

PRESS RELEASE

FAE TECHNOLOGY CONSOLIDATES IN THE AEROSPACE SECTOR: AS/EN 9100 CERTIFICATION ACHIEVED

The international standard developed by the International Aerospace Quality Group (IAQG) certifies quality management systems for the aerospace industry

CEO and Chairperson Gianmarco Lanza: "This is a strategic move that reinforces our positioning, building on our already established experience in the sector"

Gazzaniga (BG), June 19, 2025 – FAE Technology S.p.A. - Benefit Company ("**FAE Technology**" or the "**Company**"), an Italian electronics sector Group listed on the Euronext Growth Milan market of the Italian Stock Exchange (the "**Group**"), announces that it has obtained AS/EN 9100 certification, the international standard that establishes specific requirements for quality management systems for the aerospace industry. The standard strengthens the Company's access to new business opportunities in the industry.

Developed by the International Aerospace Quality Group (IAQG) and based on the ISO 9001 model, the standard covers every phase of the product lifecycle, from design and development, through manufacturing and installation, and finally maintenance. It considers crucial aspects as product safety, traceability, risk management and supply chain reliability.

By obtaining the certification, the Company can be included in OASIS (Online Aerospace Supplier Information System), the official IAQG-maintained database. This platform brings together qualified suppliers across the world and provides up-to-date audit and compliance status information for operators in the industry.

As such, AS/EN 9100 represents a strategic asset which, in addition to qualifying the company in line with internationally recognized standards, strengthens the company's ability to join the supply chains of major OEMs (Original Equipment Manufacturers) and leading international contractors, expanding the scope of industry opportunities available to it.

Gianmarco Lanza, Chairperson and Chief Executive Officer of FAE Technology, stated: «*This certification represents a further strategic move to reinforce our positioning, building on our already established experience in the sector. It is the result of work that underscores the maturity of our quality management system and our ability to operate according to internationally recognized requirements. The standard does not just guarantee compliance - it is a competitive lever that reflects the company's reliability and the effectiveness of its process control. These are essential elements for operating continuously alongside the industry's most significant players. We stand ready to tap into new opportunities as the industry continues to develop*».

The certification was awarded following a structured process that included in-depth analysis of the organizational set-up and business processes. The certified quality system also met stringent requirements regarding special process control, technical configuration

management, obsolescence monitoring and operational traceability. The certification is valid for three years and stipulates annual surveillance audits; at the end of this cycle, a full audit is required for renewal.

This Press Release is available in the Investors Relations/Press Releases section of the website <https://fae.technology/> and at www.1info.it.

FAE Technology S.p.A. - Benefit Company is an Italian electronics sector Group listed on the Euronext Growth Milan market of the Italian Stock Exchange that operates as an Original Design Manufacturer (ODM). It comprises several highly specialized entities: FAE Technology, the parent company, engages in professional ODM and EMS (Electronics Manufacturing Services) for industry; Elettronica GF operates in custom embedded computing; and IpTronix is a design house that develops high-complexity electronic applications. MAS Elettronica is a tech company specializing in the development of proprietary embedded solutions and ARM architectures for the industrial market. Founded in 1990 in Gazzaniga (BG) by Francesco Lanza, who began by producing a small series of electronic boards, FAE Technology has been led since 2008 by his son Gianmarco Lanza, current Chairperson and Chief Executive Officer. The Group, through several dedicated and integrated assets, can very rapidly enable electronic innovation in the various sectors in which it plays a central role, including e-mobility, the Internet of things (IoT), industrial automation 4.0 and aerospace. FAE Technology is known for its focus on innovation - promoting open innovation and shared research at the "Kilometro Rosso" hub - and on sustainability and corporate social responsibility, becoming a Benefit Company on May 13, 2022. The Group benefits from strategic partnerships and memberships with major sector players and renowned universities and research centers, including the "Senseable City Lab" at MIT (Massachusetts Institute of Technology) in Boston. The Group reports a consolidated value of production of Euro 75.5 million for 2024, up 18.2% on 2023.
