Valle San Bartolomeo (Alessandria), 31 July 2024 – **STAR7** (EGM: ticker STAR7) announces that the **Group's Preliminary Revenues for the first half of 2024**, not yet audited, stood at approximately **€60 million**, marking an **increase of circa 18%** compared to €51 million in the first half of 2023. STAR7 provides an integrated range of product-information services, from product and process engineering support to the creation and management of technical and marketing content, translation, printing and virtual experience.

The key factor in the progress achieved in the first six months of 2024 can be identified in significant **organic growth** in the USA and Brazil, driven by the Product Knowledge and Engineering service lines.

STAR7 has also confirmed its ability to activate all available **organic growth** levers, through the continuous acquisition of new customers and an effective cross-selling and upselling process in the services offered to existing customers.

The complete figures of the Consolidated Half-Year Financial Report 2024 will be submitted for approval to the Board of Directors at its meeting on 27 September 2024, as per the Company's Financial Calendar.

Lorenzo Mondo, Chairman and Chief Executive Officer of STAR7, commented: *"I believe that the growth of approximately €9 million that STAR7 has achieved in this first half of the year is significant not only in its amount, but also in its quality, considering the purely organic nature of the increase in revenues and the key contribution from the Engineering and Product Knowledge segments, against a backdrop of significant progress in the most relevant service lines.*

"The results of this first half of 2024 therefore also confirm that our 'Integrale' business model continues to work effectively, offering us the ability to cross-sell additional services to newly acquired customers.

"Behind these numerical results," the CEO continued, "are some fundamental forward steps that we have made in recent months. First, the completion of the integration of CAAR, having leased its business unit from the beginning of 2023. The clear benefits in terms of the increase in half-year revenues that we achieved in the Engineering service line in Brazil are just part of the positive repercussions that we expect to see as a result of the finalised integration process. Secondly, we have started to reap the benefits of the marketing campaign we launched last year in the US market. We also continue to work hard on the ever-increasing internationalisation of our business. We have in fact just opened our new operating office in India, in Hyderabad, where we will gain an even more effective presence in meeting the localisation services needs of one of our most important Global Content clients."
