This is the form of a material change report required under Section 85(1) of the *Securities Act* and Section 151 of the *Securities Rules*.

BC FORM 53-901F

Securities Act

MATERIAL CHANGE REPORT UNDER SECTION 85(1) OF THE ACT

Item 1. Reporting Issuer

Playfair Mining Ltd.
520 - 470 Granville Street
Vancouver, B.C. V6C 1V5

Item 2. Date of Material Change

March 25, 2008

Item 3. Press Release

News Release dated March 25th, 2008 was disseminated by Stockwatch and Market News.

Item 4. Summary of Material Change

Playfair Mining is pleased to announce that British Columbia based Superior Diamond Drilling Inc. have been awarded a contract to drill a minimum of 7,000 metres on **Playfair's** wholly owned Risby tungsten deposit located approximately 50 kilometres west of Ross River, Yukon.

Item 5. Full Description of Material Change

Playfair Mining is pleased to announce that British Columbia based Superior Diamond Drilling Inc. have been awarded a contract to drill a minimum of 7,000 metres on **Playfair's** wholly owned Risby tungsten deposit located approximately 50 kilometres west of Ross River, Yukon.

The Risby tungsten deposit contains a NI 43-101 compliant **inferred resource of 6.39 million tonnes of 0.46% tungsten trioxide** at a cut off grade of 0.2% (Wardrop Engineering 2007). The primary intent of the 2008 drill campaign is to increase Risby's total tungsten resource significantly by drill testing the down dip and on strike extents of established mineralization. Playfair will continue to expand the size and scope of the two sub-parallel stratiform Upper and Lower tungsten bearing skarn zones, where Scheelite mineralization is developed at or in close proximity to the quartz monzonite - limestone contact. Drilling is planned to commence by the first week of June and is expected to continue until mid-October.

Playfair Chairman Don Moore states, "*Based on the existing resource calculation at Risby, we know this is a very big deposit. Our aim, through an aggressive 7,000 metre plus drill program is to expand on the already large size of this known resource. We now have planned 2008 Drill programs at Risby, Grey River and Granite Lake. These will be very active months ahead for Playfair.*"

The summer's efforts at Risby will result in knowledge that will be applied towards a preliminary economic assessment and early stage environmental base line studies.

Playfair's Canadian Tungsten Deposits

Playfair owns four high-grade tungsten deposits, all in Canada. Two of the four high-grade deposits (Lened and Clea) have significant historical resource estimates that pre-date NI 43-101 but that have been delineated by well established mining companies. The Grey River and Risby deposits have NI 43-101 Compliant Resource Estimates. In addition, to these four deposits, **Playfair** has the early stage but highly-prospective Granite Lake W-Mo exploration property. **Playfair** is very well positioned to benefit from the expanding global demand for tungsten having four high-grade deposits, all located within Canada.

NI 43-101 Compliant Resource Estimates

Property	Classification	Cut-off Grade %WO_3	Tonnes	Grade WO_3%	Pounds WO_3	MTU's	Company
Risby	Inferred Resource	0.2	6,385,000	0.46	65,043,600	2,950,200	Wardrop 2007
Grey River	Inferred Resource	0.2	852,000	0.86	16,153,700	732,700	Wardrop 2007

Historic Resource Estimates*

Property	Classification	Cut-off Grade %WO_3	Tonnes	Grade WO_3%	Pounds WO_3	MTU's	Company
Lened	Historic Resource*	0.4	737,000	1.14	18,523,050	840,200	Union Carbide 1986
Clea	Historic Resource*	0.5	257,000	0.93	5,269,000	239,000	Placer Dome 1980

**Estimates of tungsten resources are historical in nature, predate and are noncompliant with NI 43-101. Playfair is not treating the historical estimates as current mineral resources or reserves. Playfair has not undertaken any independent investigation of the resource estimates nor has it independently analyzed the results of the previous exploration work in order to verify the resources, and therefore the historical estimates should not be relied upon. However, Playfair believes that these historical estimates provide a conceptual indication of the potential of the occurrences and are relevant to ongoing exploration.*

Michael Moore P.Geo is the Qualified Person who has reviewed the technical information contained in this News Release on behalf of Playfair.
