All members of staff are covered by a supplementary pension scheme that includes an additional death benefit, orphan's annuity and invalidity benefits. The amount covered under these schemes (which are defined benefit schemes) depends on the average final salary, number of years of service and age at the time of retirement.

These pension schemes are financed entirely by the employer through annual contributions that are recognised in the income statement.

RIGHTS AND COMMITMENTS NOT REFLECTED IN THE BALANCE SHEET

IF THERE IS A SUPPLEMENTARY RETIREMENTS OR SURVIVOR'S PENSION PLAN IN FAVOUR OF THE PERSONNEL OR THE EXECUTIVES OF THE ENTERPRISE, A BRIEF DESCRIPTION OF SUCH PLAN OF THE MEASURES TAKEN BY THE ENTERPRISE TO COVER THE RESULTING CHARGES

These contributions, calculated on an actuarial basis using the aggregate cost method, are transferred to the Pensioenfond KBC OFP (KBC pension fund for employees) and the Pensioenfond Senior Management KBC OFP (KBC pension fund for senior management), whose specific task is to manage the accrued reserves, to pay out the supplementary pension benefit and to carry out the necessary administration.

Members of the Executive Committee also benefit from a supplementary pension scheme that is based on similar principles.

In addition, staff may contribute to a supplementary pension scheme (capitalisation system). It is based solely on members' personal contributions which are deducted directly from their salaries. The bank guarantees capitalisation of the amounts contributed at an interest rate of 4.75% per year for the period up to and including 30 June 1999, and a rate of 3.75% for the period from 1 July 1999, up to the time the benefit is paid out. Management of the reserves accrued in this way, their payment and associated administration is the responsibility of the Pensioenfond KBC OFP and Pensioenfond Senior Management KBC OFP.

During 2012, a collective labour agreement was concluded for the introduction of a defined contribution plan on 1 January 2014 (mandatory for new employees and voluntary for existing members). For the target group in question, this plan will replace the defined benefit plan funded by the employer. No changes at all have been made to the plan funded solely by members' personal contributions.

VALUATION RULES

Bel GAAP valuation rules - KBC Group NV - Non-consolidated

1. Formation expenses

The capital increase expenses are directly recognised in full in the result for the financial year in which the capital increase takes place.

2. Financial fixed assets and cash movements

a. Participating interests and other securities in portfolio

Participating interests and shares are valued at acquisition cost, per set identified. The securities sold are valued using method of separating out the price of each component. Additional costs incurred on acquisition of securities are charged immediately to the results for the financial year.

If when the securities are valued at the end of the financial year it is established that they have fallen in value and that this decline is considered real and lasting in nature, a write-down equal to the decline in value identified will be recorded for the securities in question.

To establish the real and lasting nature of the decline in value, the Board of Directors may base itself on:

- " for listed securities:
 - " the trend in the share price;
 - " changes in the net worth according to the annual accounts;
 - " the performance of and outlook with regard to profitability;
- " for unlisted securities:
 - " the changes in the net worth according to the annual accounts;
 - " the performance of and outlook with regard to profitability;

If a security on which such a write-down had already been posted exhibits a lasting increase in value, the amount written down will be reversed in whole or in part.

Participating interests, shares and share certificates classified as financial fixed assets may be revalued if, in light of their usefulness to the company, they exhibit an incontestable and lasting increase in value.

Listed shares and other variable-yield securities are valued at the lower of their acquisition cost and market value at balance sheet date. Other securities are valued at least once a year, based on the annual accounts for the past year. File administrators are responsible for ensuring that any significant negative changes during the course of the year are also dealt with.

b. Amounts receivable

These are recognised at nominal value. However, amounts receivable represented by fixed-income securities are valued at acquisition cost, plus or minus the accrued portion of the premium or discount. The premium or discount is recognised pro rata temporis, on a discounted basis, in the profit & loss account over the remaining term to maturity.

Amounts receivable in foreign currency are recognised at their equivalent euro value using the fixed exchange rate applying at the end of the preceding month. For the purposes of valuation at the end of the financial year, the carrying value is adjusted according to the fixed exchange rate on 31 December.

The positive and negative translation differences are recognised in profit or loss.

If, at the close of the financial year, the realisation value of a receivable is lower than its carrying value, and if this decline in value can be considered real and lasting in nature, a write-down is applied in the amount of the decline identified.

3. Amounts receivable at more than one year and amounts receivable within one year

These are recognised at nominal value. However, amounts receivable represented by fixed-income securities are valued at acquisition cost. The rules set out in paragraph 2.c. apply to amounts receivable in foreign currency and to write-downs on receivables.

4. Contracts in progress

Specific software developed by KBC Group NV for third parties is recognised under 'Contracts in progress'. This concerns the marketing by KBC group of tailor-made software (i.e. software developed on a contractual basis and built entirely to the client's specifications). This software may have been developed from scratch by KBC or using purchased basic software. Contracts in progress are valued at manufacturing price, without taking profit in proportion to the progress of the work.

The manufacturing price includes all costs that can be allocated directly to the project (e.g., third-party development costs, infrastructure, implementation of software). Maintenance and after-sales service is considered as a period expense.

5. Accrued charges and deferred income and deferred charges and accrued income

These items allow income and expenditure to be allocated to the proper accounting period.

The option premiums received with regard to the issued stock option plans are recognised in the profit and loss account depending on if and to the extent that the stock options expire or are exercised.

The option premiums set aside by the employer are recognised pro rata in the profit and loss account as personnel expenses during the

VALUATION RULES

performance period (period between subscription and opportunity to exercise).

If employees who hold options transfer between KBC-group entities, the option premium paid (the part that has not yet been taken to the profit and loss account) is charged to the company the employee is transferring to.

6. Amounts payable

These are recognised at nominal value. With regard to commercial paper, the difference between the amount made available and the nominal value is entered pro rata temporis in the profit and loss account as an interest charge.

Amounts payable in foreign currency are recognised at their equivalent euro value using the fixed exchange rate applying at the end of the preceding month. For the purposes of valuation at the end of the financial year, the carrying value is adjusted according to the fixed exchange rate on 31 December.

The positive and negative translation differences are recognised in profit or loss.

7. Provisions

The provisions are IFRS-compliant. They are recognised in the balance sheet:

- " if an obligation exists on the balance sheet date that stems from a past event, and
- " if it is probable that an outflow of resources is required, and
- " if the amount of the obligation can be estimated reliably.

8. Deferred taxes

Deferred taxes are recognised for all temporary taxable differences between the carrying value of an asset or liability and its tax base, except for deferred tax assets on tax losses or notional interest deductions carried forward, which are not recognised due to the principle of prudence.

Deferred taxes to be recognised are measured using the tax rates in effect on realisation of the assets and settlement of the liabilities to which they relate.
