## Technology company IAI industrial systems will supply extra systems for passport personalisation to existing customers

Technology company IAI industrial systems B.V. in Veldhoven, the Netherlands, a subsidiary of the stock listed company DOCDATA N.V. in Waalwijk, the Netherlands, will supply two additional BookMaster One systems to personalise passports. The systems will be supplied to existing customers who already have identical systems in operation and are expected to be delivered in 2010. With the extra systems both countries intend to enlarge their existing production capacity.

BookMaster One systems perform the entire personalisation of the passport in one pass through the machine including quality control of all processing done. Thus, the systems turn blank books, inserted in the machine, into fully personalised passports ready for issuing.

Being a leading equipment supplier to the Security Printing market, IAI industrial systems also supplies systems for securing and/or personalisation of ID-cards, driver licences, banknotes, diplomas and other security documents.

IAI's systems are in use in many countries such as: Netherlands, Belgium, Switzerland, Ireland, UK, Sweden, China, Russia, Ukraine, Canada, Portugal, Estonia, Costa Rica, Poland, Morocco, South Africa and India. Other systems are planned to be installed in several other countries.

Technology company IAI industrial systems also offers laser processing systems for producers of solar cells or modules.

---

*The listed DOCDATA N.V. exists of two lines of business:*
