Adjusted EBITA excludes one-off expenses of €16.3 million in H1 2025 (Q2 2025: €15.1 million), related to acquisitions and divestments, one-off transportation costs due to the delayed ramp-up of Eemshaven and restructuring costs (H1 2024: €0.4 million expenses).

For further details, including the calculations on organic turnover and Adjusted EBITA growth, see the 'Alternative Performance Measures' included in the appendix of this press release.

<sup>&</sup>lt;sup>2)</sup> Adjusted net profit is the net profit before amortization of intangible non-current assets related to acquisitions and one-off income and expenses attributable to shareholders.

<sup>&</sup>lt;sup>3)</sup> H1 2025 net profit includes an impairment of €4.4 million (H1 2024: €0.9 million). H1 2024 net profit includes a one-off profit from divestment of €13.7 million.

Alexander van der Lof, CEO of technology company TKH: "Amidst challenging circumstances, we realized a slight organic increase in turnover in Q2 as well as in H1 2025. Smart Vision systems showed a strong performance, as Machine Vision was able to benefit from the improved market conditions in factory automation. Turnover in Smart Connectivity systems increased as well, despite the continued weakness in the digitalization market. The performance of Smart Manufacturing systems was lower, in line with expectations, due to the comparison with a very strong H1 2024, which benefitted from catch-up effects.

Although our underlying performance was solid, our results were impacted by our new inter-array cable plant in Eemshaven. During Q2, a number of longer length inter-array cables were successfully manufactured. However, the output was at a low level due to efforts to meet the requirements of the launching project. We were able to solve most of the production issues and production yields are improving gradually to the planned level. We are confident this will lead to a catch-up effect in the output in H2 2025.

We continue to make progress on our strategic agenda. The divestment of Dewetron, as announced in April, is expected to lead to a one-off profit of €36 million. We completed the integration of all fibre optic cable production in Digitalization into our plant in Poland, leading to further cost reductions. The long term outlook for our differentiating core technologies remains positive and we have a strong sales funnel totaling over 11,500 km currently under tender until 2030 for our inter-array cables.

For H2 2025, we expect Smart Vision systems to continue its strong performance, while Smart Manufacturing systems will not be improving yet. Due to the anticipated improvements in Smart Connectivity systems, TKH's performance in H2 2025 is expected to be substantially better than in H1 2025 and also better than in H2 2024. At our Capital Markets Day on September 25, 2025, we will present our strategy and targets for the next phase."

#### **ESG**

TKH continues to demonstrate a strong commitment to its ESG ambitions, making further progress in H1 2025 towards our key sustainability targets. Turnover related to the Sustainable Development Goals (SDG) reached 67%. MSCI updated TKH's rating to AA, indicating a strong management of Environmental, Social, and Governance (ESG) risks and opportunities. Our operating company VMI was awarded a Gold EcoVadis Medal for its progress toward sustainability and is thereby recognized as one of the top 5% most sustainable companies worldwide.

## Financial highlights Q2 2025

Turnover in Q2 2025 amounted to €438.3 million, a +0.8% organic increase in turnover on Q2 2024. Compared to Q2 2024, acquisitions and divestments had a -1.9% effect on turnover, while currency effects accounted for a -0.7% decrease. Smart Vision systems and Smart Connectivity systems recorded organic turnover growth during the quarter, up by +12.4% and +9.1% respectively. As expected, turnover in Smart Manufacturing systems decreased by -16.2% organically. Adjusted EBITA amounted to €40.2 million, a -27.8% organic decline from Q2 2024. Smart Vision systems' Adjusted EBITA showed strong organic growth compared to Q2 2024, as well as sequential quarterly growth compared to Q1 2025. Smart Connectivity systems' Adjusted EBITA was impacted by continued difficulties in ramping-up the output at the Eemshaven plant and ongoing weakness in Digitalization. Smart Manufacturing systems' Adjusted EBITA was impacted by the decrease in turnover. Order intake in Q2 2025 reached €381.8 million (Q2 2024: €515.5 million), and ROS amounted to 9.2% (Q2 2024: 12.2%).

## Financial developments H1 2025

In H1 2025, turnover was €858.1 million, representing a 1.5% organic growth (H1 2024: €867.2 million). Acquisitions accounted for +0.7% of turnover, divestments for -3.0% and currency effects for -0.2%. The turnover share in the Netherlands amounted to 23% of total turnover (H1 2024: 26%), while the share in Europe, excluding the Netherlands, amounted to 34% (H1 2024: 35%). Asia's share of turnover increased to 24% (H1 2024: 20%), while North America's share of turnover grew to 17% (H1 2024: 14%). The turnover share of the other geographical areas declined to 2% (H1 2024: 5%). This shift in geographical turnover distribution is due to divestments and a shift in sales towards North America and Asia in both Smart Vision and Smart Manufacturing systems.

The order intake in H1 2025 amounted to €803.3 million (H1 2024: €970.9 million), resulting in an orderbook as of June 30, 2025 of €1,080.2 million (December 31, 2024: €1,135.0 million).

Added value reached 50.7% in H1 2025 (H1 2024: 51.8%). Smart Manufacturing and Smart Vision systems showed an improvement in added value compared to H1 2024, due to the product mix, whereas the added value in Smart Connectivity systems decreased.

Operating expenses (excluding amortization and impairments) increased by +0.4% compared to H1 2024. Acquisitions and divestments had a net downward impact of -3.5%. Personnel expenses decreased by -1.0%, partially due to divestments.

As a result, Adjusted EBITA decreased by -18.1% organically to €80.2 million in H1 2025 (H1 2024: €95.8). ROS decreased to 9.3% (H1 2024: 11.0%), impacted by ramp-up costs and low production output at Eemshaven and ongoing weaknesses in Digitalization.

One-off expenses of €16.3 million were recorded in H1 2025 relating to acquisitions and divestments, one-off transportation costs due to the delayed ramp-up of Eemshaven and restructuring costs in Digitalization (H1 2024: one-off expense of €0.4 million). An impairment of €4.4 million was recognized, largely related to the cost reduction measures and scaling down of our production capacity in Digitalization.

Net interest expenses decreased to €13.3 million (H1 2024: €13.9 million), due to lower interest rates. The exchange rate difference amounted to +€1.9 million (compared to -€1.4 million in H1 2024), due to the strengthening of the Euro compared to the US dollar and Chinese yuan.

The normalized effective tax rate remained stable at 25.6% in H1 2025 compared to 25.8% in H1 2024.

Net profit before amortization and one-off income and expenses attributable to shareholders decreased by -20.8% to €36.0 million (H1 2024: €45.4 million) mainly due to the lower Adjusted EBITA. Net profit amounted to €13.6 million (H1 2024: €49.8 million, including a €13.7 million profit contribution from the HE System Electronic divestment).

Net interest-bearing debt according to the bank covenants increased by €105.7 million from year-end 2024 to €601.7 million as of June 30, 2025. Items affecting the debt level include an increase in working capital (€22 million), net investments in property, plant and equipment (€40 million), investments in intangible assets (€31 million) and dividends paid (€60 million). Cash flow from operating activities amounted to €41.2 million (H1 2024: €47.4 million). The net debt/EBITDA ratio was 2.6 (H1 2024: 2.3), which is within the financial ratio agreed with our banks. Solvency decreased to 36.8% (H1 2024: 37.7%).

As of June 30, 2025, TKH employed a total of 6,711 FTEs (December 31, 2024: 6,640 FTEs), of which 418 were temporary employees (December 31, 2024: 351 FTEs).

## **Developments by technology segment**

#### **Smart Vision systems**

#### **Key figures** (in € million unless otherwise stated)

	H1	H1		Organic
	2025	2024	<b>∆</b> in %	<b>∆</b> in %
Turnover	254.2	232.6	+9.3%	+7.5%
Added Value	62.0%	60.2%		
Adjusted EBITA	42.8	30.4	+40.9%	+35.4%
ROS	16.9%	13.1%		

In H1 2025, Smart Vision systems' turnover grew organically by +7.5% to €254.2 million. Acquisitions had an upward impact of +2.5%. The order book increased to €144.8 million (December 31, 2024: €139.9 million), up by +3.5%. Added value rose from 60.2% to 62.0% driven by the product mix. The higher turnover, coupled with an increase in added value, resulted in a +35.4% organic increase in Smart Vision systems' Adjusted EBITA to €42.8 million. ROS for H1 2025 amounted to 16.9% (H1 2024: 13.1%).

**Vision Technology** (88% of Smart Vision systems' turnover) – Machine Vision showed a strong increase in turnover in H1 2025. In Q2 2025, 3D Machine Vision benefitted from a strong factory automation and consumer electronics market, as well as strong demand from the battery market. 2D Machine Vision also grew due to the delivery of several larger orders. Security Vision's growth was moderate due to the timing of several larger projects, which will benefit H2 2025.

#### **Smart Manufacturing systems**

#### **Key figures** (in € million unless otherwise stated)

	H1	H1		Organic
	2025	2024	Δin %	Δin %
Turnover	260.9	315.9	-17.4%	-9.2%
Added Value	53.2%	50.8%		
Adjusted EBITA	45.5	56.4	-19.4%	-19.6%
ROS	17.4%	17.9%		

Adjusted for currency effects and divestments, turnover at Smart Manufacturing systems declined organically by -9.2%. Added value increased further, from 50.8% to 53.2%, primarily due to higher margin services contributions and cost reductions in sourcing and supply. Adjusted EBITA declined by -19.6% organically to €45.5 million. ROS reached 17.4% (H1 2024: 17.9%), as Tire Building machines performance continued to benefit from the implemented efficiency programs. The order book declined to €438.6 million, compared to the €501.5 million level of December 31, 2024. The low order intake during H1 2025 is due to orders being re-evaluated in light of uncertainties in trade tariffs and continued lower investments from the Tier 1s.

**Tire Building systems** (85% of Smart Manufacturing systems' turnover) – As anticipated, Tire Building systems' H1 2025 performance was impacted by the comparison to a strong H1 2024 which benefitted from the catch-up effect of deliveries, as well as the lower order intake in the previous quarters. The development and delivery of the first UNIXX tire building machine, scheduled for Q3 2025, is progressing according to plan. The sales funnel for Tire Building Machines, including

component systems based on the UNIXX technology remains strong. The expected order intake in H2 2025 is promising, with many projects in the pipeline, driven by the need for investments related to the production of more sustainable tires, reshoring and the demand for more automation.

**Other** – The divestment of Dewetron is scheduled to be finalized in Q3 2025, in line with our strategic focus on our core technologies.

#### **Smart Connectivity systems**

#### **Key figures** (in € million unless otherwise stated)

	H1	H1		Organic
	2025	2024	Δin %	<b>∆</b> in %
Turnover	349.8	328.5	+6.5%	+6.5%
Added Value	39.6%	45.1%		
Adjusted EBITA 1)	3.4	20.4	-83.1%	-83.1%
ROS	1.0%	6.2%		

Turnover in Smart Connectivity systems increased organically by +6.5% to €349.8 million in H1 2025. The order book grew to €496.8 million (December 31, 2024: €493.6 million). Added value as a percentage of turnover decreased from 45.1% to 39.6% in H1 2025, due to low yields in the Eemshaven plant, lower margins on outsourced service activities and continued pricing pressure on our Digitalization activities. Adjusted EBITA decreased by -83.1% organically to €3.4 million (H1 2024: €20.4 million), due to the low output and yields coupled with the start-up costs at the Eemshaven factory and the weakness in Digitalization. ROS amounted to 1.0%.

**Energy** (55% of Smart Connectivity systems' turnover) – Energy recorded growth in turnover for H1 2025, both in offshore and onshore energy. Onshore energy cables benefitted from an improvement in the roll-out of the networks in the Netherlands, leading to an increased volume of energy cables being installed. In offshore energy, our results were impacted by our new inter-array cable plant in Eemshaven. During Q2, a number of longer length inter-array cables were successfully manufactured. However, the output was at a low level due to efforts to meet the requirements of the launching project. Most of the production issues were solved and production yields are improving gradually to the planned level. This is expected to lead to a catch-up effect in the output in H2 2025. In Q2 2025, an offshore wind order was signed for the supply of 130 km inter-array cables (Waterkant project).

**Digitalization** (25% of Smart Connectivity systems' turnover) – Turnover at Digitalization dropped sharply in H1 2025, impacted by a significant decline in demand due to the continued low levels of investment in the roll-out of fibre optic networks in Europe. The resulting pricing pressure in combination with the ramp-up costs and low capacity utilization put significant pressure on the results of Digitalization during H1 2025. The consolidation of our fibre optic cable manufacturing in our Polish factory has been completed, resulting in reduced headcount at other locations, which will benefit H2 2025.

**Other** (20% of Smart Connectivity systems' turnover) – TKH's specialized and customized connectivity systems for the machine-building, robotics, and medical industries were impacted by the weak German economy.

#### Outlook

TKH expects the following developments per business segment:

#### **Smart Vision systems**

Smart Vision systems is expected to continue its strong performance. Turnover and Adjusted EBITA in H2 2025 are expected to grow compared to H1 2025, on the back of the delivery of some larger secured orders within Machine Vision as well as Security Vision.

#### **Smart Manufacturing systems**

As anticipated, Smart Manufacturing systems' H2 2025 turnover and Adjusted EBITA are expected to be lower than in H1 2025, due to a lower orderbook. The order intake during H1 2025 was impacted by uncertainties in trade tariffs and continued lower investments from the Tier 1s. The expected order intake for H2 2025 is promising.

#### **Smart Connectivity systems**

Turnover and Adjusted EBITA in H2 2025 are expected to grow substantially compared to H1 2025, due to a projected higher output level in the Eemshaven factory and an increase in accessories and service turnover. Furthermore, in onshore energy, we anticipate a further increase in demand from the network companies that support a higher utilization level within this segment. Within Digitalization a lower cost level and higher utilization will also support an improved result.

Subject to ongoing market uncertainties and barring unforeseen circumstances, on balance TKH expects turnover and Adjusted EBITA for H2 2025 to be substantially higher than H1 2025 and to be above H2 2024.

The presentation of the half year results on August 12, 2025 can be followed via live webcast at 10:00 CET (<a href="https://www.tkhgroup.com">www.tkhgroup.com</a>).

## Notes to the interim financial report

#### Accounting principles for financial reporting

The accounting policies for the valuation of assets and liabilities and determination of the result (hereafter 'valuation principles') are the same as the accounting principles applied for the consolidated financial statements 2024. Annual accounts have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union (EU-IFRS) and with Section 2: 362 sub 9 of the Dutch Civil Code (Dutch Civil Code).

The interim financial report has been prepared in accordance with IAS 34 Interim Financial Reporting. It does not include all of the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements 2024 of the group.

#### **Judgements**

The preparation of the consolidated interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported value of assets and liabilities, and income and expenses. Actual results may differ from these estimates. The main sources for estimates used by management are the same as those used in preparing the 2024 consolidated financial statements.

#### Assets and directly associated liabilities held for sale

In April 2025, TKH announced the divestment of Dewetron GmbH ("Dewetron") to Japanese Anritsu Corporation. Dewetron is active in the development, manufacturing, sale and service of high-end electrical measurement instruments such as power analyzers and data recording devices. The turnover of Dewetron, part of TKH's Smart Manufacturing segment, totaled €29.4 million in 2024, with an Adjusted EBITA of €3.0 million and 147 FTE. Dewetron is headquartered in Grambach, Austria, where the main production facilities are located, and operates across Europe, North America and Asia.

The total consideration for Dewetron upon closing amounts to €54 million, resulting in a one-off net profit contribution of about €36 million. The transaction is subject to regulatory approval and is expected to be closed in the third quarter of 2025.

## **Appendix: Alternative Performance Measures (APM)**

#### Added value

Total turnover less the cost of 'Raw materials, consumables, trade products and subcontracted work' for products sold and services delivered, excluding one-off income and expenses. Added value is presented as an absolute value, as well as a percentage from turnover. Reference is made to the 'Notes to the interim financial report – 'Segmented information' in the press release for a reconciliation and calculation. TKH deems this a relevant performance measure as it is an indicator of the pricing power TKH has in its specific markets and the ability to create added value for its customers.

#### Adjusted EBITA and EBITDA and ROS (return on sales)

off income and expenses.

EBITDA Earnings before interest, taxes, impairments, depreciation, and amortization,

excluding one-off income and expenses.

ROS Adjusted EBITA divided by total turnover as a percentage.

Reference is made to the 'Notes to the interim financial report – Segmented information' and 'One-off income and expenses' for a reconciliation and calculation.
