Ctac and TBlox form strategic alliance

's-Hertogenbosch/Rotterdam – CValue subsidiary CValue and TBlox B.V. will as of today provide an integrated solution for clients and suppliers who wish to make a (further) move towards eProcurement. The excellent way in which the products and services of the two companies complement each other is the basis for the strategic alliance.

The strategic alliance is focussed on the eProcurement module TBlox-Inkoop (purchasing) with a direct link to SAP. TBlox has a central purchasing system, fully based on internet technology, to which a large number of suppliers are already connected. An environment specially allocated to clients allows them to order from suppliers electronically according to rules determined by the clients themselves. This makes it possible to make the full functionality of electronic purchasing available simply, quickly and inexpensively.

CValue is a specialist in the implementation of SAP SRM and will be responsible for the linking of the TBlox solution to SAP SRM, or directly to SAP. In addition, CValue will be responsible for the specific design of TBlox for the SAP clients.

"CValue focuses on the improvement of the business processes of its clients. Up until now, electronic purchasing was largely the domain of our larger clients, mainly because of the costs of implementation. The introduction of TBlox will also make it possible for clients in the small and medium-sized enterprise (SME⁽⁺⁾) segment to purchase electronically. We can speed up, improve and, most importantly, reduce the costs of the purchasing process. But this solution is also very interesting for our larger clients, who should also certainly consider it," says Geert Heijmans, director of CValue. Vilayat William, commercial director of TBlox adds: "In the cooperation between TBlox and CValue, CValue offers its clients and suppliers a standardised solution to integrate the receipt of electronic orders from TBlox-Inkoop (purchasing) and TBlox-Verkoop (sales) with the accounting or ERP systems. This ensures that both parties receive the maximum benefit from the electronic processing process.

Profile TBlox

[TBlox](#) produces new generation online corporate software. Every single day, new clients discover the ease of the company's simple-to-use software. The generic software is used across the world in various sectors. TBlox software is supplied both under the TBlox name and under the name of [private label partners](#). TBlox is based on open source technology and works with open standards. TBlox is also the initiator of FreeSupplierPortal.com. This has removed the main stumbling blocks for simple and inexpensive electronic purchasing. With the pre-paid payment system and transparent pricing policy, TBlox completes the revolution in the software world.

Profile Ctac

[Ctac](#) is an ICT services provider specialising in SAP solutions. Activities include implementation, integration and management of SAP systems and related activities such as system upgrades and system optimisations. The company is a SAP Gold Partner and the largest SAP reseller for medium-sized enterprises in the Netherlands. Ctac's clients include approximately 200 organisations in trade and industry, business services, retail, (semi) government organisations and universities.

Ctac employed 278 people as per 31 December 2006. The company is based in 's-Hertogenbosch (the Netherlands).

Ctac is listed on the Eurolist of Euronext Amsterdam and is included in Euronext's Next Economy segment
