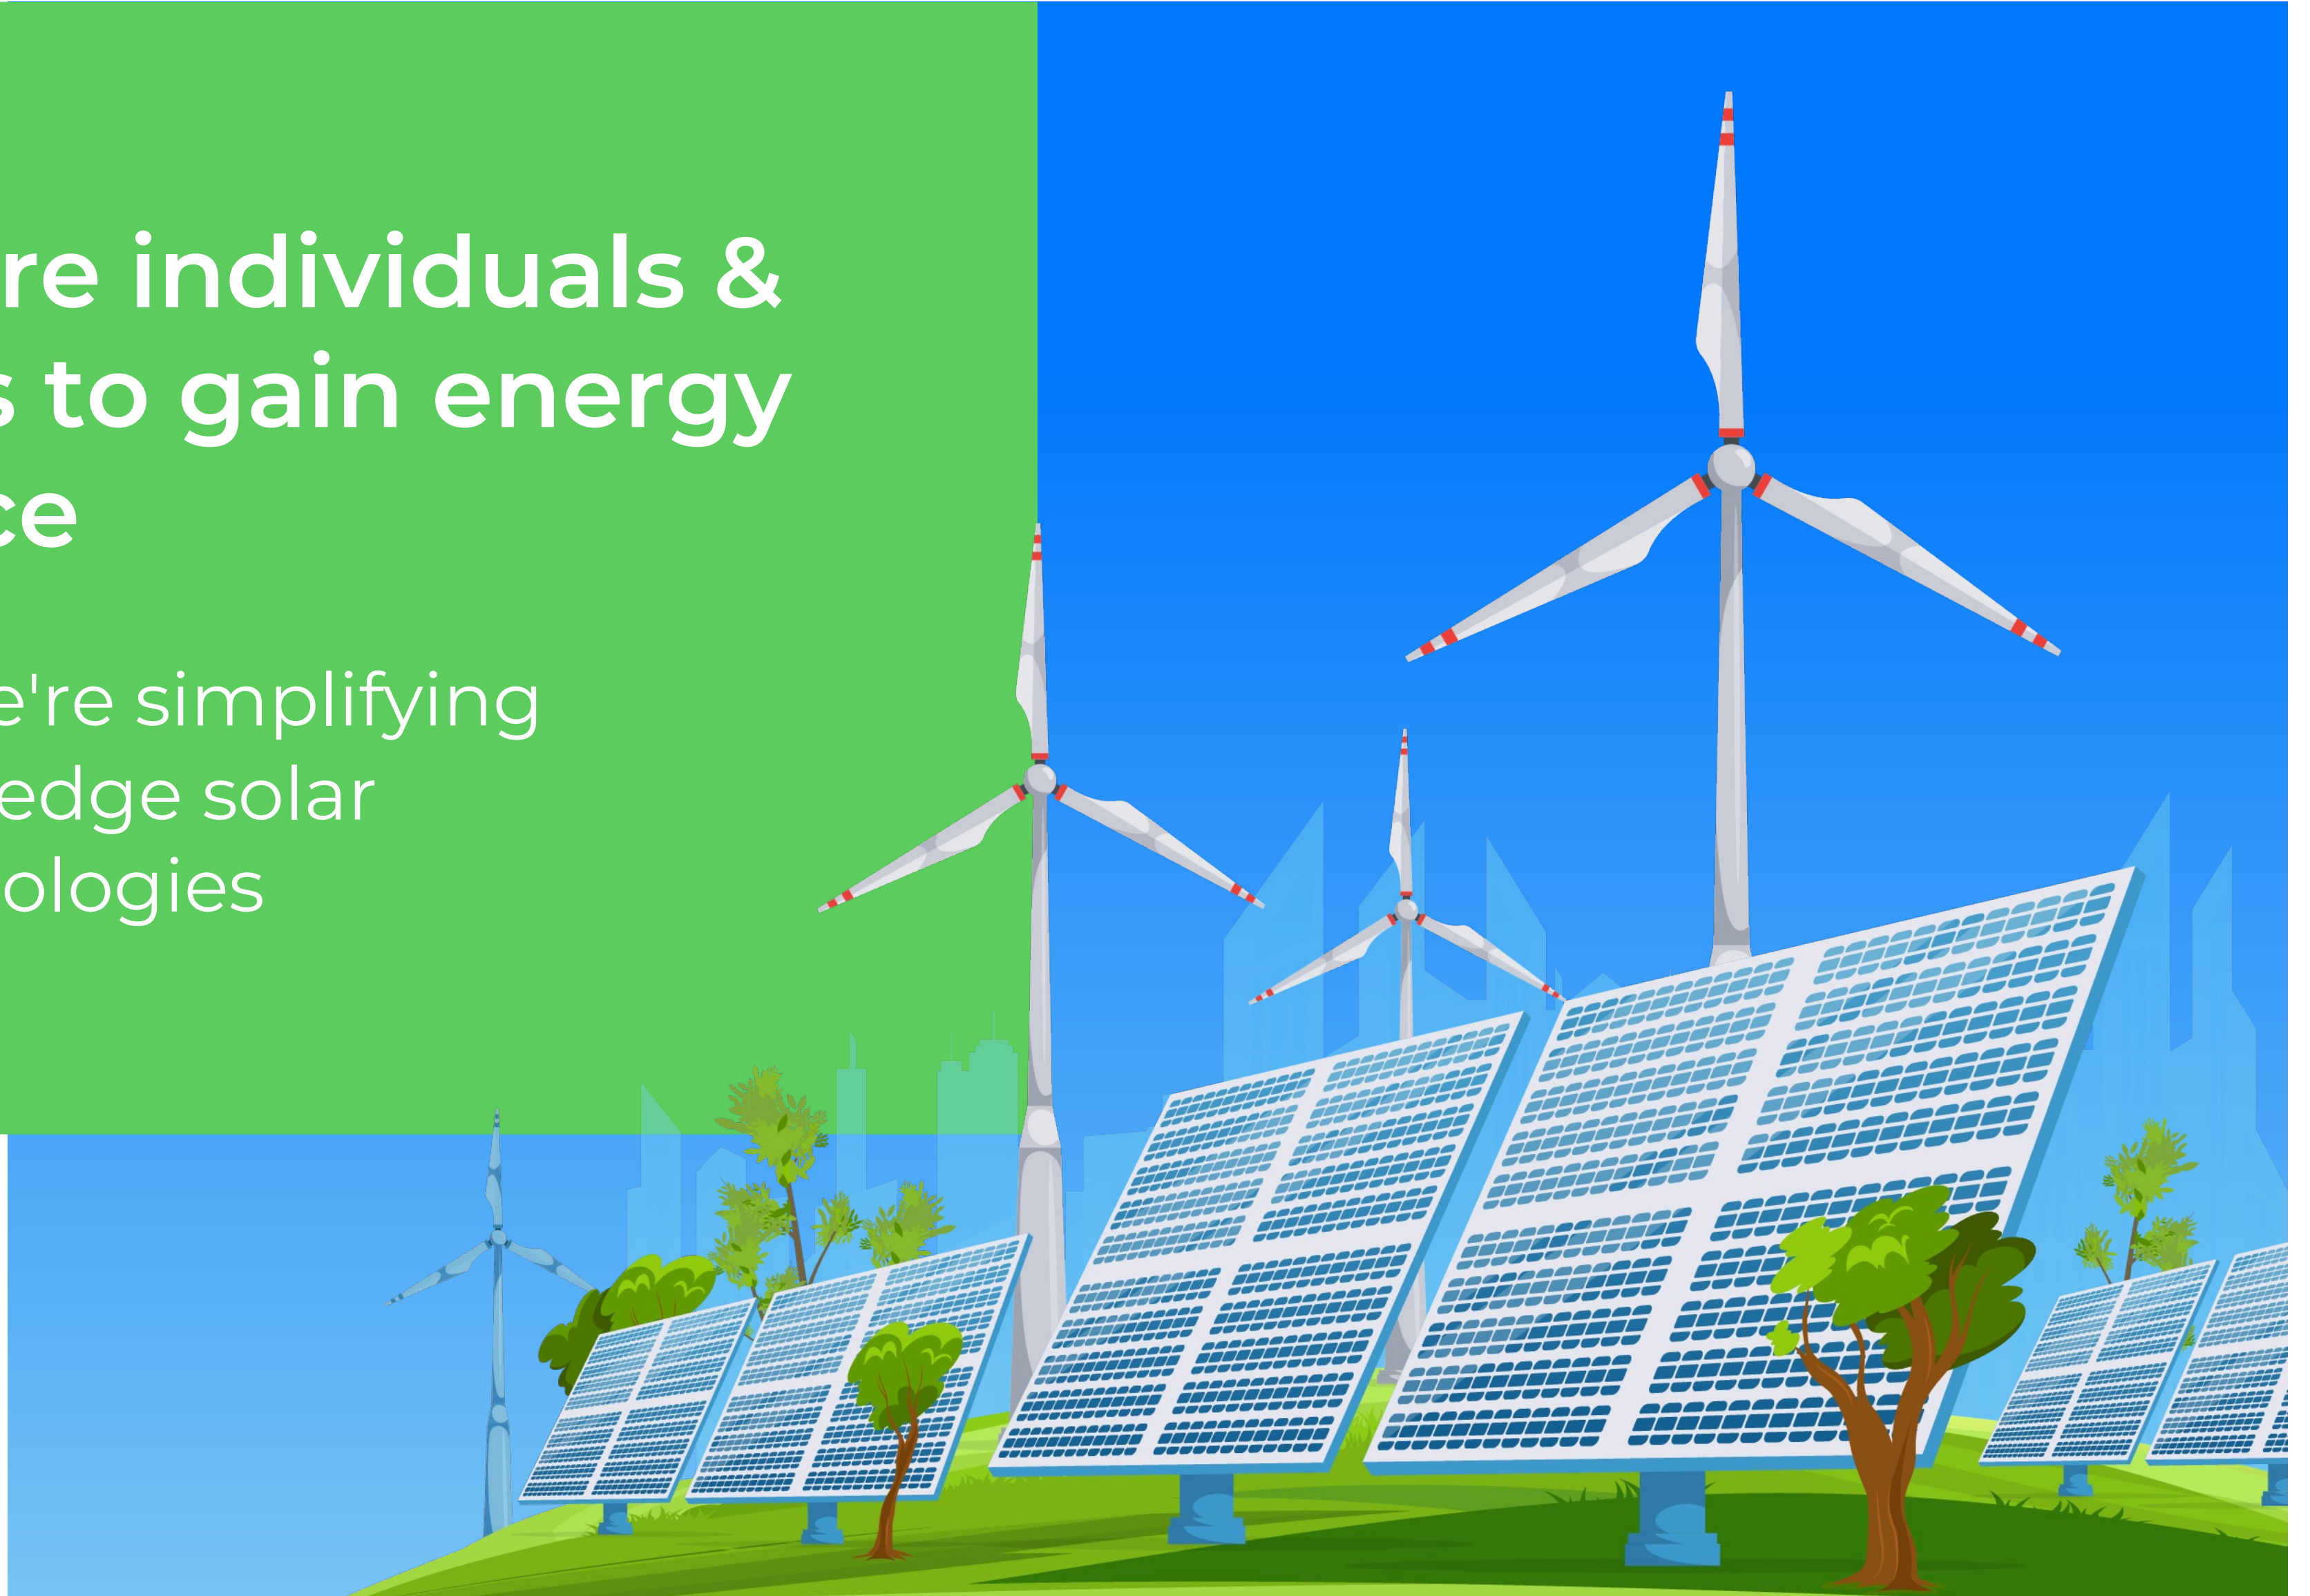

Solar parks cost half of rooftop solar per kwh

Now, anybody can take advantage from solar ownership

We want more individuals & communities to gain energy independence

To achieve this, we're simplifying access to cutting-edge solar and battery technologies

Joint Venture built on synergy of fintech and renewable energy

Norwegian Block
Exchange (NBX)

NBX

A leading financial technology company specializing in blockchain-based solutions.

NBX brings expertise in financial management, technology innovation, and market access.

Hagal

HagalTM
ULTIMATE SUSTAINABLE ENERGY

A prominent player in the renewable energy sector with a strong track record in solar panel and battery technology.

Hagal's experience and resources in sustainable energy solutions are invaluable to SunSpear's mission.

Suniqon

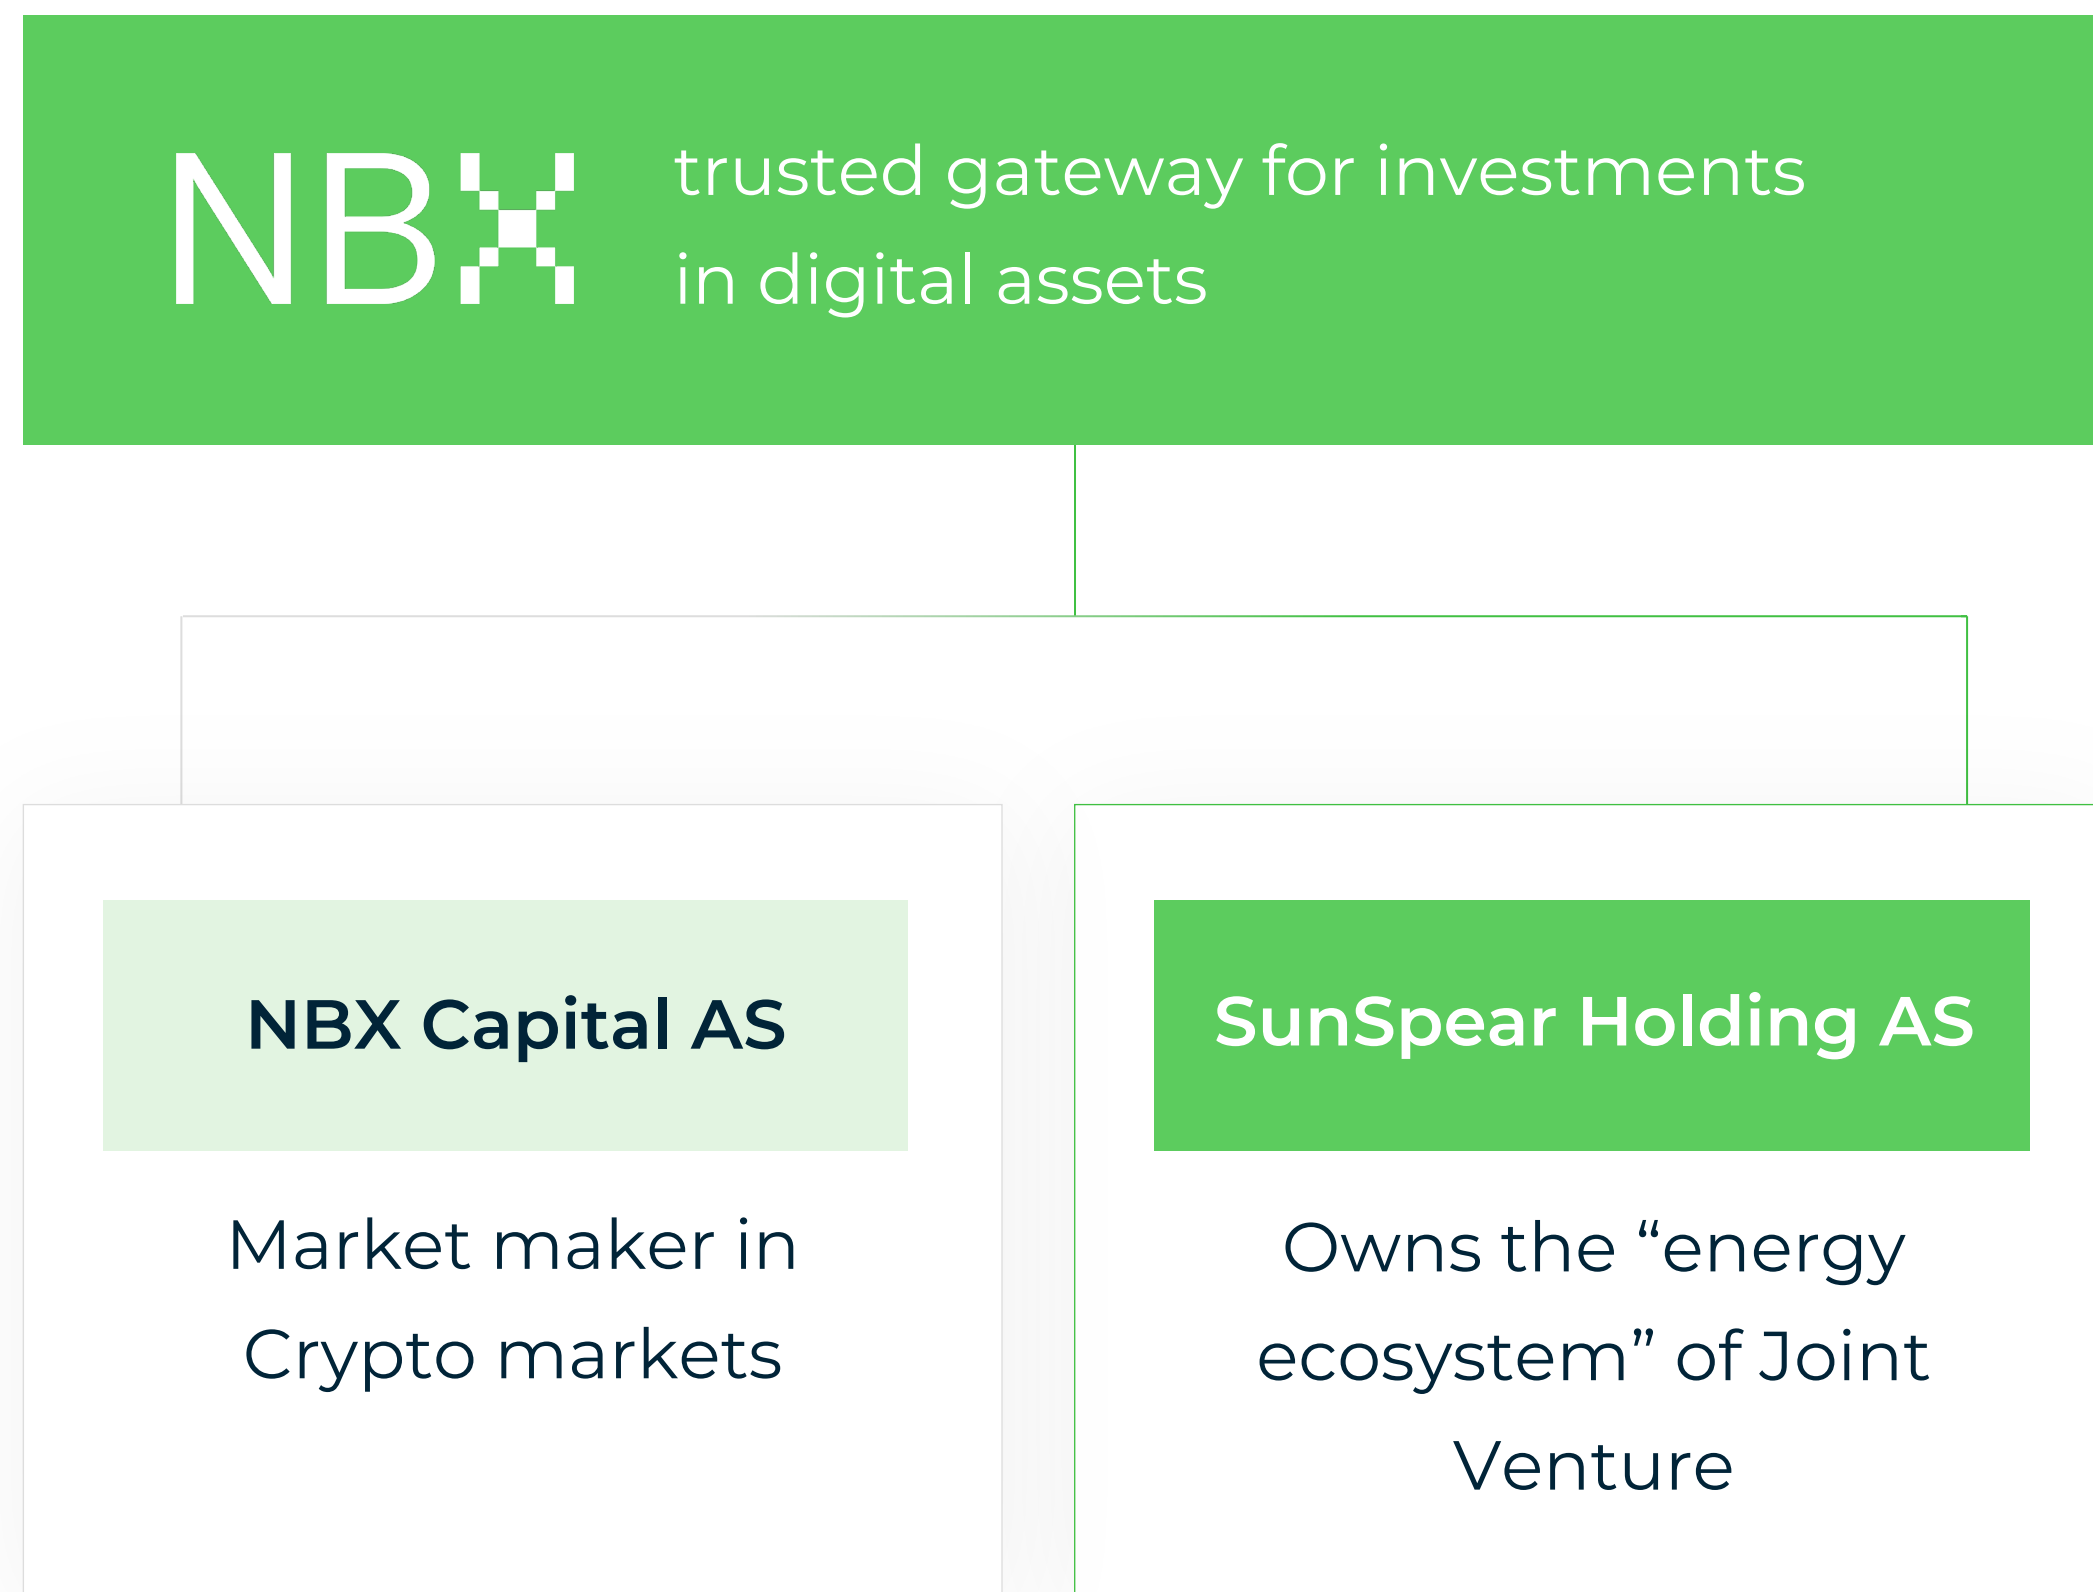

Suniqon
NATURLIG ENERGI

A market leader in installing safe and reliable solar cell systems in terms of efficiency and technology.

Suniqon has an established brand name as Norway's future-proof solar provider.

Seamlessly embedding into NBX ecosystem

What NBX brings to the table

- Create the token ecosystem
- Advice, implement and oversee the governance rules for the token economy.
- Regulated market places for the tokens
- Custody - Wallet structure in app and for the partners and affiliates of the bonus ecosystem.
- Facilitate and guarantee all payments in ecosystem
- Build SDK for quick onboarding of new ecosystem partners or affiliates

SOLUTION

Energy asset trading available for all, a few clicks away

01

Mobile trading platform for photovoltaics (PV) assets

02

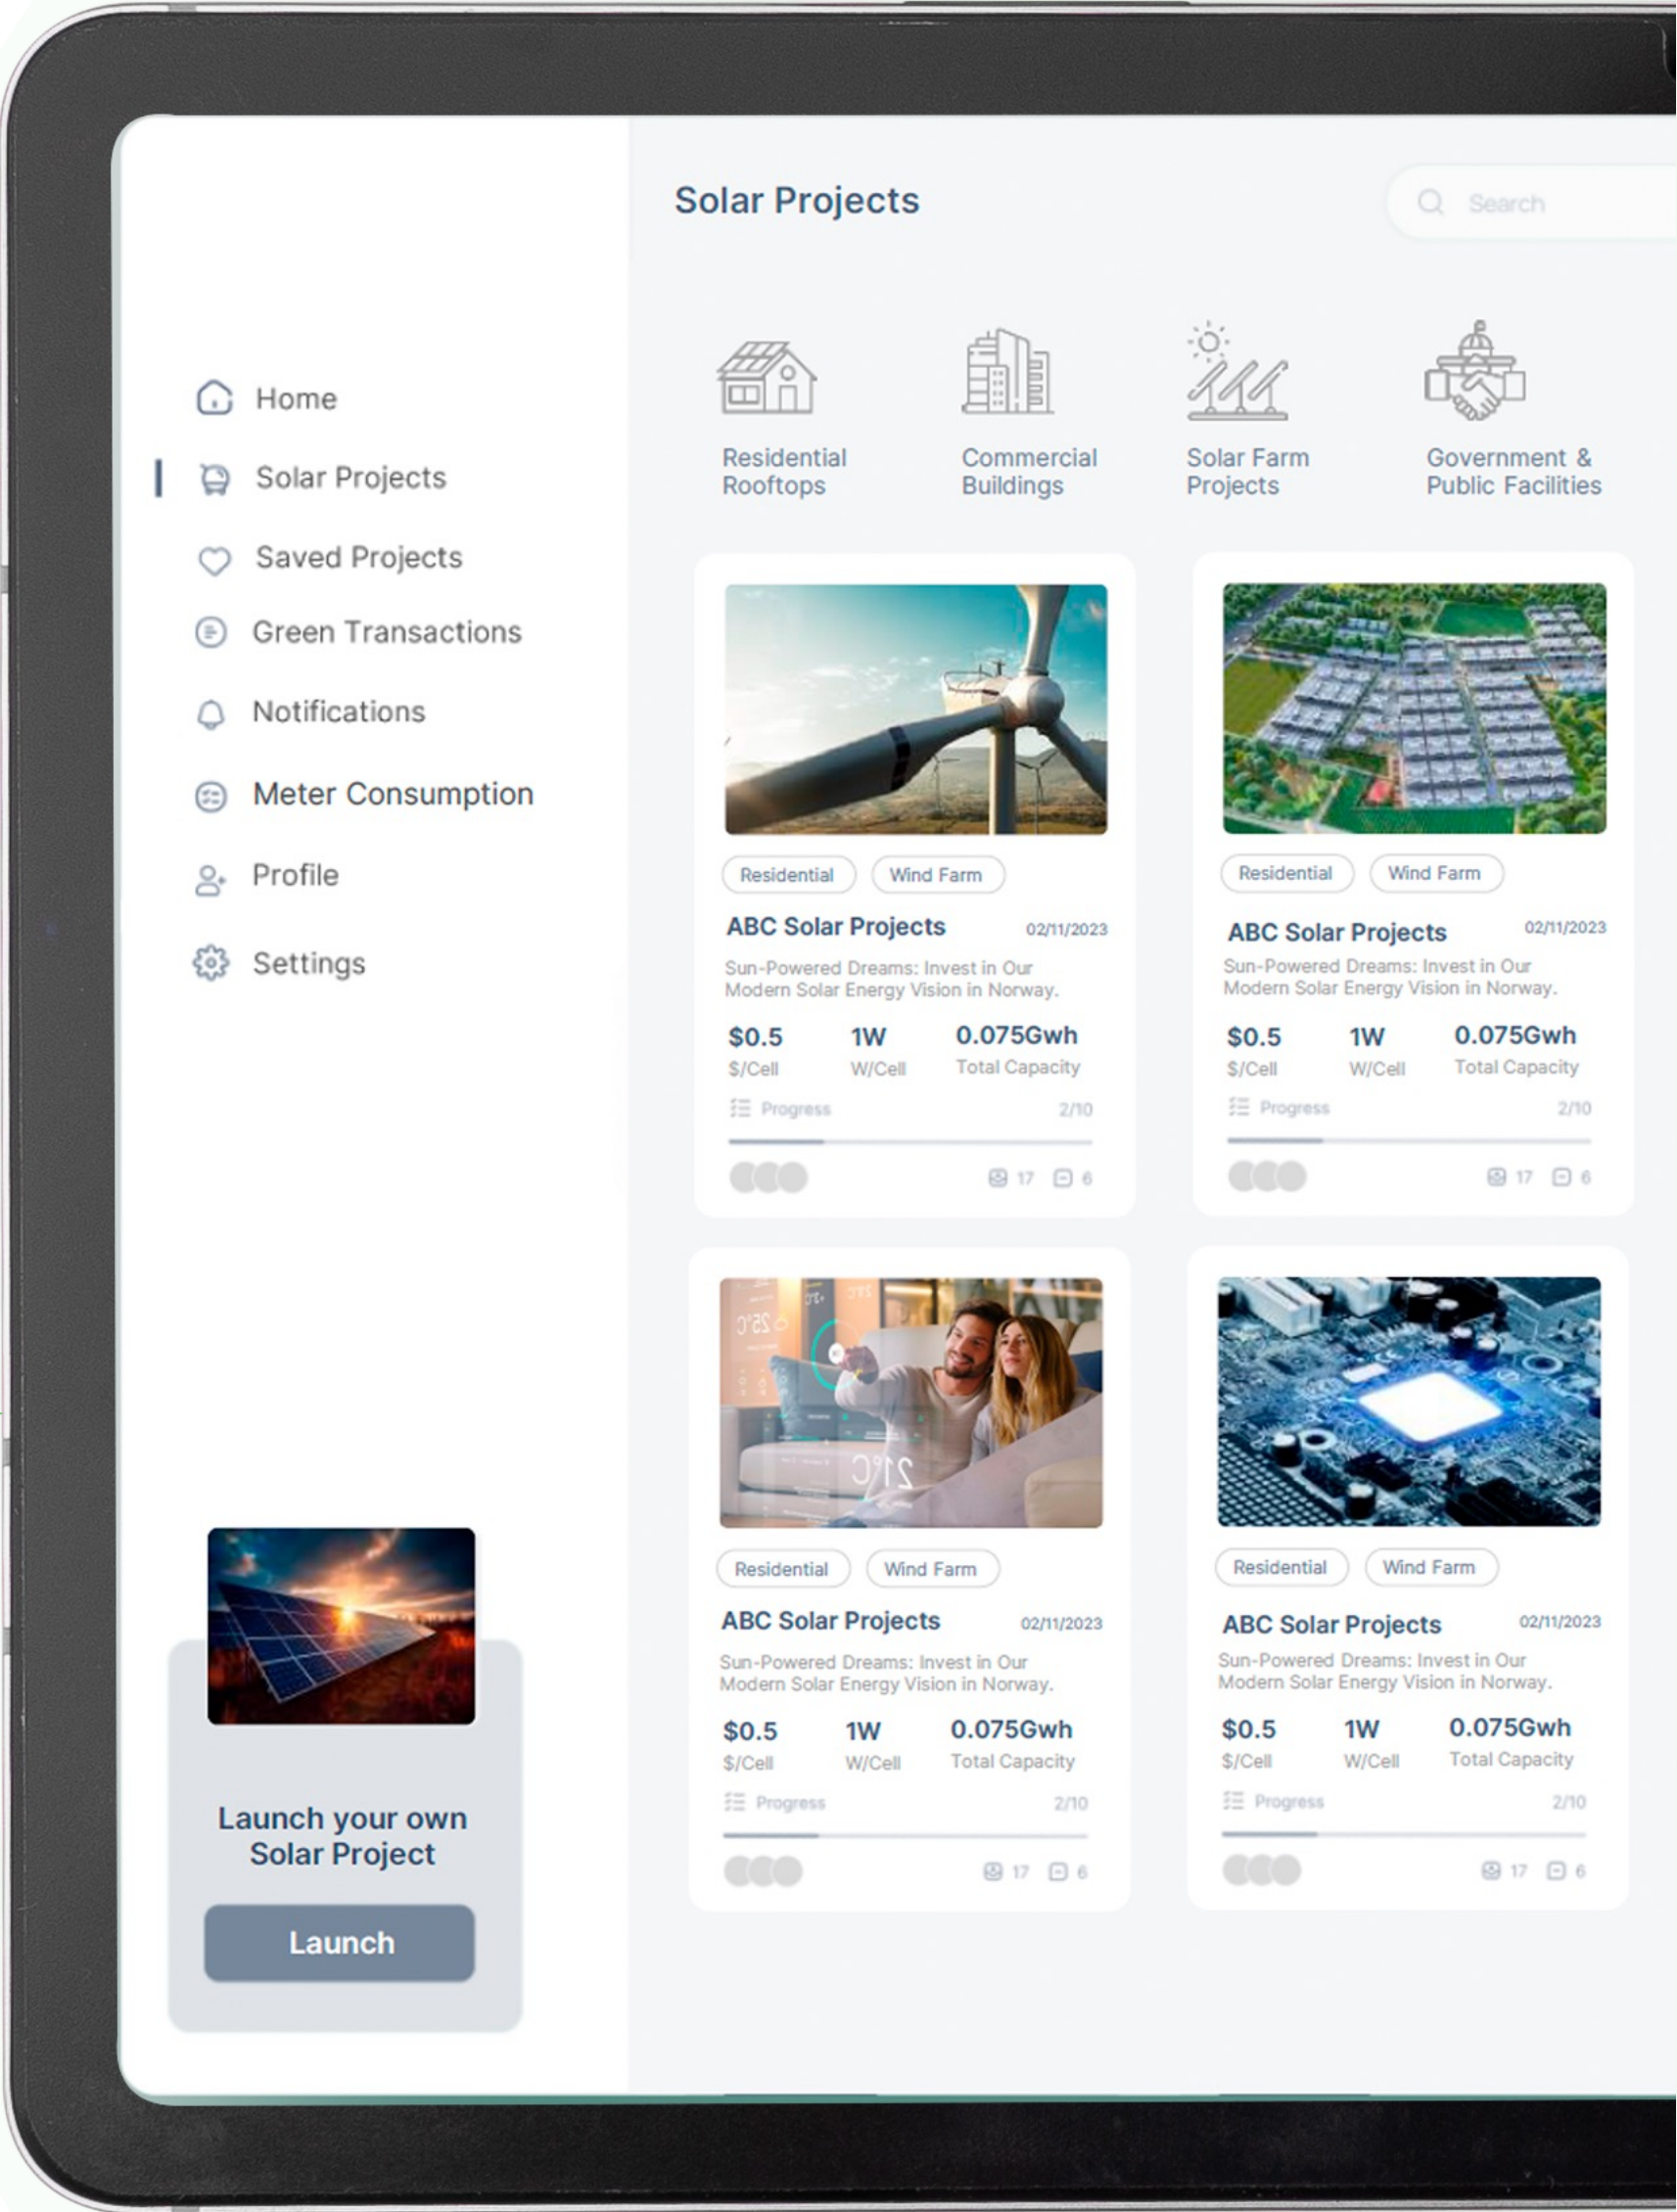

PV shares as an asset class (with a standard contract for frame agreement)

03

Marketplace of crowdfunding deals in PV space

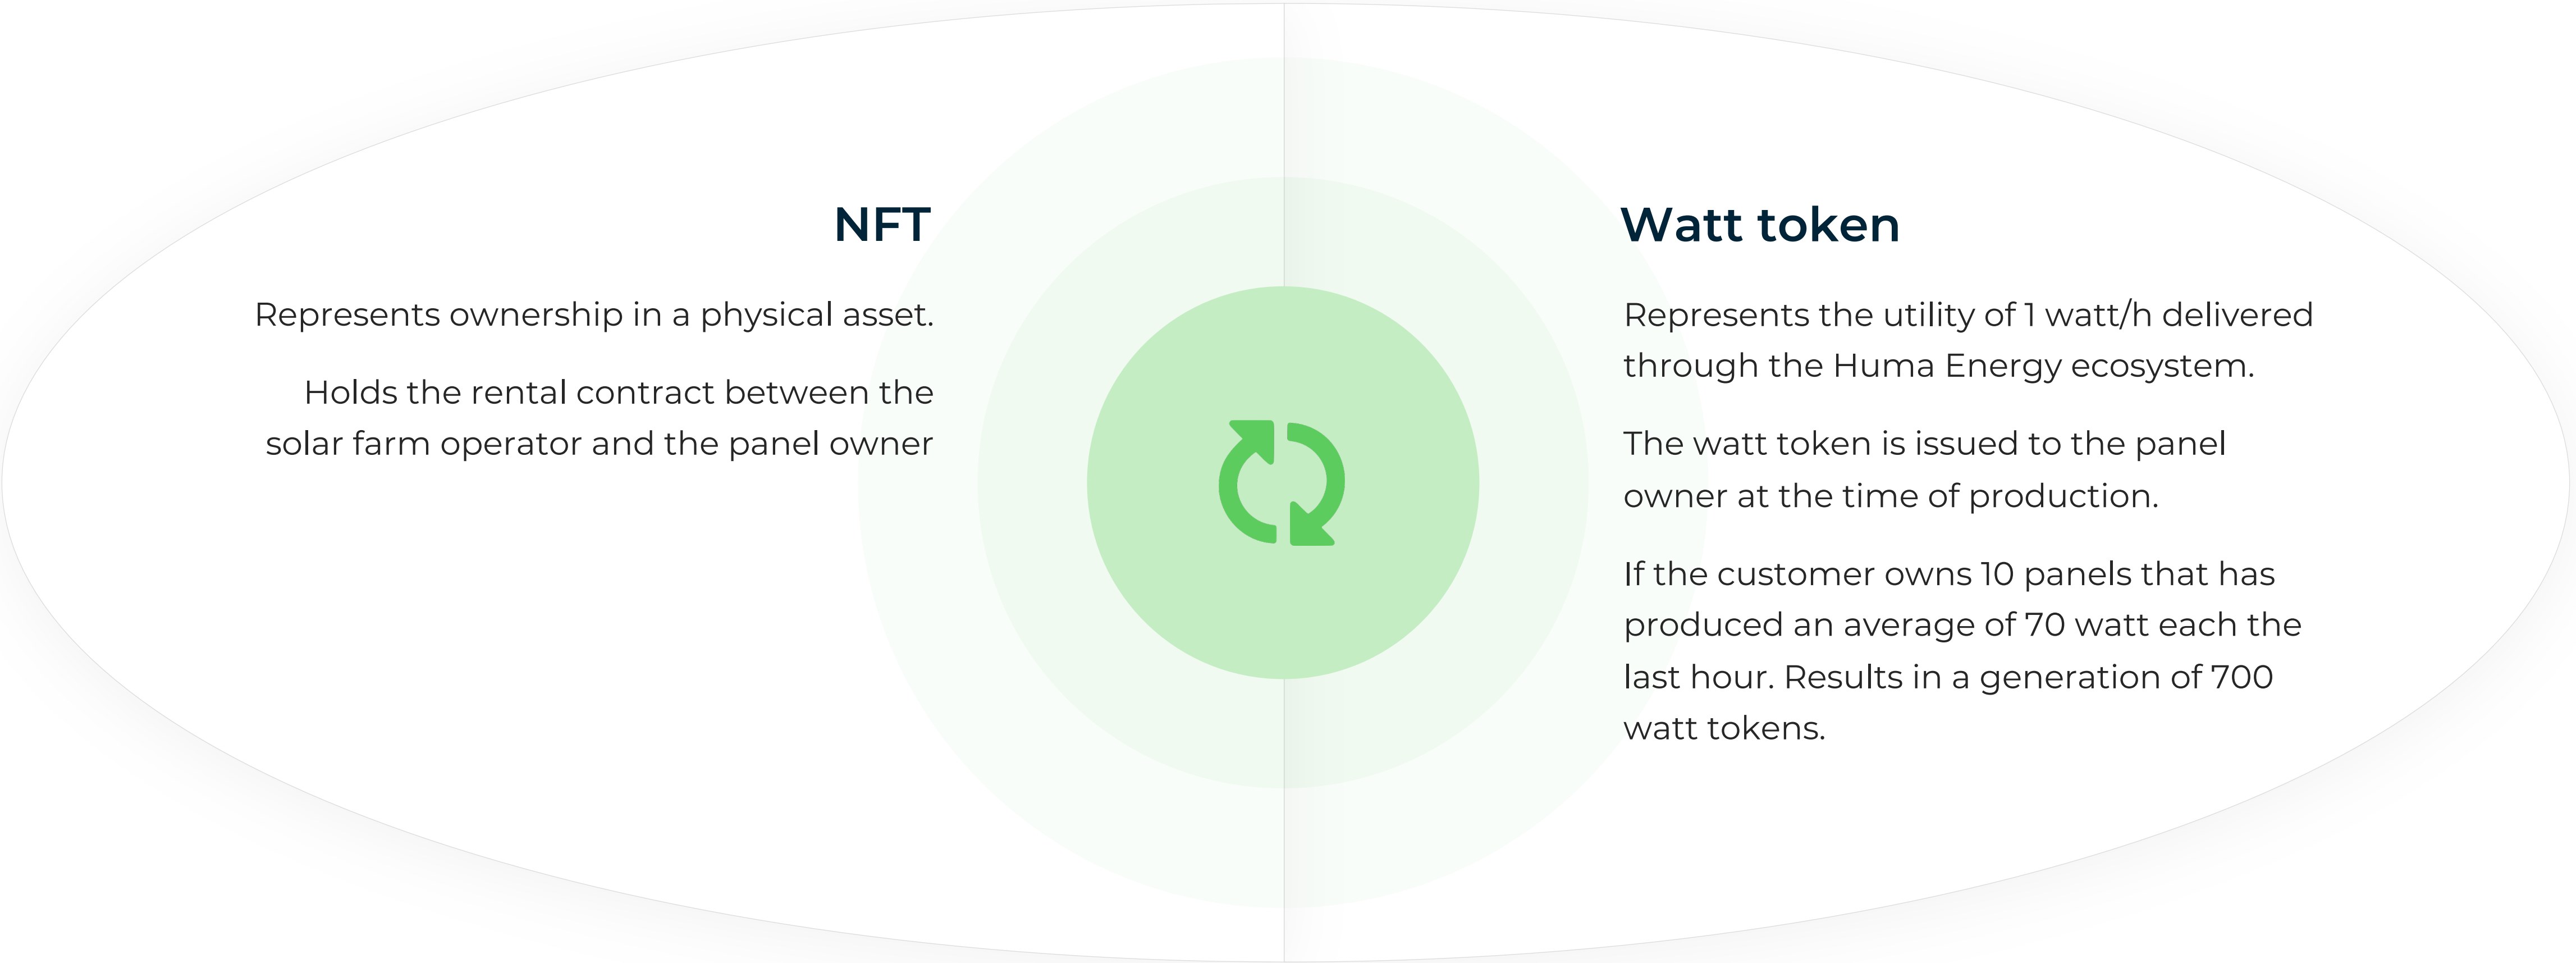

04

Ownership verification through blockchain technology

HOW IT WORKS?

We power the democratized future of solar ownership

Building the platform solution for long-awaited agility

What is SunSpear created for?

- Sourcing solar parks
- Sell panels to users + operate second hand market (arbitrage)
- Offer financing
- Produce and sell electric power (Electric utility company)
- Facilitate and guarantee all payments
- Long term goal Outsource Operating and management of solar farms

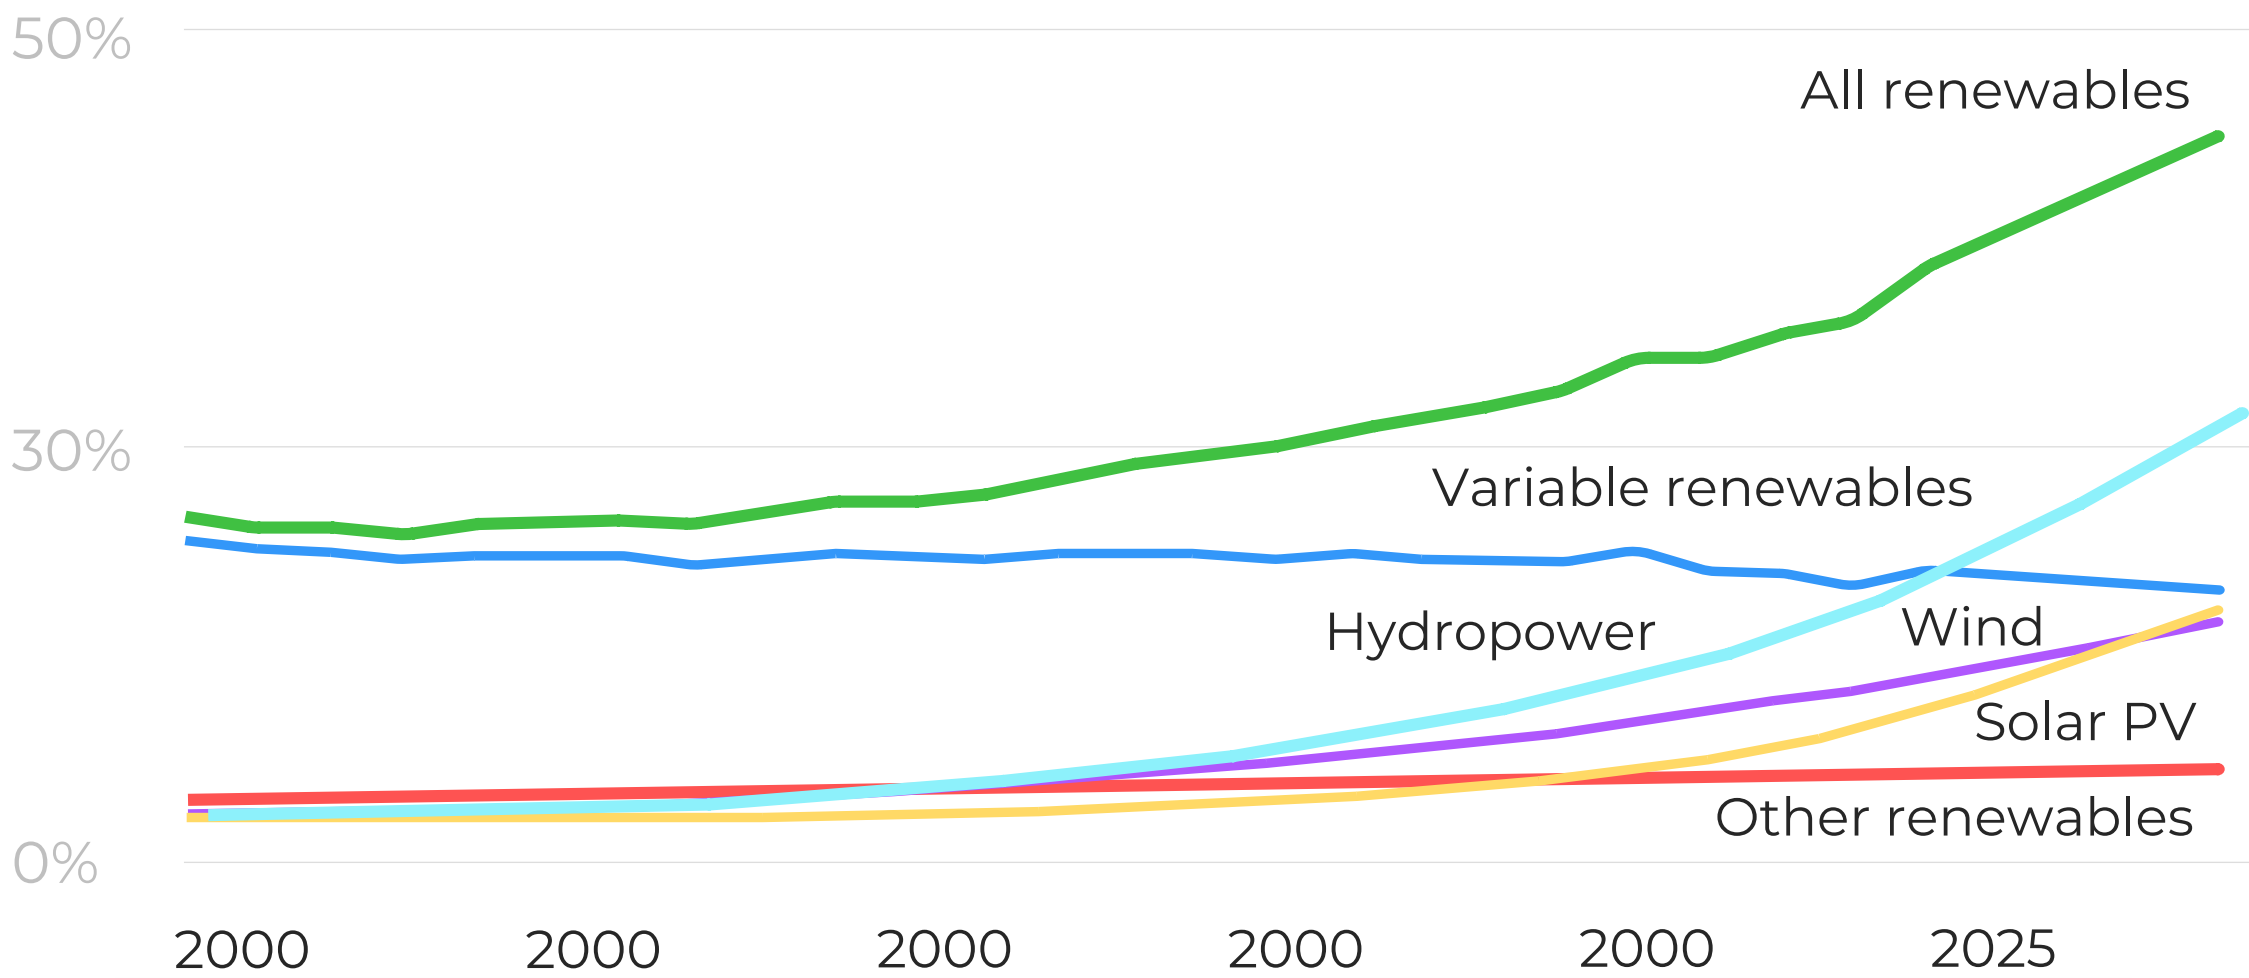

How we bring change to the industry?

- Buy and sell panels globally – full flexibility in increase/decrease
- Partial or full financing
- Off-set electric consumption with production
- Store electricity in watt token.
- Carbon credit and SDG benefits
- No physical involvement

We capitalize on the renewables market spike for the next decade

The world is on the cusp of a surge in demand for clean energy

42% share of renewable sources by 2028

2.3x growth of solar energy share

NEE	-0.14%
U.S. Bancorp	\$100.23

We are well-prepared to seize the momentum

Sustainability Focus

A strong commitment to environmental stewardship and social responsibility, driving the development and deployment of sustainable energy projects.

Technological Innovation

Leveraging cutting-edge advancements in solar panel and battery technology to deliver high-performance, reliable, and cost-effective solutions.

Global Reach

Access to a vast network of partners, distributors, and customers, enabling SunSpear to penetrate diverse markets across the globe.

How we
differentiate?

A compelling investment opportunity

We are looking for fellow visionaries sharing the idea of democratization of solar PV market

High Growth Potential	Capitalizing on the expanding market of sustainable energy solutions
Experienced Management Team	Backed by seasoned professionals with expertise in finance, technology, and renewable energy
Scalable Business Model	With a scalable business model and strong partnerships in place, SunSpear has the flexibility to adapt to evolving market dynamics and expand its global footprint.

We invite you to join us in our journey.
