Valle San Bartolomeo (Alessandria, Italy), 15 January 2025 – **STAR7** (EGM: ticker STAR7) announces that it has completed the definitive acquisition of the business divisions of **Consulting Automotive Aerospace Railway S.p.A.** ("CAAR") and **STI S.r.l.**, both in judicial liquidation. STAR7 provides an integrated range of product-information services, from product and process engineering support to the creation and management of technical and marketing content, translation, printing and virtual experience. The transaction marks the formalisation of an integration process that began in January 2023, when STAR7 leased the two business divisions.

#### An integration that is already operational

Since January 2023, STAR7 has managed the business divisions of CAAR and STI under lease agreements, ensuring operational continuity and progressively integrating the companies' resources, skills and processes. This preliminary phase allowed STAR7 to consolidate synergies and optimise operational efficiency, laying the foundations for definitive acquisition.

With the signing of the purchase agreement – which took place on **13 January 2025**, following a competitive procedure called as a result of the judicial liquidations of CAAR and STI – STAR7 formalises the transfer of ownership of the business divisions, completing a long-term strategic process.

- **Authorisations and Golden Powers:** The transaction was notified to the Office of the Prime Minister in accordance with Italy's Golden Power Decree. The Office confirmed, in a note dated 20 December 2024, that it will not exercise the special powers provided for by the legislation.
- **Business divisions acquired:**
  - CAAR's business division includes employment relationships, capital goods, contracts and equity interests outside Italy, including shares in the international companies **CAAR do Brasil Consultoria Tecnica LTDA** and **ABACAAR DOO KRAGUJEVAC**.
  - STI's business division includes employment relationships, goods and contracts, with a focus on technical services for industrial and civil plant.

### Strategic impact
