#### Labomar Profile

Founded by Walter Bertin in Istrana (province of Treviso) in 1998, Labomar is specialised in the development and production of food supplements, medical devices, foods for special medical purposes and cosmetics for third parties. Over more than 20 years, Labomar has built a business model which sets it apart from its competitors and generates value for all stakeholders, providing a comprehensive service and a high quality and productivity standard. The company boasts a well-structured and cutting-edge research and development department with a particular focus on innovation, a commercial team which reacts quickly to market demands and a high level of product differentiation thanks to its proprietary patents and formulas.

Following the acquisitions of the Welcare Group and Labiotre Srl, in addition to the establishment of LaboVar Srl, in 2022 Labomar focused on maximising the synergies among the various companies, pooling resources and expertise to expand its product portfolio, enter new markets and streamline certain processes, including through the best practices brought by each of the Group companies.

Labomar whole-heartedly believes in a business system based on sustainability and a real concern for people, the environment and the community. It therefore by 2020 had gained Benefit Company status and simultaneously embarked on obtaining B Corp Certification, for which it has already applied to the relative body for certification issuance. This is testament to the company's decision to join a global movement of enterprises meeting elevated social and environmental impact standards.
