## **Technology company IAI will supply systems to the India Security Press in Nashik, India**

Technology company IAI in Veldhoven, the Netherlands, a subsidiary of the stock listed company DOC DATA N.V. in Waalwijk, the Netherlands, will supply two SheetMaster Flex systems to the India Security Press in Nashik, Maharashtra, India.

The India Security Press is an industrial establishment of the Government of India under the Ministry of Finance, Currency and Coinage Division of the Department of Economic Affairs. It produces postal stationary, stamps, saving certificates and travel documents such as passports and visa stickers. The SheetMaster Flex systems will be used to enhance the security of certain products of the India Security Press by applying laser perforated security features to those products.

As Technology company IAI announced on 14 April 2008, the Government Printing Works of South Africa also ordered these systems.

SheetMaster Flex and WebMaster Flex systems are recent developments of IAI processing documents printed in sheet or in web. Both systems are designed to address the market segment of security documents other than banknotes, passports and ID-cards for which IAI offers dedicated systems. The introduction of these new systems allows IAI to profit from its excellent reputation in the Security Printing market in this market segment which is hardly served by any company so far.

Technology company IAI also offers laser processing systems for producers of solar cells or modules.

---

*DOC DATA N.V. is listed at the NYSE Euronext and exists of two different organisations:*

**Technology Company IAI** ([www.iai.nl](http://www.iai.nl)) is a high tech engineering company specialised in developing and building machines for very accurate and high speed processing of all kinds of products and materials. IAI delivers clients globally in the following sectors:
