

Aalberts Industries divests two small activities

Langbroek, 7 January 2015

Aalberts Industries divests the activities of both Clesse Industries (with operations in France, United Kingdom, Brazil and Italy) and Broen LAB systems (located in Denmark). Both activities have a combined annual revenue of approximately EUR 45 million.

Aalberts Industries wants to focus more on defined business segments, markets and core technologies where a leading market position and a sustainable profitable growth can be achieved. Small divestments of non-core activities are part of this strategy.

The proceeds from these transactions will be used to strengthen existing market positions and operations. Both activities will be deconsolidated as from 1 January 2015.
