Leidschendam, the Netherlands, 7 May 2008

## New order for Fugro in USA

**Fugro has successfully negotiated a contract with the National Oceanic and Atmospheric Administration (NOAA-NOS), a bureau of the U.S. Department of Commerce, to provide hydrographic surveying and related support services. The Indefinite Delivery Indefinite Quantity contract is for five years, and not-to-exceed USD 250 million.**

An initial task order, valued at USD 3.5 million, is for side scan sonar and multibeam echo sonar mapping operations in support of post hurricane debris mapping for previously affected areas of the Louisiana coastline. Future operations can include multibeam echo sounder, side scan sonar and hydrographic LIDAR anywhere in US waters, including Alaska, Hawaii, the Territories and Great Lakes areas.

The contract is designed to help alleviate the backlog of charting requirements for updating navigation charts in US waters.

*Fugro collects, processes and interprets data related to the earth's surface and soil composition and provides advice based on the results. As an extension to these activities, Fugro provides services such as precise positioning, construction materials testing, reservoir engineering and data management. Fugro's operations have been organized into three divisions: Geotechnical, Survey and Geoscience. Fugro is listed on Euronext Amsterdam and is included in the Amsterdam Midkap Index (AMX). Fugro has about 12,000 employees in more than fifty countries.*
