

Qurius implements Q-Care solution at Zorggroep Noord- en Midden-Limburg

12 December 2008 – After a careful selection procedure of almost 3 years, Zorggroep Noord- en Midden-Limburg, one of the 5 largest health care institutions in the Netherlands, has chosen Qurius to implement Q-Care. The Microsoft Dynamics NAV based ERP solution, specifically designed for health care institutions, offers the organization a fully integrated platform to streamline all directive and supportive administrative processes. Eventually a total of 7,000 employees will use the system.

High demands

Health care institutions are subject to a lot of complex rules and legislation that are relevant for the administrative system. Recently the achievement orientated financial expenses system has been launched which demands new ways of registration and invoicing. "Qurius was the only party that could offer us a system with the right financial insights and comprehensive management reports. In addition, Qurius has excellent knowledge of Microsoft Dynamics NAV, offers us continuity and flexibility," says Jan Winter, concern controller at the Zorggroep.

Frank van der Woude, Director Qurius the Netherlands: "We invest highly in our Q-Care solution to make sure it is the best solution for organisations such as homecare, elderly and nursing homes and other specialised care institutions, with all their specific demands and criteria. The fact that one of the 5 largest care institutions in the Netherlands has selected Qurius confirms the strength of our distinguishing solution and organisation."

End of press release
