

Zwipe Pay ONE to power Reltime's Decentralized Finance Ecosystem with Biometric Cards

OSLO, NORWAY - 29 september 2021 – Zwipe is proud to announce that it has partnered with startup Reltime to provide a world-class security and user experience to the end-users of Reltime's Decentralized Finance (DEFI) Ecosystem based on the Zwipe Pay ONE platform. Reltime will issue Zwipe Pay ONE-based biometric payment cards to bring the next generation contactless security and user experience to its end users.

Reltime aims to revolutionize financial services for customers and users in Europe, Japan, India, Mexico, and Brazil from Q1 2022 and then target the global markets from Q3 2022.

Headquartered in Oslo, Reltime offers ready-to-deploy financial services to users who will save and secure transactions with full control and flexibility. These services include banking, cross border money transfer, lending, card payments and digital wallets for instant use. When the users check out, it converts instantly to the local currency.

Speaking on the partnership, **Cornelia Stensby van der Laak, Reltime's Chief Commercial Officer**, said, *"We are delighted to see such positive feedback from the market on Reltime's DEFI Ecosystem. We already have several partner engagements from all over the world. Reltime has noted a strong interest in biometric payment cards, which deliver world-class security and convenience. Zwipe is a well-respected biometric payment technology brand, and we aim to launch the first pilots in Q1 2022, followed by commercial launches shortly after."*

More information on Reltime Biometric ID and Payment Cards can be found [here](#).

Reltime will be the issuer of biometric payment cards, and first to launch this to a DEFI network globally. Zwipe and other partners will be working closely to ensure that the planned pilots are started from Q1 2022. Besides delivering its Zwipe Pay ONE platform, Zwipe will also support Reltime through all stages of pilots and the commercial launch of biometric payment cards.

"We are proud that a global innovator such as Reltime recognizes the value of biometric payment cards and has decided to use Zwipe as part of its next-generation financial services platform. Together we will help many telecom operators and issuers to bring significantly enhanced convenience and security in payments. We are excited about the planned pilots and launches next year," said **André Løvestam, CEO of Zwipe**.

##
