Results

2020 has been an excellent year for Quest for Growth. Despite the corona crisis, the net asset value increased since the beginning of the year by 12.5% to € 9.14, compared with € 8.12 on 31 December 2019. A profit of € 17.1 million (€ 1.02 per ordinary share) was recorded in 2020, against a profit of € 16.7 million (€ 1.00 per ordinary share) in 2019.

The share price recovered partially at the end of the year, but by gaining 9% to € 6.50 it still lagged behind the appreciation of the underlying portfolio. The price discount compared to the net asset value increased to 28.8% at the end of 2020, compared with 27.3% at 31 December 31 2019.

Allocation of the profit and capital reduction

Of the profit for the financial year, an amount of € 9,154,587 is used to clear the losses carried forward. In accordance with the provisions on profit appropriation, as described in the Royal Decree of 10 July 2016 with regard to alternative institutions for collective investment in unlisted companies and in growth companies ("Privak KB"), the balance of 7,929,733 euros must be included in an unavailable reserve. After all, the PRIVAK RD determines as follows: "The positive balance of the fluctuations in the fair value of the assets is included in an unavailable reserve."

The board of directors proposes, subject to approval of the amendment to the articles of association by the FSMA, to convene an extraordinary general meeting that may decide to distribute 6,709,690.40 euros or 0.40 euros gross per share in the form of a capital reduction.

The capital reduction will not be accompanied by a cancellation of the existing shares of the Company, but will be borne by each existing share to the same extent and each share of the Company will continue to represent the same part of the new capital of the Company.

Market environment

The year ended in a rally sparked early by the announcements of coronavirus vaccines in November, but it was not enough to make up for the losses suffered by European stock markets since the start of the year. The European STOXX Europe 600 Net Return index closed the year with a loss of almost 2%. Thanks to a vigorous recovery in the second half of the year, European small caps were able to end the period with a positive result. US stocks held up better (S&P 500 Index + 16% in dollars, or + 6% in euros) thanks to the meteoric rise in a series of technology stocks. The NYSE FANG + Index, which contains stocks like Tesla, Apple and Amazon, rose more than 100% (in dollars) in 2020.

Investments in quoted companies

The estimated performance of the listed equity portfolio was around + 17% (excluding cash and before fees) in 2020, significantly higher than that of European indices. Victims of lockdowns and restrictive measures imposed on travelers, Akka Technologies (sold in April) and Jensen-Group (-30%) were the weakest stocks in the portfolio in 2020. The best performing stocks of the year were Steico (+ 118%), Pharmagest (+ 83%), Stratec (+ 86% since purchase) and ABO Wind (+ 175% since purchase).

In total, 10 stocks were removed from the portfolio in 2020: Sequana Medical, Robertet, CFE and Norma Group in the first quarter; EVS, Akka and Aliaxis in the second quarter; Cenit and Aures in the third quarter and Kingspan in October. The same number of new entries were made, including five small caps: the German medical technology company Stratec, the Swiss company Gurit which manufactures products for the wind energy sector, the German laser technology company LPKF, the German developer of renewable energy projects ABO Wind and the Dutch bicycle manufacturer Accell. In addition, the following five stocks with larger market capitalisations were also purchased: Tubize, the Belgian shareholder of UCB; Irish food ingredient supplier Kerry; Swiss pharmaceutical giant Roche; the Dutch information provider Wolters Kluwer and the Austrian cardboard factory Mayr-Melnhof.

Investments in unquoted companies

In the first quarter of 2020, Quest for Growth participated with an investment of € 2 million in a growth financing round of more than € 10 million in the company Prolupine GmbH. It is a co-investment with the Capricorn Sustainable Chemistry Fund, a venture capital fund in which Quest for Growth is also invested.

Illumina, Inc. announced in June the acquisition of BlueBee. This company has been included since March 2016 in the portfolio of Capricorn ICT Arkiv, in which Quest for Growth participates. Since December 2017, Quest for Growth was also a direct investor in BlueBee. The sale of BlueBee had a significant positive impact on Quest for Growth's net asset value.

During the third quarter of 2020, Quest for Growth made a new investment of € 2 million in the growing company EclecticIQ. It is a co-investment with the Capricorn Digital Growth Fund, a venture capital fund in which Quest for Growth is also invested. In addition, Quest for Growth made follow-on investments in Miracor Medical (a direct investment since 2018), Sensolus, Scaled Access and NGData. These last three stocks are co-investments with Capricorn ICT Arkiv.

Investments in venture capital funds

The rise in Avantium's stock price had a clear positive impact on the valuation of the Capricorn Cleantech Fund.

The Sequana Medical shares were distributed to shareholders of the Capricorn Health-tech Fund through a capital reduction in kind. The Sequana Medical shares that Quest for Growth received as part of this transaction were immediately sold. The term of the Capricorn Health-tech Fund has been extended by two years. Following the successful exit in 2017 of Ogeda, which has been part of the Capricorn Health-tech Fund since 2015, a second part of the deposit was reimbursed upon sale last May.

At Capricorn ICT Arkiv, the successful exit of BlueBee Holding took place in the second quarter of 2020. Following the exit from the investment in Cartagena in 2015 and that from Noona Healthcare in 2018, this transaction is the fund's third successful exit. Capricorn ICT Arkiv made a follow-up investment in Indigo Diabetes. This company has completed a € 38 million funding round to further develop its promising Multi-Biomarker Sensor for people suffering from diabetes. In September 2020, Sensolus, a Belgian company that enables companies to track non-motorized assets in supply chains and industrial production, completed a € 3.5 million funding round. The fund also made some follow-up investments in existing portfolio companies.

The Capricorn Sustainable Chemistry Fund made three new investments in 2020: Prolupin, Void Polymers and Zeopore Technologies. In the first quarter, the fund invested € 5 million in Prolupin, an innovative plant-based protein company based in Grimmen, Germany. VOID, a pioneering materials science company, is a spin-off from Kimberly-Clark to commercialize

VO + technology. Zeopore Technologies, a spin-off from KU Leuven, has developed patented mesoporation technology and extensive know-how to improve the efficiency of zeolites in refining and catalysis reactions and in other applications. The Capricorn Sustainable Chemistry Fund has also made follow-on investments in Virovet and DMC Technologies.

The Capricorn Digital Growth Fund made its first three investments in 2020. First in the Dutch AI company Gradyent, which has developed a cloud-based solution for managing and optimizing district heating networks. In the third quarter of 2020, the Capricorn Digital Growth Fund invested in Indigo Diabetes, a co-investment with Capricorn ICT Arkiv. In addition, the fund invested in EclecticIQ (a co-investment with Quest for Growth), a global cybersecurity technology provider. Finally, there were two intermediate closings of the Capricorn Digital Growth Fund, raising its capital to more than € 55 million.

Management fee

During its first meeting in 2020, the board of directors evaluated the management fee for Capricorn Partners (the management company) and maintained it at 1% of the company's capital. Given a conflict of interest within the board of directors, this decision was taken in accordance with the applicable legal requirements, whereby the board was advised by a committee of three independent directors, assisted by an external expert.

Outlook

Valuations in some segments of the equity market, such as certain US technology stocks, predict growth well into the future. In Quest for Growth's portfolio, focused on European small caps, valuations are more acceptable. Equities also remain attractive compared to fixed-return investments. As for the unlisted investments, further efforts are being made to expand the portfolio in sustainable chemicals and digital technologies, while the successful exit of BlueBee shows that existing participations can contain potentially attractive capital gains.

The General Meeting will be held in Leuven at 11 a.m. on 25 March 2021. It will be possible to attend digitally.

TOTAL SHAREHOLDERS RETURN (31/12/2010 - 31/12/2020)
