Snam rating raised to Baa1 stable outlook by Moody's

Milan, 3 April 2026 - Snam has been upgraded to Baa1 (stable outlook) from Baa2 (positive outlook) by Moody's, with the short-term rating affirmed at P-2. The upgrade follows the presentation of the new 2026-30 strategic plan on the 5th of March 2026, with financial metrics broadly commensurate with the guidance for a Baa1 rating.

Moody's acknowledged Snam's low business risk profile of its gas transport and storage, LNG regasification activities within an established regulatory framework, ensuring the stability and predictability of its cash flow, together with its strategic focus on upgrading and developing its domestic infrastructure.

"The upgrade to Baa1, following the upgrade to A- by S&P in 2025, is a further recognition to our outstanding credit profile and financial strength, following our recently presented strategic plan supporting energy integration. We remain firmly committed to financial discipline, proactive balance sheet management and cash flows supported by our regulated business model" said Luca Passa, Snam CFO.
