Triple Finance Group tekent intentieverklaring voor financiering Europese NVIDIA GPU AI-infrastructuur

Heemstede, 4 juni 2026, 18:00 – Lavide Holding, dat binnenkort onder de naam Triple Finance Group verder gaat, heeft een intentieverklaring getekend met een Europese Neocloud voor de financiering van NVIDIA GPU-infrastructuur voor AI-rekenkracht in Europa.

De beoogde partner is een snelgroeiende NVIDIA Elite Partner die via een AI-cloudplatform GPU-capaciteit aanbiedt aan bedrijven en ontwikkelaars. Het bedrijf ontwikkelt zich tot een toonaangevende Europese leverancier van AI-rekenkracht en biedt via zijn AI-cloudplatform GPU-as-a-service aan ondernemingen en ontwikkelaars. De naam zal in een later stadium bekend worden gemaakt.

Triple Finance Group ziet Europese AI-infrastructuur als een van de grootste investeringskansen van dit moment. De markt ontwikkelt zich snel richting de institutionalisering van een nieuwe beleggingscategorie. De Verenigde Staten lopen in deze ontwikkeling voorop, met grootschalige financiering door institutionele beleggers van GPU-infrastructuur.

Volgens CEO Thijs Groeneveld is er sprake van een onderontwikkelde markt: “De Europese markt voor institutionele financiering van AI-infrastructuur is nog in een vroege fase, terwijl de vraag snel blijft toenemen.” Hij voegt daaraan toe: “In Europa staat AI-infrastructuur op het punt door te breken als hele nieuwe asset class. Met deze samenwerking positioneren wij ons als een van de leidende investeerders in een snelgroeiende markt die nog beperkte toegang heeft tot grootschalige institutionele financiering.”

De eerste transactie betreft circa USD 45 miljoen in NVIDIA GPU infrastructuur, voor AI-training en -inference op grote schaal. De systemen zullen naar verwachting worden ingezet in een datacenter binnen het Europese netwerk van de datacenters van de Neocloud.

De investering past binnen de hybride strategie van Triple Finance Group, gericht op financiering van kapitaalintensieve sectoren met tastbare, inkomsten genererende activa en langetermijnwaarde. De transactie wordt gefinancierd via een aandelenuitgifte. De afronding van de private plaatsing wordt begin juli verwacht, parallel aan het reverse listing-proces en de rebranding naar Triple Finance Group.

Triple Finance Group signs LOI to finance European NVIDIA GPU AI Infrastructure

Heemstede, June 4, 2026, 18:00 – Lavide Holding N.V. ("Lavide"), soon to be rebranded Triple Finance Group N.V. ("Triple Finance Group"), has signed a Letter of Intent (LOI) with a European Neocloud company regarding the strategic financing of NVIDIA GPU infrastructure supporting AI computing power across Europe.

The targeted Neocloud is one of Europe's fastest-growing GPU infrastructure companies and an NVIDIA Elite Partner, on its way to becoming a leading European provider of AI computing power. Through its AI cloud platform, the company provides GPU-as-a-service to enterprises and developers. The name of the company will be disclosed at a later stage.

As investors in the asset-backed sector, Triple Finance Group sees Europe's AI compute infrastructure as one of the defining opportunities today. The market is moving fast towards the institutionalization of an entirely new asset class. The US is leading in this sector, providing institutional-grade GPU-backed financing at scale.

According to Thijs Groeneveld, CEO of Triple Finance Group, "The European market for institutional-grade AI compute infrastructure financing remains underdeveloped, while demand continues to grow rapidly."

Groeneveld adds, "Europe is on the verge of institutionalizing AI infrastructure as a new asset class. With this partnership we are positioning ourselves as one of the leading investors in a rapidly growing market that still has limited access to large-scale institutional financing."

Transaction Structure and Financing

The first transaction is expected to be approximately USD 45 million in NVIDIA GPU infrastructure, designed for large-scale AI training and inference. The infrastructure is expected to be deployed within the European network of the Neocloud's data center footprint.

The proposed transaction reflects Triple Finance Group's hybrid strategy of providing debt and equity financing to high-growth, asset-rich sectors that are underserved by traditional banks and financiers.

AI compute infrastructure fits this model closely, whereby the GPU systems represent tangible, income-generating assets, while the financing gives the Company exposure to one of the fastest-growing sectors in the real economy. The transaction is a result of our hybrid financing strategy and supports our objective of building a portfolio of cash-generating investments with long-term equity returns for Shareholders.

Triple Finance Group will fund the transaction by issuing new shares as part of its previously announced placements. The closing of the private placement is expected in early July 2026. This will coincide with the completion of the reverse listing process on Euronext Amsterdam and the company's full rebranding to Triple Finance Group.

END OF PRESS RELEASE

About Triple Finance Group

Triple Finance Group is a listed investment holding on Euronext Amsterdam that invests through a hybrid strategy combining debt and equity. The debt component is designed to generate stable, recurring cash flows, while the equity component provides long-term value creation.

Over the past two decades, banks have steadily retreated from parts of the lending market, driven by stricter capital requirements and regulatory pressure, creating persistent funding gaps that Triple Finance Group is uniquely positioned to fill.

Triple Finance Group focuses on asset classes that combine strong underlying credit quality with structural underinvestment by traditional banks. Its team brings deep expertise in structured finance, and its approach targets compelling combinations of safety, yield, and long-term upside across its investment portfolio.
