The financial and operational performance reflects the strength of our underlying core asset PNGF Sud and its ability to generate strong free-cash flow in this stable commodity price environment. This economically robust cornerstone asset provides PetroNor with optionality to consider other opportunities in line with its stated growth strategy.

Following a transitional period of corporate activity, we look forward to the coming year and the various value catalysts that we see on the near-term horizon. We thank our shareholders for their continued support and patience, and look forward to delivering on our long-term growth objectives for the benefit of all our stakeholders."
