

No damage from Mexico's earthquake to IMPACT Silver's facilities in Zacualpan

Trading Symbol: "IPT: TSX.V"

VANCOUVER, Sept. 19, 2017 /CNW/ - On September 19, 2017, an earthquake with a magnitude 7.1, according to the U.S. Geological Survey, struck near Mexico City. The city has experienced some severe damage; however, the office staff in Mexico City are safe and have been sent home. The earthquake does not appear to have damaged the facilities of the mining operations in Zacualpan. Post-earthquake inspections at the mines and processing plant are currently being carried out.

On behalf of the Directors of IMPACT Silver Corp.,

"Frederick W. Davidson"
President & CEO

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Forward-Looking and Cautionary Statements

This IMPACT News Release contains certain "forward-looking" statements and information relating to IMPACT that are based on the beliefs of, and assumptions made by, IMPACT management, following consideration of the information currently available to IMPACT management. Such statements include statements regarding the discovery and commercialization of commercial quantities of minerals, improvements in profitability, increases to processing capacity, expansion of resource quality and quantity, exploration goals, future results, the operational goals and outcomes in the Zacualpan and Capire districts and generally, and future production as a result, expected 2017 drilling and testing operations, IMPACT's exploration program for 2017, the completion and effectiveness of the mining database project and other statements that are not historical facts. Readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the plans, intentions or expectations upon which they are based will occur. By their nature, forward-looking statements involve numerous assumptions, known and unknown risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and other forward-looking statements will not occur, which may cause actual performance and results in future periods to differ materially from any estimates or projections of future performance or results expressed or implied by such forward-looking statements. These assumptions, risks and uncertainties include, without limitation, exploration and development risks, expenditure and financing requirements, title matters, operating hazards, metal prices, political and economic factors, competitive factors, general economic conditions, relationships with vendors and strategic partners, governmental regulation and supervision, seasonality, technological change, industry practices, and one-time events. Should any one or more risks or uncertainties materialize or change, or should any underlying assumptions prove incorrect, actual results and forward-looking statements may vary materially from those described herein. IMPACT does not assume any obligation to update any forward-looking statement contained herein other than in accordance with applicable law.

The Company's decision to place a mine into production, expand a mine, make other production related decisions or otherwise carry out mining and processing operations, is largely based on internal non-public Company data and reports based on exploration, development and mining work by the Company's geologists and engineers. The results of this work are evident in the discovery and building of multiple mines for the Company and in the track record of mineral production and financial returns of the Company since 2006. Under National Instrument 43-101, the Company is required to disclose that it has not based its production decisions on NI 43-101 compliant mineral resource or reserve estimates, preliminary economic assessments or feasibility studies, and historically such projects have increased uncertainty and risk.
