FAE TECHNOLOGY: STRATEGIC PARTNERSHIP WITH DIGIPROCES FOR IBERIAN MARKET EXPANSION

The agreement, covering the joint provision of electronic prototyping services supported by a new dedicated platform, marks the Group's structured entry into Spain and Portugal

The collaboration is the first step in a potential synergistic evolution between the two enterprises, opening up prospects for industrial and commercial expansion

Gazzaniga (BG), December 19, 2025 - FAE Technology S.p.A. - Benefit Company ("**FAE Technology**" or the "**Company**"), Tech company and parent of the Italian electronics sector Group of the same name (the "**Group**"), announces the launch of a strategic partnership with **Digiproces**, a leading Spanish Electronics Manufacturing Services (EMS) enterprise. The agreement covers the joint provision of prototyping services for the Spanish and Portuguese markets through the prototyping structure of FAE Technology and thanks to a new dedicated digital platform, directly designed and developed by the Group.

The partnership allows FAE Technology to extend its industrial and commercial presence on the Spanish and Portuguese markets, while also developing its digital expertise in electronic prototyping. This is the first step toward a synergistic evolution that may extend over time, supporting the integration of expertise and opening up opportunities amid future technological innovation.

Gianmarco Lanza, Chairperson and Chief Executive Officer of **FAE Technology**, stated: «*Digiproces is a clear example to understand how optimization in an EMS company should be boosted up through the combination of human passion and smart manufacturing cutting edge innovation. We share the same approach about the value of synergy and we are proud to partner with them, starting from prototype as entry point to face new opportunities together*».

Jordi Batet, Chief Executive Officer of **Digiproces**, commented: «*For DigiProces, this collaboration is a natural step in our strategy to offer comprehensive solutions throughout the entire product life cycle. Combining our engineering and manufacturing expertise with FAE Technology's digital platform, will allow our Spanish and Portuguese clients to access prototypes quickly and reliably, while maintaining the level of quality and customization that defines us*».

Digipoces, founded in 1987, is an EMS provider headquartered in Barcelona, with additional production operations in Bangalore. The Spanish subsidiary employs 220 people and generated revenues of EUR 42 million in 2024. The company's E2MS (Extended Engineering & Manufacturing Services) approach covers the full product life cycle, serving key sectors such as electric mobility, IoT, industrial automation, medical technology and aerospace & defense. Digipoces is recognized for its advanced electronic manufacturing capabilities and for a strong commitment to the digitalization of industrial processes, positioning it as a complementary partner to FAE Technology's design, development and digital innovation competences.

The dedicated digital platform enables the seamless integration of hardware and software development processes, supporting the creation of complex prototypes while ensuring high standards of efficiency, traceability and quality. The solution provides advanced configuration and component-selection tools and delivers online quotations rapidly, streamlining the entire prototyping workflow and significantly reducing turnaround times. Designed to meet customers' testing requirements, the platform incorporates certified quality processes and guarantees fully "EU-manufactured" output, strengthening compliance and supply-chain reliability. These features offer tangible evidence of FAE Technology's ability to combine vertical engineering expertise and industrial assets with advanced digital capabilities, laying the foundations for a collaborative ecosystem capable of responding flexibly to evolving market demand.

FAE Technology S.p.A. - Benefit Company is an Italian electronics sector Group listed on the Euronext Growth Milan market of the Italian Stock Exchange that operates as an Original Design Manufacturer (ODM). It comprises several highly specialized entities: FAE Technology, the parent company, engages in professional ODM and EMS (Electronics Manufacturing Services) for industry; Elettronica GF operates in custom embedded computing; and IpTronix is a design house that develops high-complexity electronic applications. MAS Elettronica is a tech company specializing in the development of proprietary embedded solutions and ARM architectures for the industrial market. Founded in 1990 in Gazzaniga (BG) by Francesco Lanza, who began by producing a small series of electronic boards, FAE Technology has been led since 2008 by his son Gianmarco Lanza, current Chairperson and Chief Executive Officer. The Group, through several dedicated and integrated assets, can very rapidly enable electronic innovation in the various sectors in which it plays a central role, including e-mobility, the Internet of things (IoT), industrial automation 4.0 and aerospace. FAE Technology is known for its focus on innovation - promoting open innovation and shared research at the "Kilometro Rosso" hub - and on sustainability and corporate social responsibility, becoming a Benefit Company on May 13, 2022. The Group benefits from strategic partnerships and memberships with major sector players and renowned universities and research centers, including the "Senseable City Lab" at MIT (Massachusetts Institute of Technology) in

Boston. The Group reports a consolidated value of production of Euro 75.5 million for 2024, up 18.2% on 2023.
