

U.S. SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2021

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission file number: 000-32919

PATRIOT GOLD CORP.

(Exact name of registrant as specified in its charter)

Nevada

(State of incorporation)

86-0947048

(I.R.S. Employer Identification No.)

401 Ryland St. Suite 180

Reno, Nevada, 89502

(Address of principal executive offices)

702-456-9565

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
N/A	N/A	N/A

Securities registered pursuant to Section 12(g) of the Exchange Act:

Common Stock, \$0.001 par value

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one)

Large accelerated filer ☐

Non-accelerated filer ☒

Emerging growth company ☐

Accelerated filer ☐

Smaller reporting company ☒

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the average bid and asked price of such common equity as of June 30, 2021 was approximately \$4,744,502.

The number of shares of the issuer's common stock issued and outstanding as of March 29, 2022 was 74,380,354 shares.

Glossary of Mining Terms

Adit(s). Historic working driven horizontally, or nearly so into a hillside to explore for and exploit ore.

Air track holes. Drill hole constructed with a small portable drill rig using an air-driven hammer.

Core holes. A hole in the ground that is left after the process where a hollow drill bit with diamond chip teeth is used to drill into the ground. The center of the hollow drill fills with the core of the rock that is being drilled into, and when the drill is extracted, a hole is left in the ground.

Geochemical sampling. Sample of soil, rock, silt, water or vegetation analyzed to detect the presence of valuable metals or other metals which may accompany them. For example, arsenic may indicate the presence of gold.

Geologic mapping. Producing a plan and sectional map of the rock types, structure and alteration of a property.

Geophysical survey. Electrical, magnetic, gravity and other means used to detect features, which may be associated with mineral deposits.

Ground magnetic survey. Recording variations in the earth's magnetic field and plotting same.

Ground radiometric survey. A survey of radioactive minerals on the land surface.

Leaching. Leaching is a cost-effective process where ore is subjected to a chemical liquid that dissolves the mineral component from ore, and then the liquid is collected and the metals extracted from it.

Level(s). Main underground passage driven along a level course to afford access to stopes or workings and provide ventilation and a haulage way for removal of ore.

Magnetic lows. An occurrence that may be indicative of a destruction of magnetic minerals by later hydrothermal (hot water) fluids that have come up along faults. These hydrothermal fluids may in turn have carried and deposited precious metals such as gold and/or silver.

Patented or Unpatented Mining Claims. In this Annual Report, there are references to "patented" mining claims and "unpatented" mining claims. A patented mining claim is one for which the United States government has passed its title to the claimant, giving that person title to the land as well as the minerals and other resources above and below the surface. The patented claim is then treated like any other private land and is subject to local property taxes. An unpatented mining claim on United States government lands establishes a claim to the locatable minerals (also referred to as stakeable minerals) on the land and the right of possession solely for mining purposes. No title to the land passes to the claimant. If a proven economic mineral deposit is developed, provisions of federal mining laws permit owners of unpatented mining claims to patent (to obtain title to) the claim. If one purchases an unpatented mining claim that is later declared invalid by the United States government, one could be evicted.

Plug. A vertical pipe-like body of magma representing a volcanic vent similar to a dome.

Quartz Stockworks. A multi-directional system of quartz veinlets.

RC holes. Short form for Reverse Circulation Drill holes. These are holes are left after the process of Reverse Circulation Drilling.

Reserve. That part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination. Reserves are customarily stated in terms of "ore" when dealing with metalliferous minerals; when other materials such as coal, oil, shale, tar, sands, limestone, etc. are involved, an appropriate term such as "recoverable coal" may be substituted.

Resource. An estimate of the total tons and grade of a mineral deposit defined by surface sampling, drilling and occasionally underground sampling of historic diggings when available.

Reverse circulation drilling. A less expensive form of drilling than coring that does not allow for the recovery of a tube or core of rock. The material is brought up from depth as a series of small chips of rock that are then bagged and sent in for analysis. This is a quicker and cheaper method of drilling but does not give as much information about the underlying rocks.

Rhyolite plug dome. A domal feature formed by the extrusion of viscous quartz-rich volcanic rocks.

Scintillometer survey. A survey of radioactive minerals using a scintillometer, a hand-held, highly accurate measuring device.

Scoping Study. A detailed study of the various possible methods to mine a deposit.

Silicic dome. A convex landform created by extruding quartz-rich volcanic rocks.

Stope(s). An excavation from which ore has been removed from sub-vertical openings above or below levels.

Tertiary. That portion of geologic time that includes abundant volcanism in the western U.S.

Trenching. A cost-effective way of examining the structure and nature of mineral ores beneath gravel cover. It involves digging long usually shallow trenches in carefully selected areas to expose unweathered rock and allow sampling.

Volcanic center. Origin of major volcanic activity

Volcanoclastic. Coarse, unsorted sedimentary rock formed from erosion of volcanic debris.

Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking information. Forward-looking information includes statements relating to future actions, prospective products, future performance or results of current or anticipated products, sales and marketing efforts, costs and expenses, interest rates, outcome of contingencies, financial condition, results of operations, liquidity, business strategies, cost savings, objectives of management of Patriot Gold Corp. (hereinafter referred to as the “Company,” “Patriot Gold” or “we”) and other matters. Forward-looking information may be included in this Annual Report on Form 10-K or may be incorporated by reference from other documents filed with the Securities and Exchange Commission (the “SEC”) by the Company. One can find many of these statements by looking for words including, for example, “believes,” “expects,” “anticipates,” “estimates” or similar expressions in this Annual Report on Form 10-K or in documents incorporated by reference in this Annual Report on Form 10-K.

The Company has based the forward-looking statements relating to the Company’s operations on management’s current expectations, estimates and projections about the Company and the industry in which it operates. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that we cannot predict. In particular, we have based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, the Company’s actual results may differ materially from those contemplated by these forward-looking statements. Any differences could result from a variety of factors, including, but not limited to general economic and business conditions, competition, and other factors. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events.

PART I

The following should be read in conjunction with the audited consolidated financial statements and the notes thereto included elsewhere in this Form 10-K. Throughout this document, we make statements that are classified as "forward-looking." Please refer to the "Forward-Looking Statements" section above for an explanation of these types of statements.

Item 1. Description of Business

We are engaged in natural resource exploration and acquiring, exploring, and developing natural resource properties. Currently we are undertaking exploration and development programs in Nevada.

Development of Business

We were incorporated in the State of Nevada on November 30, 1998. In June 2003, the Company filed Amended and Restated Articles of Incorporation with the Secretary of State of Nevada changing its name to Patriot Gold Corp. and moving the Company into its current business of natural resource exploration and mining. On June 17, 2003, the Company adopted a new trading symbol - PGOL- to reflect the name change. The Company has been in the resource exploration and mining business since June 2003.

On April 16, 2010, we caused the incorporation of our wholly owned subsidiary, Provex Resources Inc. ("Provex") under the laws of Nevada.

On April 16, 2010, the Company entered into an Assignment Agreement with Provex to assign the exclusive option to an undivided right, title and interest in the Bruner and Vernal properties and the Bruner Expansion property to Provex. Pursuant to the Assignment Agreements, Provex assumed the rights, and agreed to perform all of the duties and obligations, of the Company arising under the Bruner and Vernal Property Option Agreement and the Bruner Property Expansion Option Agreement. Provex's only assets are the aforementioned agreements and it does not have any liabilities. On May 28, 2010, Provex entered into an exclusive right and option agreement with Canamex Resources Corp. ("Canamex") whereby Canamex could earn up to 75% in the Bruner and the Bruner Property Expansion. Canamex agreed to spend an aggregate total of US \$6 million on exploration and related expenditures over the ensuing seven years whereupon Provex agreed to grant the right and option to earn a vested seventy percent (70%) and an additional five percent (5%) upon delivery of a bankable feasibility study.

On February 28, 2011, the Company entered into an Exploration and Option to Enter Joint Venture Agreement with Idaho State Gold Company, LLC, ("ISGC") whereby the Company granted the option and right to earn a vested seventy percent (70%) interest in the property and the right and option to form a joint venture for the management and ownership of the property called the Moss Mine Property, Mohave County, Arizona (the "Moss Property" or "Moss Mine Property"). Upon execution of the agreement ISGC paid the Company \$500,000 USD and agreed to spend an aggregate total of \$8,000,000 USD on exploration and related expenditures over the ensuing five years. Subsequent to exercise of the earn-in, ISGC and the Company agreed to form a 70/30 joint venture.

In March 2011, ISGC transferred its rights to the Exploration and Option to Enter Joint Venture Agreement dated February 28, 2011, to Elevation Gold Mining Corporation ("Elevation"), formerly known as Northern Vertex Capital Inc.

On May 12, 2016, the Company entered into a material definitive Agreement for Purchase and Sale of Mining Claims and Escrow Instructions (the "Purchase and Sale Agreement") with Golden Vertex Corp., an Arizona corporation ("Golden Vertex," a wholly-owned Subsidiary of Northern Vertex) whereby Golden Vertex agreed to purchase the Company's remaining 30% working interest in the Moss Gold/Silver Mine for C\$1,500,000 (the "Purchase Price") plus a 3% net smelter return royalty. Specifically, the Company conveyed all of its right, title and interest in those certain patented and unpatented lode mining claims situated in the Oatman Mining District, Mohave County, Arizona (the "Claims") together with all extralateral and other associated rights, water rights, tenements, hereditaments and appurtenances belonging or appertaining thereto, and all rights-of-way, easements, rights of access and ingress to and egress from the Claims appurtenant thereto and in which Seller had any interest (collectively, the "Property"). The Purchase Price consisted of C\$1,200,000 in cash payable at closing and the remaining C\$300,000 was paid by the issuance of Northern Vertex common shares to the Company valued at \$0.35 (857,140 shares), issued pursuant to the terms and provisions of an investment agreement (the "Investment Agreement") entered between the Company and Northern Vertex contemporaneous to the Purchase and Sale Agreement.

On April 25, 2017, Provex and Canamex Resources Corp. (“Buyer”) entered into a purchase and sale agreement whereby Canamex Resources purchased Patriot Gold's 30 percent working interest in the Bruner gold/silver mine project for US\$1.0 million cash, and the retention of a net smelter return (“NSR”) royalty on the Bruner property including any claims acquired within a two-mile area of interest around the existing claims. Additionally, the Buyer has the option to buy-down half of the NSR royalty retained by Patriot for US\$5 million any time during a five-year period following closing of the purchase and sale agreement. The Company recognized a gain on sale of mineral properties of \$1,000,000 from the sale of the Bruner in its Consolidated Statement of Operations.

On May 23, 2017, the Company caused the incorporation of its wholly owned subsidiary, Patriot Gold Canada Corp (“Patriot Canada”), under the laws of British Columbia, Canada.

On January 17, 2018, the Company designated 13,500,000 shares of the authorized and unissued preferred stock of the company as “Series A Preferred Stock” by filing an Amended and Restated Certificate of Designation with the Secretary of State of Nevada.

On May 7, 2018, the Company caused the name change of our wholly owned subsidiary, Provex Resources Inc. to Goldbase, Inc. (“Goldbase”) under the laws of Nevada.

On June 27, 2019, the Company approved a change in its fiscal year end from May 31 to December 31.

Business Operations

We are a natural resource exploration and mining company which acquires, explores, and develops natural resource properties. Our primary focus in the natural resource sector is gold.

The search for valuable natural resources as a business is extremely risky. We can provide investors with no assurance that the properties we have either optioned or purchased contain commercially exploitable reserves. Exploration for mineral reserves is a speculative venture involving substantial risk. Few properties that are explored are ultimately developed into producing commercially feasible reserves. Problems such as unusual or unexpected formations and other conditions are involved in mineral exploration and often result in unsuccessful exploration efforts. In such a case, we would be unable to complete our business plan and any money spent on exploration would be lost.

Natural resource exploration and development requires significant capital and our assets and resources are limited. Therefore, we anticipate participating in the natural resource industry through the selling or partnering of our properties, the purchase of small interests in producing properties, the purchase of properties where feasibility studies already exist or by the optioning of natural resource exploration and development projects. To date, we have two gold projects located in the southwest United States. In May 2016, we sold our interest in the Moss Mine project and retained a royalty. In April 2017, we sold our interest in the Bruner project and retained a royalty. Our current project inventory consists of the Vernal project and the Windy Peak project.

Financing

There were no financing activities undertaken by the Company during the fiscal year ended December 31, 2021. Due to the commencement of the royalties from the Moss mine, management estimates that the Company will not require additional funding for the Company's planned operations for the next twelve months.

Competition

The mineral exploration industry, in general, is intensely competitive and even if commercial quantities of ore are discovered, a ready market may not exist for sale of same. Numerous factors beyond our control may affect the marketability of any substances discovered. These factors include market fluctuations, the proximity and capacity of natural resource markets and processing equipment, government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in our not receiving an adequate return on invested capital.

Compliance with Government Regulation and Regulatory Matters

Mining Control and Reclamation Regulations

The Surface Mining Control and Reclamation Act of 1977 ("SMCRA") is administered by the Office of Surface Mining Reclamation and Enforcement ("OSM") and establishes mining, environmental protection and reclamation standards for all aspects of U.S. surface mining, as well as many aspects of underground mining. Mine operators must obtain SMCRA permits and permit renewals for mining operations from the OSM. Although state regulatory agencies have adopted federal mining programs under SMCRA, the state becomes the regulatory authority. States in which we expect to have active future mining operations have achieved primary control of enforcement through federal authorization.

SMCRA permit provisions include requirements for prospecting including mine plan development, topsoil removal, storage and replacement, selective handling of overburden materials, mine pit backfilling and grading, protection of the hydrologic balance, subsidence control for underground mines, surface drainage control, mine drainage and mine discharge control and treatment and re-vegetation.

The U.S. mining permit application process is initiated by collecting baseline data to adequately characterize the pre-mining environmental condition of the permit area. We will develop mine and reclamation plans by utilizing this geologic data and incorporating elements of the environmental data. Our mine and reclamation plans incorporate the provisions of SMCRA, state programs and complementary environmental programs which impact mining. Also included in the permit application are documents defining ownership and agreements pertaining to minerals, oil and gas, water rights, rights of way and surface land and documents required of the OSM's Applicant Violator System, including the mining and compliance history of officers, directors and principal stockholders of the applicant.

Once a permit application is prepared and submitted to the regulatory agency, it goes through a completeness and technical review. Public notice of the proposed permit is given for a comment period before a permit can be issued. Some SMCRA mine permit applications take over a year to prepare, depending on the size and complexity of the mine and often take six months to two years to be issued. Regulatory authorities have considerable discretion in the timing of the permit issuance and the public has the right to comment on, and otherwise engage in, the permitting process including public hearings and intervention by the courts.

Surface Disturbance

All mining activities governed by the Bureau of Land Management ("BLM") require reasonable reclamation. The lowest level of mining activity, "casual use," is designed for the miner or weekend prospector who creates only negligible surface disturbance (for example, activities that do not involve the use of earth-moving equipment or explosives may be considered casual use). These activities would not require either a notice of intent to operate or a plan of operation. For further information regarding surface management terms, please refer to 43 CFR Chapter II Subchapter C, Subpart 3809.

The second level of activity, where surface disturbance is 5 acres or less per year, requires a notice advising the BLM of the anticipated work 15 days prior to commencement. This notice must be filed with the appropriate field office. No approval is needed although bonding is required. State agencies must be notified to ensure all requirements are met.

For operations involving more than 5 acres total surface disturbance on lands subject to 43 CFR 3809, a detailed plan of operation must be filed with the appropriate BLM field office. Bonding is required to ensure proper reclamation. An Environmental Assessment (EA) is to be prepared for all plans of operation to determine if an Environmental Impact Statement is required. A National Environmental Policy Act review is not required for casual use or notice level operations unless those operations involve occupancy as defined by 43 CFR 3715. Most occupancies at the casual use and notice level in Arizona are covered by a programmatic EA.

An activity permit is required when use of equipment is utilized for the purpose of land stripping, earthmoving, blasting (except blasting associated with an individual source permit issued for mining), trenching or road construction.

Future legislation and regulations are expected to become increasingly restrictive and there may be more rigorous enforcement of existing and future laws and regulations and we may experience substantial increases in equipment and operating costs and may experience delays, interruptions or termination of operations. Failure to comply with these laws and regulations may result in the assessment of administrative, civil and criminal fines or penalties, the acceleration of cleanup and site restoration costs, the issuance of injunctions to limit or cease operations and the suspension or revocation of permits and other enforcement measures that could have the effect of limiting production from our future operations.

Trespassing

The BLM will prevent abuse of public lands while recognizing valid rights and uses under the mining laws. The BLM will take appropriate action to eliminate invalid uses, including unauthorized residential occupancy. The Interior Board of Land Appeals (IBLA) has found that a claim may be declared void by the BLM when it has been located and held for purposes other than the mining of minerals. The issuance of a notice of trespass may occur if an unpatented claim/site is:

- (1) used for a home site, place of business, or for other purposes not reasonably related to mining or milling activities;
- (2) used for the mining and sale of leasable minerals or mineral materials, such as sand, gravel and certain types of building stone; or
- (3) located on lands that for any reason have been withdrawn from location after the effective date of the withdrawal.

Trespass actions are taken by the BLM Field Office.

Environmental Laws

We may become subject to various federal and state environmental laws and regulations that will impose significant requirements on our operations. The cost of complying with current and future environmental laws and regulations and our liabilities arising from past or future releases of, or exposure to, hazardous substances, may adversely affect our business, results of operations or financial condition. In addition, environmental laws and regulations, particularly relating to air emissions, can reduce our profitability. Numerous federal and state governmental permits and approvals are required for mining operations. When we apply for these permits or approvals, we may be required to prepare and present to federal or state authorities data pertaining to the effect or impact that a proposed exploration for, or production or processing of, may have on the environment. Compliance with these requirements can be costly and time-consuming and can delay exploration or production operations. A failure to obtain or comply with permits could result in significant fines and penalties and could adversely affect the issuance of other permits for which we may apply.

Clean Water Act

The U.S. Clean Water Act and corresponding state and local laws and regulations affect mining operations by restricting the discharge of pollutants, including dredged or fill materials, into waters of the United States. The Clean Water Act provisions and associated state and federal regulations are complex and subject to amendments, legal challenges and changes in implementation. As a result of court decisions and regulatory actions, permitting requirements have increased and could continue to increase the cost and time we expend on compliance with water pollution regulations. These and other regulatory requirements, which have the potential to change due to legal challenges, Congressional actions and other developments increase the cost of, or could even prohibit, certain current or future mining operations. Our operations may not always be able to remain in full compliance with all Clean Water Act obligations and permit requirements. As a result, we may be subject to fines, penalties or changes to our operations.

Clean Water Act requirements that may affect our operations include the following:

Section 404

Section 404 of the Clean Water Act requires mining companies to obtain U.S. Army Corps of Engineers (“ACOE”) permits to place material in streams for the purpose of creating slurry ponds, water impoundments, refuse areas, valley fills or other mining activities.

Our construction and mining activities, including our surface mining operations, will frequently require Section 404 permits. ACOE issues two types of permits pursuant to Section 404 of the Clean Water Act: nationwide (or “general”) and “individual” permits. Nationwide permits are issued to streamline the permitting process for dredging and filling activities that have minimal adverse environmental impacts. An individual permit typically requires a more comprehensive application process, including public notice and comment; however, an individual permit can be issued for ten years (and may be extended thereafter upon application).

The issuance of permits to construct valley fills and refuse impoundments under Section 404 of the Clean Water Act, whether general permits commonly described as the Nationwide Permit 21 (NWP 21) or individual permits, has been the subject of many recent court cases and increased regulatory oversight. The results may materially increase our permitting and operating costs, permitting delays, suspension of current operations and/or prevention of opening new mines.

Employees

Currently, our officers and directors provide planning and organizational services for us on an as-needed basis, and our administrative and office staff also works on an as-needed basis. Some of the field work is completed by service providers and/or exploration partners. All of the operations, technical and otherwise, are overseen by the directors of the Company.

Subsidiaries

On April 16, 2010, we caused the incorporation of our wholly owned subsidiary, Provex Resources, Inc., under the laws of Nevada. On April 16, 2010, the Company entered into an Assignment Agreement to assign the exclusive option to an undivided right, title and interest in the Bruner and Vernal property; and the Bruner Property Expansion to Provex. Pursuant to the Assignment Agreement, Provex assumed the rights, and agreed to perform all of the duties and obligations, of the Company arising under the Bruner and Vernal Property Option Agreement; and the Bruner Property Expansion Option Agreement. Provex’s only assets are the aforementioned agreements and it does not have any liabilities.

On May 28, 2010, Provex Resources, Inc. entered into an exclusive right and option agreement with Canamex Resources Corp. (“Canamex”) whereby Canamex could earn up to a 75% undivided interest in the Bruner and the Bruner Property Expansion. Canamex agreed to spend an aggregate total of US \$6 million on exploration and related expenditures over the ensuing seven years whereupon the Company agreed to grant the right and option to earn a vested seventy percent (70%) and an additional five percent (5%) upon delivery of a bankable feasibility study.

On April 25, 2017, Provex and Canamex Resources Corp. (“Buyer”) entered into a purchase and sale agreement whereby Canamex Resources purchased our 30-per-cent working interest in the Bruner gold/silver mine project for US\$1.0 million cash, and the retention of a net smelter return (“NSR”) royalty on the Bruner property including any claims acquired within a two-mile area of interest around the existing claims. Additionally, the Buyer has the option to buy-down half of the NSR royalty for US\$5 million any time during a five-year period following closing of the purchase and sale agreement.

On May 23, 2017, the Company caused the incorporation of its wholly owned subsidiary, Patriot Gold Canada Corp (“Patriot Canada”), under the laws of British Columbia, Canada.

On May 7, 2018, the Company caused the name change of our wholly owned subsidiary, Provex Resources Inc. to Goldbase, Inc. (“Goldbase”) under the laws of Nevada.

On June 27, 2019, the Company approved a change in its fiscal year end from May 31 to December 31.

Item 1A. Risk Factors

Factors that May Affect Future Results

1. We may require additional funds to achieve our business objectives and any inability to obtain funding will impact our business.

We may incur operating losses in future periods because there are expenses associated with the acquisition, exploration and development of natural resource properties. We may need to raise additional funds in the future through public or private debt or equity sales to fund our future operations and fulfill contractual obligations. These financings may not be available when needed, and even if these financings are available, they may be on terms that we deem unacceptable or are materially adverse to your interests with respect to dilution of book value, dividend preferences, liquidation preferences or other terms. Any inability to obtain financing could have an adverse effect on our ability to implement our business objectives and as a result, could require us to diminish or suspend our operations or cause a materially adverse effect on our business. Obtaining additional financing would be subject to a number of factors, including the market prices for gold, silver and other minerals. These factors may make the timing, amount, terms or conditions of additional financing unavailable to us.

2. Because our Directors may serve as officers and directors of other companies engaged in mineral exploration, a potential conflict of interest could negatively impact our ability to acquire properties to explore and to run our business.

Our Directors and Officers may work for other mining and mineral exploration companies. Due to time demands placed on our Directors and Officers, and due to the competitive nature of the exploration business, the potential exists for conflicts of interest to occur from time to time that could adversely affect our ability to conduct our business. The Officers and Directors’ employment and affiliations with other entities limit the amount of time they can dedicate to us. Also, our Directors and Officers may have a conflict of interest in helping us identify and obtain the rights to mineral properties because they may also be considering the same properties. To mitigate these risks, we work with several technical consultants in order to ensure that we are not overly reliant on any one of our Officers and Directors to provide us with technical services. However, we cannot be certain that a conflict of interest will not arise in the future. To date, there have not been any conflicts of interest between any of our Directors or Officers and the Company.

3. Because of the speculative nature of exploration and development, there are substantial risks in our business model.

The search for valuable natural resources as a business is extremely risky. We can provide investors with no assurance that the properties we own contain commercially exploitable reserves. Exploration for natural resources is speculative and involves risk. Few properties that are explored are ultimately developed into producing commercially feasible reserves. Problems such as unusual or unexpected formations and other conditions are involved in mineral exploration and often result in unsuccessful exploration efforts. In such a case, we would be unable to complete our business plan.

4. Because of the unique difficulties and uncertainties inherent in mineral exploration and the mining business, we face risks.

Potential investors should be aware of the difficulties normally encountered by mineral exploration companies. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration of the mineral properties that we plan to undertake. These potential problems include, but are not limited to, unanticipated problems relating to exploration and additional costs and expenses that may exceed current estimates. In addition, the search for valuable minerals involves numerous hazards which pose financial risks.

5. Because our operating expenses may vary, as may our revenues, profitability may be inconsistent.

We anticipate that our expenses may vary and so may our revenues. Therefore, any profitability we may have could be inconsistent. There is little history upon which to base any assumption as to the likelihood that we will be consistently profitable, and we can provide investors with no assurance that we will generate consistent revenues or consistently achieve profitable operations.

6. Because access to our mineral claims may be restricted by inclement weather, we may be delayed in our exploration.

Access to our mineral properties may be restricted through some of the year due to weather in the area. As a result, any attempt to test or explore the property is largely limited to the times when weather permits such activities. These limitations can result in significant delays in exploration efforts.

7. Because of the speculative nature of exploration of mineral properties, there is substantial risk.

The search for valuable minerals as a business is extremely risky. Exploration for minerals is a speculative venture involving substantial risk. The expenditures to be made by us in the exploration of the mineral claims may not always result in the discovery of economic mineral deposits. Problems such as unusual or unexpected formations and other conditions are involved in mineral exploration and often result in unsuccessful exploration efforts.

8. Because of the inherent dangers involved in mineral exploration, there is liability risk.

The search for valuable minerals involves numerous hazards. As a result, there is potential liability for hazards, including pollution, cave-ins and other hazards against which we cannot insure or against which we may elect not to insure.

9. We are heavily dependent on our CEO and President.

Our success depends heavily upon the continued contributions of our CEO and President, whose knowledge, leadership and technical expertise would be difficult to replace. Our success is also dependent on our ability to retain and attract experienced engineers, geoscientists and other technical and professional staff. We do not maintain key man insurance. If we were to lose our CEO and President, our ability to execute our business plan could be harmed.

Risks Related to Legal Uncertainties and Regulations

10. As we undertake exploration and development of our mineral claims, we will be subject to compliance with government regulation which may increase the anticipated cost of our exploration programs.

There are several governmental regulations that materially restrict mineral exploration. We will be subject to the federal, state and local laws as we carry out our exploration program. We may be required to obtain work permits, post bonds and perform remediation work for any physical disturbance to the land in order to comply with these laws. While our planned exploration and development program budgets for regulatory compliance, there is a risk that new regulations could increase our costs of doing business and prevent us from carrying out our exploration and development programs.

Public Health Threats Risk

24. Our financial and operating performance may be adversely affected by global public health threats, including the recent outbreak of the novel coronavirus (COVID-19).

Public health threats, such as the coronavirus (COVID-19), influenza and other highly communicable diseases or viruses could adversely impact our operations and cause disruptions in the natural resource exploration and mining industry. If the effect of the coronavirus (COVID-19) is ongoing, economic conditions and the economic slow-down resulting from COVID-19 and the intentional governmental responses to the virus may also adversely affect the market price of our common shares.

Item 1B. Unresolved Staff Comments

There are no unresolved staff comments.

Item 2. Description of Properties.

We do not lease or own any real property for our corporate offices. We currently maintain our corporate office on a month-to-month basis at 401 Ryland St, Suite 180, Reno, NV 89502. Management believes that our office space is suitable for our current needs.

Our property holdings as of December 31, 2021 consist of the Vernal Property and the Windy Peak Property

Vernal Project

Map showing the location of our Vernal Project located in Central Western Nevada.

Acquisition of Interests - Vernal Project

Pursuant to a Property Option Agreement (the “BV Agreement”), dated as of July 25, 2003, with MinQuest, Inc., a Nevada Company (“MinQuest”), we acquired the option to earn a 100% interest in the Bruner and Vernal mineral exploration properties located in Nevada. Together, these two properties originally consisted of 28 unpatented mining claims on a total of 560 acres in the northwest trending Walker Lane located in western central Nevada.

To date, the Company has paid the option payments and made the expenditures necessary to satisfy the requirements of the BV Agreement and 100% interest in these two properties was therefore transferred to Patriot, subject to MinQuest retaining a 3% royalty. All mining interests in the properties are subject to MinQuest retaining a 3% royalty of the aggregate proceeds from any smelter or other purchaser of any ores, concentrates, metals or other material of commercial value produced from the property, minus the cost of transportation of the ores, concentrates or metals, including related insurance, and smelting and refining charges. Pursuant to the BV Agreement, we have a one-time option to purchase a portion of MinQuest’s royalty interest at a rate of \$1,000,000 for each 1%. We may exercise our option 90 days following completion of a bankable feasibility study of the Bruner and Vernal properties, which, as it relates to a mineral resource or reserve, is an evaluation of the economics for the extraction (mining), processing and marketing of a defined ore reserve that would justify financing from a banking or financing institution for putting the mine into production.

On April 16, 2010, the Company entered into an Assignment Agreement with its wholly owned subsidiary, Provex Resources, Inc., (now Goldbase, Inc.) a Nevada Company, to assign the exclusive option to an undivided right, title and interest in the Bruner, Bruner Expansion and Vernal properties to Provex. Pursuant to the Agreement, Provex assumed the rights, and agreed to perform all of the duties and obligations, of the Company arising under the original property option agreements.

In April 2017, Canamex Resources (“Buyer”) purchased our interest in the Bruner properties for US\$1.0 million cash, and we retained a two percent net smelter return royalty on the Bruner properties including any claims acquired within a two-mile area of interest around the existing claims. Additionally, the Buyer has the option to buy-down half of the NSR royalty retained by Patriot for US\$5 million any time during a five-year period following closing of the purchase and sale agreement.

Description and Location of the Vernal Property

The Vernal Property is located approximately 140 miles east-southeast of Reno, Nevada on the west side of the Shoshone Mountains. Access from Fallon, the closest town of any size, is by 50 miles of paved highway and 30 miles of gravel roads. The Company holds the property via 12 unpatented mining claims (approximately 248 acres). The Company has a 100% interest in the Vernal property, subject to an existing royalty.

Exploration History of the Vernal Property

Historical work includes numerous short adits constructed on the Vernal Property between 1907 and 1936. There appears to have been little or no mineral production.

The Vernal Property is underlain by a thick sequence of Tertiary age rhyolitic volcanic rocks including tuffs, flows and intrusives. A volcanic center is thought to underlie the district, with an intruding rhyolite plug dome (a domal feature formed by the extrusion of viscous quartz-rich volcanic rocks) thought to be closely related to mineralization encountered by the geologists of Amselco, the U.S. subsidiary of a British company, who explored the Vernal Property back in the 1980’s, and who in 1983 mapped, sampled and drilled the Vernal Property. Amselco has not been involved with the Vernal Property over the last 20 years and is not associated with our option on the Vernal Property or the exploration work being done. A 225-foot-wide zone of poorly outcropping quartz stockworks (a multi-directional quartz veinlet system) and larger veining trends exist northeast from the northern margin of the plug. The veining consists of chalcedony containing 1-5% pyrite. Clay alteration of the host volcanics is strong. Northwest trending veins are also present but very poorly exposed. Both directions carry gold values. Scattered vein float is found over the plug. The most significant gold values in rock chips come from veining in tuffaceous rocks north of the nearly east-west contact of the plug. This area has poor exposure, but sampling of old dumps and surface workings show an open-ended gold anomaly that measures 630 feet by 450 feet.

The Vernal Property claims presently do not have any known mineral reserves. The property that is the subject of our mineral claims is undeveloped and does not contain any commercial scale open-pits. Numerous shallow underground excavations occur within the central portion of the property. No reported historic production is noted for the property. There is no mining plant or equipment located on the property that is the subject of the mineral claim. Currently, there is no power supply to the mineral claims. Although drill holes are present within the property boundary, there is no known drilled reserve on our claims.

In July 2003 and again in June 2017, members of our Board of Directors and geology team made an onsite inspection of the Vernal property. Mapping (the process of laying out a grid on the land for area identification where samples are taken) and sampling (the process of taking small quantities of soil and rock for analysis) have been completed. In March 2005, the Company initiated the process to secure the proper permits for trenching and geochemical sampling from the U.S. Forest Service.

Our exploration of the Vernal Property to date has consisted of geologic mapping, trenching and rock chip geochemical sampling. The Board of Directors approved a budget of approximately \$55,000 (including the refundable bond of \$900) for the Vernal property. An exploration program was conducted in November 2008. The program consisted of 200 feet of trenching, sampling and mapping, and opening, mapping and sampling of an underground workings consisting of approximately 275 feet of workings. The Company is continuing to evaluate the Vernal Property.

In September 2017, we released a National Instrument 43-101 Technical Report on the Vernal.

Planned Exploration

The Company's current objectives are to assess the geological merits and if warranted and feasible establish an exploration program to identify the potential for economically viable mineralization. The cost of an exploration plan has not yet been determined therefore estimated exploration expenditures are not available at this time. The Company recognizes that the Vernal Property is an early-stage exploration opportunity and there are currently no proven or probable reserves.

Windy Peak Property

Acquisition of Interest

In May 2015, after a review of historical records and information available regarding a potential mineral property interest in Churchill County, Nevada, the Company acquired the Windy Peak Property, (referred to herein as the "Windy Peak Property," "Windy Peak" or the "Property"). This early-stage exploration project was secured through the completion of an Assignment and Assumption Agreement. Windy Peak has been visited by directors and technical staff of the Company several times in 2017, 2018, 2019, and 2020.

The Windy Peak Property Location in Nevada

Description and Location of the Windy Peak Property

The Windy Peak Property consists of 114 unpatented mineral claims covering approximately 2,337 contiguous acres, 3 miles NNE of the Bell Mountain and 7 miles east of the Fairview mining district in southwest Nevada. Windy Peak is approximately 45 miles southeast of Fallon and 5 ½ miles south of Middlegate. The Property is a contiguous claim block. Access to the project area is by paved highway, followed by a short stretch of gravel road.

Access to the Windy Peak Property is from U.S. Highway 50, thence south via Highway 361 to an unmarked dirt road that heads west along the south side of an unnamed wash referred to as Windy Wash. The dirt road exits Highway 95 near the border of Sections 27 & 34. The Bell Mountain quadrangle (dated 1972) shows an older dirt road that follows the floor of the wash. About 2 miles along the dirt road, trenching and cutting of trails to access various portions of the Property have extensively disturbed the hill. The dirt road is in good condition, however the steeper trails near Windy Peak require a 4-wheel-drive for access. There is no plant, equipment, water source nor power currently on site. Power could be provided by portable diesel-powered generators. Non potable water may be source able on site for drilling, mining and milling purposes.

The Property claims are held as unpatented federal land claims administered under the Department of Interior, BLM. In order to acquire an unpatented mineral claim, the land must be open to mineral entry. Federal law specifies that a claim must be located or “staked” and site boundaries be distinctly and clearly marked to be readily identifiable on the ground in addition to filing the appropriate state and or federal documentation such as Location Notice, Claim Map, Notice of Non-liability for Labor and Materials Furnished, Notice of Intent to Hold Mining Claims, Maintenance Fee Payment and fees to secure the claim. The State may also establish additional requirements regarding the manner in which mining claims and sites are located and recorded. An unpatented mining claim on U.S. government lands establishes a claim to the locatable minerals (also referred to as stakeable minerals) on the land and the right of possession solely for mining purposes. No title to the land passes to the claimant. If a proven economic mineral deposit is developed, provisions of federal mining laws permit owners of unpatented mining claims to patent (to obtain title to) the claim. The Property surface estate and mineral rights are federally owned and subject to BLM regulations. None of the Property claims have been legally surveyed. Although our legal access to unpatented Federal claims cannot be denied, staking or operating a mining claim does not provide the claim holder exclusive rights to the surface resources (unless a right was determined under Public Law 84-167), establish residency or block access to other users. Regulations managing the use and occupancy of the public lands for development of locatable mineral deposits by limiting such use or occupancy to that which is reasonably incident is found in 43 CFR 3715. These Regulations apply to public lands administered by the BLM.

Annual maintenance fees paid to the BLM and recording fees must be paid to the respective county on or before September 1 of each year to keep the claims in good standing, provided the filings are kept current these claims can be kept in perpetuity.

Past Exploration in the Windy Peak Area

Fairview District

The Windy Peak area has been considered to be part of, or at least an extension of, the Fairview District, which, is located on Fairview Peak about 6 miles WNW of Hill 6483. Both areas are within the Fairview Peak caldera, but their geochemical differences indicate they are not related.

Windy Peak

Published information regarding the Windy Peak area refers to a small leach pad at the Cye Cox prospect at Hill 6483. This exploration was located adjacent to but not on our northern claim block. According to historical reports, an initial 6 claims (Red Star) were staked by Cye Cox of Fallon from 1945 to 1969. Subsequent lessees staked an additional 79 Red Star claims from 1978 to 1979. Cye Cox together with Pete Erb and "Pine Nut" Forbush discovered high-grade gold on the south side of Hill 6483 in the Windy fault in 1970. The presence of old timbers near a mostly-covered hole at the western trench (about mile west of the Windy adit) indicates that they also did some work there. After further examination a plant with a 6-8" grizzly and trommel (21' x 30") was setup and operated.

Exploration on and around the property has included geologic mapping, rock chip sampling, sagebrush biogeochemistry, VLF-EM, VLF-resistivity and magnetic geophysical surveys, and reverse circulation drilling. Various companies, including Terraco Gold Corp, Solitario Resources, Red Star Gold, Pegasus Gold Corp, Rio Tinto, and Kennecott, have conducted drilling on and around the property, with more than 70 holes drilled. Limited small-scale mining activities have been conducted by various private parties since the 1940's, including a small glory hole mined during the 1970's centered on Hill 6483. Previous work on the property included many vertical reverse-circulation drill holes, which are not suited to testing the high-angle structures known to host the gold-bearing veins. Some of the holes previously drilled are inferred to be too shallow to properly test targets. The Company believes the high-grade structurally hosted gold potential on the property has not been tested by previous drilling programs.

Geology of the Windy Peak Property Area

Review of late Tertiary epithermal gold-silver deposits in the northern Great Basin, revealed that most deposits are spatially and temporally related to two magmatic assemblages: bimodal basalt-rhyolite and western andesite. The Fairview district, including the Bell Mine, is related to a third, minor magmatic assemblage, the late Eocene to early Miocene caldera complexes of the interior andesite-rhyolite assemblage. This assemblage hosts the giant late-Oligocene Round Mountain deposit plus smaller deposits in the Atlanta, Fairview, Tuscarora, and Wonder mining districts. The youngest rocks in the interior andesite-rhyolite assemblage are in the Fairview and Tonopah mining districts. Recent studies have shown that the magmatism associated with the interior andesite rhyolite assemblage had a close spatial and temporal association with crustal extension, and that these magmas may have been formed by partial mixing of mantle-derived basal with crustal melt.

Current Exploration

The Company has been conducting an ongoing exploration program to assess the potential for economically viable mineralization. The exploration program has been permitted by the BLM. The Company initiated drilling in the summer of 2018, and this program extended into October 2018. Further drilling was completed in December 2019, and again in January 2021. Exploration on the project is ongoing. The Company recognizes that Windy Peak is an early-stage exploration opportunity and there are currently no proven or probable reserves.

Rainbow Mountain Property

Acquisition of Interest

In autumn of 2018, after conducting initial reconnaissance of the Rainbow Mountain, the Company acquired the Rainbow Mountain Property, (referred to herein as the "Rainbow Mountain Property," "Rainbow Mountain" or the "Property"). This early-stage exploration project was secured through staking and filing the associated paperwork and fees with the BLM and County. Rainbow Mountain has been visited by directors and technical staff of the Company several times in 2018, 2019, and 2020.

The Rainbow Mountain Property Location in Nevada

Description and Location of the Rainbow Mountain Property

The Rainbow Mountain gold project consisted of 81 unpatented lode claims totaling approximately 1,620 contiguous acres, located approximately 23 km southeast of Fallon, in the state of Nevada. Access to the project area is by paved highway, followed by a short stretch of gravel road.

The Property claims were held as unpatented federal land claims administered under the Department of Interior, BLM. In order to acquire an unpatented mineral claim, the land must be open to mineral entry. Federal law specifies that a claim must be located or “staked” and site boundaries be distinctly and clearly marked to be readily identifiable on the ground in addition to filing the appropriate state and or federal documentation such as Location Notice, Claim Map, Notice of Non-liability for Labor and Materials Furnished, Notice of Intent to Hold Mining Claims, Maintenance Fee Payment and fees to secure the claim. The State may also establish additional requirements regarding the manner in which mining claims and sites are located and recorded. An unpatented mining claim on U.S. government lands establishes a claim to the locatable minerals (also referred to as stakeable minerals) on the land and the right of possession solely for mining purposes. No title to the land passes to the claimant. If a proven economic mineral deposit is developed, provisions of federal mining laws permit owners of unpatented mining claims to patent (to obtain title to) the claim. The Property surface estate and mineral rights are federally owned and subject to BLM regulations. None of the Property claims have been legally surveyed. Although our legal access to unpatented Federal claims cannot be denied, staking or operating a mining claim does not provide the claim holder exclusive rights to the surface resources (unless a right was determined under Public Law 84-167), establish residency or block access to other users. Regulations managing the use and occupancy of the public lands for development of locatable mineral deposits by limiting such use or occupancy to that which is reasonably incident is found in 43 CFR 3715. These Regulations apply to public lands administered by the BLM.

Annual maintenance fees paid to the BLM and recording fees must be paid to the respective county on or before September 1 of each year to keep claims in good standing, and provided the filings are kept current such claims can be kept in perpetuity.

Geology of the Rainbow Mountain Property Area

The claim area roughly encompassed nearly the full extent of Rainbow Mountain, and specifically a prominent zone of northeast-striking faults which transect the central part of Rainbow Mountain. This complex fault zone involves three discrete Tertiary volcanic units comprised of basalt, dacite, and olivine basalt. Individual fault traces are well exposed locally and are often coincident with the contacts between the individual lithologic units. Many of the fault traces exhibit prominent fault breccia and hydrothermal breccia, and surface samples of this material returned anomalous gold and silver values up to 0.807 ppm and 1.6 ppm, respectively.

Based on observations recorded during field reconnaissance, individual hydrothermal veins along the faulted contacts range in thickness up to 1.5 m, with associated strike lengths of up to 1.7 km. The Company postulates that this locally intense faulting, in conjunction with the associated anomalous assay values, is suggestive of a potential epithermal vein system within the footwall of the greater Rainbow Fault zone.

Current Exploration

The Company conducted an exploration program to assess the potential for economically viable mineralization. The exploration program was permitted by the BLM. The Company initiated drilling in December of 2020. In light of the assay results of the drilling program, the Company opted to not renew the claims associated with the Rainbow Mountain project.

Item 3. Legal Proceedings

There are no pending legal proceedings involving the Company or in which any director, officer or affiliate of the Company, any owner of record or beneficially of more than 5% of any class of voting securities of the Company, or security holder is a party adverse to the Company or has a material interest adverse to the Company.

Item 4. Mine Safety Disclosures

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Act”) and Item 104 of Regulation S-K require certain mine safety disclosures to be made by companies that operate mines regulated under the Federal Mine Safety and Health Act of 1977. However, the requirements of the Act and Item 104 of Regulation S-K do not apply as the Company does not engage in mining activities. Therefore, the Company is not required to make such disclosures.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

CANADIAN SECURITIES EXCHANGE ("CSE") and OTCQB

The Company's common stock is listed on the Canadian Securities Exchange and also trades on the OTCQB market. Patriot's stock symbol is "PGOL."

The Company's common shares were approved for listing on the CSE on May 9, 2017 under the symbol of "PGOL" and trades in Canadian dollars. Listing and disclosure documents will be available at www.thecse.com. The average trade price on the CSE is \$.12 (CDN).

Holders

On December 31, 2021, there were approximately seventy-eight (78) holders of record of the Company's common stock.

Dividends

The Company has not declared or paid any cash dividends on its common stock. The payment of cash dividends in the future will be at the discretion of its Board of Directors and will depend upon its earnings levels, capital requirements, any restrictive loan covenants and other factors the Board considers relevant.

Warrants or Options

There were no warrants issued or exercised during the year ending December 31, 2021. There were 200,000 warrants that were cancelled or expired. For further information, see Note 8 – Warrants, in the financial statements included in this 10-K filing.

There were no stock options issued, exercised or cancelled or expired during the year ending December 31, 2021. For further information, see Note 6 - Stock Options in the financial statements included in this 10-K filing.

Securities Authorized for Issuance under Equity Compensation Plans

Set forth below is certain information as of December 31, 2021, the end of our most recently completed fiscal year, regarding equity compensation plans.

Equity compensation plans not approved by stockholders as of December 31, 2021

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance
2012 Stock Option Plan	3,745,000	\$ 0.10	155,000
2014 Stock Option Plan	4,815,000	\$ 0.10	185,000
2019 Stock Option Plan	—	—	9,500,000

The following discussion describes material terms of grants made pursuant to the stock option plans as of December 31, 2021:

Pursuant to the 2012 and 2014 and 2019 Stock Option Plans, grants of shares can be made to employees, officers, directors, consultants and independent contractors of non-qualified stock options as well as stock options to employees that qualify as incentive stock options under Section 422 of the Internal Revenue Code of 1986 ("Code"). The Plans are administered by the Option Committee of the Board of Directors (the "Committee"), which has, subject to specified limitations, the full authority to grant options and establish the terms and conditions for vesting and exercise thereof. Currently the Board of Directors functions as the Committee.

In order to exercise an option granted under the Plans, the optionee must pay the full exercise price of the shares being purchased. Payment may be made either: (i) in cash; or (ii) at the discretion of the Committee, by delivering shares of common stock already owned by the optionee that have a fair market value equal to the applicable exercise price; or (iii) with the approval of the Committee, with monies borrowed from us.

Subject to the foregoing, the Committee has broad discretion to describe the terms and conditions applicable to options granted under the Plans. The Committee may at any time discontinue granting options under the Plans or otherwise suspend, amend or terminate the Plans and may make such modification of the terms and conditions of such optionee's option as the Committee shall deem advisable.

Recent Sales of Unregistered Securities; Use of Proceeds from Registered Securities.

See "Note 7 - Common Stock" in the financial statements included in this 10-K filing.

Purchases of Equity Securities by the Company and Affiliated Purchasers.

There was no purchase of equity securities by the Company and affiliated purchasers during the year ended December 31, 2021.

Stock Based Compensation

For the year ended December 31, 2021, there was no stock based compensation awarded.

Item 6. Selected Financial Data

A smaller reporting company, as defined by Item 10 of Regulation S-K, is not required to provide the information required by this item.

Item 7. Management's Discussion and Analysis or Plan of Operation.

Overview

As a natural resource exploration company, our focus is to acquire, explore and develop natural resource properties which may host mineral reserves which may be economical to extract commercially. With this in mind, we have identified and secured interests in mining claims with respect to properties in Nevada. Current cash on hand is sufficient to fund planned operations for 2022 after payment of accounts payable outstanding at December 31, 2021. Our officers and directors and advisors, attorneys and consultants will continue to be utilized to support all operations.

Plan of Operation

During the twelve-month period ending December 31, 2021, we continued our evaluation work on our Vernal project, Windy Peak project and Rainbow Mountain project. Our funds are sufficient to meet all planned activities as outlined below. The Company expects the short and long-term funding of our operations going forward to be financed through existing funds.

We do not anticipate a change to our company staffing levels. We remain focused on keeping the staff compliment, which currently consists of our three directors. Our staffing in no way hinders our operations, as outsourcing of legal, accounting, and other operational duties is the most cost effective and efficient manner of conducting the business of the Company.

We do not anticipate any equipment purchases in the twelve months ending December 31, 2022.

Results of Operations

The Twelve Months Ended December 31, 2021 compared to the Twelve Months Ended December 31, 2020

During the years ended December 31, 2021 and 2020, we had revenues of \$1,737,707 and \$2,468,078, respectively, resulting from the Moss royalty. We are currently exploring and developing our properties and are actively reviewing new projects.

Net income for the year ended December 31, 2021 was \$152,340 compared to net income of \$2,027,293 for the year ended December 31, 2020, for an approximate \$1,875,000 decrease in net income. The decrease in the net income is primarily due to the \$730,000 decrease of royalty revenue received from the Moss Mine, as a result of fluctuations in Moss Mine's gold/silver production. In addition, due to a change in the deferred income tax valuation allowance, the Company recognized an income tax benefit of \$1,165,000 in 2020. This was offset by an approximate \$161,000 decrease in stock based compensation expense and a \$300,000 charge due to the impairment of the royalty asset in 2020.

For the years ended December 31, 2021 and 2020, mineral and exploration expenses were \$505,788 and \$271,062, respectively, for an approximate \$235,000 increase. The increase is primarily due to an increase of \$281,000 expenditures on the Windy Peak project, offset by a decrease of \$43,000 expenditures on the Rainbow Mountain project.

For the years ended December 31, 2021 and 2020, general and administrative expenses were \$220,939 and \$203,808, respectively, for an approximate \$17,000 increase, primarily due to an increase in state income taxes.

For the years ended December 31, 2021 and 2020, other income (expense) was \$(107,277) and (\$236,574), respectively. The change in other income (expense) is due to the \$300,000 impairment of a royalty interest in 2020, offset by an approximated \$164,000 increase in unrealized holding losses on marketable securities.

Liquidity and Capital Resources

We had total assets of \$3,787,437 at December 31, 2021 consisting primarily of \$1,417,275 of cash and \$116,106 of marketable securities. We had total liabilities of \$176,636 at December 31, 2021, consisting primarily of accounts payable and accrued expenses.

We anticipate that we will incur the following during the year ended December 31, 2022:

- \$1,000,000 for operating expenses, including working capital and general, legal, accounting and administrative expenses associated with reporting requirements under the Securities Exchange Act of 1934 and compliance with Canadian regulatory authorities.

Cash provided by operations was \$293,234 and \$873,482 for the years ended December 31, 2021 and 2020, respectively. The \$580,000 decrease in cash provided by operations was primarily due to the decrease in royalty revenue, offset by the change in the deferred tax asset account.

There were no cash provided by (used in) investing activities for the years ended December 31, 2021 and 2020.

Financing activities during the years ended December 31, 2021 and 2020 generated cash of \$0 and \$22,400, respectively, from the exercise of stock options and warrants.

Management estimates that the Company will not need additional funding for the next twelve months.

We currently have no agreements, arrangements or understandings with any person to obtain funds through bank loans, lines of credit or any other sources.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Item 7A. Quantitative and Qualitative Disclosure About Market Risk

A smaller reporting company, as defined by Item 10 of Regulation S-K, is not required to provide the information required by this item.

Item 8. Financial Statements.

The financial statements are set forth immediately preceding the signature page beginning with page F-1.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, under supervision and with the participation of the Chief Executive Officer, evaluated the effectiveness of our disclosure controls and procedures, as defined under Exchange Act Rule 13a-15(e). Based upon this evaluation, the Chief Executive Officer concluded that, as of December 31, 2021, our disclosure controls and procedures were effective.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Controls over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined under Exchange Act Rules 13a-15(f) and 14d-14(f). Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

All internal control systems, no matter how well designed, have inherent limitations and may not prevent or detect misstatements. Therefore, even those systems determined to be effective can only provide reasonable assurance with respect to financial reporting reliability and financial statement preparation and presentation. In addition, projections of any evaluation of effectiveness to future periods are subject to risk that controls become inadequate because of changes in conditions and that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2021. In making the assessment, management used the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission's (COSO) 2013 Internal Control-Integrated Framework. Based on its assessment, management concluded that, as of December 31, 2021, the Company's internal controls over financial reporting were effective.

As defined by Auditing Standard No. 5, "An Audit of Internal Control Over Financial Reporting that is Integrated with an Audit of Financial Statements and Related Independence Rule and Conforming Amendments," established by the Public Company Accounting Oversight Board ("PCAOB"), a material weakness is a deficiency or combination of deficiencies that results in more than a remote likelihood that a material misstatement of annual or interim financial statements will not be prevented or detected. In connection with the assessment described above, management concluded the Company does not have control deficiencies that represent material weaknesses as of December 31, 2021.

Attestation Report of Registered Public Accounting Firm

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to permanent rules of the SEC that permit the Company to provide only management's report in this annual report.

Changes in Internal Controls over Financial Reporting

As of December 31, 2021 and to date, management assessed the effectiveness of our internal control over financial reporting and based upon that evaluation, they concluded the internal controls and procedures were effective. During the course of their evaluation, we did not discover any fraud involving management or any other personnel who play a significant role in our disclosure controls and procedures or internal controls over financial reporting.

We believe that our financial statements contained in our Form 10-K for the twelve months ended December 31, 2021, fairly present our financial position, results of operations and cash flows for the years covered thereby in all material respects. We are committed to improving our financial organization. We will continue to monitor and evaluate the effectiveness of our internal controls and procedures and our internal controls over financial reporting on an ongoing basis and are committed to taking further action and implementing additional enhancements or improvements as necessary.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Directors and Officers

All Directors of our Company hold office until the next applicable vote of the stockholders or until their successors are elected and qualified. The Officers of our Company are appointed by our Board of Directors and hold office until their earlier death, retirement, resignation or removal. Our Directors, Executive Officers and other significant employees, their ages, positions held and duration each person has held that position, are as follows:

Name	Position Held with the Company	Age	Date First Appointed
Robert Coale (1)	Chairman of the Board	81	October 13, 2005(1)
Trevor Newton (2)	President, Chief Executive Officer, Secretary Treasurer, and Director	52	October 9, 2014
Zachary Black (3)	Director	41	July 18, 2016

- (1) Mr. Coale was initially appointed as a Director on June 23, 2003. On September 12, 2008 Mr. Coale resigned as an officer of the Company but remained a Director. Subsequently, on October 18, 2010, Mr. Coale was reappointed as the Company's President, Chief Executive Officer, Secretary and Treasurer and resigned these positions on May 27, 2016 where he was simultaneously appointed as Chairman of the Board.
- (2) Mr. Newton was appointed as Director on October 9, 2014. On May 27, 2016, Mr. Newton was elected as CEO, President, Secretary and Treasurer.
- (3) Mr. Black was appointed Director on July 18, 2016.

Business Experience

The following is a brief account of the education and business experience of each director, executive officer and key employee during at least the past five years, indicating each person's principal occupation during the period, and the name and principal business of the organization by which he was employed.

Robert Coale has been a Director since June 2003 and served as our Chief Executive Officer, President, Secretary and Treasurer for two terms: (i) October 2005 to September 2008; and (ii) October 18, 2010 to May 27, 2016. Mr. Coale has over 50 years of resource related business and management experience and is currently an independent consulting engineer specializing in mineral processing and natural gas fueling systems, including development of projects for converting low-grade or stranded natural gas sources into liquefied natural gas. Mr. Coale is also a past Technical Advisor for Premium Exploration Inc. and a past Director of Francisco Gold Corporation and past Technical Advisor to Andean American Gold Corp. Mr. Coale is a Professional Engineer and holds two degrees in Engineering (1963 - MetE. - Colorado School of Mines, 1971 - MSc. - University of the Witwatersrand in South Africa) as well as an MBA from the University of Minnesota (1982).

Trevor Newton is President of Patriot Gold Corp. Mr. Newton is founder of the Company and has been involved in the development of the Company from its initial land acquisitions and discovery stages through to the present. He has assisted the Company by establishing its corporate focus, assembling its team and helping advance its core projects. Mr. Newton's corporate experience has primarily been in the resource sector where he has assisted private and public companies in their financing, project acquisition, and development. Mr. Newton is also Chief Executive Officer, Chief Financial Officer, President, Secretary and Director of Strata Power Corp. Mr. Newton has a B.Sc. in Economics from the University of Victoria and an M.A. in Economics from Simon Fraser University.

Zachary Black is a Resource Geologist with 15 plus years of experience in geological exploration projects, consulting, database management, geotechnical engineering, project management and project engineering. Mr. Black has conducted professionally recognized, innovative work in geo-statistical modelling, and routinely provides his expertise to the mineral industry with regard to geologic modelling, geo-statistical evaluation, mineral resource estimation, and exploration program design and support. He is a Society for Mining, Metallurgy & Exploration Registered Member and is recognized as a Qualified Person for exploration, geology, and mineral resource estimation according to the Canadian National Instrument 43-101 (NI 43-101). Mr. Black has participated in mineral resource projects at many levels of project development, from early exploration through bankable feasibility studies, and has assisted in the preparation of numerous NI 43-101 compliant technical reports. He has conducted site investigations, geologic field mapping and sampling, and data verification as an independent QP for a variety of gold, silver, and multiple commodity projects throughout the world. Mr. Black earned his Bachelor of Science degree in Geological Engineering from the University of Nevada.

There are no family relationships among our directors or officers. None of our Directors or Officers have been affiliated with any company that has filed for bankruptcy within the last five years. We are not aware of any proceedings to which any of our officers or directors, or any associate of our officers or directors, is a party adverse to our company or has a material interest adverse to it.

Audit Committee Financial Expert.

Currently, the Board of Directors functions as the audit committee. The Board of Directors does not have an audit committee financial expert.

Section 16(a) Beneficial Ownership Reporting Compliance.

Section 16(a) of the Securities Exchange Act of 1934 requires officers and directors of the Company and persons who own more than ten percent of a registered class of the Company's equity securities to file reports of ownership and changes in their ownership with the Securities and Exchange Commission, and forward copies of such filings to the Company. During the most recent fiscal year, the Company is not aware that any director, officer, and beneficial owner of more than ten percent of the equity securities of the Company registered pursuant to Section 12 of the Exchange Act has failed to file such forms on a timely basis.

Code of Ethics.

The Company has not adopted a Code of Ethics due to the size and limited resources of the Company.

Item 11. Executive Compensation.

Summary Compensation

The following table sets forth information concerning the compensation paid or earned during the fiscal years ended December 31, 2021 and 2020 for services rendered to our Company in all capacities by the following persons: (i) all individuals who served as the principal executive officer or acting in a similar capacity during the year ended December 31, 2021, regardless of compensation level; (ii) all individuals who served as officers at December 31, 2021 and whose total compensation during the year ended December 31, 2021 exceeded \$100,000; and (iii) up to two additional individuals who served as officers during the year ended December 31, 2021 and whose total compensation during the year ended December 31, 2021 exceeded \$100,000, regardless of whether they were serving as officers at the end of such fiscal year.

SUMMARY COMPENSATION TABLE

Name and principal position (a)	Year (b)	Salary (\$) (c)	Bonus (\$) (d)	Stock Awards (\$) (e)	Option Awards (\$) (f)	Non-Equity Incentive Plan Compensation (\$) (g)	Nonqualified Deferred Compensation Earnings (\$) (h)	All Other Compensation (\$) (i)	Total (\$) (j)
Trevor Newton	2021	0	0	70,000	0	0	0	391,176	461,176
	2020	0	0	70,000	216,000	0	0	282,147	568,147

Outstanding Equity Awards

The table set forth below presents certain information concerning unexercised options, stock that has not vested, and equity incentive plan awards for each named executive officer above outstanding as of December 31, 2021.

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR-END									
OPTION AWARDS						STOCK AWARDS			
Name	Number of Securities Underlying Unexercised Options (#)	Number of Securities Underlying Unexercised Options (#)	Equity Incentive Plan Awards: Number of Securities Underlying Unexercised Options (#)	Option Exercise Price (\$)	Option Expiration Date	Number of Shares or Units of Stock That Have Not Vested (#)	Market Value of Shares or Units of Stock That Have Not Vested (\$)	Equity Incentive Plan Awards: Number of Unearned Shares, Units or Other Rights That Have Not Vested (#)	Equity Incentive Plan Awards: Market or Payout Value of Unearned Shares, Units or Other Rights That Have Not Vested (\$)
(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)
Trevor Newton	1,250,000	(1)	0	0.10	December 24, 2025	0	0	0	0
Trevor Newton	1,000,000	(2)	0	0.10	September 5, 2027	0	0	0	0
Trevor Newton	1,000,000	(3)	0	0.10	February 15, 2028	0	0	0	0
Trevor Newton	2,000,000	(4)	0	0.10	December 10, 2030	0	0	0	0

- (1) On December 24, 2015 Mr. Newton was granted the right to purchase 1,250,000 common shares at an exercise price of \$0.10 per option pursuant to the 2014 Plan. The \$0.10 options vested immediately and had a fair market value at issuance of \$84,152.
- (2) On September 5, 2017, Mr. Newton was granted the right to purchase 1,000,000 common shares at an exercise price of \$0.10 per option pursuant to the 2014 Plan. The \$0.10 options vested immediately and had a fair market value at issuance of \$80,100.
- (3) On February 15, 2018, Mr. Newton was granted the right to purchase 1,000,000 common shares at an exercise price of \$0.10 per option pursuant to the 2014 Plan. The \$0.10 options vested immediately and had a fair market value at issuance of \$77,500.
- (4) On December 10, 2020, Mr. Newton was granted the right to purchase 2,000,000 common shares at an exercise price of \$0.10 per option pursuant to the 2012 Plan. The \$0.10 options vested immediately and had a fair market value at issuance of \$216,000.

Compensation of Directors

The following table sets forth information concerning the compensation paid or earned during the fiscal year ended December 31, 2021 for services rendered by the Directors.

Name	Fees earned or paid in cash (\$)	Stock Awards (\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Nonqualified Deferred Compensation Earnings (\$)	All Other Compensation (\$) (4)	Total (\$)
Robert Coale (1)	70,000	0	0	0	0	0	70,000
Trevor Newton (2)	0	70,000	0	0	0	391,176	461,176
Zachary Black (3)	70,000	0	0	0	0	56,248	126,248

- (1) Mr. Coale was originally appointed as a Director on June 23, 2003. On September 12, 2008 Mr. Coale resigned as an officer of the Company but remained a Director. Subsequently, on October 18, 2010, Mr. Coale was reappointed as the Company's President, Chief Executive Officer, Secretary and Treasurer and resigned these positions on May 27, 2016 where he was simultaneously appointed as Chairman of the Board.
- (2) Mr. Newton was appointed as Director on October 9, 2014. On May 27, 2016, Mr. Newton was appointed as the Company's President, Chief Executive Officer, Secretary and Treasurer and remains a Director.
- (3) Mr. Black was appointed Director on July 18, 2016.
- (4) Cash payments for consulting and other services.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The following table lists, as of December 31, 2021, the number of shares of common and preferred stock of the Company beneficially owned by (i) each person or entity known to the Company to be the beneficial owner of more than 5% of the outstanding common stock; (ii) each officer and director of the Company; and (iii) all officers and directors as a group. Information relating to beneficial ownership of common stock by our principal stockholders and management is based upon information furnished by each person using "beneficial ownership" concepts under the rules of the Securities and Exchange Commission. Under these rules, a person is deemed to be a beneficial owner of a security if that person has or shares voting power, which includes the power to vote or direct the voting of the security, or investment power, which includes the power to vote or direct the voting of the security. The person is also deemed to be a beneficial owner of any security of which that person has a right to acquire beneficial ownership within 60 days. Under the Securities and Exchange Commission rules, more than one person may be deemed to be a beneficial owner of the same securities, and a person may be deemed to be a beneficial owner of securities as to which he or she may not have any pecuniary beneficial interest. Except as noted below, each person has sole voting and investment power.

The percentages below are calculated based upon 74,380,354 outstanding common shares and 290,000 outstanding Series A preferred shares as of December 31, 2021 which does not include vested options and warrants.

Name of Beneficial Owner	Title of Class	Amount and Nature of Beneficial Ownership	Percentage of Class
Robert D. Coale	Common Stock	731,250 (1)	1.0%
Trevor Newton	Common	19,921,500 (2)	26.8%
	Series A Preferred Stock	290,000	100%
Zachary Black	Common Stock	500,000 (3)	0.7%
Directors and Officers as a Group Common Stock (3 individuals)	Common Stock	21,152,750	28.4%
Directors and Officers as a Group Series A Preferred Stock (3 individuals)	Series A Preferred Stock	290,000	100%
Ron Daems	Common Stock	9,600,000	12.9%

- (1) Does not include 350,000 vested options pursuant to the 2012 Plan to purchase common stock at a purchase price of \$0.10 per share and 750,000 vested options pursuant to the 2014 Plan to purchase common stock at a purchase price of \$0.10 per share.
- (2) Does not include 3,000,000 vested options pursuant to the 2012 Plan to purchase common stock at a purchase price of \$0.10 per share, 2,250,000 vested options pursuant to the 2014 Plan to purchase common stock at a purchase price of \$0.10 per share and 9,940,000 vested warrants. Also exclude 320,000 shares that have not yet been issued from a warrant exercise in 2020.
- (3) Does not include 1,225,000 vested options pursuant to the 2014 Plan to purchase common stock at a purchase price of \$0.10 per share.

Shareholder Agreements

We are unaware of any contract or other arrangement the operation of which may at a subsequent date result in a change in control of our Company.

Securities Authorized for Issuance under Equity Compensation Plans

Information regarding our equity compensation plans is set forth above under Part II, Item 5.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Related Party Transactions

See Note 11 - Related Party Transactions in the notes to the consolidated financial statements included in this 10-K filing.

Director Independence

We are not subject to the listing requirements of any national securities exchange or national securities association and, as a result, we are not at this time required to have our board comprised of a majority of “independent directors.”

Item 14. Principal Accounting Fees and Services.

Fees Billed by Independent Public Accountants

Aggregate fees billed and expected to be billed for professional services by Fruci & Associates II, PLLC, our independent registered public accounting firm for the audit of our consolidated financial statements for the years ended December 31, 2021 and 2020 is set forth below.

	Year ending December 31, 2021	Year ending December 31, 2020
Audit Fees	\$ 28,025	\$ 22,000
Audit Related Fees	\$ 0	\$ 0
Tax Fees	\$ 0	\$ 2,500
All Other Fees	\$ 0	\$ 0

All of the principal accounting fees and services were approved by the Board of Directors, currently acting in place of the Audit Committee in accordance with the By-Laws of the Company.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Patriot Gold Corp.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Patriot Gold Corp. ("the Company") as of December 31, 2021 and 2020, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the years in the two-year period ended December 31, 2021, and the related notes (collectively referred to as the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020 and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2021, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

Critical audit matters are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. We determined that there were no critical audit matters.

We have served as the Company's auditor since 2017.

PATRIOT GOLD CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2021

NOTE 1 - NATURE OF BUSINESS AND OPERATIONS

Patriot Gold Corp. ("Company") was incorporated in the State of Nevada on November 30, 1998. The Company is engaged in natural resource exploration and anticipates acquiring, exploring, and developing natural resource properties. Currently the Company is undertaking programs in Nevada. The Company's common stock trades on the Canadian Securities Exchange under the symbol PGOL, and also on the Over-The-Counter ("OTCQB") market under the symbol PGOL.

On May 23, 2017, the Company caused the incorporation of its wholly owned subsidiary, Patriot Gold Canada Corp ("Patriot Canada"), under the laws of British Columbia, Canada.

On April 16, 2010, the Company caused the incorporation of its wholly owned subsidiary, Provex Resources, Inc., ("Provex") under the laws of Nevada. Effective May 7, 2018, Provex's name was changed to Goldbase, Inc. ("Goldbase").

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP") and pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Goldbase and Patriot Canada. Collectively, they are referred to herein as "the Company". Inter-company accounts and transactions have been eliminated.

Reclassifications

Certain amounts related to the prior year financial presentation have been reclassified to conform with the presentation as of December 31, 2021.

Risks and Uncertainties

The Company is subject to additional risks and uncertainties due to the COVID-19 pandemic. The extent of the impact on the Company's business is uncertain and difficult to predict. The Company considered the impact of COVID-19 on the assumptions and estimates used and determined that there has been no material impact on the Company's results of operations other than delays in exploration activity and project assessments. The Company cannot reasonably estimate with any degree of certainty the future impact COVID-19 may have on the Company's results of operations, financial position and liquidity.

Management's Estimates and Assumptions

The preparation of the consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes that all applicable estimates and adjustments are appropriate. Actual results could differ from those estimates.

Going Concern

Management believes they will have sufficient funds to support their business based on the following: (a) revenues derived from the Moss royalty, given the Moss Mine is now in production; (b) the Company's marketable securities are relatively liquid; (c) current cash on hand is sufficient to cover estimated minimum operational costs for the next 12 months.

Exploration and Development Costs

Mineral exploration costs and payments related to the acquisition of the mineral rights are expensed as incurred. When it has been determined that a mineral property can be economically developed as a result of establishing proven and probable reserves, the costs incurred to acquire and develop such property will be capitalized. Such costs will be amortized using the units-of-production method over the estimated life of the probable reserve. No costs have been capitalized through December 31, 2021.

Cash and Cash Equivalents

The Company considers all investment instruments purchased with a maturity of three months or less to be cash equivalents to the extent the funds are not being held for investment purposes. The Company has no cash equivalents as of December 31, 2021 and 2020.

Marketable Securities

Equity investments with readily determinable fair values are measured at fair value. Equity investments without readily determinable fair values are measured using the equity method or measured at costs with adjustments for observable changes in price or impairments (referred to as the measurement alternative). We currently do not have investments without readily determinable fair values. We perform a qualitative assessment on a periodic basis and recognize an impairment if there are sufficient indicators that the fair value of the investment is less than carrying value. Changes in value are recorded in Other income (expense), net.

Royalties Receivables

Royalties Receivables consist of amounts due from Golden Vertex related to the net smelter return royalty on the Moss Mine in Arizona (see Note 4). An allowance for uncollectible receivables is based on historical collection trends and write-off history. As of December 31, 2021 and 2020, there was no allowance recorded.

Foreign Currency Translation

The Company's functional currency and reporting currency is the U.S. dollar. Monetary items denominated in foreign currency are translated to U.S. dollars at exchange rates in effect at the balance sheet date and non-monetary items are translated at rates in effect when the assets were acquired, or obligations incurred. Revenue and expenses are translated at rates in effect at the time of the transactions. Foreign exchange gains and losses are included in the consolidated statements of operations.

Concentration of Credit Risk

The Company has no off-balance-sheet concentrations of credit risk such as foreign exchange contracts, options contracts or other foreign hedging arrangements. Financial instruments that potentially subject the Company to concentration of credit risk consist principally of cash deposits. The Company maintains the majority of its cash balances with two financial institutions in the form of demand deposits. Accounts at banks in the United States are insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000, while accounts at banks in Canada are insured by the Canada Deposit Insurance Corporation ("CDIC") up to \$100,000. At December 31, 2021 and 2020, the Company had \$1,110,406 and \$851,115 in excess of the FDIC and CDIC insured limits, respectively.

Income/Loss per Share

Basic earnings per share is computed by dividing the net income by the weighted average number of shares outstanding during the period. Diluted earnings per share is computed by dividing net income by the weighted-average number of common shares plus dilutive potential common shares outstanding during the period.

The following is a reconciliation of the number of shares used in the calculation of basic earnings per share and diluted earnings per share:

	For the year ended December 31,	
	2021	2020
Numerator:		
Net income available to common stockholders	\$ 152,340	\$ 2,027,293
Denominator:		
Weighted-average shares, basic	74,380,354	74,324,616
Effect of dilutive shares:		
Incremental shares from the assumed exercise of dilutive stock warrants	1,711,077	55,988
Weighted-average shares diluted	<u>\$ 76,091,431</u>	<u>\$ 74,380,605</u>
Net income per common share, basic	\$ 0.00	\$ 0.03
Net income per common share, diluted	\$ 0.00	\$ 0.03

The following were excluded from the computation of diluted shares outstanding as the exercise price exceeds the average stock closing price for the respective periods:

	For the year ended December 31,	
	2021	2020
Common stock equivalents:		
Stock options	—	10,340,000
Stock warrants	3,000,000	9,640,000
Total	<u>3,000,000</u>	<u>19,980,000</u>
