Asieris: Cevira (APL-1702) NDA Advances to Second Round of Technical Review

Press release – Oslo, Norway, August 4, 2025: Photocure ASA (OSE: PHO), the Bladder Cancer Company, announces that its partner Asieris Pharmaceuticals (SSE: 688176) communicated today that its photodynamic drug-device combination product candidate Cevira (APL-1702), has advanced to the second round of technical review.

The company will maintain proactive communication with the Center for Drug Evaluation (CDE) to expedite the New Drug Application (NDA) review process.

Cevira (APL-1702) is a photodynamic drug-device combination product in development for the non-surgical treatment of high-grade squamous intraepithelial lesions (HSIL), licensed to Asieris by Photocure.

About Cevira®

Cevira® (APL-1702) is a photodynamic drug-device combination product in development. Based on the principles of photodynamic therapy, the Cevira product aims to use a photosensitizer in combination with light activation to produce a therapeutic effect as a non-surgical treatment of high-grade squamous intraepithelial lesions (HSIL) in patients aged 18 years and above, excluding carcinoma in situ. Photocure developed Cevira through Phase I and Phase II trials, and the global rights for development and commercialization were out-licensed to Asieris Meditech Co., Ltd in 2019. In November 2020 Asieris initiated the phase III clinical trial for APL-1702 (Cevira) which achieved its primary endpoint in September 2023, Clinical trial number: [NCT04484415](https://clinicaltrials.gov/ct2/show/study/NCT04484415).
