

Capital Markets Day ‘Focused Acceleration’

Langbroek, 6 December 2017

Aalberts Industries presents today its updated strategy ‘Focused Acceleration’ for the period 2018-2022 during a Capital Markets Day in Utrecht (NL) combined with a factory tour in its new facility in Hilversum (NL).

The strategy will be an update of our existing strategy based on four pillars. We will further develop and drive our defined niche technologies worldwide through organic growth initiatives and bolt-on acquisitions with a focused business approach.

The objectives during this period are to accelerate our average organic revenue growth and further increase our EBITA margin and Return on Capital Employed (ROCE).

During today’s presentation this will be explained in more detail. The presentation will start at 10.30am (CET) and will be webcasted via aalberts.com/cmdwebcast.
