About Webstep:

Webstep ASA and its subsidiaries form the Webstep Group, a high-end provider of IT consultancy services in Norway and Sweden. Since its incorporation in 2000, the Webstep Group has offered IT services designed to address its customers' software needs by creating functional custom-made digital tools and applications optimizing the customers' business strategies. Webstep aims to be at the forefront of the technological development and to assist its customers in their digitalisation through the offering of cutting-edge IT expertise.

The Webstep Group's core digitalisation offering consists of digitisation, cloud implementation, migration and integration, in addition to its other core focus areas Internet of Things (IoT), machine learning and analytics. An important part of the Webstep Group's strategy is to employ and offer only senior IT consultants with significant experience. The Webstep Group employs approximately 400 employees, of which more than 360 are IT consultants. For more information visit www.webstep.com (<http://www.webstep.com>).
