### **Ctac and Prologys join forces for warehouse optimization**

**Ctac NV and logistics specialist Prologys have founded a joint venture that focuses exclusively on process optimization in large scale warehouses. Ctac brings its extensive SAP expertise and a large customer base to the joint venture**

Prologys has focused on warehouse logistics for many years and has extensive experience in the optimum deployment of SAP WM (Warehouse Management). The company managed very successful projects at among others KLM, Kenya Airways, Klaas Puul and Wavin Italy.

The new joint venture, of which the name is yet to be confirmed, now offers consultancy in warehouse optimization. Analysis plays an important role in this respect. By meticulously studying customer data, it is possible to save up to 65 percent on space and thirty percent in time without drastic changes in processes. An additional fifty percent in savings is possible on operational costs by redesigning the picking process.

Henny Hilgerdenaar, CEO at Ctac: "Ctac always addresses its clients from a business perspective. We want to see how we can make processes more flexible and effective. I am convinced that we offer our clients more efficiency through this new joint venture."

Ctac and Prologys start with the development of a generic application, which enables SAP WM users to optimize their warehouse processes. This new software application will be available as Software-as-a-Service (SaaS) in the future.

#### **About Prologys**

Prologys was founded in 2001 by Jaap van Neerven. Prologys offers logistics consultancy services, based upon many years of expertise. The service offering focuses on optimizing SAP WM systems and adjusting warehouses to the client's operational needs. Prologys offers these services for existing and new warehouses. In addition, integration of these knowledge areas within a SAP environment plays an important role.

#### **About Ctac**

Ctac is an ICT services provider specialising in ERP solutions. Activities include implementation, integration and management of among other things SAP and Microsoft systems and related activities such as system upgrades and system optimisations.
