

ABO-Group Annual Results for 2015

Ghent, 31 March 2016 – 18.00 CET – Press release / regulated information

ABO-Group, a group of engineering and testing companies operating in the areas of soil investigation, environment, geotechnology, energy and waste, has today announced its consolidated financial figures for 2015.

	2014	2015			Per share
	€ 000	€ 000	Change	+/- %	In €
Total operating income	29,947	33,143	3,196	+10.7%	
Sales	29,015	31,620	2,605	+9.0%	
REBITDA ¹	2,177	2,195	18	+0.8%	0.21
Depreciation	1,544	1,713	169	+10.9%	
Operating profit	342	323	-19	-5.6%	0.02
Financial result ²	-136	-160	-24	-17.6%	
Pre-tax profit from ongoing operations	206	163	-43	-20.9%	
Net profit from continuing operations	38	162	124	+326.3%	
Net profit	199	148	-51	-25.6%	0.01

2015 highlights

- Strong growth in sales by 9%, autonomous growth of 6%
- Operating and net profit affected by weak international division and one-off provision
- Healthy balance sheet and financial position

Outlook for 2016

- Strong start into 2016 with well-filled order book
- Continued commitment to organic and acquisitive growth
- Change of the operational management

Strong sales growth of 9%

In 2015, the ABO-Group was able to feel the early economic recovery, primarily in Belgium and the Netherlands. The French market showed little drive. The group was able to achieve solid revenue growth in each of its home countries, however. **Total sales increased by 9%, of which 6% was**

¹ Recurring earnings before interest, taxes, depreciation and amortization

² Including the share in the profit of associated companies

organic and 3% from acquisition in the Netherlands. Despite continuing pressure on prices, demand in general increased. The strongest growth was recorded at Geosonda Belgium, with geotechnology in the Netherlands, and at the E20 energy department. The consulting operations in Belgium (ABO) progressed significantly, in particular through the expansion of the range of products aimed at archaeology and BREEAM³.

The sales distribution for the 3 home markets is broken down as follows:

	2014 € 000	2015 € 000	Change in € 000	Growth %
France	15,862	16,545	+683	+4.3%
Belgium	12,084	12,935	+851	+7.0%
The Netherlands	1,069	2,140	+1,071	+100%
Total sales	29,015	31,620	+2,605	+9.0%

Operating and net profit, affected by weak international department and one-off provision

The operating profitability of the group was strongly influenced by one-off, non-recurring items in both 2014 and in 2015. In 2014, the stock exchange listing generated extraordinary costs amounting to 291k. In 2015, the figures were influenced on the one hand by a one-off provision for a legal dispute, with a negative impact of 520k euro, and, on the other, by an 'other operating income' amounting to 360k euro on the revaluation of the existing interest in Sialtech (application of IFRS 3). It may therefore be better to consider the underlying trend without taking these one-off items into account in both financial years, hence the use of REBITDA as yardstick.

The recurring cash flow of the group (REBITDA) amounted to 2.2 million euro (0.21 euro/share), a slight increase of 0.8%. The major focus in 2015 remained on the development of the services offered by the group, which resulted in a reduction in margin. Geographic expansion continued with the start-up of an office in Montpellier. In addition, the loss of export support in the international department could not be absorbed in time by new contracts. The lead time (= the period between the quotation and effectively winning the contract) is rather long in this type of projects, in which switching suddenly is not an obvious choice. ABO-Group is gradually reaping the fruits of many new initiatives that were launched in recent years, however. The product range was systematically expanded, ensuring that customers can address ABO with an increasing number of demands. In addition to the price advantage, the integrated approach mainly provides the customer with time savings with regard to the implementation of his project.

In their fieldwork departments, the ABO-Group has continuously invested in building up their machinery in recent years. The year-on-year 10.9% increase in depreciation, to 1.7 million euro, is proof of this. This guarantees the customer a quality implementation, as well as a multi-purpose deployability and flexibility in drilling technology.

³ BREEAM is a label developed by BRE (an organisation from the United Kingdom), which assesses the environmental impact of buildings or projects on the basis of the implemented sustainability measures. The label can be applied at an international level, and can be granted to buildings that are already in use, to new or renovated buildings, and to new master plans.

Healthy balance sheet and financial position

With a shareholders' equity of 11.1 million euro and net financial debt of 4.2 million euro, the group has all the required assets to continue on the path of organic and acquisitive growth.

The full set of figures (consolidated profit and loss account, consolidated balance sheet and cash flow overview) is included as an annex to this press release.

Strong start into 2016 with well-filled order book

The financial year 2016 has started strongly, with the well-filled order book at the end of 2015 being one factor in this. The Dutch market continues to recover at a rapid pace. Growth in Belgium has been supported by winning several interesting contracts. The French market is currently at a status quo.

Continued commitment to organic and acquisitive growth

ABO-Group aims to further expand its environmental and energy consultation, and its engineering and testing activities, both in its three home countries (Belgium, the Netherlands, France), and in a number of specific growth markets (Central and Southeast Asia, Africa and the former Eastern bloc countries). The group is continuing its strategy of positioning itself as a European player with international ambitions. The ABO-Group focuses on internal growth, together with the recruitment of experts in order to set up and develop new operations. In addition, the group also aims to further develop its acquisition strategy in the home countries. In 2015, the ABO-Group became the 100% owner of E20 (through the acquisition of the 50% stake that was held by KWA B.V.), purchased a 17.5% stake in Sialtech B.V., and a 25% holding in Ecorem NV was sold. The positive effect of the transactions that were realised in recent years is already clearly noticeable.

Change of the operational management

In an increasingly changing environment, a fast response to the changing market conditions is of crucial importance. To this end, ABO-Group will strengthen the decision-making bodies in its operational companies. The HQ services ("ABO Corporate Office") will be streamlined in order to create added value for the entire group. Specific services have therefore already been outsourced externally (IT). This will result in significant cost savings and increased flexibility.

Overview of 2015 / Outlook for 2016 per segment

<u>France</u>

ABO-ERG, the French department of the ABO-Group, is known as one of the best performing French companies in geotechnology and the environment, ensuring the company wide access to major national French projects, such as (energy) transport, industrial projects, nuclear power plants and contaminated sites. Despite the negative economic situation in France, ABO-ERG was able to book further revenue growth in 2015, in addition to the significant revenue growth (+16%) in 2014. The higher turnover was mainly achieved in the large geotechnical sites. Other contributory factors were

commercial operations, in particular the further development of the office in Lyon and the new branch in Montpellier. Finally, ABO-ERG is now picking the fruits of significant investments in machines, laboratory equipment and training. The Environment department has managed to maintain and even strengthen its position in a very difficult market. ABO-ERG is diversifying into related activities, and is also continuing its investment programme in quality and safety. In this way, further growth and development can also be expected in France for 2016.

Belgium

As a consultancy and engineering office, **ABO NV** is focusing on the provision of comprehensive advice regarding all kinds of construction and redevelopment projects. ABO NV operates in the Belgian market, with offices in Flanders, Brussels and Wallonia, and focuses on soil investigation and soil remediation, all types of environmental studies, and archaeological and historical building research, as well as on comprehensive advice with regard to sustainable redevelopment and spatial planning. The services that ABO provides range from project description (advice in support of policies, strategic notes), the (pre-)feasibility phase (techno-economic studies, positioning studies, environmental impact studies, risk analyses, tendering assistance, etc.), the design phase (detail engineering, preparation of specifications, social and environmental impact studies, licences, etc.), up to the guidance and monitoring of the implementation of projects. In order to successfully realise projects, ABO can rely on a multidisciplinary team of no less than 80 specialists in different disciplines on a daily basis.

In 2016, ABO is expecting strong growth in archaeology (as a result of the implementation of new legislation in Flanders) as well as in BREEAM and sustainable construction consultancy. In addition, ABO is also strongly homing in on further diversification, such as asbestos studies (in view of the asbestos reduction policy) in collaboration with Translab. From the end of 2016 and into the coming years, strong growth is expected in the soil remediation sector in Wallonia as a result of the operation of the long-awaited implementation decrees of the Walloon soil decree.

Given the changing international market conditions in environmental consultancy, with fewer subsidies available and an increasing demand for an integrated approach, 2015 could be seen as a major investment year for **ECOREM**, with the deepening and broadening of the international service package taking central stage. In order to optimise our response to the globalising and changing environmental consultancy market, the development of certain operations was accelerated. This mainly applied to the "urban environment" concept, as well as to our projects relating to renewable energy, with an emphasis on research into the possibilities for energy storage (such as the energy atoll in the North Sea).

Networks in a selected number of emerging countries were strengthened in preparation for new contracts. In addition, several new countries were examined with regard to their potential for environmental funding. Due to the economic and/or political instability, commercial operations in other regions were scaled down or provisionally put "on hold". In order to be able to focus even better on areas such as sustainable urban development, port expansion, strategic energy storage and innovative research projects, the local, more decree-oriented research projects were transferred to ABO or, in some cases, even discontinued. This restructuring should contribute to the international profile of Ecorem NV and to the internationalisation of the entire ABO-Group.

2015 was a year of strong growth and transformation for **GEOSONDA**, the environmental and geotechnical fieldwork department. First of all, the operational integration was completed. As a result, the three major research techniques (drilling, probing and the installation of trial trenches) are now combined with the three major soil investigation markets (environment, geotechnology and archaeology). This unique combination generated a solid revenue growth, in which the company was strengthened by several new and talented employees. Several large and multidisciplinary projects were also acquired (such as soil analysis for the Saeftinghe dock). In addition, further investments were made in modern and specialised equipment, such as environmentally-friendly vehicles and a new CPT unit, which will allow the continuation of growth and innovation.

2015 also was a year of growth for **E20 (Energy to zero Consult)**. A new, experienced auditor profile was attracted, a project manager targeting the Brussels' market was employed and the necessary administrative support was provided. E20 sees its market share increasing. The award of a major contract for Antwerp will allow us to significantly increase the 2016 sales. In addition, continuity was ensured through an additional assignment for the Enterprise Agency, the attraction of new customers for the mandatory energy audits for large companies, and the ongoing energy coaching contract for the city of Ghent. For 2016, growth is foreseen in the consultancy of companies regarding energy-related matters, and of governments regarding the reduction of their energy consumption. Furthermore, investments in R&D will enable the development of niche activities and the build-up of long-term cooperation with customers.

The Netherlands

The Dutch market seems to be gaining speed. As a result, the recovery movement is continuing after a very difficult crisis period in 2009-2013. The environmental and geotechnical fieldwork operations (Sjaltech and Goorbergh Geotechniek) experienced a very healthy growth, and a significant organic sales growth is again expected for 2016. ABO-Group is very much looking forward to strengthening its presence and product range in the Dutch market.

Financial calendar

25/05/2016: General Shareholders' Meeting 30/09/2016: Figures for the first half of 2016

Statement of the statutory auditor

The auditor of ABO-Group Environment NV, Ernst & Young Bedrijfsrevisoren BCVBA, represented by Marnix Van Dooren, has confirmed that his audit review, which was thoroughly completed, has not revealed any significant corrections that would require an adjustment to the 2015 consolidated figures for the Group, which are included in this press release.

About the ABO-Group

The ABO-Group is a group of integrated engineering and testing companies operating in the areas of soil investigation, environment, geotechnology, energy and waste. The ABO-Group aims to increase its sales through internal growth and acquisitions, and to broaden the range of its operations both within and outside Europe. For a more detailed description of the group's risks and operations, we refer to the listing document of the ABO-Group, which was released on 31 July 2014, and is available on the ABO-Group website (www.abo-group.eu).
