

PRESS RELEASE

ARCADIS WINS MULTI-MILLION DOLLAR FEDERAL ENVIRONMENTAL RESTORATION CONTRACT

August 16, 2012 – ARCADIS (NYSE Euronext: ARCAD), a leading international consultancy, design, engineering and management services company, today announced it has been selected by the Air Force Center for Engineering and the Environment (AFCEE) to provide restoration services at Moody Air Force Base under its \$3B Worldwide Environmental Remediation framework contract. The Moody AFB Performance Based Remediation task order extends through September 2020 with a total value to ARCADIS of approximately \$18 million.

Under the Air Force's Performance Based Remediation Program, ARCADIS will deliver remedies and strategies that meet federal and state environmental restoration standards while reducing costs to the Air Force, accelerating the project timeline for a firm fixed price and aiding in restoration on the more than 11,000 acre property.

"Each of the sites identified for cleanup will require individual analysis and a technological approach designed to address the specific characteristics of the contamination," said Steve Blake, chief executive officer for ARCADIS U.S. "The base will benefit from our innovative approach to restoring these sites with minimal impact to base residents and their mission in support of the nation's national security."

This task order, under the AFCEE Worldwide Environmental Remediation Contract, provides for the environmental restoration of twelve sites on the World War II era Air Force Base including several landfills, industrial and vehicle maintenance shops, fueling stations, disposal and burn areas, and the associated soils, groundwater plumes, and drainage areas.
