About Minnova Corp.

Minnova Corp. is a gold mine development and evolving cleantech company focused on the restart of its 100% owned, past producing PL Gold Mine and developing a pipeline of green energy projects. The PL Gold Mine restart efforts are supported by a Positive Feasibility Study completed in 2017. The study concluded the restart of the PL Mine, at an average annual production rate of 46,493 ounces over a minimum 5-year mine life was economically robust. Importantly the global resource remains open to expansion, as does the reserve. The PL Gold Mine benefits from a short pre-production timeline forecast at 15 months, a valid underground mining permit (Environment Act 1207E), an existing 1,000 tpd processing plant, over 7,000 meters of developed underground ramp to -135 metres depth. The project is fully road accessible and close to existing mining infrastructure in the prolific Flin Flon Greenstone Belt of Central Manitoba.
