Leidschendam, The Netherlands, 1 August 2025

Fugro selected to deliver extensive offshore and onshore surveys for multiple major energy field developments in the Middle East

Fugro has recently been awarded multiple contracts to perform comprehensive offshore and onshore surveys in the United Arab Emirates, supporting two of the region's largest long-term field development programmes. These projects mark a major milestone in Fugro's continued contribution to the sustainable advancement of the Middle East's energy sector.

Starting in August 2025, Fugro will deploy its advanced geophysical, geotechnical, uncrewed surface vessel (USV), and environmental expertise, as well as the innovative GroundIQ® technology. These will be complemented by cutting-edge engineering and geo-consulting services to support our strategic client's Front End Engineering Design (FEED) process.

The scopes of work include surveys for pipelines, cables, artificial islands, and offshore structures. Fugro's integrated approach will deliver near real-time insights into ground conditions via its remote data management solutions, enabling the client to make timely, well-informed design decisions and realise significant capital expenditure savings across the development programme.

Annabelle Vos, Group Director Middle East & India at Fugro, said: "We are proud to support these landmark field developments with our full suite of site characterisation and consulting services. Our local expertise, combined with Fugro's global technology leadership, will help deliver safe, efficient, and sustainable outcomes for our client. These awards further strengthen our position as a trusted partner in the region's energy sector."

These projects were partially included in the 12-month backlogs as per April and June 2025 (Fugro's latest published results).

About Fugro

Fugro is the world's leading Geo-data specialist. With our unique map, model and monitor solutions, we provide project critical insights into the built and natural environment. Fugro supports clients by delivering solutions in support of the energy transition, large-scale infrastructure development and climate resilience. With expertise in site characterisation and asset integrity, clients are supported in the safe, sustainable and efficient design, construction and operation of their assets throughout the life cycle. In line with our purpose, we are extending our know-how and solutions to the understanding and preservation of ecosystems.

Employing approximately 11,000 people in 52 countries, Fugro serves clients around the globe, mostly in the energy, infrastructure and water industries, both offshore and onshore. In 2024, revenue amounted to EUR 2.3 billion. Fugro is listed on Euronext Amsterdam.
