#### Certified by:

lines: diagnosis and therapy services for infrastructure maintenance with inspections and assessments, intervention planning and construction management and ICT services for predictive programming of infrastructure maintenance. Franchetti has in fact developed two proprietary software that exploit the potential of artificial intelligence and predictive data analysis: Argan® which allows you to estimate the life cycle of the infrastructure and therefore automatically obtains the trend of the level of security over time in different scenarios and maintenance contexts and Pathwork© which allows for optimized management of road and motorway infrastructure construction sites and for sustainable mobility. With a workforce of 70 professionals, over 90% of whom have engineering degrees, the Group achieved a Value of Production of 2.9 million euros in 1H2023, of which 82% was generated in Italy and 18% in Brazil.
