STUDIO NOTARILE ASSOCIATO

Repertorio N.72257 Raccolta N.37525

VERBALE DI ASSEMBLEA DI "TERNA S.p.A."

REPUBBLICA ITALIANA

L'anno duemilaventicinque, il giorno ventuno del mese di maggio

(21 maggio 2025)

in Roma, piazzale di Porta Pia 121;

alle ore 15,30

io sottoscritto Dr. Nicola Atlante Notaio in Roma, iscritto al Collegio Notarile di Roma;

su richiesta di Igor De Biasio nato a Milano il 18 novembre 1977, da me personalmente conosciuto, verbalizzo ai sensi dell'art. 2375 c.c. come segue l'Assemblea della società:

"TERNA – RETE ELETTRICA NAZIONALE SOCIETA' PER AZIONI"

(in forma abbreviata TERNA S.p.A.)

con sede in Roma Viale Egidio Galbani 70, codice fiscale, registro imprese di Roma e Partita Iva 05779661007, R.E.A. di Roma n. RM – 922416, capitale sociale iscritto al registro imprese alla data odierna di Euro 442.198.240,00 interamente versati

tenutasi in Roma presso l'auditorium di TERNA S.p.A. in piazza Giuseppe Frua n. 2 il giorno 21 maggio 2025 con inizio alle ore 11,01 e con chiusura alle ore 12,19.

Io sottoscritto Notaio do atto che il resoconto dello svolgimento della predetta Assemblea, cui io Notaio ho assistito senza soluzione di continuità nel luogo di convocazione sopra indicato e dunque in Roma presso l'auditorium di TERNA S.p.A. in piazza Giuseppe Frua n. 2, è quello di seguito riportato.

****

Il Dott. De Biasio rivolge un saluto a tutti i presenti, assume, ai sensi dell'articolo 12.1 del vigente Statuto sociale e dell'articolo 4.1 del Regolamento assembleare, la presidenza dell'Assemblea quale Presidente del Consiglio di Amministrazione e dichiara aperta alle ore 11,01 l'Assemblea di TERNA S.p.A. (di seguito, anche, soltanto "la Società").

Ricorda che il Consiglio di Amministrazione della Società, in data 25 marzo 2025, ha convocato la presente Assemblea in sede ordinaria per il giorno 21 maggio 2025, in unica convocazione, con l'ordine del giorno di seguito indicato, come da avviso integrale pubblicato nei termini e nelle modalità di legge e disponibile sul sito internet della Società www.terna.it, sul sito internet di Borsa Italiana S.p.A. e presso il meccanismo di stoccaggio "1Info" e, per estratto, sui quotidiani "Il Sole 24 Ore" e "Milano Finanza" del 18 aprile 2025.

Ricorda che la Società ha deciso di avvalersi della facoltà prevista dall'art. 106, comma 4, del Decreto Legge 17 marzo 2020, n. 18 (c.d. Decreto "Cura Italia"), convertito con modificazioni dalla Legge 24 aprile 2020, n. 27 (il cui

termine finale di applicazione è stato da ultimo prorogato al 31 dicembre 2025 dal Decreto-Legge 27 dicembre 2024, n. 202, convertito con modificazioni dalla Legge 21 febbraio 2025, n. 15), prevedendo che l'intervento in Assemblea da parte degli aventi diritto possa avvenire esclusivamente per il tramite del rappresentante designato dalla Società ai sensi dell'art. 135-undecies del Decreto Legislativo 24 febbraio 1998, n. 58 (il "Testo Unico della Finanza" o "TUF").

Secondo quanto previsto nell'avviso di convocazione della presente Assemblea, fermo quanto precede, è consentita la partecipazione a distanza degli amministratori, dei sindaci, del predetto rappresentante designato e degli altri soggetti dei quali sia richiesta la partecipazione all'Assemblea, senza che sia necessario che il presidente, il segretario e il notaio si trovino nel medesimo luogo.

Tale collegamento a distanza assicura sia l'identificazione degli intervenuti alla odierna adunanza assembleare, sia il contemporaneo collegamento degli stessi con gli altri partecipanti alla riunione e consente di partecipare alla discussione e ai lavori assembleari.

In virtù del predetto art. 106, comma 4 del Decreto Cura Italia, la Società, come indicato nell'avviso di convocazione, ha quindi provveduto a nominare la società Computershare S.p.A., con sede in Milano, Via Lorenzo Mascheroni, n. 19, quale rappresentante designato per la presente Assemblea ai sensi dell'art. 135-undecies del TUF, al quale gli aventi diritto hanno potuto conferire le proprie deleghe con istruzioni di voto sia ai sensi del predetto art. 135-undecies che ai sensi dell'art. 135-novies del TUF (c.d. "Rappresentante Unico").

Il Rappresentante Unico partecipa alla presente riunione in persona del Sig. Enrico Caruso, personalmente presente nel luogo di convocazione dell'Assemblea, munito dei necessari poteri in base a procura a rogito del notaio Lorenzo Grossi di Milano del 15 febbraio 2021 rep. 9527 racc. 6103.

In via preliminare, informa che Computershare S.p.A., in qualità di Rappresentante Unico:

- ha reso noto di non avere alcun interesse proprio rispetto alle proposte di deliberazione sottoposte al voto. Tuttavia, tenuto conto dei rapporti contrattuali in essere tra Computershare S.p.A. e la Società relativi, in particolare, all'assistenza tecnica in sede assembleare e servizi accessori, al fine di evitare eventuali successive contestazioni connesse alla supposta presenza di circostanze idonee a determinare l'esistenza di un conflitto di interessi di cui all'articolo 135-decies, comma 2, lett. f), del TUF, Computershare S.p.A. ha dichiarato espressamente che, ove dovessero verificarsi circostanze ignote ovvero in caso di modifica o integrazione delle proposte presentate

Teleborsa: distribution and commercial use strictly prohibited

all'Assemblea, non intende esprimere un voto difforme da quello indicato nelle istruzioni, anche in relazione a quanto espressamente previsto dall'art. 134 della Delibera Consob 14 maggio 1999, n. 11971 e s.m.i. (nel prosieguo, per brevità, anche, il "Regolamento Emittenti");

- ha dichiarato alla Società di avere ottemperato all'obbligo di riservatezza imposto al Rappresentante Unico dall'art. 135-undecies, comma 4, TUF e dalla comunicazione Consob n. 3/2020 del 10 aprile 2020.

Passando all'espletamento degli adempimenti preliminari per l'apertura dell'Assemblea, ai sensi dell'articolo 4.2 del Regolamento assembleare, conferisce quindi a me Notaio, Dott. Nicola Atlante, presente fisicamente nel luogo di convocazione dell'Assemblea, l'incarico di redigere il verbale della presente Assemblea.

Dà atto che, del Consiglio di Amministrazione, è presente, oltre ad esso Presidente, nel luogo di convocazione dell'Assemblea, anche l'Ing. Giuseppina Di Foggia – Amministratore Delegato della Società.

Come da avviso di convocazione, partecipano all'Assemblea, anche mediante mezzi di telecomunicazione che, come già accertato, ne garantiscono l'identificazione, i sig.ri Amministratori:

Angelica Krystle Donati
Anna Chiara Svelto
Simona Signoracci
Karina Audrey Litvack
Gian Luca Gregori
Francesco Renato Mele
Marco Giorgino
Jean Michel Aubertin

e i sig.ri Sindaci

Mario Matteo Busso
Antonella Tomei
Lorenzo Pozza

Sono altresì presenti, nel luogo di convocazione dell'Assemblea, il Direttore Affari Generali, Legali e Societari, Avv. Danilo Del Gaizo, e il Segretario del Consiglio di Amministrazione, Prof. Avv. Andrea Sacco Ginevri, che, ai fini della presente Assemblea, costituiscono l'Ufficio di Presidenza, unitamente agli Avvocati Daniela Carria, Emanuela Caminiti, Barbara Bochicchio, Francesco Guidotti, Claudia Vellucci, Andrea Pulcioni, Enrico De Luca Picione e Pietro Cappabianca.

Ai sensi dell'art. 2.2 del Regolamento assembleare, sono inoltre presenti, anche mediante collegamento con mezzi di telecomunicazione che ne garantiscano l'identificazione, alcuni Dirigenti che occupano le posizioni di più elevato livello nell'ambito della Società o delle società del Gruppo, nonché i rappresentanti della Società di Revisione

Teleborsa: distribution and commercial use strictly prohibited

Deloitte&Touche S.p.A. e i Consulenti incaricati di supportare gli Uffici della Società per l'odierna Assemblea.
Come anticipato in premessa, ricorda nuovamente che, ai sensi dell'art. 106, comma 4, del richiamato Decreto "Cura Italia", l'avviso di convocazione ha previsto che l'intervento all'odierna Assemblea da parte di coloro a cui spetta il diritto di voto sia consentito esclusivamente a mezzo rappresentanza, conferendo apposita delega al Rappresentante Unico Computershare S.p.A..
Precisa che, ai sensi della citata normativa, come già ricordato, la delega poteva essere conferita, alternativamente, ai sensi:
- dell'art. 135-novies del Testo Unico della Finanza, mediante il "modulo ordinario di delega o subdelega ordinaria"; ovvero
- dell'art. 135-undecies del Testo Unico della Finanza, mediante il "modulo di delega al rappresentante designato".
Precisa, inoltre, che, come indicato nell'avviso di convocazione, (i) il termine raccomandato per il conferimento delle deleghe e/o subdeleghe ordinarie ex art. 135-novies del Testo Unico della Finanza, con le relative istruzioni di voto, era stato indicato nelle ore 12:00 del 20 maggio 2025, mentre (ii) il termine previsto ai sensi di legge per il conferimento delle deleghe al rappresentante designato ex art. 135-undecies del Testo Unico della Finanza, con le relative istruzioni di voto, era stato indicato nel 19 maggio 2025.
Ricorda, infine, che – come indicato nell'avviso di convocazione – in relazione alla presente Assemblea non è prevista la possibilità di esprimere il proprio voto in via elettronica e/o per corrispondenza.
Dà atto che:
- il capitale sociale iscritto al registro imprese alla data odierna ammonta a Euro 442 milioni 198 mila e 240 virgola 00 interamente versati, ed è suddiviso in 2 miliardi 9 milioni e 992 mila azioni ordinarie, da nominali Euro 0,22 ciascuna, con diritto di intervento e di voto nella presente Assemblea;
- risultano conferite al Rappresentante Unico numero 2.219 deleghe o sub-deleghe ordinarie ai sensi dell'art. 135-novies TUF e numero 4 deleghe ai sensi dell'art. 135-undecies TUF;
- **sono regolarmente rappresentati in Assemblea, esclusivamente tramite il Rappresentante Unico, numero 2.223 Azionisti, rappresentanti numero 1.451.059.164 azioni ordinarie, pari al 72,192286% del capitale sociale della Società;**
- ad oggi, TERNA S.p.A. detiene complessivamente 4.151.848 azioni proprie (pari allo 0,207% del capitale sociale). La Società non detiene ulteriori azioni proprie in portafoglio,

Teleborsa: distribution and commercial use strictly prohibited

neanche per il tramite di società controllate. Ai sensi dell'art. 2357-ter, comma 2 del Codice civile, le azioni proprie sono computate ai fini del calcolo del quorum costitutivo e non anche del quorum deliberativo dell'Assemblea della Società. Ciò premesso, ai sensi dell'art. 6.1 dello Statuto sociale, hanno diritto di voto, escluse le indicate azioni proprie, n. 2.005.840.152 azioni ordinarie; inoltre, considerando che - ai sensi di legge e dell'art. 9.1 dello Statuto sociale vigenti - l'Assemblea si tiene in unica adunanza, essa è regolarmente costituita, in sede ordinaria, qualunque sia la parte di capitale sociale rappresentata dai soci intervenuti, mentre il quorum deliberativo è pari alla maggioranza assoluta del capitale sociale rappresentato in Assemblea;

- sarà allegato al verbale dell'Assemblea l'elenco degli Azionisti intervenuti per il tramite del Rappresentante Unico, con l'indicazione delle azioni per cui è stata effettuata la comunicazione ex art. 83-sexies del TUF, nonché l'elenco contenente i dati riferiti ai voti espressi sui diversi argomenti all'ordine del giorno, con specifica indicazione dei nominativi e del numero di azioni di titolarità degli Azionisti intervenuti per il tramite del Rappresentante Unico.

Dà, inoltre, atto che, in base alle risultanze del Libro dei Soci e tenuto conto degli aggiornamenti relativi all'odierna Assemblea, delle comunicazioni pervenute ai sensi dell'art. 120 del TUF e delle altre informazioni a disposizione della Società, risulta partecipare, direttamente o indirettamente, al capitale sociale della Società in misura superiore alla soglia di rilevanza del 3% (ovvero del 5%, per i soggetti che si avvalgono delle esenzioni di cui all'art. 119-bis del Regolamento Emittenti), il seguente Azionista:

- CDP RETI S.p.A. (società controllata da Cassa Depositi e Prestiti S.p.A.), in possesso di 599 milioni 999 mila 999 azioni, pari al 29,851% del capitale sociale.

Inoltre dichiara che, sulla base delle comunicazioni ricevute ai sensi dell'art. 120 del TUF e dell'art. 119 del Regolamento Emittenti, BlackRock Inc., in data 6 maggio 2025, ha notificato una partecipazione al capitale superiore al 3%, la quale non è stata oggetto di formale comunicazione 120 A, dichiarando, la medesima, di avvalersi dell'esenzione di cui all'art. 119-bis, comma 7, del Regolamento Emittenti (per cui opera la soglia del 5%, anziché del 3%).

Richiede comunque formalmente al Rappresentante Unico di intervenire nel caso in cui gli siano state conferite deleghe e/o subdeleghe relative a ulteriori partecipazioni rilevanti al capitale sociale in misura superiore alla soglia di rilevanza del 3%, in relazione alle quali debba essere dichiarata la carenza di legittimazione al voto ai sensi delle vigenti disposizioni di legge e dello Statuto

Teleborsa: distribution and commercial use strictly prohibited

sociale.
Il Rappresentante Unico non rende alcuna dichiarazione in tal senso.
Ricorda a tale ultimo riguardo che, in base all'articolo 6.3 dello Statuto sociale, i soggetti individuati dalla medesima previsione statutaria ai quali sia riferibile il limite del possesso azionario del 5% del capitale sociale, non possono esercitare il diritto di voto inerente alle azioni detenute in eccedenza rispetto al suddetto limite e, laddove lo esercitino, è previsto che lo stesso si riduca proporzionalmente. Tale limitazione non trova peraltro applicazione alle partecipazioni azionarie possedute dallo Stato, da enti pubblici o da soggetti da essi controllati, secondo quanto previsto dall'articolo 3 del Decreto-Legge 31 maggio 1994, n. 332, convertito con modificazioni dalla Legge 30 luglio 1994, n. 474 sulle privatizzazioni, richiamata dal citato articolo 6.3 dello Statuto sociale.
Pertanto, con riguardo alle partecipazioni indicate e alle informazioni a esse relative che risultino alla Società in base a quanto innanzi esposto, si opererà di conseguenza.
Precisa che, sulla base di quanto reso noto e comunicato alla Società, consta l'esistenza di un patto parasociale ai sensi dell'art. 122 del TUF, pubblicato ai sensi di legge e per estratto anche sul sito internet della Società www.terna.it ed attualmente in essere, tra Cassa Depositi e Prestiti S.p.A., State Grid Europe Limited, società del gruppo State Grid Corporation of China interamente controllata da State Grid International Development Limited, e quest'ultima.
Il suddetto patto ha ad oggetto tutte le azioni ordinarie di TERNA S.p.A. detenute da CDP RETI S.p.A.
Ricorda, infine, che, in base all'articolo 10.2 dello Statuto sociale, nell'ambito della certificazione della Società quale gestore del sistema di trasmissione, si considera in conflitto di interessi, agli effetti dell'art. 2373 del Codice civile, chi, esercitando direttamente o indirettamente il controllo della Società o detenendo in essa una partecipazione rilevante ai sensi dell'art. 120 del TUF, operi nel settore della generazione o fornitura dell'energia elettrica o del gas o, direttamente o indirettamente, controlli un'impresa operante nel settore della generazione o fornitura dell'energia elettrica o del gas. A tale fine, ogni partecipante all'Assemblea è tenuto a dichiarare, sotto la propria responsabilità, l'eventuale sussistenza del conflitto d'interessi.
Invita, dunque, il Rappresentante Unico a comunicare l'eventuale sussistenza di dichiarazioni di conflitto d'interesse ad esso pervenute nell'ambito delle deleghe/sub-deleghe ricevute.
Rileva che non viene resa alcuna dichiarazione.

Teleborsa: distribution and commercial use strictly prohibited

Pertanto,

- verificata, a cura dell'Ufficio di Presidenza, l'identità e la legittimazione degli Azionisti rappresentati in Assemblea tramite il Rappresentante Unico;
- esaminate le comunicazioni attestanti la legittimazione all'intervento in Assemblea e all'esercizio del diritto di voto alla cosiddetta "record date" del 12 maggio 2025 e verificata la legittimità delle deleghe conferite a norma della legislazione vigente;
- considerato che, con riferimento alle norme di legge e statutarie vigenti, l'Assemblea in unica convocazione è regolarmente costituita, in sede ordinaria, qualunque sia la parte di capitale sociale rappresentata dai soci intervenuti;

dichiara, in base ai poteri conferitimi dall'articolo 2371 del Codice civile, dall'articolo 12 del vigente Statuto sociale e dall'articolo 4.8 del Regolamento assembleare, l'Assemblea regolarmente costituita in sede ordinaria ed atta a deliberare sui seguenti argomenti all'

ordine del giorno:

1. Relazione Finanziaria Annuale 2024 che comprende la relazione sulla gestione, inclusiva della rendicontazione consolidata di sostenibilità redatta ai sensi del D. Lgs. 6 settembre 2024, n. 125, il progetto di bilancio di esercizio di Terna S.p.A. e il bilancio consolidato del Gruppo Terna al 31 dicembre 2024, nonché le relazioni del Collegio Sindacale e della Società di Revisione;

2. Destinazione dell'utile di esercizio;

3. Piano di Incentivazione di lungo termine basato su Performance Share 2025-2029 destinato al management di TERNA S.p.A. e/o di società da questa controllate ai sensi dell'art. 2359 del codice civile;

4. Autorizzazione all'acquisto e alla disposizione di azioni proprie, previa revoca dell'autorizzazione conferita dall'Assemblea del 10 maggio 2024;

5. Relazione sulla politica in materia di remunerazione e sui compensi corrisposti:

5.1. Prima sezione: relazione sulla politica in materia di remunerazione (deliberazione vincolante);

5.2. Seconda sezione: relazione sui compensi corrisposti (deliberazione non vincolante).

Dà inoltre atto che:

- la documentazione relativa ai singoli argomenti all'ordine del giorno dell'Assemblea è stata pubblicata con le modalità e nei termini previsti dalla normativa vigente;
- non è pervenuta alla Società alcuna richiesta di integrazione dell'ordine del giorno o proposta di delibera da parte degli azionisti titolari di almeno il 2,5% del capitale sociale ai sensi dell'art. 126-bis, comma 1, primo periodo, del TUF;
- non sono pervenute alla Società, entro il termine del 6

Teleborsa: distribution and commercial use strictly prohibited

maggio 2025, né successivamente, altre proposte di deliberazione sugli argomenti all'ordine del giorno - ai sensi dell'art. 126-bis, comma 1, penultimo periodo, del TUF;

- nei giorni precedenti all'Assemblea sono pervenute alla Società alcune domande presentate, ai sensi dell'articolo 127-ter del TUF, nel rispetto del termine indicato nell'avviso di convocazione (e cioè entro il 12 maggio 2025). In particolare, tali domande sono state formulate, in data 5 maggio 2025, dall'Azionista Marco Bava. In linea con quanto indicato nell'avviso di convocazione, alle suddette domande è stata fornita risposta dalla Società in data 19 maggio 2025, mediante pubblicazione nella sezione del sito internet della Società dedicata alla presente Assemblea degli Azionisti. Si mette a disposizione del Notaio copia del fascicolo contenente le risposte alle domande poste ai sensi dell'art. 127-ter del TUF per l'allegazione al verbale assembleare.

Rileva che il Rappresentante Unico non ha domande o ulteriori richieste di intervento.

Il Presidente dà quindi lettura del suo saluto agli Azionisti e al termine ringrazia il Consiglio d'amministrazione e l'Amministratore Delegato, il Collegio Sindacale e tutti i dipendenti della società. Il testo viene allegato al verbale.

Primo argomento all'ordine del giorno

Approvazione del Bilancio

Passa ora alla trattazione del primo argomento all'ordine del giorno.

1. Relazione Finanziaria Annuale 2024 che comprende la relazione sulla gestione, inclusiva della rendicontazione consolidata di sostenibilità redatta ai sensi del D. Lgs. 6 settembre 2024, n. 125, il progetto di bilancio di esercizio di Terna S.p.A. e il bilancio consolidato del Gruppo Terna al 31 dicembre 2024, nonché le relazioni del Collegio Sindacale e della Società di Revisione.

Ricorda che il fascicolo "Relazione finanziaria annuale 2024" - che comprende la relazione sulla gestione, inclusiva della rendicontazione consolidata di sostenibilità redatta ai sensi del D. Lgs. 6 settembre 2024, n. 125 - è stato messo a disposizione del pubblico, presso la sede sociale, nella sezione del sito internet della Società, nonché presso il meccanismo di stoccaggio autorizzato "1Info", entro i termini previsti dalla normativa vigente.

Sono altresì disponibili, all'interno di tale fascicolo, il bilancio di esercizio di TERNA S.p.A., che chiude con un utile netto di euro 970.356.839,31, e il bilancio consolidato al 31 dicembre 2024, nonché la relativa Relazione degli Amministratori sulla gestione, inclusiva della rendicontazione consolidata di sostenibilità redatta

Teleborsa: distribution and commercial use strictly prohibited

ai sensi del D. Lgs. 6 settembre 2024, n. 125.
Congiuntamente a tali documenti, è stata messa a disposizione del pubblico, con le stesse modalità, anche la "Relazione Annuale sul Governo Societario e gli Assetti proprietari".
Precisa che tale documento, così come la Rendicontazione consolidata di sostenibilità e il bilancio consolidato, ricompresi nella Relazione finanziaria annuale 2024, sono presentati all'Assemblea a soli fini informativi, non essendo sottoposti all'approvazione di quest'ultima.
Entro il suddetto termine di legge, sono stati messi a disposizione del pubblico, con le stesse modalità sopra indicate, anche le relazioni del soggetto incaricato della revisione legale dei conti della Società e la relazione del Collegio Sindacale.
Si astiene dal dare lettura integrale della Relazione Illustrativa predisposta dal Consiglio di Amministrazione sul primo argomento all'ordine del giorno, pubblicata nei termini di legge e disponibile sul sito internet della Società, nella sezione dedicata alla presente Assemblea, nonché della documentazione relativa alla Relazione Finanziaria annuale, per le quali rinvia al testo riprodotto nel fascicolo di bilancio.
Passa quindi la parola all'Amministratore Delegato, Ing. Giuseppina Di Foggia, per l'esposizione della sintesi dei risultati del bilancio consolidato e d'esercizio al 31 dicembre 2024 e per la presentazione della Rendicontazione consolidata di sostenibilità.

******

L'Amministratore Delegato dà quindi lettura della sua sintesi circa i risultati del bilancio consolidato e d'esercizio al 31 dicembre 2024 e la presentazione della Rendicontazione consolidata di sostenibilità. Il testo viene allegato al verbale.

******

Il Presidente al termine passa quindi la parola al Presidente del Collegio Sindacale, dott. Mario Matteo Busso, il quale illustra la struttura della relazione del Collegio Sindacale e le relative conclusioni, avvalendosi del documento di sintesi allegato al presente verbale, ed evidenzia il parere favorevole del Collegio sia all'approvazione del bilancio d'esercizio di TERNA S.p.A. di cui al presente punto all'ordine del giorno sia alla proposta di destinazione dell'utile di esercizio – così come formulata dal Consiglio di Amministrazione – di cui al successivo punto all'ordine del giorno.

******

Al termine il Presidente chiede all'Ufficio di Presidenza se siano pervenute domande o richieste di intervento relative al presente argomento all'ordine del giorno.

Teleborsa: distribution and commercial use strictly prohibited

Non essendo pervenute richieste di intervento e/o domande, dichiara chiusa la discussione e passa alla votazione sul presente argomento all'ordine del giorno.
Secondo quanto previsto dall'articolo 10.1 del Regolamento assembleare, sottopone pertanto alla approvazione dell'assemblea la seguente proposta del Consiglio di Amministrazione:
"L'Assemblea di TERNA S.p.A., esaminata la relazione illustrativa del Consiglio di Amministrazione,

delibera

di approvare il bilancio di esercizio al 31 dicembre 2024 di TERNA S.p.A. che si chiude con l'utile netto di euro 970.356.839,31".

Dichiara quindi aperta la procedura di votazione sulla indicata proposta di deliberazione in merito al primo argomento all'ordine del giorno.
Ricorda che, a norma dell'art. 135-undecies, comma 3, del TUF, in relazione alle proposte per le quali non siano state conferite istruzioni di voto, le azioni non sono computate ai fini del calcolo della maggioranza e della quota di capitale richiesta per l'approvazione della delibera. Precisa che lo stesso varrà con riferimento a tutte le deliberazioni sottoposte al voto dell'odierna Assemblea.
Invita la segreteria dell'Ufficio di Presidenza a fornire l'esito delle votazioni.
Comunica quindi l'esito delle votazioni fornito dalla segreteria dell'Ufficio di Presidenza sulla base delle votazioni espresse dal Rappresentante Unico, dando lettura dei risultati:

- **partecipanti alla votazione n. 2.223 azionisti, per n. 1.451.059.164 azioni tutte ammesse al voto, pari al 72,192286% del capitale sociale;**
- **favorevoli n. 1.443.370.012 azioni, pari al 99,470101% del capitale sociale rappresentato in Assemblea;**
- **contrari n. 5.817.251 azioni, pari allo 0,400897% del capitale sociale rappresentato in Assemblea;**
- **astenuti n. 1.871.901 azioni, pari allo 0,129002% del capitale sociale rappresentato in Assemblea;**
- **non votanti n. 0 azioni, pari allo 0 % del capitale sociale rappresentato in Assemblea.**

La proposta del Consiglio di Amministrazione, avendo raggiunto la maggioranza assoluta del capitale presente, è dichiarata approvata.
Dà atto che è terminata la trattazione del primo argomento all'ordine del giorno.

Secondo argomento all'ordine del giorno

Destinazione dell'utile di esercizio

Passa ora alla trattazione del secondo argomento all'ordine del giorno.
2) "Destinazione dell'utile di esercizio"

Teleborsa: distribution and commercial use strictly prohibited

Si astiene dalla lettura della Relazione Illustrativa relativa al presente argomento all'ordine del giorno predisposta dal Consiglio di Amministrazione, pubblicata ai sensi della normativa vigente e disponibile sul sito internet della Società, nella sezione dedicata alla presente Assemblea, a cui è fatto rinvio.

In considerazione della politica dei dividendi contemplata dal Piano Industriale 2024-2028, con specifico riferimento ai risultati dell'esercizio 2024, il Consiglio di Amministrazione propone di destinare un dividendo per azione relativo all'intero esercizio 2024 di euro 0,3962, corrispondente a un importo complessivo massimo di euro 796.358.830,40.

Ricorda, altresì, che TERNA S.p.A. ha già distribuito un acconto su tale dividendo pari a euro 0,2192 per azione, che è stato posto in pagamento, al lordo delle eventuali ritenute di legge, a decorrere dal 20 novembre 2024. A tale acconto sul dividendo non hanno concorso le n. 4.151.848 azioni proprie in portafoglio alla "record date" del 19 novembre 2024; l'acconto sul dividendo dell'esercizio 2024 distribuito è stato dunque pari ad un importo 239.591.046,40, di cui euro 494.900,28 è stato destinato alla riserva "Utili portati a Nuovo" a fronte delle azioni proprie risultate in portafoglio alla "record date" in precedenza indicata la quota restante, pari a euro 239.096.146,12, è stata corrisposta alle azioni in circolazione alla stessa data.

Tenuto conto dell'importo dell'acconto sul dividendo già distribuito, il Consiglio di Amministrazione propone la distribuzione di un saldo del dividendo pari a euro 0,2770 per azione (per un importo complessivo massimo pari a circa euro 556.767.784,00), da mettere in pagamento nel mese di giugno 2025. Con l'accordo del Presidente del Collegio Sindacale, si dà atto che il Collegio ha espresso parere favorevole, come da intervento del suo Presidente di cui al punto all'ordine del giorno che precede.

Chiede all'Ufficio di Presidenza se siano pervenute domande o richieste di intervento relative al presente argomento all'ordine del giorno.

Non essendo pervenute richieste di intervento e/o domande, dichiara chiusa la discussione e passa alla votazione sul presente argomento all'ordine del giorno.

Secondo quanto previsto dall'articolo 10.1 del Regolamento assembleare, sottopone pertanto alla approvazione dell'assemblea la seguente proposta del Consiglio di Amministrazione:

"L'Assemblea di TERNA S.p.A., esaminata la relazione illustrativa del Consiglio di Amministrazione,

delibera

di destinare l'utile netto dell'esercizio 2024 di TERNA

Teleborsa: distribution and commercial use strictly prohibited

S.p.A., pari a 970.356.839,31 come segue:

- *quanto a euro 239.591.046,40 a copertura dell'acconto sul dividendo messo in pagamento a decorrere dal 20 novembre 2024 per ciascuna azione ordinaria in circolazione al netto delle azioni proprie risultate in portafoglio alla "record date" del 19 novembre 2024 (per un valore pari a euro 494.900,28 destinato alla riserva denominata "utili portati a nuovo");*
- *quanto a massimi euro 556.767.784,00 a saldo del dividendo da distribuire nella misura di euro 0,2770 per ognuna delle 2.009.992.000 azioni ordinarie che risulteranno in circolazione alla "data di stacco" della cedola n. 42 coincidente con il 23 giugno 2025 (al netto delle azioni proprie che risulteranno in portafoglio alla "record date" ex art. 83-terdecies del TUF del 24 giugno 2025), da mettere in pagamento - al lordo delle eventuali ritenute di legge - il 25 giugno 2025. L'ammontare del saldo del dividendo dell'esercizio 2024 spettante alle azioni proprie detenute dalla Società alla "record date" sarà destinato alla riserva denominata "utili portati a nuovo";*
- *quanto ad almeno euro 173.998.008,91 alla riserva denominata "utili portati a nuovo".*

Dichiara quindi aperta la procedura di votazione sulla indicata proposta di deliberazione in merito al secondo argomento all'ordine del giorno.

Invita la segreteria dell'Ufficio di Presidenza a fornire l'esito delle votazioni.

Comunica quindi l'esito delle votazioni fornito dalla segreteria dell'Ufficio di Presidenza sulla base delle votazioni espresso dal Rappresentante Unico, dando lettura dei risultati:

- partecipanti alla votazione n. 2.223 azionisti, per n. 1.451.059.164 azioni tutte ammesse al voto, pari al 72,192286% del capitale sociale;

- favorevoli n. 1.450.272.284 azioni, pari al 99,945772% del capitale sociale rappresentato in Assemblea;

- contrari n. 786.880 azioni, pari allo 0,054228% del capitale sociale rappresentato in Assemblea;

- astenuti n. 0 azioni, pari allo 0% del capitale sociale rappresentato in Assemblea;

- non votanti n. 0 azioni, pari allo 0 % del capitale sociale rappresentato in Assemblea.

La proposta del Consiglio di Amministrazione, avendo raggiunto la maggioranza assoluta del capitale presente, è dichiarata approvata.

Dà atto che è terminata la trattazione del secondo argomento all'ordine del giorno.

Terzo argomento all'ordine del giorno

Piano di incentivazione di lungo termine

Passa ora alla trattazione del terzo argomento all'ordine

Teleborsa: distribution and commercial use strictly prohibited

del giorno.

3) "Piano di Incentivazione di lungo termine basato su Performance Share 2025-2029 destinato al management di TERNA S.p.A. e/o di società da questa controllate ai sensi dell'art. 2359 del codice civile"

Come in precedenza, si astiene dalla lettura integrale della Relazione Illustrativa relativa al presente argomento all'ordine del giorno predisposta dal Consiglio di Amministrazione, pubblicata ai sensi della normativa vigente e disponibile sul sito internet della Società, nella sezione dedicata alla presente Assemblea, a cui è fatto rinvio.

Ai sensi dell'art. 114-bis, comma 1, del TUF, l'Assemblea ordinaria degli Azionisti è competente ad approvare i piani di compensi basati su strumenti finanziari che abbiano quali destinatari, inter alia, i componenti del Consiglio di Amministrazione e/o i dipendenti della società o di società da questa controllate.

In ragione di quanto precede, l'Assemblea è stata convocata in sede ordinaria per discutere e deliberare in merito all'approvazione del piano di incentivazione di lungo termine basato su Performance Share 2025-2029 destinato al management di TERNA S.p.A. e/o di società da questa controllate ai sensi dell'art. 2359 del codice civile (il "Piano di Performance Share 2025-2029" o il "Piano"), predisposto dal Consiglio di Amministrazione, su proposta del Comitato Remunerazione e Nomine.

In base a quanto previsto dall'art. 84-bis, comma 1, del Regolamento Emittenti, le caratteristiche del Piano di Performance Share 2025-2029 sono descritte in dettaglio in apposito documento informativo, al quale è fatto rinvio, messo a disposizione sul sito internet della Società così come la Relazione Illustrativa predisposta dal Consiglio di Amministrazione, entrambi pubblicati ai sensi della normativa vigente e disponibili nell'ambito della documentazione assembleare cui espressamente si rinvia.

Chiede all'Ufficio di Presidenza se siano pervenute domande o richieste di intervento relative al presente argomento all'ordine del giorno.

Non essendo pervenute richieste di intervento e/o domande, dichiara chiusa la discussione e passa alla votazione sul presente argomento all'ordine del giorno.

Secondo quanto previsto dall'art. 10.1 del Regolamento assembleare, sottopone pertanto alla approvazione dell'Assemblea la seguente proposta formulata dal Consiglio di Amministrazione:

"L'Assemblea di TERNA S.p.A., esaminata la Relazione illustrativa del Consiglio di Amministrazione e il documento informativo sul Piano di Performance Share 2025-2029 predisposto ai sensi dell'art. 84-bis, comma 1, del Regolamento Emittenti

Teleborsa: distribution and commercial use strictly prohibited

delibera

1. di approvare il Piano di Performance Share 2025-2029 destinato al management di TERNA S.p.A. e/o di società da questa controllate ai sensi dell'art. 2359 del codice civile, le cui caratteristiche sono descritte nel documento informativo predisposto ai sensi dell'art. 84-bis, comma 1, del Regolamento Emittenti e messo a disposizione del pubblico presso la sede sociale, nella sezione del sito internet della Società (https://www.terna.it/it/Governance/assemblea-azionisti/ultima-assemblea) dedicata alla presente Assemblea e sul meccanismo di stoccaggio autorizzato "1Info" (www.linfo.it);

2. di attribuire al Consiglio di Amministrazione, con facoltà di subdelega, tutti i poteri occorrenti alla concreta attuazione del Piano di Performance Share 2025-2029, da esercitare nel rispetto di quanto indicato nel relativo documento informativo. A tal fine, il Consiglio di Amministrazione potrà provvedere, a titolo esemplificativo e non esaustivo: alla individuazione dei beneficiari di tale Piano; all'approvazione, modifica e/o integrazione del regolamento di attuazione del Piano stesso; alla determinazione del numero di azioni da attribuire a ciascun beneficiario, sulla base delle performance conseguite; all'esecuzione del Piano (inclusa l'attribuzione delle azioni); nonché al compimento di ogni atto, adempimento, formalità, comunicazione che siano necessari o opportuni ai fini della gestione e/o attuazione del Piano, compresa la sua modifica in conformità a quanto previsto dal predetto documento informativo e dalle politiche in materia di remunerazione adottate dalla Società".

Dichiara quindi aperta la procedura di votazione sulla indicata proposta di deliberazione in merito al terzo argomento all'ordine del giorno.

Invita la segreteria dell'Ufficio di Presidenza a fornire l'esito delle votazioni.

Comunica quindi l'esito delle votazioni fornito dalla segreteria dell'Ufficio di Presidenza sulla base delle votazioni espresse dal Rappresentante Unico, dando lettura dei risultati:

- partecipanti alla votazione n. 2.223 azionisti, per n. 1.451.059.164 azioni tutte ammesse al voto, pari al 72,192286% del capitale sociale;

- favorevoli n. 1.424.232.260 azioni, pari al 98,151219% del capitale sociale rappresentato in Assemblea;

- contrari n. 26.826.093 azioni, pari al 1,848725% del capitale sociale rappresentato in Assemblea;

- astenuti n. 811 azioni, pari allo 0,000056% del capitale sociale rappresentato in Assemblea;

- non votanti n. 0 azioni, pari allo 0 % del capitale sociale rappresentato in Assemblea.

Teleborsa: distribution and commercial use strictly prohibited

La proposta, avendo raggiunto la maggioranza assoluta del capitale rappresentato, è dichiarata approvata.
Dà atto che è terminata la trattazione del terzo argomento all'ordine del giorno.

Quarto argomento all'ordine del giorno
Autorizzazione all'acquisto e alla disposizione di azioni proprie, previa revoca dell'autorizzazione conferita dall'Assemblea del 10 maggio 2024

Passa ora alla trattazione del quarto argomento all'ordine del giorno.
4) "Autorizzazione all'acquisto e alla disposizione di azioni proprie, previa revoca dell'autorizzazione conferita dall'Assemblea del 10 maggio 2024"
Si astiene, come in precedenza, dalla lettura della Relazione Illustrativa relativa al presente argomento all'ordine del giorno predisposta dal Consiglio di Amministrazione, pubblicata ai sensi della normativa vigente e disponibile sul sito internet della Società, nella sezione dedicata alla presente Assemblea, a cui è fatto rinvio.
Ricorda che l'Assemblea è chiamata in sede ordinaria, ai sensi degli artt. 2357 e seguenti del Codice Civile, per discutere e deliberare in merito alla proposta di autorizzazione all'acquisto e alla disposizione di azioni proprie, previa revoca dell'autorizzazione conferita dall'Assemblea del 10 maggio 2024.
Ricorda che tale ultima Assemblea ha autorizzato (i) per un periodo di diciotto mesi dalla data dell'Assemblea medesima (i.e. fino al 10 novembre 2025), l'acquisto di azioni proprie della Società per un esborso complessivo massimo di 8 milioni di euro e sino al limite massimo di n. 1,6 milioni di azioni ordinarie, rappresentative dello 0,08% circa del capitale sociale di TERNA S.p.A.; e (ii) senza limiti temporali, la disposizione di azioni proprie così acquistate.
Alla data dell'Assemblea del 10 maggio 2024, la Società deteneva n. 4.213.660 azioni proprie acquistate a servizio dei Piani di Performance Share in essere.
In data 3 giugno 2024, la Società ha provveduto all'attribuzione di 1.060.240 azioni proprie a favore dei beneficiari del Piano Performance Share 2021-2025, riducendo così il numero di azioni proprie detenute dalla Società da 4.213.660 a 3.153.420.
L'ammontare degli utili distribuibili e delle riserve disponibili risultanti dall'ultimo bilancio approvato (al 31 dicembre 2023) risultava pari a Euro 3.811.061.211,70.
Il successivo 26 giugno 2024, il Consiglio di Amministrazione di TERNA S.p.A. ha deliberato l'esecuzione di un nuovo programma di acquisto di azione proprie, in osservanza dei termini dell'autorizzazione assembleare (d'ora in avanti, il "Programma"), a servizio del piano

Teleborsa: distribution and commercial use strictly prohibited

performance share 2024-2028 destinato al management di TERNA S.p.A. e/o di società da questa controllate ai sensi dell'art. 2359 del codice civile approvato dalla predetta Assemblea del 10 maggio 2024, secondo quanto previsto dall'art. 114-bis del TUF.
In data 4 settembre 2024, TERNA S.p.A. ha pertanto avviato l'esecuzione del Programma, per un esborso massimo pari a 8 milioni di euro e sino a un limite massimo di 1,6 milioni di azioni ordinarie della Società, da effettuarsi entro il 4 ottobre 2025. Tale programma si è concluso il 20 settembre 2024, essendo stato raggiunto l'ammontare massimo complessivo di 7.999.999,09 euro ivi previsto. Nell'ambito del Programma, TERNA S.p.A. ha quindi acquistato n. 998.428 azioni proprie (pari allo 0,050% del capitale sociale).
Alle azioni complessivamente acquistate si sommano le sopra richiamate ulteriori 3.153.420 azioni proprie già acquistate dalla Società nel corso degli anni precedenti, al netto delle attribuzioni eseguite finora. Ad oggi, dunque, TERNA S.p.A. detiene complessivamente 4.151.848 azioni proprie (pari allo 0,207% del capitale sociale).
Le società controllate non detengono azioni della capogruppo TERNA S.p.A..
In particolare, in considerazione dell'approssimarsi della scadenza del periodo di diciotto mesi per l'autorizzazione all'acquisto deliberata dall'Assemblea ordinaria degli Azionisti del 10 maggio 2024 e del sostanziale esaurimento della capienza di tale autorizzazione, nonché del permanere delle motivazioni poste a fondamento della medesima, si propone all'Assemblea degli Azionisti di rinnovare l'autorizzazione all'acquisto di azioni proprie, per le finalità, nei termini e con le modalità indicate nella suddetta Relazione Illustrativa, per un periodo di ulteriori diciotto mesi, e di conferire una nuova autorizzazione alla disposizione di azioni proprie senza limiti temporali, previa revoca della precedente autorizzazione, fatti salvi gli effetti di quest'ultima in relazione agli atti compiuti e/o connessi e conseguenti.
Chiede all'Ufficio di Presidenza se siano pervenute domande o richieste di intervento relative al presente argomento all'ordine del giorno.
Non essendo pervenute richieste di intervento e/o domande, dichiara chiusa la discussione e passa alla votazione sul presente argomento all'ordine del giorno.
Secondo quanto previsto dall'art. 10.1 del Regolamento assembleare, sottopongo pertanto alla approvazione dell'Assemblea la seguente proposta formulata dal Consiglio di Amministrazione.
"*L'Assemblea di TERNA S.p.A.,*

esaminata la Relazione del Consiglio di Amministrazione predisposta ai sensi dell'art. 125-ter del TUF, nonché

Teleborsa: distribution and commercial use strictly prohibited

dell'art. 73 del Regolamento Emittenti (la "Relazione Illustrativa");

tenuto conto di quanto previsto dagli artt. 2357 e seguenti del codice civile, dall'art. 132 del TUF, dall'art. 144-bis del Regolamento Emittenti, dall'art. 5 del Regolamento (UE) n. 596/2014, nonché da ogni altra disposizione applicabile,

delibera

1. di revocare la deliberazione di autorizzazione all'acquisto e alla disposizione di azioni proprie adottata dall'Assemblea ordinaria degli Azionisti del 10 maggio 2024, fatti salvi gli effetti di quest'ultima in relazione agli atti compiuti e/o connessi e conseguenti;

2. di autorizzare il Consiglio di Amministrazione all'acquisto, in una o più volte, per un periodo di diciotto mesi dalla data della presente delibera, di azioni ordinarie di TERNA S.p.A., per le finalità di cui alla predetta Relazione Illustrativa del Consiglio di Amministrazione e nei limiti e alle condizioni di cui alla relazione medesima, da considerarsi integralmente richiamati, e in particolare con le modalità di seguito precisate:

il numero massimo di azioni da acquistare è pari a un esborso complessivo fino a 9 milioni di euro e sino al limite massimo di n. 1,8 milioni di azioni ordinarie della Società, rappresentative dello 0,09% circa del capitale sociale di TERNA S.p.A., fermo restando che le azioni Terna di volta in volta detenute in portafoglio dalla Società e dalle società da essa controllate non potranno in ogni caso superare il 10% del capitale sociale della Società o l'eventuale diverso ammontare massimo previsto dalla legge pro tempore vigente (se inferiore alla predetta soglia del 10%) e che gli acquisti dovranno essere effettuati nei limiti degli utili distribuibili e delle riserve disponibili risultanti dall'ultimo bilancio approvato;

gli acquisti saranno effettuati ad un prezzo che non si discosti in diminuzione e in aumento per più del 10% rispetto al prezzo di riferimento rilevato sul mercato Euronext Milan organizzato e gestito da Borsa Italiana S.p.A. nella seduta di borsa precedente ogni singola operazione;

gli acquisti dovranno essere effettuati in modo da assicurare la parità di trattamento tra gli Azionisti e secondo le modalità previste dalla normativa vigente nonché, ove applicabili, dalle prassi di mercato ammesse pro-tempore vigenti, come richiamate nella Relazione Illustrativa relativa al presente punto all'ordine del giorno, fermo restando che gli acquisti non potranno essere effettuati mediante attribuzione ai soci, proporzionalmente alle azioni da questi possedute, di un'opzione di vendita, né nello svolgimento dell'attività di internalizzazione sistematica

Teleborsa: distribution and commercial use strictly prohibited

secondo modalità non discriminatorie e che prevedano l'esecuzione in via automatica e non discrezionale delle operazioni in base a parametri preimpostati;

3. di autorizzare il Consiglio di Amministrazione a disporre, in una o più volte, di tutte o parte delle azioni proprie in portafoglio, senza limiti temporali, anche prima di aver esaurito il quantitativo massimo di azioni acquistabile, nonché all'eventuale riacquisto delle azioni stesse in misura tale per cui le azioni proprie detenute dalla Società e, se del caso, dalle società dalla stessa controllate, non superino il limite stabilito ai sensi del precedente punto 2 della presente delibera (secondo quanto precisato nella Relazione Illustrativa del Consiglio di Amministrazione), nei modi ritenuti più opportuni nell'interesse della Società e nel rispetto della normativa applicabile nonché, ove applicabili, delle prassi di mercato ammesse pro-tempore vigenti, per le finalità di cui alla predetta Relazione Illustrativa e nei limiti e alle condizioni di cui alla Relazione medesima, da considerarsi integralmente richiamati, prevedendo in particolare che le azioni proprie acquistate a servizio del Piano Performance Share 2025-2029 e/o di altri eventuali piani di incentivazione azionaria destinati agli Amministratori e/o ai dipendenti di TERNA S.p.A. e/o di società da questa controllate e/o ad essa collegate siano assegnate con le modalità e nei termini indicati dai regolamenti dei piani stessi;

4. di conferire al Consiglio di Amministrazione e per esso al Presidente del Consiglio di Amministrazione e all'Amministratore Delegato, anche disgiuntamente fra loro e con facoltà di subdelega, ogni più ampio potere occorrente per dare concreta e integrale esecuzione alle deliberazioni di cui ai punti precedenti e per provvedere all'informativa al mercato in relazione agli stessi, ai sensi della normativa anche comunitaria vigente e, ove applicabili, dalle prassi di mercato ammesse pro-tempore vigenti".

Dichiara, quindi, aperta la procedura di votazione sulla indicata proposta di deliberazione in merito al quarto argomento all'ordine del giorno.

Invita la segreteria dell'Ufficio di Presidenza a fornire l'esito delle votazioni.

Comunica quindi l'esito delle votazioni fornito dalla segreteria dell'Ufficio di Presidenza sulla base delle votazioni espresse dal Rappresentante Unico, dando lettura dei risultati:

- partecipanti alla votazione n. 2.223 azionisti, per n. 1.451.059.164 azioni tutte ammesse al voto, pari al 72,192286% del capitale sociale;

- favorevoli n. 1.435.807.491 azioni, pari al 98,948928% del capitale sociale rappresentato in Assemblea;

Teleborsa: distribution and commercial use strictly prohibited

- **contrari n. 15.251.673 azioni, pari al 1,051072% del capitale sociale rappresentato in Assemblea;**
- **astenuti n. 0 azioni, pari allo 0% del capitale sociale rappresentato in Assemblea;**
- **non votanti n. 0 azioni, pari allo 0 % del capitale sociale rappresentato in Assemblea.**

La proposta, avendo raggiunto la maggioranza assoluta del capitale presente, è dichiarata approvata.

Dà atto che è terminata la trattazione del quarto argomento all'ordine del giorno.

Quinto argomento all'ordine del giorno

Relazione sulla remunerazione

Passa ora alla trattazione del quinto argomento all'ordine del giorno.

5) "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti".

5.1. Prima sezione: relazione sulla politica in materia di remunerazione (deliberazione vincolante);

5.2. Seconda sezione: relazione sui compensi corrisposti (deliberazione non vincolante).

Ricorda che, ai sensi dell'art. 123-ter del TUF e dell'art. 84-quater del Regolamento Emittenti, il Consiglio di Amministrazione di TERNA S.p.A. ha predisposto la "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti".

si astiene come sempre dalla lettura sia di tale Relazione che della Relazione Illustrativa relativa al presente argomento all'ordine del giorno, entrambe predisposte dal Consiglio di Amministrazione, pubblicate ai sensi della normativa vigente e disponibili sul sito internet della Società, nella sezione dedicata alla presente Assemblea, facendo ad esse rinvio.

Ricorda che il voto dell'Assemblea, in relazione al quinto argomento all'ordine del giorno, è vincolante con riferimento alla Prima sezione e non vincolante con riferimento alla Seconda sezione.

In considerazione di quanto precede, in relazione al presente argomento all'ordine del giorno si procederà con due distinte e separate votazioni, sulla base delle proposte di seguito formulate.

Chiede a me notaio di allegare al verbale la lettera del Presidente del Comitato Remunerazione e Nomine di TERNA S.p.A., dott. Enrico Tommaso Cucchiani, riportata in apertura della Relazione sulla politica in materia di remunerazione e sui compensi corrisposti.

Chiede all'Ufficio di Presidenza se siano pervenute domande o richieste di intervento relative al presente argomento all'ordine del giorno.

Non essendo pervenute richieste di intervento e/o domande, dichiara chiusa la discussione e passa alla votazione sui

Teleborsa: distribution and commercial use strictly prohibited

presente argomento all'ordine del giorno.
Secondo quanto previsto dall'articolo 10.1 del Regolamento assembleare, sottopone pertanto alla approvazione dell'Assemblea la seguente proposta formulata dal Consiglio di Amministrazione sull'argomento 5.1 all'ordine del giorno con riguardo alla prima sezione della Relazione sulla politica in materia di remunerazione e sui compensi corrisposti:

"L'Assemblea di TERNA S.p.A.

- *presa visione della "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti" di TERNA S.p.A. predisposta dal Consiglio di Amministrazione della Società ai sensi dell'art. 123-ter del TUF;*
- *esaminata in particolare la prima sezione di tale Relazione, contenente, ai sensi del comma 3 del predetto art. 123-ter, l'illustrazione della politica della Società in materia di remunerazione dei componenti del Consiglio di Amministrazione e del Collegio Sindacale, del Direttore Generale e dei Dirigenti con responsabilità strategiche con riferimento all'esercizio 2025, nonché delle procedure utilizzate per l'adozione e l'attuazione di tale politica;*
- *tenuto conto che, ai sensi del combinato disposto dei commi 3-bis e 3-ter dell'art. 123-ter del TUF, il voto dell'Assemblea sulla suddetta prima sezione della "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti" ha natura vincolante*

delibera

di approvare la prima sezione della "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti", predisposta dal Consiglio di Amministrazione della Società ai sensi dell'art. 123-ter, comma 3, del TUF."

Dichiara quindi aperta la procedura di votazione sulla indicata proposta di deliberazione in merito all'argomento 5.1 all'ordine del giorno.
Invita la segreteria dell'Ufficio di Presidenza a fornire l'esito delle votazioni.
Comunica quindi l'esito delle votazioni fornito dalla segreteria dell'Ufficio di Presidenza sulla base delle votazioni espresse dal Rappresentante Unico, dando lettura dei risultati:

- **partecipanti alla votazione n. 2.223 azionisti, per n. 1.451.059.164 azioni tutte ammesse al voto, pari al 72,192286% del capitale sociale;**
- **favorevoli n. 1.303.957.497 azioni, pari al 89,862462% del capitale sociale rappresentato in Assemblea;**
- **contrari n. 135.260.368 azioni, pari al 9,321492% del capitale sociale rappresentato in Assemblea;**
- **astenuti n. 11.841.299 azioni, pari allo 0,816045% del capitale sociale rappresentato in Assemblea;**
- **non votanti n. 0 azioni, pari allo 0 % del capitale**

Teleborsa: distribution and commercial use strictly prohibited

sociale rappresentato in Assemblea.
La proposta, avendo raggiunto la maggioranza assoluta del capitale presente, è dichiarata approvata.

****

Passa quindi a dare lettura della proposta formulata dal Consiglio di Amministrazione sull'argomento 5.2 all'ordine del giorno con riguardo alla seconda sezione della Relazione sulla politica in materia di remunerazione e sui compensi corrisposti:

"L'Assemblea di TERNA S.p.A.

- *presa visione della "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti" di TERNA S.p.A. predisposta dal Consiglio di Amministrazione della Società ai sensi dell'art. 123-ter del TUF;*
- *esaminata in particolare la seconda sezione di tale Relazione, contenente, ai sensi del comma 4 del predetto art. 123-ter, l'indicazione dei compensi dei componenti del Consiglio di Amministrazione e del Collegio Sindacale, del Direttore Generale e dei Dirigenti con responsabilità strategiche (per questi ultimi in forma aggregata) relativi all'esercizio 2024;*
- *tenuto conto che, ai sensi del comma 6 dell'art. 123-ter del TUF, il voto dell'Assemblea sulla suddetta seconda sezione della "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti" ha natura non vincolante,*

delibera

in senso favorevole sulla seconda sezione della "Relazione sulla politica in materia di remunerazione e sui compensi corrisposti adottata da TERNA S.p.A." predisposta dal Consiglio di Amministrazione della Società ai sensi dell'art. 123-ter, comma 4, del TUF".

Dichiara quindi aperta la procedura di votazione sulla indicata proposta di deliberazione in merito al punto 5.2 all'ordine del giorno.

Invita la segreteria dell'Ufficio di Presidenza a fornire l'esito delle votazioni.

Comunica quindi l'esito delle votazioni fornito dalla segreteria dell'Ufficio di Presidenza sulla base delle votazioni espresse dal Rappresentante Unico, dando lettura dei risultati:

- partecipanti alla votazione n. 2.223 azionisti, per n. 1.451.059.164 azioni tutte ammesse al voto, pari al 72,192286% del capitale sociale;
- favorevoli n. 1.394.750.844 azioni, pari al 96,119502% del capitale sociale rappresentato in Assemblea;
- contrari n. 42.572.039 azioni, pari al 2,933860% del capitale sociale rappresentato in Assemblea;
- astenuti n. 13.736.281 azioni, pari allo 0,946638% del capitale sociale rappresentato in Assemblea;

Teleborsa: distribution and commercial use strictly prohibited

- non votanti n. 0 azioni, pari allo 0 % del capitale sociale rappresentato in Assemblea.

La proposta, avendo raggiunto la maggioranza assoluta del capitale presente, è dichiarata approvata.

Dà atto che è terminata la trattazione del quinto argomento all'ordine del giorno.

*****

Pertanto, conclusa la trattazione degli argomenti all'ordine del giorno, procede alla chiusura dell'Assemblea.

Prima di concludere, rivolge un vivo ringraziamento al Notaio, al Rappresentante Designato, ai componenti dell'Ufficio di Presidenza e a tutti coloro che hanno collaborato per l'organizzazione e lo svolgimento di questa Assemblea.

Dichiara quindi chiusa l'Assemblea alle ore 12,19.

****

Elenco allegati verbale assemblea

Io sottoscritto Notaio do atto che il Presidente mi ha consegnato, chiedendo l'allegazione al verbale:

a) presenze alla costituzione dell'Assemblea;

b) saluto del Presidente agli azionisti;

c) intervento dell'Amministratore Delegato ed esposizione della sintesi dei risultati del bilancio d'esercizio e del bilancio consolidato al 31 dicembre 2024;

d) intervento del Presidente del Collegio Sindacale su primo e secondo punto all'ordine del giorno;

e) esito prima votazione;

f) esito seconda votazione;

g) esito terza votazione;

h) esito quarta votazione;

i) esito quinta votazione parte I;

l) esito quinta votazione parte II;

m) giornale presenze in Assemblea con dettaglio dell'esito delle votazioni;

n) fascicolo completo della Relazione Finanziaria annuale 2024 TERNA comprendente tra l'altro:

(i) la Relazione sulla gestione, inclusiva della rendicontazione consolidata di sostenibilità redatta ai sensi del D. Assemblea degli azionisti di Terna 21 maggio 2025

Intervento del presidente Igor De Biasio

L'occasione di portare il mio saluto all'assemblea annuale degli azionisti di Terna è per me una preziosa possibilità per ribadire con accresciuta convinzione il valore assolutamente strategico della nostra società nella compagine del sistema Paese.

Dal punto di vista geopolitico è inevitabile osservare che i fronti di tensione che avevano determinato negli ultimi anni uno stress sulle catene di approvvigionamento energetico non sono venuti meno; anzi, in alcuni casi, la situazione delle relazioni tra l'Europa e gli altri continenti ha registrato un innalzamento della tensione, che ha avuto conseguenze anche direttamente sui costi dell'energia e sulle condizioni degli scambi economici tra paesi avanzati.

Nello stesso tempo, la riaffermazione di ambiziosi obiettivi europei in materia di transizione energetica al fine del raggiungimento dell'obiettivo dell'annullamento delle emissioni ha continuato a richiedere un'impostazione di sviluppo che sapesse mantenere un forte orientamento all'innovazione e alla transizione digitale, per aumentare efficienza e versatilità del sistema.

Un ulteriore elemento estremamente importante del contesto economico e produttivo che si è confermato in questo anno è il costante aumento del fabbisogno energetico, che si prospetta crescente e progressivo anche per il nostro Paese.

È a fronte a questo quadro di incertezza e tensione, e, al contempo, di profonda trasformazione e crescente fabbisogno, che possiamo riaffermare con una certa soddisfazione non solo la solidità di Terna, ma anche la sua particolare predisposizione a guardare con fiducia alle sfide del futuro.

In primo luogo, mi fa piacere ricordare qui che il vero elemento di forza di Terna è rappresentato dal suo capitale umano: persone qualificate, che con passione quotidianamente determinano la capacità di Terna di rispondere in modo puntuale e sempre più efficiente alle esigenze del mercato energetico. L'attenzione di Terna a questo fattore fondamentale di successo è confermato anche quest'anno dallo sforzo dell'azienda nel moltiplicare le possibilità formative e nel rilancio dei programmi di partnership per la creazione di profili professionali adeguati alle esigenze del contesto di oggi e di domani.

In secondo luogo, dobbiamo richiamare la dimensione infrastrutturale gestita da Terna come asset di valore per tutto il Paese: sono proprio le infrastrutture dislocate sui territori, la loro qualità tecnica e tecnologica, che ci hanno consentito anche quest'anno di offrire performance di servizio di assoluta qualità, tra le migliori al mondo in questo settore.

85

Teleborsa: distribution and commercial use strictly prohibited

In terzo luogo, l'investimento in ricerca, già previsto dal piano industriale e declinato nelle attività di questo anno, confermano l'orientamento della società verso l'innovazione, cioè verso l'acquisizione di soluzioni innovative che possano trovare effettivo impiego nei sistemi di oggi.

Da ultimo, non è mai inutile ricordare che la società Terna è in sé – come già accennato – un patrimonio territoriale diffuso. La relazione con i territori non è appena un aspetto di un inevitabile collegamento motivato esclusivamente da funzioni di servizio; in realtà è molto di più: è connessione con le comunità dei territori, partecipazione indiretta alle loro evoluzioni, integrazione progressiva di comunità ed istituzioni, strutture e persone.

A questo proposito è significativo ricordare che da quest'anno ha preso avvio la Fondazione Terna, che si pone non semplicemente come un soggetto complementare alle dinamiche di business proprie dell'azienda, ma in realtà come sforzo di diffusione organica del patrimonio di Terna in termini di competenze, conoscenze e innovazione, al fine di trasferirlo progressivamente e in modo sempre più capillare e trasversale al variegato tessuto fisico e sociale dell'Italia.

Se dunque guardando l'orizzonte possiamo dire che non mancano fattori di preoccupazione e sfide impegnative, possiamo anche dire che Terna si presenta come un soggetto particolarmente adeguato ad affrontare il futuro: in essa solidità e stabilità sanno combinarsi con dinamismo e integrazione, a partire da una visione che fa della persona e delle comunità i principali protagonisti e i principali destinatari dell'innovazione.

ASSEMBLEA DEGLI AZIONISTI 2025

Intervento dell'Amministratore Delegato attinente al 1 punto all'OdG

Desidero dare il benvenuto al rappresentante unico designato dagli azionisti e ringraziare il Presidente per la sua relazione.

Per prima cosa, vorrei condividere che è per me un onore essere alla guida di Terna come Amministratore Delegato e Direttore Generale. Un'azienda solida, con elevate competenze, che persegue obiettivi ambiziosi.

Con grande soddisfazione, vi presento gli ottimi risultati ottenuti dal Gruppo Terna nel 2024, anno che ha segnato un ulteriore passo avanti nella nostra missione di guidare la transizione energetica del Paese, consolidando il ruolo di leader nel settore.

Nel 2024, Terna ha registrato una crescita significativa di tutti gli indicatori economico-finanziari. Anticipo, in breve, i principali risultati ottenuti, che riprenderò con maggior dettaglio più avanti:

- i ricavi sono aumentati del 15,5% rispetto all'anno precedente, raggiungendo quota 3.680,2 milioni di euro;
- il Margine Operativo Lordo (EBITDA) si è attestato a 2.566,4 milioni di euro, con un incremento del 18,3%;
- l'utile netto di Gruppo è cresciuto del 19,9%, attestandosi a 1.061,9 milioni di euro.

Ancora più significativo l'andamento degli investimenti che hanno raggiunto i 2.692,1 milioni di euro, con un incremento del 17,6% rispetto all'anno precedente.

A marzo di quest'anno, inoltre, Terna ha presentato l'aggiornamento del Piano Industriale 2024-2028, prevedendo un ulteriore aumento degli investimenti a 17,7 miliardi di euro nell'arco di Piano, il valore più elevato nella storia del Gruppo. Questo Piano conferma gli obiettivi strategici che Terna persegue, per adempiere al suo ruolo di Transmission System Operator nazionale. Il Gruppo continuerà ad abilitare l'integrazione della nuova capacità di generazione rinnovabile attraverso l'espansione dell'infrastruttura di rete, da pianificare e realizzare insieme allo sviluppo dei sistemi di accumulo ed all'incremento della sicurezza ed adeguatezza del sistema elettrico, contribuendo anche ad una maggiore indipendenza energetica del Paese.

La duplice transizione – energetica e digitale – resta centrale anche nell'aggiornamento del Piano Industriale, che prevede 2,4 miliardi di euro per digitalizzazione ed innovazione al fine di garantire l'affidabilità e la sicurezza del sistema elettrico.

Nel Piano di Sviluppo 2025 della Rete Elettrica Nazionale, presentato da Terna ad inizio marzo, è previsto un programma di investimenti di oltre 23 miliardi di euro nel periodo 2025-2034, con un incremento del 10% rispetto al precedente Piano. In particolare, nel 2030 saranno completate opere strategiche, quali il Tyrrhenian Link, l'Adriatic Link, il SA.CO.I. 3 e l'interconnessione Elmed tra Italia e Tunisia.

Al centro del Piano di Sviluppo 2025 vi è anche la Programmazione Territoriale Efficiente (PTE) delle infrastrutture energetiche del Paese, volta a facilitare l'integrazione delle fonti rinnovabili nella rete. A questo proposito, il Decreto Energia, D.L. 181 del 9 dicembre 2023, convertito nella Legge 11 del 2 febbraio 2024, ha affidato a Terna il compito di realizzare un nuovo portale digitale. È stata, quindi,

Teleborsa: distribution and commercial use strictly prohibited

realizzata la piattaforma TE.R.R.A. (Territorio, Reti, Rinnovabili e Accumuli), online da giugno 202 tratta di uno strumento di comunicazione istituzionale d'avanguardia, che ha l'obiettivo di favori massima trasparenza su dati ed informazioni riguardo allo stato attuale e futuro degli impianti di rete e di accumulo, le richieste di connessione ed i vincoli ambientali, paesaggistici e culturali. La piattaforma TE.R.R.A. contribuirà ad ottimizzare la pianificazione delle infrastrutture elettriche ed a supportare gli stakeholder coinvolti, attraverso rapporti di monitoraggio ed avanzamento sulla rete e sul sistema elettrico.

Nel corso del 2024, abbiamo inoltre ottenuto autorizzazioni che superano 2,3 miliardi di euro di investimenti dal Ministero dell'Ambiente e della Sicurezza Energetica (MASE) e dagli Assessorati Regionali/Province Autonome competenti: 25 progetti di sviluppo della rete elettrica nazionale che confermano il ruolo fondamentale di Terna e sottolineano l'efficace collaborazione con le istituzioni. Le opere autorizzate porteranno benefici ambientali, sociali ed economici di rilievo: oltre 560 km di nuove linee sottomarine o interrate garantiranno una significativa riduzione degli impatti paesaggistici ed ambientali. Tra i progetti più rilevanti approvati dal MASE, si distinguono tre grandi collegamenti sottomarini: Elmed, l'elettrodotto Italia-Tunisia, realizzato da Terna in collaborazione con STEG, il gestore tunisino della rete elettrica e del gas; l'Adriatic Link, il collegamento tra Marche e Abruzzo; l'elettrodotto Bolano-Annunziata, interconnessione a 380 kV in corrente alternata tra Calabria e Sicilia. Il Ministero ha dato il via libera anche alla realizzazione di due nuovi collegamenti elettrici nella città di Milano, nell'ambito delle attività pianificate per aumentare l'affidabilità dell'alimentazione dei luoghi che accoglieranno i Giochi Olimpici e Paralimpici "Milano-Cortina 2026".

Per quanto riguarda il Tyrrhenian Link, nei primi mesi del 2025 è stata avviata e completata la prima fase della posa del cavo sottomarino del Ramo Est, che collegherà Sicilia e Campania. Il progetto, che include anche il ramo ovest tra Sicilia e Sardegna, prevede un investimento complessivo di circa 3,7 miliardi di euro.

Per quanto attiene all'ampliamento degli asset della rete elettrica nazionale, il Gruppo ha, inoltre, sottoscritto a novembre 2024 un accordo con Areti, società controllata da Acea S.p.A., per acquisire una parte delle infrastrutture in alta tensione situate nell'area metropolitana di Roma, che Areti stessa conferirà in una nuova società di scopo.

Come Gruppo possiamo conseguire gli ambiziosi obiettivi del Piano, generare ulteriore valore per gli azionisti e contribuire allo sviluppo del Paese grazie al nostro capitale più importante - le persone - alla loro eccellenza e al loro costante lavoro: oltre 6.400 dipendenti a fine 2024, in crescita di 493 unità rispetto al 31 dicembre 2023, che si occupano con passione e competenza della gestione, della manutenzione e dell'evoluzione della rete elettrica nazionale.

A conferma del valore della nostra people strategy, avviata nel 2024, Terna ha ricevuto la certificazione Top Employers 2025 per le modalità di gestione e valorizzazione del capitale umano. Terna ha, inoltre, ricevuto la certificazione per la parità di genere, che evidenzia il forte impegno nell'abbattimento delle disuguaglianze e nella creazione di un ambiente di lavoro inclusivo e che premia il merito. Dopo il successo delle prime due edizioni, è stata avviata la terza edizione del Master "Digitalizzazione del sistema elettrico per la transizione energetica" promosso da Terna in collaborazione con le Università degli Studi di Cagliari, Palermo e Salerno nell'ambito del progetto Tyrrhenian Lab.

La gestione del nostro business si basa sui valori di sostenibilità e sul rispetto dei principi ESG (Environmental, Social, Governance). A sostegno di ciò, nel 2024, Terna ha confermato la sua leadership nel campo della sostenibilità con l'inclusione, tra gli altri, negli indici STOXX "Global ESG

Teleborsa: distribution and commercial use strictly prohibited

Leaders", Dow Jones Sustainability, ESG FTSE4Good ed Euronext Vigeo. La sostenibilità è p integrante della Strategia del Gruppo; gli investimenti di Terna sono, infatti, considerati sostenib 99% secondo i criteri di ammissibilità introdotti dalla Tassonomia Europea.

In linea con la strategia del Gruppo, che coniuga investimenti e sostenibilità, Terna ha rafforzato il suo impegno nella finanza sostenibile, segmento di mercato in cui l'Azienda resta leader, lanciando ad aprile 2024 un'emissione obbligazionaria perpetua subordinata ibrida non convertibile green, per un ammontare nominale di 850 milioni di euro. Ha, inoltre, ottenuto grande favore da parte del mercato, con richieste per quasi cinque volte l'offerta, il nuovo green bond da 750 milioni di euro, con durata pari a 7 anni, lanciato a febbraio del 2025.

Relativamente alla creazione di valore condiviso, la Fondazione Terna, costituita il 30 luglio 2024, concentrerà le proprie attività su tre principali aree di intervento, tutte riconducibili ad un obiettivo generale di inclusione sociale. Mi riferisco innanzitutto alla diffusione della cultura energetica, attraverso iniziative di formazione che coinvolgono le generazioni più giovani per promuovere l'alfabetizzazione energetica; il secondo ambito è il contrasto alla povertà energetica. Infine, la definizione di programmi che favoriscano l'accesso al mercato del lavoro e le nuove opportunità professionali nel settore dell'energia.

Oggi l'Assemblea è chiamata ad approvare i risultati del 2024 di Terna S.p.A., che hanno segnato un deciso miglioramento rispetto all'anno precedente.
A livello del Gruppo, i ricavi crescono di 493,5 milioni di euro rispetto al precedente esercizio raggiungendo quota 3.680,2 milioni di euro, con un incremento del +15,5% rispetto al 2023, trainato dalle Attività Regolate e Non Regolate.
Il Margine Operativo Lordo (EBITDA) dell'esercizio si attesta a 2.566,4 milioni di euro, in crescita di 397,8 milioni di euro rispetto ai 2.168,6 milioni di euro del 2023, grazie ad un migliore risultato delle Attività Regolate, con un incremento del 18,3% sull'anno precedente.
Il Risultato Operativo (EBIT), dopo aver scontato gli ammortamenti e le svalutazioni, si attesta a 1.677,4 milioni di euro, rispetto ai 1.362,3 milioni di euro del 2023 (+23,1%).
L'utile netto di Gruppo dell'esercizio (esclusa la quota di pertinenza dei terzi) si attesta a 1.061,9 milioni di euro, in crescita di 176,5 milioni di euro (+19,9%) rispetto agli 885,4 milioni di euro del 2023.
Gli investimenti complessivi realizzati dal Gruppo Terna nel 2024, pari a 2.692,1 milioni di euro, sono in crescita del +17,6% rispetto ai 2.290,0 milioni di euro dell'esercizio 2023.
Con queste premesse, considerato l'utile netto di Terna S.p.A. pari a 970,4 milioni di euro, proponiamo all'approvazione degli azionisti un dividendo per l'esercizio 2024 pari a 39,62 centesimi di euro per azione, in linea con la politica dichiarata al mercato (+17% rispetto al 2023), di cui 11,92 centesimi già pagati lo scorso novembre a titolo di acconto, mentre i rimanenti 27,70 centesimi per azione saranno pagati a giugno 2025.
Il titolo Terna ha chiuso il 2024 a 7,620 euro/azione, pari a una performance annua del +0,9% rispetto al 2023. Considerando sia la performance di Borsa che l'impatto dei dividendi pagati nell'anno, il titolo Terna ha garantito un ritorno totale per i propri azionisti del 5,5%.

In conclusione, consentitemi di ringraziare il Presidente Igor De Biasio, il Consiglio di Amministrazione, il Collegio Sindacale, nonché tutti i colleghi di Terna per l'ottimo lavoro svolto nel 2024. Auguro a tutti i migliori successi anche per l'anno corrente.

Passo, quindi, di nuovo la parola al Presidente De Biasio.

Dott. Mario Matteo Busso

******

La presente relazione, redatta ai sensi dell'art. 153 del D.Lgs. n. 58/1998 ("TUF") e dell'art. 2429 del c.c., riferisce sull'attività svolta dal Collegio Sindacale di TERNA S.p.A. ("Terna" o anche la "Società") nell'esercizio conclusosi il 31 dicembre 2024, in conformità alla normativa di riferimento, tenuto altresì conto delle "Norme di comportamento del Collegio Sindacale di società quotate" raccomandate dal Consiglio Nazionale dei Dottori Commercialisti e degli Esperti Contabili, delle disposizioni CONSOB in materia di controlli societari e delle indicazioni contenute nel Codice di *Corporate Governance* promosso da Borsa Italiana.

Inoltre, avendo Terna adottato il modello di *governance* tradizionale, il Collegio Sindacale si identifica con il "Comitato per il controllo interno e la revisione contabile" cui competono ulteriori specifiche funzioni di controllo e monitoraggio in tema di informativa finanziaria e revisione legale, previste dall'art. 19 del D.Lgs. 27 gennaio 2010 n. 39, così come modificato dal D.Lgs. 17 luglio 2016 n. 135, e dal D. Lgs. N. 125/2024.

La relazione contiene i seguenti paragrafi:

1. Attività di Vigilanza su:
   - osservanza delle norme di legge, regolamentari e statutarie;
   - rispetto dei principi di corretta amministrazione e sull'adeguatezza della struttura organizzativa;
   - sistema di controllo interno e di gestione del rischio;
   - sistema amministrativo e contabile e sul processo di informativa finanziaria;
   - rendicontazione di sostenibilità;

90

emarket sdir storage CERTIFIED

Terna

- operazioni con parti correlate;

2. Comitato per il Controllo interno e la Revisione contabile:

2.1 Attività di vigilanza sulla revisione dei conti annuali e consolidati:

Per quanto riguarda i giudizi e le attestazioni, la Società di Revisione nelle relazioni sulla revisione contabile sul bilancio d'esercizio e consolidato ha:

- rilasciato un giudizio dal quale risulta che i bilanci d'esercizio di Terna e consolidato del Gruppo Terna forniscono una rappresentazione veritiera e corretta della situazione patrimoniale e finanziaria della Società e del Gruppo al 31 dicembre 2024, del risultato economico e dei flussi di cassa per l'esercizio chiuso a tale data, in conformità agli *International Financial Reporting Standards* adottati dall'Unione Europea, nonché ai provvedimenti emanati in attuazione dell'art. 9 del D. Lgs. 38/2005;
- rilasciato un giudizio di coerenza dal quale risulta che la Relazione sulla Gestione che correda il bilancio d'esercizio e il bilancio consolidato al 31 dicembre 2024 e alcune specifiche informazioni contenute nella "Relazione sul Governo Societario e gli Assetti Proprietari" indicate nell'articolo 123-*bis*, comma 4, del TUF, la cui responsabilità compete agli amministratori di Terna, sono coerenti con il bilancio di esercizio e con il bilancio consolidato e sono redatte in conformità alle norme di legge.

In data 23 aprile 2025 la Società di Revisione ha, altresì, presentato al Collegio Sindacale la relazione aggiuntiva prevista dall'art. 11 del Regolamento UE n. 537/2014, dalla quale non risultano carenze significative nel sistema di controllo interno in relazione al processo di informativa finanziaria meritevoli di essere portate all'attenzione dei responsabili delle attività di *governance*.

La Società di Revisione ha presentato al Collegio Sindacale, nella relazione aggiuntiva suddetta, la dichiarazione relativa all'indipendenza, così come richiesto dall'art. 6 del Regolamento UE n. 537/2014, dalla quale

SA

Teleborsa: distribution and commercial use strictly prohibited

emarket sdir storage CERTIFIED

Terna

non emergono situazioni che possono compromettere la sua indipendenza.

2.2. Attività di vigilanza del processo di rendicontazione consolidata di sostenibilità e del suo esame limitato da parte della società di revisione:

Il Collegio Sindacale ha acquisito conoscenza dalle strutture preposte al processo di redazione della rendicontazione di sostenibilità e verificato l'esistenza:

- di un'adeguata struttura organizzativa preposta alla rendicontazione di sostenibilità;
- di un adeguato sistema amministrativo-contabile;
- di direttive, procedure e prassi operative adottate allo scopo di garantire che la rendicontazione consolidata di sostenibilità sia completa ed attendibile;
- di adeguati flussi informativi periodici, sia quantitativi che qualitativi, funzionali alla definizione della rendicontazione di sostenibilità.

Il Collegio Sindacale ha monitorato l'attività di attestazione della rendicontazione consolidata di sostenibilità ponendo in essere un regolare scambio di flussi informativi con i revisori della rendicontazione di sostenibilità e ha effettuato l'analisi dell'impianto metodologico dagli stessi adottato.

Il Dirigente Preposto e la Società di revisione hanno confermato al Collegio Sindacale di aver tenuto conto, nell'ambito delle proprie verifiche, delle indicazioni fornite dall'Autorità Europea degli Strumenti Finanziari e dei Mercati (ESMA) nel documento del 24 ottobre 2024 sulle priorità comuni europee di vigilanza e del Richiamo di attenzione Consob del 20 dicembre 2024, in tema di informativa sul clima fornita nella Rendicontazione di sostenibilità.

In data 23 aprile 2025 la Società di revisione ha rilasciato, ai sensi del D. Lgs. 125/2024, la relazione sull'esame limitato della rendicontazione di sostenibilità esprimendo le seguenti conclusioni:

RL

Teleborsa: distribution and commercial use strictly prohibited

"Sulla base del lavoro svolto, non sono pervenuti alla nostra attenzione elementi che ci facciano ritenere che:

- *la rendicontazione consolidata di sostenibilità del Gruppo Terna relativa all'esercizio chiuso al 31 dicembre 2024 non sia stata redatta, in tutti gli aspetti significativi, in conformità ai principi di rendicontazione adottati dalla Commissione Europea ai sensi della Direttiva (UE) 2013/34/UE* (European Sustainability Reporting Standards, *nel seguito anche "ESRS");*
- *le informazioni contenute nel paragrafo "La Tassonomia UE" della rendicontazione consolidata di sostenibilità non siano state redatte, in tutti gli aspetti significativi, in conformità all'art. 8 del Regolamento (UE) n. 852 del 18 giugno 2020 (nel seguito anche "Regolamento Tassonomia")".*

Sulla base delle informazioni acquisite nel corso dello svolgimento dell'attività di vigilanza, il Collegio sindacale, anche nel ruolo di Comitato per il controllo interno e la revisione contabile, non ha osservazioni da riferire in relazione agli aspetti di tale materia di propria competenza.

3. Altre attività: modalità di concreta attuazione delle regole di *corporate governance*, politiche remunerazione, esposti, denunce, omissioni o fatti censurabili, pareri resi ed iniziative intraprese, autovalutazione.

4. Conclusioni:

   Tenuto conto di tutto quanto precede, il Collegio Sindacale, considerato il contenuto delle relazioni redatte dalla Società di Revisione, preso atto delle attestazioni rilasciate congiuntamente dall'Amministratore Delegato e dal Dirigente Preposto alla redazione dei documenti contabili societari, esprime, per quanto di sua competenza, parere favorevole alla proposta di approvazione del bilancio d'esercizio di Terna al 31 dicembre 2024 e alla proposta di destinazione dell'utile netto dell'esercizio di Euro 970.356.839 così come formulata dal Consiglio di Amministrazione.

Terna investe per lo sviluppo dell'Italia

Assicuriamo la sicurezza energetica e l'equilibrio tra domanda e offerta di elettricità 24 ore su 24, mantenendo il sistema affidabile, efficiente e accessibile a tutti.

Investiamo e innoviamo ogni giorno per sviluppare una rete elettrica in grado di integrare l'energia prodotta da fonti rinnovabili, collegando sempre meglio le diverse aree del Paese e rafforzando le interconnessioni con l'estero, con un approccio sostenibile e attento alle esigenze dei territori e delle persone con cui lavoriamo.

2015 2020

Siamo dietro l'energia che usi ogni giorno

Abbiamo la responsabilità di garantire la continuità del servizio elettrico, condizione indispensabile perché l'elettricità arrivi in ogni istante a case e imprese in Italia.

Assicuriamo a tutti parità di accesso all'elettricità e lavoriamo per consegnare energia pulita alle generazioni future.

2021 2025

Pensiamo al futuro dell'energia

Ci impegniamo per un futuro alimentato da energia pulita, favorendo nuovi modi di consumare e di produrre basati sempre più sulle fonti rinnovabili per raggiungere gli obiettivi di una transizione energetica che sia equa e inclusiva, anche riducendone i costi.

Grazie alla nostra visione d'insieme del sistema elettrico e alle nuove tecnologie digitali, guidiamo il percorso del Paese verso l'azzeramento delle emissioni di gas serra al 2050, in linea con i target climatici europei.

VISION

Teleborsa: distribution and commercial use strictly prohibited

Lettera agli stakeholder

Cari azionisti, cari stakeholder,

nel corso del 2024, il **contesto macroeconomico** è stato caratterizzato da una maggiore stabilità rispetto all'anno precedente, dalla riduzione dell'inflazione e dalla minore volatilità del prezzo delle commodities, pur perdurando le tensioni sui prezzi dell'energia legate a diversi fattori tra cui i conflitti in atto: questi trend hanno comportato un cambio della **politica monetaria** della Banca Centrale Europea che, a partire dal mese di giugno, ha iniziato un percorso di riduzione dei tassi di interesse, per la prima volta dal 2019.

In questo scenario, Terna ha registrato un miglioramento di tutti i **principali indicatori economico-finanziari** e ha mantenuto il suo impegno per la realizzazione della transizione energetica e digitale del sistema elettrico del Paese, garantendo gli investimenti destinati alle infrastrutture e ai programmi legati a questi obiettivi.

Nell'aggiornamento del **Piano Industriale 2024-2028** - presentato a marzo di quest'anno - Terna ha previsto una significativa crescita degli investimenti, i più alti nella storia del Gruppo, che nell'arco di Piano saranno pari complessivamente a 17,7 miliardi di euro per la transizione energetica, l'indipendenza energetica e l'accelerazione del processo di decarbonizzazione del Paese. Il concetto di duplice transizione - energetica e digitale - è il fondamento del Piano Industriale, che ha stanziato 2,4 miliardi di euro in digitalizzazione e innovazione, per garantire anche l'affidabilità e la sicurezza del sistema elettrico, perché non c'è transizione energetica senza una contestuale transizione digitale che la accompagni e la sostenga.

Come Azienda possiamo conseguire gli ambiziosi obiettivi del Piano, generare ulteriore valore per gli azionisti e contribuire allo sviluppo del Paese grazie al nostro capitale più importante - le **persone** - alla loro **eccellenza** e al loro costante lavoro: **oltre 6.400 dipendenti** che, ogni giorno, si occupano con **passione** e **competenza** della **gestione**, della **manutenzione** e dell'**evoluzione della rete elettrica nazionale**.

Nel percorso verso la decarbonizzazione, nell'anno appena concluso, oltre che sulle persone abbiamo investito per abilitare e velocizzare l'integrazione delle fonti rinnovabili nella rete nazionale anche con processi di digitalizzazione. Abbiamo allocato investimenti sulle tecnologie a beneficio della **sicurezza energetica** e della **resilienza del sistema elettrico italiano**, per migliorarne efficienza e affidabilità.

Prosegue la **forte accelerazione nello sviluppo delle fonti rinnovabili**: nel 2024 l'incremento di capacità è stato pari a circa 7,5 GW, il 29% in più rispetto al 2023, corrispondente a circa 1,7 GW. Il dato delle nuove attivazioni è passato da 1 GW nel 2021 a circa 3 GW del 2022, per raggiungere circa 5,8 GW nel 2023. L'interesse del mercato resta alto: al 31 dicembre 2024, in Italia si registrano 76,6 GW di potenza installata da fonti rinnovabili, principalmente solare, idrico rinnovabile, eolico e biomasse. E, sempre al 31 dicembre dello scorso anno, Terna ha ricevuto **richieste di connessione alla Rete di Trasmissione Nazionale (RTN)** per oltre 348 GW di nuova capacità rinnovabile, di cui il 43,6% riguarda il solare e il 56,3% l'eolico (on-shore e off-shore).

Per soddisfare queste richieste e per portare avanti la *twin transition* - energetica e digitale - servono infrastrutture e tempi contenuti per realizzarle. La collaborazione costante tra Terna e le istituzioni nazionali e territoriali favorisce una concertazione efficace: la nostra Azienda si distingue in questo campo come *best practice* a livello europeo. Nel 2024 abbiamo registrato **oltre 2,3 miliardi di euro di investimenti** autorizzati dal Ministero dell'Ambiente e della Sicurezza Energetica (MASE) e dagli Assessorati regionali/Province Autonome competenti: **25 progetti di sviluppo della rete elettrica nazionale** che confermano il ruolo cruciale di Terna nella transizione energetica italiana e sottolineano l'efficace collaborazione con le istituzioni.

Teleborsa: distribution and commercial use strictly prohibited

Nel 2024, tra i progetti più rilevanti **approvati dal MASE** spiccano tre grandi collegamenti sottomarini: Elmed, l'elettrodotto Italia-Tunisia, realizzato da Terna in collaborazione con STEG, il gestore tunisino della rete elettrica e del gas; l'Adriatic Link, il collegamento tra Marche e Abruzzo; l'elettrodotto Bolano-Annunziata, interconnessione a 380 kV in corrente alternata tra Calabria e Sicilia. Il Ministero ha dato il via libera anche alla realizzazione di due nuovi collegamenti elettrici nella città di Milano, nell'ambito delle attività pianificate per aumentare l'affidabilità dell'alimentazione dei luoghi che accoglieranno i Giochi Olimpici e paralimpici "Milano-Cortina 2026".

Si trova, inoltre, in fase di progettazione esecutiva il **Tyrrhenian Link**: a inizio 2025 è stata avviata a Fiumetorto, nel Comune di Termini Imerese, in provincia di Palermo, la prima fase di posa del cavo sottomarino del ramo est, che collegherà Sicilia e Campania e toccherà una profondità record di oltre 2.000 metri sotto il livello del mare. Il progetto, che include anche il ramo ovest tra Sicilia e Sardegna, prevede un investimento complessivo di circa 3,7 miliardi di euro.

Queste opere porteranno non solo vantaggi dal punto di vista dell'elettrificazione del Paese, ma anche benefici di natura sociale e legati al territorio: **oltre 560 km di nuove linee sottomarine o interrate** garantiranno, infatti, una significativa riduzione degli impatti paesaggistici e ambientali. Inoltre, grazie a questi interventi, saranno eliminati circa 100 sostegni e liberati oltre 70 ettari di territorio, con effetti positivi per le comunità locali. Come Azienda, siamo convinti che la dimensione ambientale e quella sociale si sostengano a vicenda ed è per questo che mettiamo al centro le persone, per una *just transition* sempre più equa e inclusiva. Un obiettivo chiave della **Fondazione Terna**, nata a luglio del 2024 e che, nei primi mesi del 2025, ha iniziato le sue attività.

Si tratta di elementi che confermano come la gestione del nostro business sia incentrata sui valori di sostenibilità e sul rispetto dei principi ESG (*Environmental*, *Social*, *Governance*), sempre in coerenza con i dieci principi del Global Compact delle Nazioni Unite - a cui la nostra Azienda aderisce dal 2009 - garantendo la minimizzazione degli impatti ambientali, il coinvolgimento degli stakeholder territoriali e il rispetto dei principi di integrità, responsabilità e trasparenza. La sostenibilità ambientale e il rispetto per la biodiversità sono centrali anche nelle fasi di progettazione e realizzazione delle grandi opere: per il Tyrrhenian Link, ad esempio, ad agosto 2024, Terna ha avviato, presso l'approdo di Fiumetorto, un progetto sperimentale di trapianto di **Cymodocea nodosa**, una pianta acquatica protetta che è fondamentale per l'ecosistema marino. La stessa attenzione per gli aspetti ambientali è stata rivolta anche ai lavori per l'elettrodotto Elmed, dove si è provveduto all'espianto e alla ripiantumazione di oltre 1.700 ulivi nel comune di Partanna, in provincia di Trapani, per predisporre l'area in cui sorgerà la stazione di conversione.

Tra i progetti di Terna inseriti nel programma REPowerEU è presente il **SA.CO.I. 3**, l'interconnessione elettrica in corrente continua a 200 kV che collegherà Sardegna, Corsica e Toscana, contribuendo al rafforzamento del mercato elettrico europeo e favorendo l'integrazione delle fonti rinnovabili. Per la realizzazione di quest'opera sono stati avviati nel 2025 i lavori terrestri: l'apertura dei cantieri conferma l'impegno dell'Azienda nella fase di esecuzione e realizzazione delle infrastrutture elettriche, essenziali per il raggiungimento degli obiettivi fissati dal Piano Nazionale Integrato per l'Energia e il Clima (PNIEC).

Inoltre, Terna ha previsto nel **Piano di Sviluppo 2025** un programma di investimenti di **oltre 23 miliardi di euro** nel periodo 2025-2034, con un incremento del 10% rispetto al precedente Piano. Al 2030 è previsto il completamento di **opere strategiche** quali il Tyrrhenian Link, l'Adriatic Link, il SA.CO.I. 3 e l'interconnessione Elmed, tra le altre. Mentre, al 2034, ulteriori rinforzi infrastrutturali tra cui i collegamenti HVDC Milano-Montalto, la Dorsale Adriatica

Teleborsa: distribution and commercial use strictly prohibited

Foggia-Forlì e il Central Link (tra Umbria e Toscana), l'elettrodotto Montecorvino-Avellino-Benevento e GR.ITA. 2, il raddoppio dell'interconnessione Italia-Grecia (prima fase del progetto). Con queste opere, Terna punta a garantire la **sicurezza** e la **qualità** del servizio, l'**efficienza** e la **resilienza** della rete, la **sostenibilità** e l'**integrazione** della produzione da **fonti rinnovabili**.

Al centro del Piano di Sviluppo 2025 vi è anche la programmazione territoriale efficiente delle infrastrutture energetiche del Paese. In questo ambito, il Decreto Energia, D.L.181 del 9 dicembre 2023, convertito nella Legge 11 del 2 febbraio 2024, ha affidato a Terna il compito di realizzare un nuovo portale digitale. È la **piattaforma TE.R.R.A.** (Territorio, Reti, Rinnovabili e Accumuli), online da giugno 2024, che integra e rende consultabili informazioni strategiche e rilevanti sulle infrastrutture energetiche esistenti e future, sulle richieste di connessione e sui vincoli territoriali. Possono accedervi amministratori nazionali e locali, legislatori e soggetti proponenti che, grazie alla massima trasparenza e al patrimonio informativo sulle richieste di connessione e il loro stato, hanno a disposizione uno strumento fondamentale per una gestione efficiente. Da ottobre 2024, è online anche il nuovo **portale Dati di Terna**, una piattaforma digitale integrata che riporta tutti i dati di esercizio e statistici del sistema elettrico nazionale e di mercato e, per la prima volta, anche quelli sui sistemi di accumulo.

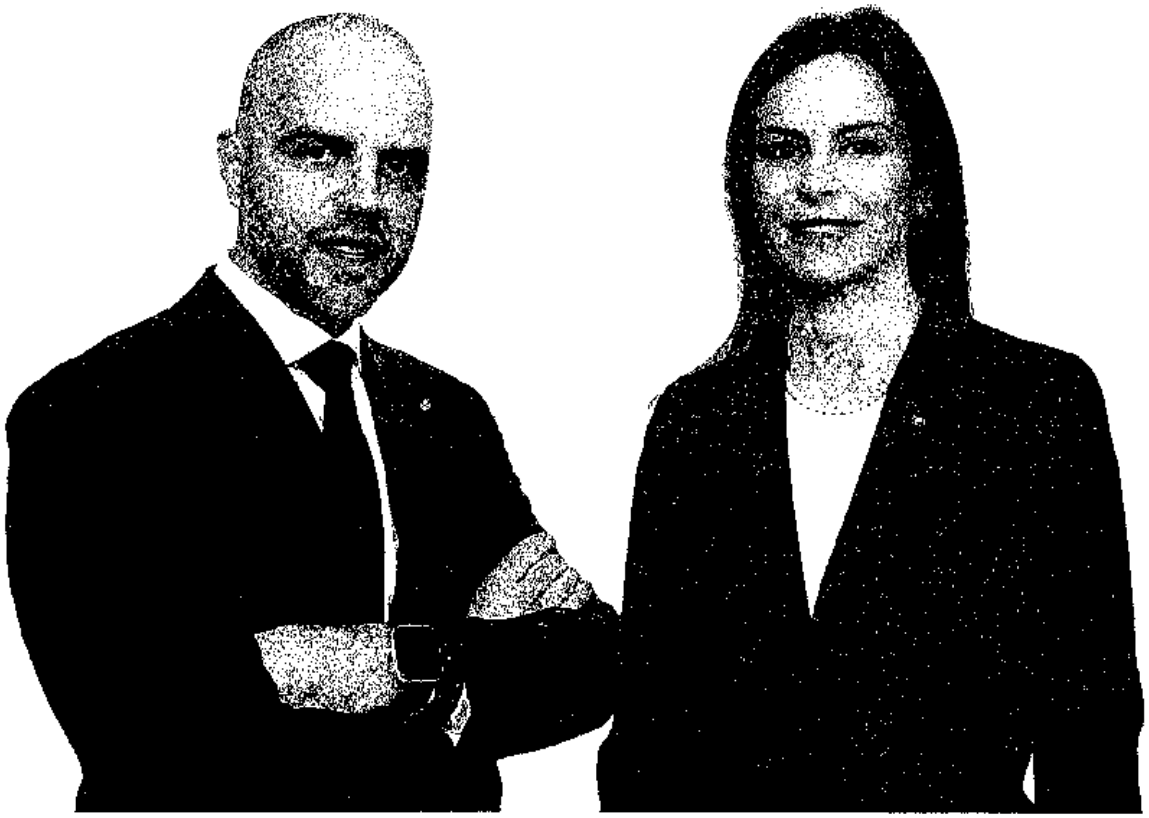
Lo studio delle tecnologie più innovative e all'avanguardia per la transizione energetica è uno strumento essenziale per intercettare nuove soluzioni di IoT (*Internet of Things*) e di Intelligenza Artificiale, da affiancare a modelli di Digital Twin della rete elettrica, robotica e droni per il monitoraggio degli asset. Terna, infatti, adotta un modello di *open innovation*, che si avvale anche di un'antenna nella Silicon Valley, il luogo con la maggiore densità di imprese innovative al mondo; per supportare le iniziative di innovazione e ricerca, a ottobre scorso è stato infatti aperto a **San Francisco** il primo **Terna Innovation Zone** con lo scopo di sostenere lo sviluppo di startup e di piccole e medie imprese innovative italiane, favorendo il loro accesso al mercato degli Stati Uniti. A questa prima iniziativa è seguito, all'inizio del 2025, il **Terna Innovation Zone Tunisia**, primo hub di innovazione in Africa gestito dalla nostra Azienda, che rafforza il partenariato strategico tra Italia e Tunisia e promuove l'innovazione tecnologica, favorendo lo sviluppo delle competenze nel settore energetico tunisino.

Polo di riferimento per soluzioni tecnologiche, innovative e digitali in ambito energetico e industriale, Terna Energy Solutions S.r.l. (TES), società del Gruppo che gestisce le **Attività Non Regolate** sui mercati competitivi, si è riorganizzata, a marzo del 2025, attraverso l'integrazione di competenze diversificate lungo tutta la catena del valore dell'energia. Il nuovo assetto societario di TES, coerentemente con il modello di business collegato all'aggiornamento del Piano Industriale 2024-2028, prevede che la società Altenia, in cui confluiscono tutte le attività di system integrator per la transizione energetica, si affianchi al Gruppo Tamini, leader italiano nel settore dei trasformatori, e al Gruppo Brugg Cables, azienda di riferimento nel settore dei cavi terrestri.

In linea con la strategia del Gruppo, che coniuga investimenti e sostenibilità, Terna ha rafforzato il suo impegno nella finanza sostenibile, segmento di mercato in cui l'Azienda resta leader: a conferma di tale strategia, ad aprile 2024 ha lanciato un'**emissione obbligazionaria perpetua subordinata ibrida non convertibile green**, a tasso fisso, per un ammontare nominale complessivo pari a 850 milioni di euro. Ha, inoltre, ottenuto grande favore da parte del mercato, con richieste per quasi cinque volte l'offerta, il **nuovo green bond** da 750 milioni euro, con durata pari a 7 anni, lanciato a febbraio del 2025. Nell'anno abbiamo anche celebrato i **20 anni dalla quotazione** sul mercato telematico di Borsa italiana: in quest'arco di tempo il valore del titolo è quadruplicato e la capitalizzazione è tra le più alte del FTSE MIB.

Nel periodo, Terna ha confermato la sua **leadership nel campo della sostenibilità** con l'inclusione, tra gli altri, nell'indice STOXX "Global ESG Leaders", Dow Jones Sustainability, FSG FTSE4Good ed Euronext Vigeo. La sostenibilità è parte integrante del Piano Industriale 2024-2028 del Gruppo; gli investimenti di Terna sono, infatti, considerati sostenibili al 99% secondo i criteri di ammissibilità introdotti dalla Tassonomia Europea. A conferma della sua importanza, il Piano di Sostenibilità, per la prima volta nella storia di Terna, è stato integrato nel Piano Industriale.

Per il quinto anno consecutivo, Terna ha ottenuto il primo posto nella principale indagine in Europa che valuta la trasparenza sui canali digitali delle più grandi società quotate in Borsa: il **Webranking by Comprend**, raggiungendo nell'edizione 2024-2025 il punteggio di 95,3 su 100, in crescita di 0,6 punti rispetto all'anno precedente.



653

Teleborsa: distribution and commercial use strictly prohibited

Lo sviluppo delle strategie aziendali e dei progetti core del nostro Piano Industriale va di pari passo con l'attenzione alle persone: il loro benessere, lo sviluppo delle competenze e la valorizzazione delle eccellenze sono parte integrante della nostra *people strategy* che coniuga proattività, inclusione e performance, promuovendo una cultura organizzativa incentrata su crescita, cambiamento e merito, elementi che si ritrovano anche all'interno del centro di formazione Terna Academy. La *people strategy* di Terna include anche la ricerca attiva e costante di professionisti e di talenti, in linea con il Piano Industriale 2024-2028, che prevede una crescita organica di 1.400 persone. A conferma del valore della people strategy di Terna, avviata nel 2024, la certificazione **Top Employers 2025** ricevuta da Terna per le eccellenze e le sue strategie HR. Strettamente collegato agli obiettivi del Piano ESG del Gruppo, con cui l'Azienda si è impegnata a creare uno sportello di ascolto, promuovere un linguaggio inclusivo, sensibilizzare sul tema della disabilità e consolidare ulteriormente la formazione di coloro che si occupano di selezione del personale, per pari opportunità di accesso, è il progetto **Terna Ability**. Un programma verticale, articolato in numerosi progetti, presentato da Terna nel 2024 con l'obiettivo di creare valore per l'Azienda e per il Paese. Lo scorso anno Terna ha, inoltre, ricevuto la certificazione per la **parità di genere**, che evidenzia il forte impegno nell'abbattimento delle disuguaglianze e nella creazione di un ambiente di lavoro inclusivo e che premia il merito.

Dopo il successo delle prime due edizioni, ha preso il via la terza edizione del Master "Digitalizzazione del sistema elettrico per la transizione energetica" promosso da Terna in collaborazione con le Università degli Studi di Cagliari, Palermo e Salerno nell'ambito del progetto **Tyrrhenian Lab**. Un modello vincente che investe sulla **formazione continua di nuove competenze**, con un'opportunità formativa di alto livello accademico per le nuove generazioni che entreranno a far parte del Gruppo Terna, e che puntiamo a estendere anche in altre sedi in Italia e all'estero.

L'impegno preso da Terna "con il futuro dell'energia" coinvolge, dunque, non solo le **infrastrutture**, ma anche le **persone**, il nostro asset più importante e distintivo: intendiamo valorizzare questo capitale lavorando su sostenibilità, investimenti, solidarietà e digitalizzazione, per abilitare una **transizione energetica e digitale, sostenibile, giusta e inclusiva**.

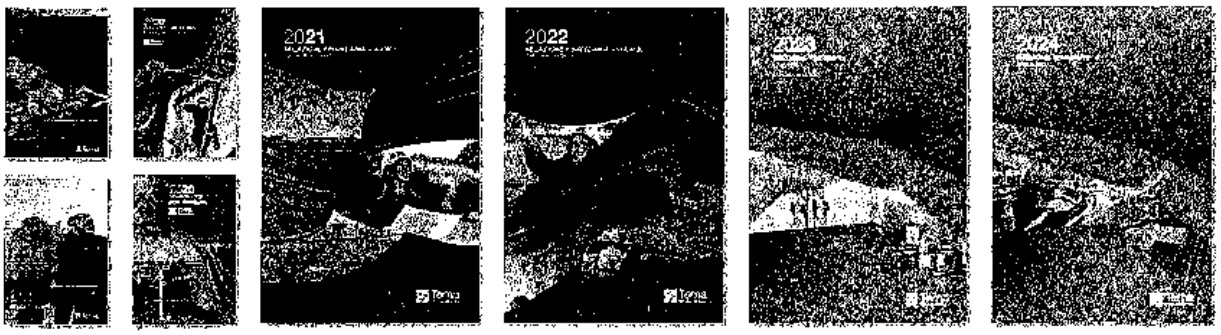
Presentazione della Relazione Finanziaria Annuale 2024

La Relazione Finanziaria Annuale 2024 del Gruppo Terna contiene la Relazione sulla Gestione, che, in virtù dei recenti obblighi normativi in ambito di rendicontazione delle informazioni a carattere ESG, include in un'apposita sezione la Rendicontazione Consolidata di Sostenibilità, oltre che il Bilancio Consolidato e il Bilancio dell'Esercizio della Capogruppo e ha l'obiettivo il fornire a tutti gli stakeholder una rendicontazione chiara, completa ed equilibrata del business del Gruppo e del suo processo di creazione di valore.

Il processo di creazione di valore del Gruppo Terna rappresenta le fasi della creazione di ricchezza e di benefici finanziari e sostenibili generati da parte dell'Azienda nel tempo, attraverso un Modello di business sostenibile fondato sull'interazione tra i capitali, tangibili e intangibili, a disposizione dell'organizzazione. È per questo che il Gruppo Terna ha scelto di descrivere il proprio modello di creazione del valore per capitali, in linea con il framework dell'International Integrated Reporting Council (IIRC), i quali rappresentano le risorse essenziali di cui il Gruppo Terna dispone per creare e preservare valore nel tempo attraverso le loro combinazioni e interazioni continue, al fine anche di fornire gli output e i relativi outcome generati, evidenziando i vantaggi che i propri stakeholder ottengono sia da un punto di vista finanziario che da un punto di vista di impatti sociali-relazionali e ambientali prodotti.

Il Gruppo Terna a partire dall'anno di rendicontazione 2024 è obbligato a predisporre la Rendicontazione Consolidata di Sostenibilità 2024 ai sensi del Decreto Legislativo 6 settembre 2024, n. 125 (il "Decreto"), che recepisce nell'ordinamento nazionale le disposizioni della Direttiva (UE) 2022/2464 Corporate Sustainability Reporting Directive ("CSRD"), in sostituzione di quanto precedentemente previsto in materia di dichiarazione non finanziaria (ex D. Lgs. 254/2016). Si precisa che, nel 2023 il Gruppo Terna ha predisposto il Rapporto Integrato, che coincideva con la Relazione sulla Gestione, il Rapporto di Sostenibilità e la Dichiarazione consolidata di carattere Non Finanziario.



Come previsto dalla CSRD la Rendicontazione Consolidata di Sostenibilità è stata redatta secondo gli European Sustainability Reporting Standards (ESRS)[1] sviluppati dall'EFRAG (European Financial Reporting Advisory Group), la cui finalità principale è di fornire agli stakeholder una visione completa e trasparente delle performance in ambito ESG del Gruppo, permettendo un'agevole comparabilità con altre realtà del panorama europeo. Tali standard di rendicontazione sono ben identificati all'interno della Relazione sulla Gestione.

Il Gruppo Terna al fine di garantire la comparabilità dell'informativa di sostenibilità obbligatoria e la piena aderenza alla normativa, ha incluso la Rendicontazione Consolidata di Sostenibilità in un'apposita sezione della Relazione sulla Gestione e ha definito una struttura della stessa in linea con l'esemplificativo dell'appendice F (ESRS 1) e con le raccomandazioni esterne (ESMA), prevedendo pochi e specifici rimandi - all'interno della Relazione sulla Gestione - con riferimento in particolare al business di Terna e alla descrizione strategica del Gruppo al fine di garantire maggiore fluidità nella lettura di questi aspetti e agevolare la reperibilità delle informazioni. Per maggiori dettagli in merito alla struttura della Rendicontazione Consolidata di Sostenibilità si rinvia a quanto esposto nel paragrafo "La nota metodologica e il perimetro di rendicontazione" nella sezione "Informazioni generali".

[1] Tali standard si applicano per la prima volta con riferimento al 2024 e, pertanto, non è previsto un comparativo riferito al 2023.

GSS

Teleborsa: distribution and commercial use strictly prohibited

2019 — 2020 — 2021 — 2022 — 2023 — **2024**

Di conseguenza, le ulteriori informazioni in ambito ESG di cui il Gruppo Terna vuole fornire informativa saranno integrate all'interno di documenti complementari pubblicati su base volontaria o all'interno del sito web aziendale.

I contenuti della Rendicontazione Consolidata di Sostenibilità 2024 si basano sulle risultanze emerse dall'Analisi di Doppia Rilevanza, condotta in conformità con i requisiti della CSRD e degli ESRS, e relative Linee Guida di implementazione. Tale analisi ha permesso di identificare i temi di sostenibilità più rilevanti per il Gruppo Terna, adottando un approccio integrato che ha considerato sia la materialità d'impatto che la materialità finanziaria. Attraverso la materialità d'impatto, il Gruppo Terna ha valutato gli effetti significativi che le proprie attività hanno generato a livello ambientale, sociale e di governance, considerando sia gli impatti attuali che quelli potenziali, positivi e negativi, e i loro riflessi sull'intera catena del valore. Attraverso la materialità finanziaria, invece, il Gruppo ha analizzato in che modo le questioni ambientali, sociali e di governance (ESG) hanno influenzato e potrebbero influenzare in futuro le proprie performance economico-finanziarie, valutando i rischi e le opportunità derivanti dalle stesse.

Gli Standard ESRS, inoltre, recepiscono e integrano al loro interno le caratteristiche principali dei framework "TCFD" (*Task Force on Climate-Related Financial Disclosures*) e "TNFD" (*Taskforce on Nature-related Financial Disclosures*), ai quali il Gruppo Terna si era allineato anche per le rendicontazioni relative agli anni passati, e per i quali le relative informazioni possono essere rintracciate all'interno della sezione relativa alle "Informazioni ambientali" della Rendicontazione Consolidata di Sostenibilità 2024.

La Relazione sulla gestione è un documento interattivo, che riporta al suo interno *hyperlink* che rimandano a ulteriori approfondimenti su specifiche tematiche, indirizzando il lettore direttamente alle pagine dedicate del sito Terna, www.terna.it.

La Relazione Finanziaria Annuale, inoltre, riporta al suo interno un'informativa in linea con le ESMA Priorities e con i requisiti obbligatori richiesti ai sensi dell'Articolo 8 della Tassonomia UE e dei relativi atti delegati inclusi nella sezione "Informazioni ambientali".

La presente Relazione Finanziaria Annuale 2024 è stata approvata dal Consiglio di Amministrazione di Terna S.p.A. il 25 marzo 2025.

Gennaio

Autorizzato dal Ministero dell'Ambiente e della Sicurezza Energetica (MASE) l'**Adriatic Link**, l'elettrodotto sottomarino di Terna che unirà le Marche e l'Abruzzo.

Terna è inclusa nel nuovo **"LargeMidCap SDG Index"** lanciato da S&P Global.

Lanciata, nell'ambito del **Programma Euro Medium Term Notes (EMTN), un'emissione obbligazionaria single tranche a tasso fisso**, per un totale di **850 milioni di euro e una durata pari a sette anni**.

Febbraio

Sottoscritta con la **Banca Europea per gli Investimenti (BEI) l'ultima tranche per 500 milioni di euro** relativa al finanziamento da 1,9 miliardi di euro per il **Tyrrhenian Link** (ramo Est e ramo Ovest).

Firmato l'accordo di collaborazione quinquennale tra Terna e RSE – Ricerca sul Sistema Energetico, società leader nell'analisi e nella ricerca applicata al settore energetico - finalizzato allo sviluppo e all'applicazione di processi e tecnologie nel campo energetico e ambientale.

Terna è inclusa nel nuovo **"LargeMidCap Biodiversity Index"** lanciato da S&P Global.

Autorizzato, con decreto del MASE, il progetto di Terna per la realizzazione di **due nuovi collegamenti elettrici nella città di Milano**: investimento di circa 17 milioni di euro, nell'ambito delle attività pianificate per incrementare l'affidabilità dell'alimentazione dei luoghi di svolgimento dei Giochi olimpici e paralimpici "Milano – Cortina 2026".

Marzo

Presentato il **Piano Industriale 2024-2028**: previsti complessivi **16,5 miliardi di euro di investimenti, i più alti mai registrati nella storia del Gruppo.**

A conferma dell'impegno di Terna nell'abbattimento delle disuguaglianze e nella creazione di un ambiente di lavoro inclusivo, la Società ottiene la certificazione per la parità di genere che attesta la **conformità del suo Sistema di Gestione per la Parità di genere alla norma UNI/PdR 125:2022.**

Terna Forward, società del Gruppo Terna, entra nel capitale sociale di **Wesii S.r.l.**, società italiana leader di mercato nei servizi di ispezione e telerilevamento nel settore energetico, per una quota pari al 33%.

Al via la nuova campagna istituzionale **"Abbiamo preso un impegno con il futuro dell'energia"** che porta all'attenzione del pubblico i quattro punti di forza del Piano Industriale 2024-2028: gli **Investimenti** più alti di sempre; la **Sostenibilità**, per la prima volta integrata nel Piano Industriale; la **Digitalizzazione** per innovare la rete; la **Solidarietà**, per una transizione più equa per tutti.

Confermati un ***notch* al di sopra di quelli della Repubblica Italiana** i rating di lungo termine di Terna in seguito alla presentazione del Piano Industriale 2024-2028 (BBB+ per Standard & Poor's e Baa2 per Moody's).

Aprile

Lanciata un'**emissione obbligazionaria perpetua subordinata ibrida non convertibile green, a tasso fisso**, per un ammontare nominale complessivo pari a **850 milioni di euro.**

Sottoscritto un **accordo** volto a incrementare a **2,255 miliardi di euro** l'importo della **ESG-linked Revolving Credit Facility** firmata lo scorso maggio 2023.

Conclusa la **terza edizione di Terna Ideas - Corporate Entrepreneurship**, il programma di imprenditorialità interna, che consente alle persone di Terna di contribuire all'innovazione con le proprie idee. Premiato il team vincitore con il progetto "DTS – Dynamic Targeting Synchronization": un sistema software di analisi che adotta un algoritmo deterministico per una migliore gestione dei compensatori sincroni, al fine di garantire una maggiore efficienza e stabilità del sistema elettrico.

Terna è premiata nella categoria "Grandi Imprese" del **Premio Bilancio di Sostenibilità 2024**, promosso dal Corriere della Sera, in collaborazione con NeXt – Nuova Economia per Tutti.

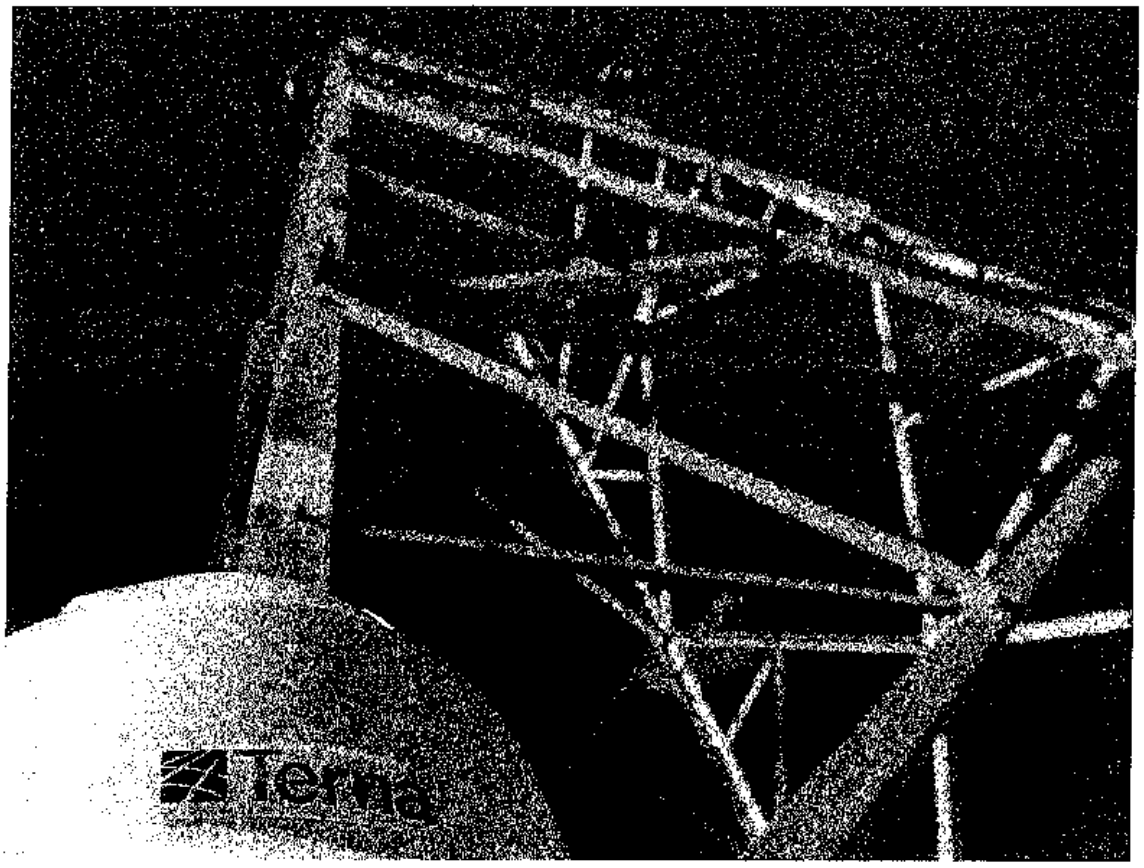
663

Teleborsa: distribution and commercial use strictly prohibited

Maggio

L'Assemblea ordinaria degli Azionisti di Terna **approva il bilancio 2023 e delibera il dividendo di 33,96 centesimi di euro per azione** per l'intero esercizio 2023.

Sottoscritta una **Revolving Credit Facility, ESG-linked**, per un ammontare complessivo di **250 milioni di euro** e una durata di **cinque anni**.



Autorizzato dal MASE il **progetto Elmed,** l'interconnessione elettrica tra Italia e Tunisia che sarà realizzata da Terna e STEG, il gestore della rete tunisina.

Terna aderisce al **Codice di autodisciplina delle Imprese responsabili**, a sostegno della genitorialità condivisa e della maternità, promosso dal Dipartimento Pari Opportunità della Presidenza del Consiglio dei ministri.

Aperto il **bando di iscrizione per la terza edizione del Master di II livello "Digitalizzazione del sistema elettrico per la transizione energetica"**, promosso da Terna in collaborazione con le Università degli Studi di Cagliari, Palermo e Salerno nell'ambito del progetto Tyrrhenian Lab.

Terna è inclusa nella lista delle **240 aziende italiane leader della sostenibilità** pubblicata da "Il Sole 24 Ore".

Sottoscritto **protocollo d'intesa** con la **Regione Calabria** e la **Regione Lazio** per monitorare le richieste di connessione alla rete di impianti rinnovabili con l'obiettivo dell'accordo è ottimizzare il flusso informativo per la programmazione di nuove infrastrutture elettriche nel territorio.

664

Teleborsa: distribution and commercial use strictly prohibited

Principali eventi dell'anno 2024

Giugno

È online la **piattaforma digitale TE.R.R.A.** sviluppata da Terna per abilitare e promuovere la programmazione territoriale efficiente delle infrastrutture energetiche del Paese, a disposizione di amministratori nazionali e locali, legislatori e soggetti proponenti per la consultazione di informazioni strategiche e rilevanti su Territorio, Reti, Rinnovabili e Accumuli.

Il 23 giugno 2024 Terna celebra **20 anni dalla quotazione** sul mercato telematico di Borsa Italiana. In questo periodo **il valore del titolo è quadruplicato e la capitalizzazione è tra le più alte del FTSE MIB**, con una crescita costante e significativa, anche grazie all'apprezzamento degli investitori socialmente responsabili.

Rinnovato il programma di emissioni obbligazionarie **"Euro Medium Term Note Programme" (EMTN)**; incrementato il relativo importo sottoscrivibile a **12 miliardi di euro**.

L'impegno di Terna nel contrastare il cambiamento climatico ottiene un **doppio riconoscimento da parte di CDP (ex Carbon Disclosure Project)**, l'organizzazione globale non profit specializzata nella rendicontazione ambientale e nella valutazione delle performance e delle strategie sul clima adottate dalle imprese.

Terna è inclusa anche nell'elenco del TIME relativo alle **500 aziende più sostenibili al mondo** nel 2024.

Sottoscritto **protocollo d'intesa** con la **Regione Lombardia** con l'obiettivo dell'accordo è ottimizzare il flusso informativo per la programmazione di nuove infrastrutture elettriche nel territorio.

Luglio

Sottoscritti **due Term Loan ESG-linked**, il primo per un ammontare complessivo di **200 milioni di euro**, il secondo per un ammontare complessivo di **400 milioni di euro**, entrambi aventi una durata di cinque anni.

Rinnovato il programma **"Euro-Commercial Paper Programme for the issuance of Notes and ESG Notes"** e incrementato il relativo importo massimo a **2 miliardi di euro**.

Sottoscritto **protocollo di intesa** con la **Regione Umbria** con l'obiettivo di ottimizzare il flusso informativo per la programmazione di nuove infrastrutture elettriche nel territorio.

Il 30 luglio è istituita la **Fondazione Terna**, tra le principali novità del Piano di Sostenibilità del Gruppo, che promuove la sostenibilità sociale, l'inclusione e lo sviluppo culturale del Paese per una transizione energetica giusta che non lasci indietro nessuno. Alla creazione della Fondazione fa seguito, il 26 settembre, la sua iscrizione nel Registro delle Persone Giuridiche.

Settembre

Concluso il **Premio Driving Energy 2024** – Fotografia Contemporanea, il concorso gratuito aperto a tutti i fotografi professionisti e amatoriali in Italia, finalizzato alla promozione dello sviluppo culturale del Paese e dei nuovi talenti del settore. Il Premio ha proposto quest'anno il tema **"La via dell'invisibile"**.

Sottoscritto un **protocollo di intesa** con la **Regione Sicilia** relativo all'attuazione delle attività di realizzazione di Elmed, l'interconnessione elettrica tra Italia e Tunisia.

Concluso il **Programma di acquisto di azioni proprie** a servizio del nuovo **Piano Performance Share 2024-2028**, per un esborso complessivo pari a circa **8 milioni di euro** e l'acquisto di **998.428 azioni proprie** (rappresentative dello 0,050% circa del capitale sociale).

465

Teleborsa: distribution and commercial use strictly prohibited

Ottobre

Sottoscritto un **nuovo contratto di finanziamento da 400 milioni di euro con la Banca Europea per gli Investimenti (BEI)**, di durata pari a circa 22 anni, finalizzato a rafforzare l'efficienza e l'affidabilità della rete di trasmissione nazionale.

Sottoscritto un **Term Loan ESG-linked**, per un ammontare complessivo di **400 milioni di euro** e una durata massima di **cinque anni**.

Terna organizza a San Francisco **l'Innovation Zone Forum**, evento dedicato alla valorizzazione delle startup con cui il Gruppo collabora e al confronto con player dell'energia, europei e statunitensi, e investitori americani, sulle sfide e sulle tecnologie innovative legate al futuro del sistema elettrico. L'Innovation Zone Forum di San Francisco è la prima iniziativa di rilievo internazionale organizzata da Terna nell'ambito del suo Innovation Zone in Silicon Valley.

Sottoscritto **protocollo di intesa** con la **Regione Piemonte** con l'obiettivo di ottimizzare il flusso informativo per la programmazione di nuove infrastrutture elettriche nel territorio.

Pubblicato, il primo giorno del mese, il nuovo **Documento di Descrizione degli Scenari 2024**, elaborato da Terna insieme a SNAM con l'obiettivo di declinare gli scenari energetici nazionali di medio e lungo termine.

Novembre

Firmato **accordo tra Terna e Acea per l'acquisizione di parte della rete in alta tensione nell'area metropolitana di Roma** che consentirà una maggiore continuità e sicurezza del servizio di trasmissione nazionale, favorendo l'integrazione delle reti in alta tensione nel Centro Italia.

Inaugurata la terza edizione del Master "Digitalizzazione del sistema elettrico per la transizione energetica" promosso da Terna in collaborazione con le Università degli Studi di Cagliari, Palermo e Salerno nell'ambito del progetto Tyrrhenian Lab, per il quale l'azienda ha previsto un investimento complessivo di 100 milioni di euro dal 2022 al 2026.

Perfezionato il **terzo closing** per la cessione a CDPQ, gruppo globale di investimenti, della società **"SPE Transmissora de Energia Linha Verde I S.A."**, ceduti circa 150 km di linee elettriche in Brasile per un valore di circa 79 milioni di euro.

Dicembre

In occasione della Giornata Internazionale delle persone con disabilità, Terna presenta **Terna Ability**, il progetto verticale di inclusione delle persone con disabilità, con l'obiettivo di creare valore per l'azienda e per il Paese.

Terna confermata tra i leader mondiali della sostenibilità, dopo l'inclusione nel **"Dow Jones Sustainability Index"** di S&P Global per il sedicesimo anno consecutivo.

Per il quinto anno consecutivo Terna è al vertice della classifica **"Webranking Europe 500"**, la principale classifica internazionale sulla qualità e trasparenza della comunicazione digitale delle 500 più grandi società quotate europee. Terna si conferma al primo posto grazie a risultati eccellenti in tutte le aree del protocollo, distinguendosi per la capacità di spiegare un business complesso con un linguaggio accessibile a un pubblico sempre più ampio e segmentato.

Sottoscritti due **Term Loan ESG-linked**, il primo per un ammontare complessivo di **150 milioni di euro**, il secondo per un ammontare complessivo di **100 milioni di euro**, entrambi aventi una durata di **cinque anni**.

Standard Ethics migliora il **Corporate Rating di Terna a 'EE+'** (corrispondente al grado di valutazione 'Very Strong') dal precedente 'EE', confermando la società nella fascia "Sustainable", la migliore.

466

Teleborsa: distribution and commercial use strictly prohibited

Il ruolo di Terna nella *just transition*

Il sistema elettrico nazionale si articola in diversi segmenti: produzione, trasmissione, distribuzione e vendita di energia elettrica. Con le attività di **trasmissione** e **dispacciamento** Terna occupa il segmento fondamentale della trasmissione. È un compito complesso, che richiede un coordinatore centrale, indipendente e dotato di visibilità complessiva su un numero elevato di attori, sia sul fronte della produzione sia su quello del consumo.

In questo contesto, Terna **guida la complessa transizione** verso un nuovo modello decarbonizzato, consapevole che gli sfidanti obiettivi nazionali e internazionali che scandiscono i prossimi anni andranno affrontati considerando, oltre alla dimensione ambientale, anche quella sociale in un'ottica di ***just transition*** che sia il più possibile equa e inclusiva. Per questo sarà fondamentale coinvolgere tutti i soggetti interessati alla transizione (dalle associazioni di categoria, alla società civile, alle istituzioni) attraverso partnership, tavoli di confronto e iniziative di ascolto.

Per essere davvero equo e inclusivo (*just*) tale processo di trasformazione dovrà abbracciare gli ambiti **energetico** e **digitale**, ma anche quello **sociale**, appunto, guardando all'equità energetica, con un approccio che metta al centro anche la dimensione umana per ridurre le disuguaglianze ed evitare nuove forme di povertà energetica. In quest'ottica, per la prima volta nella storia del Gruppo il Piano di Sostenibilità 2024-2028 è pienamente integrato nel Piano Industriale presentato a marzo 2024. La sostenibilità è insita nella natura stessa di Terna, proprio in virtù del suo ruolo cruciale per la realizzazione della transizione energetica ("*Green by Nature*"). Ma il Gruppo si caratterizza come sostenibile, anche e soprattutto, per il modo in cui sceglie di svolgere le proprie attività ("*Social by Purpose*"). Per perseguire una transizione inclusiva, a sostegno di questo approccio, tra le principali novità del Piano di Sostenibilità c'è la creazione della Fondazione Terna, avvenuta il 30 luglio 2024 a cui ha fatto seguito, il 26 settembre, la sua iscrizione nel Registro delle Persone Giuridiche. Le attività operative della fondazione sono cominciate a gennaio 2025.

Nella gestione della rete di trasmissione e del sistema le nuove tecnologie e la digitalizzazione rivestono e rivestiranno un ruolo sempre più centrale per abilitare la transizione energetica a beneficio dell'intero sistema elettrico e incrementare ulteriormente la sicurezza, resilienza e flessibilità delle infrastrutture di trasmissione nazionale, in modo da sostenere la progressiva decarbonizzazione e una sempre maggiore integrazione delle rinnovabili.

La transizione verso un regime di produzione diffusa da fonti green sta rapidamente modificando, infatti, il sistema elettrico con la conseguente crescita esponenziale delle risorse attive connesse alla rete. La gestione delle richieste di connessione in alta tensione, che arrivano da chi propone iniziative rinnovabili, permette a Terna di avere una visuale sistemica sulla situazione attuale e sui futuri scenari: in qualità di Transmission System Operator (TSO) può così **monitorare la capacità del sistema di soddisfare il fabbisogno di energia elettrica** nel rispetto dei requisiti di **sicurezza** e **qualità del servizio**, in una parola la sua adeguatezza.

Gli interventi previsti da Terna nel Piano di Sviluppo 2025 della rete di trasmissione nazionale contribuiranno in modo significativo al raggiungimento degli obiettivi fissati a livello europeo dal pacchetto di misure "Fit for 55", dal RepowerEU e in Italia dal Piano Nazionale Integrato Energia e Clima (PNIEC) 2024, che prevedono una **riduzione del 55% delle emissioni di CO_2 al 2030** rispetto ai livelli del 1990. In Italia, **l'energia prodotta da fonti rinnovabili dovrà coprire almeno il 65% dei consumi finali nel settore elettrico entro il 2030 per un totale di oltre 70 GW di potenza aggiuntiva (eolica e solare)** rispetto al 2021 (circa 65 GW rispetto al 2023). Ai target

Teleborsa: distribution and commercial use strictly prohibited

di riduzione delle emissioni di gas a effetto serra si è aggiunta poi, più recentemente, la necessità di conquistare l'indipendenza dai combustibili fossili russi come descritto nel piano **REPowerEU**[2].

In tale scenario, gli operatori di mercato stanno rispondendo con importanti piani di investimento: il livello di iniziative di sviluppo di impianti rinnovabili proposti da investitori privati risulta essere molto incoraggiante. Al **31 dicembre 2024** Terna ha ricevuto richieste di connessione alla Rete di Trasmissione Nazionale (RTN) per **oltre 348 GW di nuova capacità rinnovabile**, di cui il 43,6% riguarda il solare e il 56,3% l'eolico (on-shore e off-shore). È possibile monitorare in maniera costante e continuativa queste iniziative attraverso la piattaforma digitale **Econnextion**[3], lanciata da Terna nel 2023 in collaborazione con il Ministero dell'Ambiente e della Sicurezza Energetica, in cui sono centralizzate le informazioni sulle richieste di connessione in alta tensione di impianti a fonte rinnovabile in Italia. Questa *dashboard* è stata arricchita con ulteriori dati su **tutte le fonti green** e anche con le **informazioni relative ai sistemi di accumulo**. Un nuovo importante strumento di consultazione a beneficio degli operatori di settore, con cui Terna condivide le informazioni sulla **distribuzione regionale e locale** delle richieste di connessione rinnovabile suddivise per fonti (solare, eolico on-shore, eolico off-shore, idroelettrico, geotermico, biomasse) e dei sistemi di accumulo (pompaggio puro, pompaggio misto, accumulo stand-alone, accumulo integrato su impianto solare, accumulo integrato su impianto eolico).

I numeri sulle **richieste di connessione di nuovi impianti rinnovabili alla rete elettrica** ci dicono che la strada intrapresa è quella giusta e che basterebbe realizzare il 20% delle iniziative ad oggi presentate per raggiungere i target fissati. Considerando tutte le fonti rinnovabili, secondo le rilevazioni Terna – considerando tutte le fonti rinnovabili - l'incremento di capacità in Italia è stato pari a circa 7,5 GW, valore superiore di circa 1,7 GW rispetto al 2023 (+29%). Un dato che evidenzia l'accelerazione nello sviluppo delle rinnovabili: si è, infatti, passati dalle nuove attivazioni pari a 1 GW nel 2021, circa 3 GW del 2022 ai circa 5,8 GW del 2023. Al 31 dicembre 2024, in Italia si registrano 76,6 GW di potenza installata da fonti rinnovabili, così suddivise per fonte: solare 37,1 GW, idrico rinnovabile 21,56 GW, eolico 13 GW, biomasse 3,97 GW e geotermoelettrico 0,95 GW[4]. In aggiunta, secondo i dati Terna aggiornati al 31 dicembre 2024, 8 GW hanno ottenuto la Soluzione Tecnica Minima di Dettaglio nell'ambito del processo di connessione alla rete elettrica nazionale[5].

La diversa distribuzione geografica e un mix tecnologico differente rispetto a quello prefigurato negli scenari, rendono però la sfida molto impegnativa: **dal punto di vista della trasmissione** iniettare questa nuova "linfa rinnovabile" nella rete richiederà uno sforzo di pianificazione, autorizzazione e realizzazione degli investimenti che in Italia negli ultimi decenni non ha precedenti. Nel **Piano di Sviluppo 2025** Terna ha presentato un programma di investimenti di **oltre 23 miliardi di euro** nel periodo 2025-2034, con un valore complessivo, oltre l'orizzonte decennale, **fino a circa 40 miliardi di euro**. Sono previsti interventi, nell'orizzonte decennale 2025-2034, finalizzati a garantire l'**efficienza** e la **resilienza** della rete, la **sostenibilità**, la **sicurezza** e la **qualità** del servizio, oltre all'**integrazione** della produzione da **fonti rinnovabili**. Al centro del Piano di Sviluppo 2025 anche la **programmazione territoriale efficiente** delle infrastrutture energetiche del Paese come nuovo modello per

[2] Per ulteriori informazioni si rinvia allo scenario Energetico nell'ambito della sezione "I contesti di riferimento" del documento.
[3] https://www.terna.it/it/sistema-elettrico/rete/econnextion

[5] https://www.terna.it/it/sistema-elettrico/rete/connessione-rete/procedura-connessione

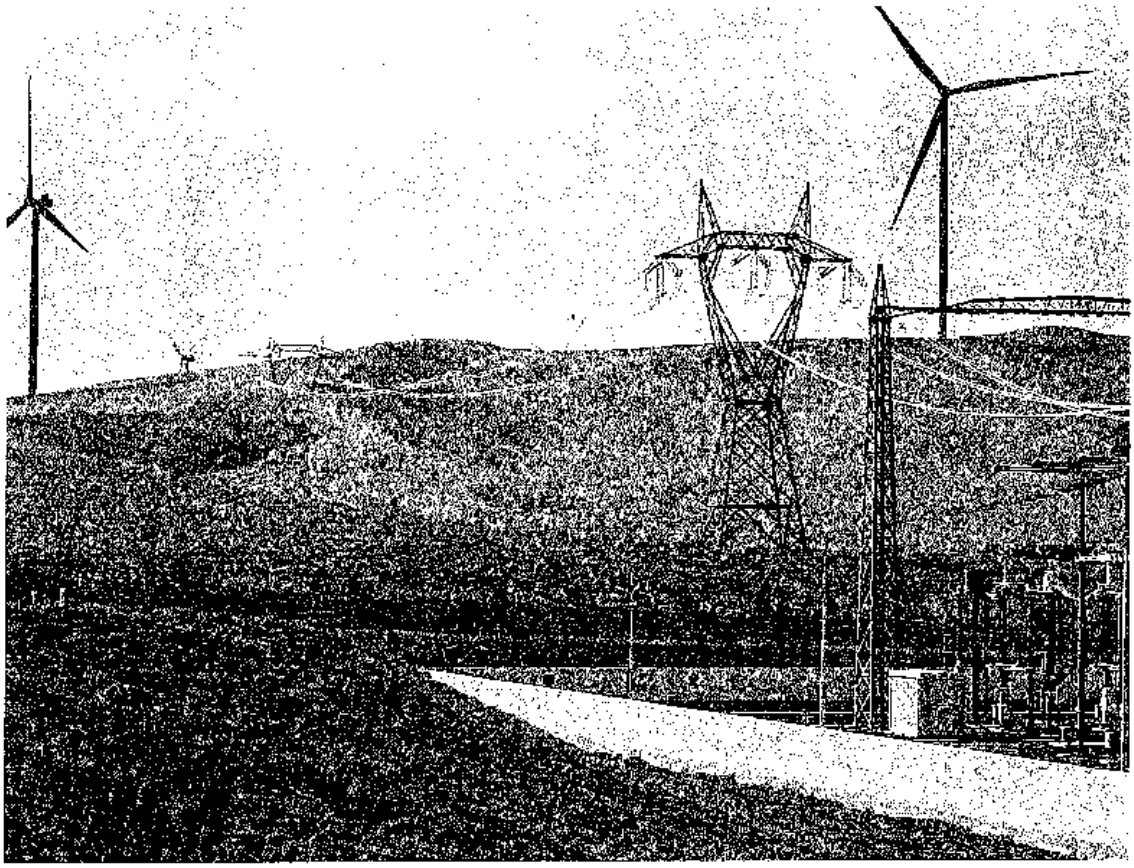
Teleborsa: distribution and commercial use strictly prohibited

assicurare efficienza nella realizzazione delle opere di rete abilitanti la connessione e l'integrazione delle nuove risorse, minimizzando i costi per il sistema, nonché l'impatto delle infrastrutture sul territorio. Al 2030 è, inoltre, prevista una **riduzione totale delle emissioni di CO_2** fino a quasi 2.000 kt/anno, che tenderà sul lungo termine (al 2040) a quasi 12.100 kt/anno.

Il testo definitivo del PNIEC 2024 conferma gli **obiettivi di decarbonizzazione** del sistema elettrico e le relative azioni necessarie identificate da Terna nel Documento di Descrizione degli Scenari 2024 e nei Piani di Sviluppo: per integrare volumi crescenti di generazione da fonte rinnovabile non programmabile (FRNP) in sostituzione della generazione da fonti fossili, sarà necessario uno sviluppo della capacità di accumulo e delle opere di rete, gestite in maniera sempre più digitale e intelligente.

Il percorso di transizione energetica richiede un impegno comune a livello nazionale per raggiungere gli sfidanti obiettivi di decarbonizzazione tracciati in Italia dal Piano Nazionale Integrato Energia e Clima: a tal fine, il Decreto Energia ha affidato a Terna il compito di realizzare un nuovo portale digitale. È online dal 7 giugno 2024 la **piattaforma digitale TE.R.R.A.** sviluppata da Terna per abilitare e promuovere la programmazione territoriale efficiente delle infrastrutture energetiche del Paese, a disposizione di amministratori nazionali e locali, legislatori e soggetti proponenti per la consultazione di informazioni strategiche e rilevanti su Territorio, Reti, Rinnovabili e Accumuli. Uno strumento di comunicazione istituzionale d'avanguardia, nato con l'obiettivo di favorire la massima trasparenza su dati e informazioni, promuovere azioni di razionalizzazione e ottimizzazione nella pianificazione delle infrastrutture elettriche e, in ultimo, affiancare gli stakeholder coinvolti anche attraverso continui rapporti di monitoraggio e avanzamento sulla rete e sul sistema elettrico forniti da Terna. Nella piattaforma è presente un enorme patrimonio informativo sullo stato delle richieste di connessione (circa 8.000 tra impianti rinnovabili, sistemi di accumulo e utenti di consumo con soluzione di connessione accettata dai proponenti), e sulla localizzazione geografica di oltre 43.000 impianti in esercizio AAT/AT e MT, a conferma di un lavoro costante per la qualità del dato e per la digitalizzazione di processi e sistemi. Anche attraverso mappe multilayer navigabili è possibile osservare gli interventi di sviluppo necessari, quelli pianificati e le linee elettriche esistenti, l'anagrafica degli impianti già in esercizio e lo stato di avanzamento per le nuove iniziative di connessione.

Terna ha quindi, e avrà sempre più, un ruolo centrale, sia come abilitatore della transizione del sistema elettrico verso fonti rinnovabili sia come coordinatore centrale di questo importante processo di trasformazione energetica e digitale. Per raggiungere l'**obiettivo globale di decarbonizzazione la rete elettrica è il principale fattore abilitante.**



Cosa significa? Il raggiungimento degli ambiziosi obiettivi europei e internazionali ovviamente richiede una partecipazione attiva di tutti gli attori della Società, ma il settore energetico deve fare da apripista perché è, di gran lunga, il principale responsabile delle emissioni a livello mondiale.

In linea con le disposizioni del Green Deal europeo il target emissioni zero dovrà essere raggiunto grazie a due leve principali: oltre alla crescita delle rinnovabili elettriche, servirà una maggiore elettrificazione dei consumi. In quest'ottica uno dei punti fermi di tutti gli scenari che guardano all'obiettivo della cosiddetta *carbon neutrality* è che lo **strumento principale è l'efficienza energetica**.

Introducendo il principio *energy efficiency first*, la Commissione europea ha invitato i Paesi membri a tenere in considerazione l'efficientamento energetico in tutte le decisioni, che siano a livello politico, di pianificazione o di investimenti. In questo modo, sempre secondo la strategia di lungo termine dell'Unione europea, il consumo finale di energia in Europa dovrebbe diminuire di (almeno) il 35% entro il 2050 rispetto ai livelli del 2019.

Il tassello fondamentale, in tal senso, è rappresentato dal fatto che l'elettricità sarà il vettore energetico principale e che la rete elettrica avrà la funzione di spina dorsale della decarbonizzazione anche per tutti gli altri settori energetici. E questo grazie all'efficienza intrinseca di questo vettore e alla maturità delle tecnologie applicate alle fonti di energia rinnovabile (FER).

Teleborsa: distribution and commercial use strictly prohibited

Nel suo ruolo di gestore del sistema elettrico nazionale, a fine 2023 Terna ha lanciato la nuova campagna istituzionale "Pensiamo al futuro dell'Energia", con cui ha invitato a un'ampia riflessione sul tema dell'energia, protagonista della quotidianità degli italiani. A marzo 2024 ha poi preso il via la nuova campagna istituzionale corporate di Terna "Abbiamo preso un impegno con il futuro dell'energia" declinata sui media per accompagnare i contenuti del nuovo Piano Industriale 2024-2028. In particolare, la creatività della campagna ha portato all'attenzione del pubblico i quattro punti di forza del Piano: gli Investimenti più alti di sempre; la Sostenibilità, per la prima volta integrata nel Piano Industriale; la Digitalizzazione per innovare la rete; la Solidarietà, per una transizione più equa per tutti.

Gli obiettivi climatici rivestono un ruolo fondamentale nell'**Agenda 2030 delle Nazioni Unite per lo Sviluppo Sostenibile**, non solo perché l'SDG 13 - *Climate Action* è dedicato in modo esplicito all'azione per il clima, ma soprattutto perché affrontare l'emergenza climatica e garantire, quindi, un pianeta migliore per il futuro, è la condizione abilitante per raggiungere anche tutti gli altri obiettivi contenuti nell'Agenda, attuando uno sviluppo realmente prosperoso e duraturo nell'ambito di una transizione giusta.

La consapevolezza di avere un ruolo fondamentale nella transizione in atto coincide per Terna con la volontà di irrobustire ulteriormente la sua strategia ambientale. L'adozione di un *Science Based Target* (SBT), ovvero di un obiettivo di riduzione delle proprie emissioni di CO_2 basato sulla misura della situazione esistente e progettazione di interventi concreti, e validato da un ente terzo, trasforma un buon proposito in reale e concreto contributo al contenimento dell'aumento della temperatura globale del pianeta, in linea con gli accordi del 2015 sul clima sottoscritti a Parigi. In tale contesto, Terna si è impegnata a tagliare del 46% al 2030 le proprie emissioni di anidride carbonica rispetto ai valori del 2019, migliorando il precedente obiettivo che prevedeva una riduzione delle emissioni climalteranti di circa il 30%. Inoltre, con l'obiettivo di posizionarsi tra le aziende più impegnate a livello globale nella tutela degli ecosistemi e della biodiversità, Terna ha avviato le attività per l'adozione di un nuovo *Science Based Target for Nature*.

Teleborsa: distribution and commercial use strictly prohibited

La storia del Gruppo

1962 2005

EVOLUZIONE DEL SISTEMA ELETTRICO ITALIANO

Dalla nazionalizzazione alla riforma del sistema elettrico italiano.

Le principali attività di Terna affondano le loro radici nella storia del Paese: il 6 dicembre 1962 la Legge 1643 sancisce la nazionalizzazione del settore elettrico e affida a ENEL (Ente Nazionale Energia Elettrica) tutte le fasi della filiera elettrica (produzione, trasmissione e distribuzione), fino ad allora private, per favorire l'elettrificazione di tutto il Paese.

Nella seconda metà degli anni '90 l'Unione Europea avvia un processo di liberalizzazione per rendere indipendente la gestione della rete che, in Italia, si concretizza nel Decreto Legislativo 79/1999 (il cosiddetto "decreto Bersani"), punto di partenza della riforma del mercato elettrico italiano con la separazione della Rete di Trasmissione Nazionale ("RTN") dalla sua gestione (attività di trasmissione e dispacciamento) secondo il modello dell'Independent System Operator.

Il 1999 è l'anno di nascita di Terna. ENEL costituisce nel suo perimetro due distinte Società: Terna S.p.A., a cui è assegnata la proprietà di oltre il 90% della RTN, e il GRTN ("Gestore della Rete di Trasmissione Nazionale") che all'epoca gestisce la trasmissione e il dispacciamento dell'energia elettrica nonché la pianificazione dello sviluppo della RTN.

Il DPCM dell'11 maggio 2004, recependo la Legge 290/2003, istituisce la borsa dell'energia elettrica e dispone la **riunificazione della proprietà della rete di trasmissione** con le relative attività gestionali. Tale processo si concluderà nel 2005 con il trasferimento a Terna del ramo d'azienda del GRTN relativo alle attività di trasmissione e dispacciamento e il rilascio della **Concessione** per lo svolgimento di queste attività sul territorio nazionale da parte del Ministero delle Attività Produttive: Terna diventa il TSO italiano.

Il 23 giugno 2004, debutta in Borsa con il collocamento del 50% del capitale sociale e nel settembre 2005 Cassa Depositi e Prestiti ne acquisisce la quota pari al 29,99%, diventandone l'azionista di maggioranza relativa.

2006 2016

SVILUPPO DELLA RETE DI TRASMISSIONE NAZIONALE E NUOVE OPPORTUNITÀ DI BUSINESS

"Utili per il Paese", il nuovo ruolo di Terna.

Con l'attribuzione del duplice ruolo di TSO e di SO evolve la mission di Terna che diventa una realtà infrastrutturale strategica al servizio del Paese, esplicitata nel payoff "Utili per il Paese".

In questi anni la Società amplia progressivamente la RTN: nel 2009, con l'acquisizione di 18.600 km di linee in Alta Tensione da ENEL, Terna ha la proprietà del 98,6% della rete nazionale e diventa il primo operatore indipendente in Europa, il settimo al mondo. **Nel 2015 Terna acquisisce la rete in alta tensione del Gruppo Ferrovie dello Stato** e, con circa 72.600 km di rete gestiti, consolida il suo primato europeo.

Al tempo stesso Terna pianifica e realizza importanti collegamenti elettrici a 380kV che adeguano la rete di trasmissione alle esigenze energetiche del Paese: nel 2011 entrano in esercizio la linea Chignolo Po-Maleo (Lombardia) e il collegamento sottomarino SA.PE.I (Sardegna-Penisola Italiana), nel 2014 la Trino-Lacchiarella (Lombardia) e, nel 2016, la Villanova-Gissi (Abruzzo) e il collegamento sottomarino Sorgente-Rizziconi (Calabria-Sicilia).

Nel 2012, in coerenza con l'evoluzione del contesto di riferimento, cambia la struttura del Gruppo con la costituzione di **due nuove Società operative: Terna Rete Italia S.p.A.** per le Attività Regolate, e **Terna Plus S.r.l.** per la crescita dei servizi nel settore Non Regolato. Nel 2014 entra a far parte del Gruppo Terna la Società Tamini, una realtà italiana leader nella progettazione, produzione, commercializzazione e riparazione di trasformatori di potenza per reti di trasmissione e distribuzione di energia elettrica, di trasformatori industriali per il settore siderurgico e metallurgico e di trasformatori speciali per convertitori con applicazioni in ambito elettrochimico ed elettrolitico.

2017 2022

DA ABILITATORE A REGISTA DELLA TRANSIZIONE ENERGETICA

Con "Driving Energy" evolve il posizionamento di Terna.

Terna riveste un ruolo sempre più centrale nella filiera del sistema elettrico e apre una nuova fase della sua storia, come **regista del sistema elettrico italiano.**

Partono le progettazioni di **grandi opere** quali il Sa.Co.I.3 (collegamento Sardegna, Corsica e Italia) e l'interconnessione Italia-Austria. Si conclude il collegamento Italia-Montenegro, il primo ponte elettrico tra Italia e Balcani, fondamentale per rafforzare il ruolo dell'Italia come hub europeo e mediterraneo nella trasmissione elettrica. Nel 2022 via libera al ramo est (Campania-Sicilia) dell'elettrodotto sottomarino Tyrrhenian Link. Per l'intera opera Terna investirà circa 3,7 miliardi di euro. Nel 2021 Terna raggiunge il **99,9%** di proprietà della RTN con l'acquisizione di porzioni di rete da altri operatori.

Nell'aggiornamento del **Piano Industriale 2021-2025 Driving Energy**, presentato nel 2022, previsti investimenti complessivi per 10 miliardi di euro.

Dal 2018 Terna lancia nuovi strumenti finanziari collocando con successo, in avanguardia tra le utility italiane, il primo green bond per un importo complessivo di 750 milioni di euro e, nel 2022, emette il **primo green bond ibrido per un miliardo di euro.**

Nel periodo di riferimento, sul fronte societario, la controllata Terna Energy Solutions S.r.l. rafforza la sua componente industriale acquisendo **Brugg Kabel AG**, tra i principali operatori europei nel settore dei cavi terrestri, e perfeziona l'acquisto del 75% di **LT S.r.l.**, dando vita al primo operatore dell'*Operation & Maintenance* di impianti fotovoltaici. Nasce, infine, **Terna Forward**, per cogliere opportunità tecnologiche e trasferirle alle altre Società del Gruppo.

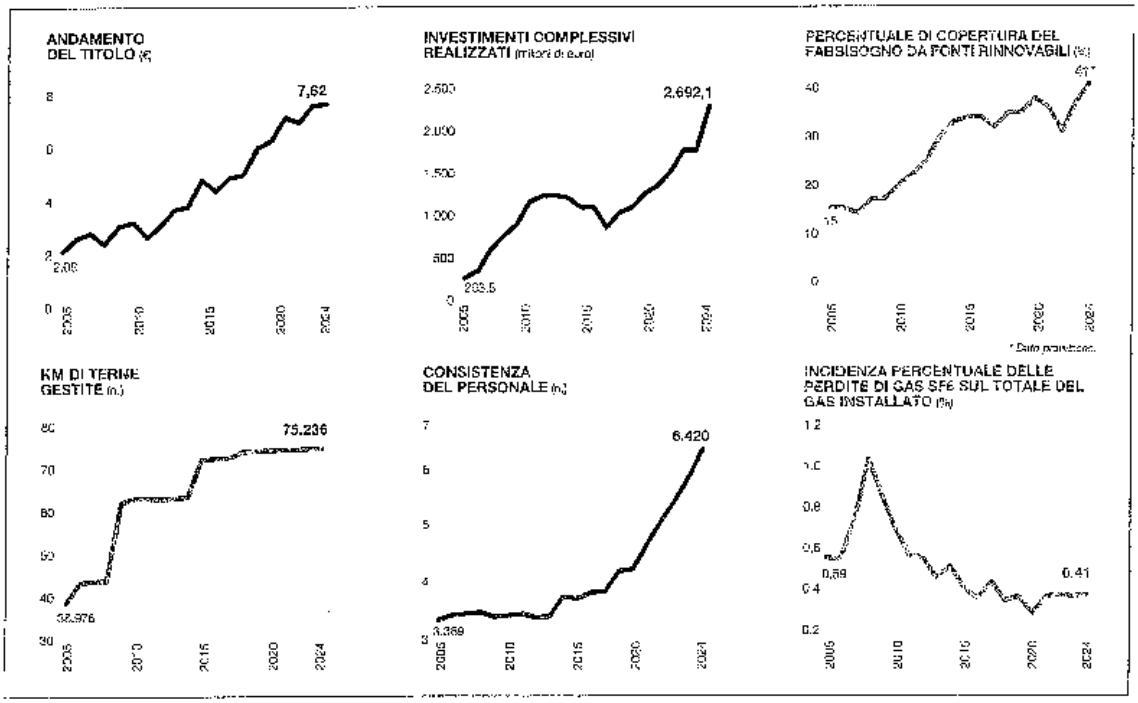
2025

AL CENTRO DELLA TRASFORMAZIONE PER UNA TRANSIZIONE PIÙ GIUSTA

"Un impegno con il futuro dell'energia".

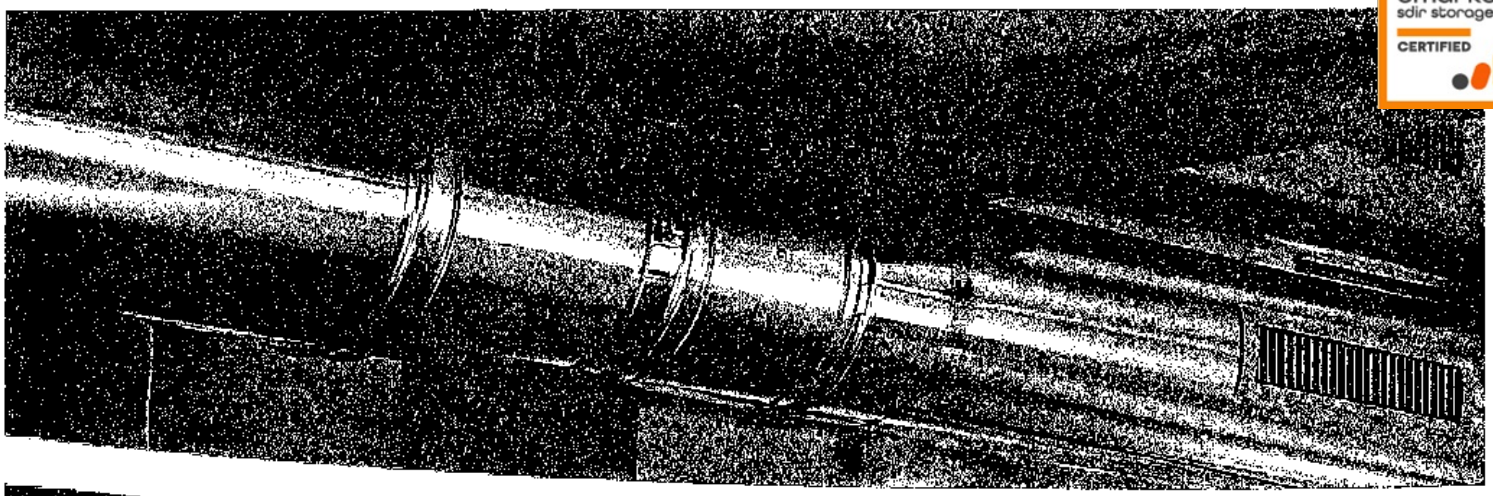
Garantire l'**efficienza** e la **resilienza** della rete, la **sostenibilità**, la **sicurezza** e la **qualità** del servizio, oltre all'**integrazione** della produzione da **fonti rinnovabili**. Questi i fattori chiave del **Piano di Sviluppo 2025** della RTN, pubblicato a marzo 2025 in continuità con la precedente edizione del Piano 2023, con un programma di **investimenti che superano i 23 miliardi di euro** nell'orizzonte decennale 2025-2034.

Sempre a marzo, il Gruppo Terna presenta l'**aggiornamento del Piano Industriale 2024-2028**, che prevede investimenti complessivi per **17,7 miliardi di euro**, attraverso i quali Terna consolida l'impegno al servizio del Paese per la decarbonizzazione e l'indipendenza energetica, a favore di una **twin transition** che possa garantire una *Just Transition* equa e inclusiva per tutti gli stakeholders. **"Abbiamo preso un impegno con il futuro dell'energia"** è il claim della campagna dedicata nel 2024 al Piano Industriale per una transizione "più rapida, più digitale, più sostenibile, più giusta".

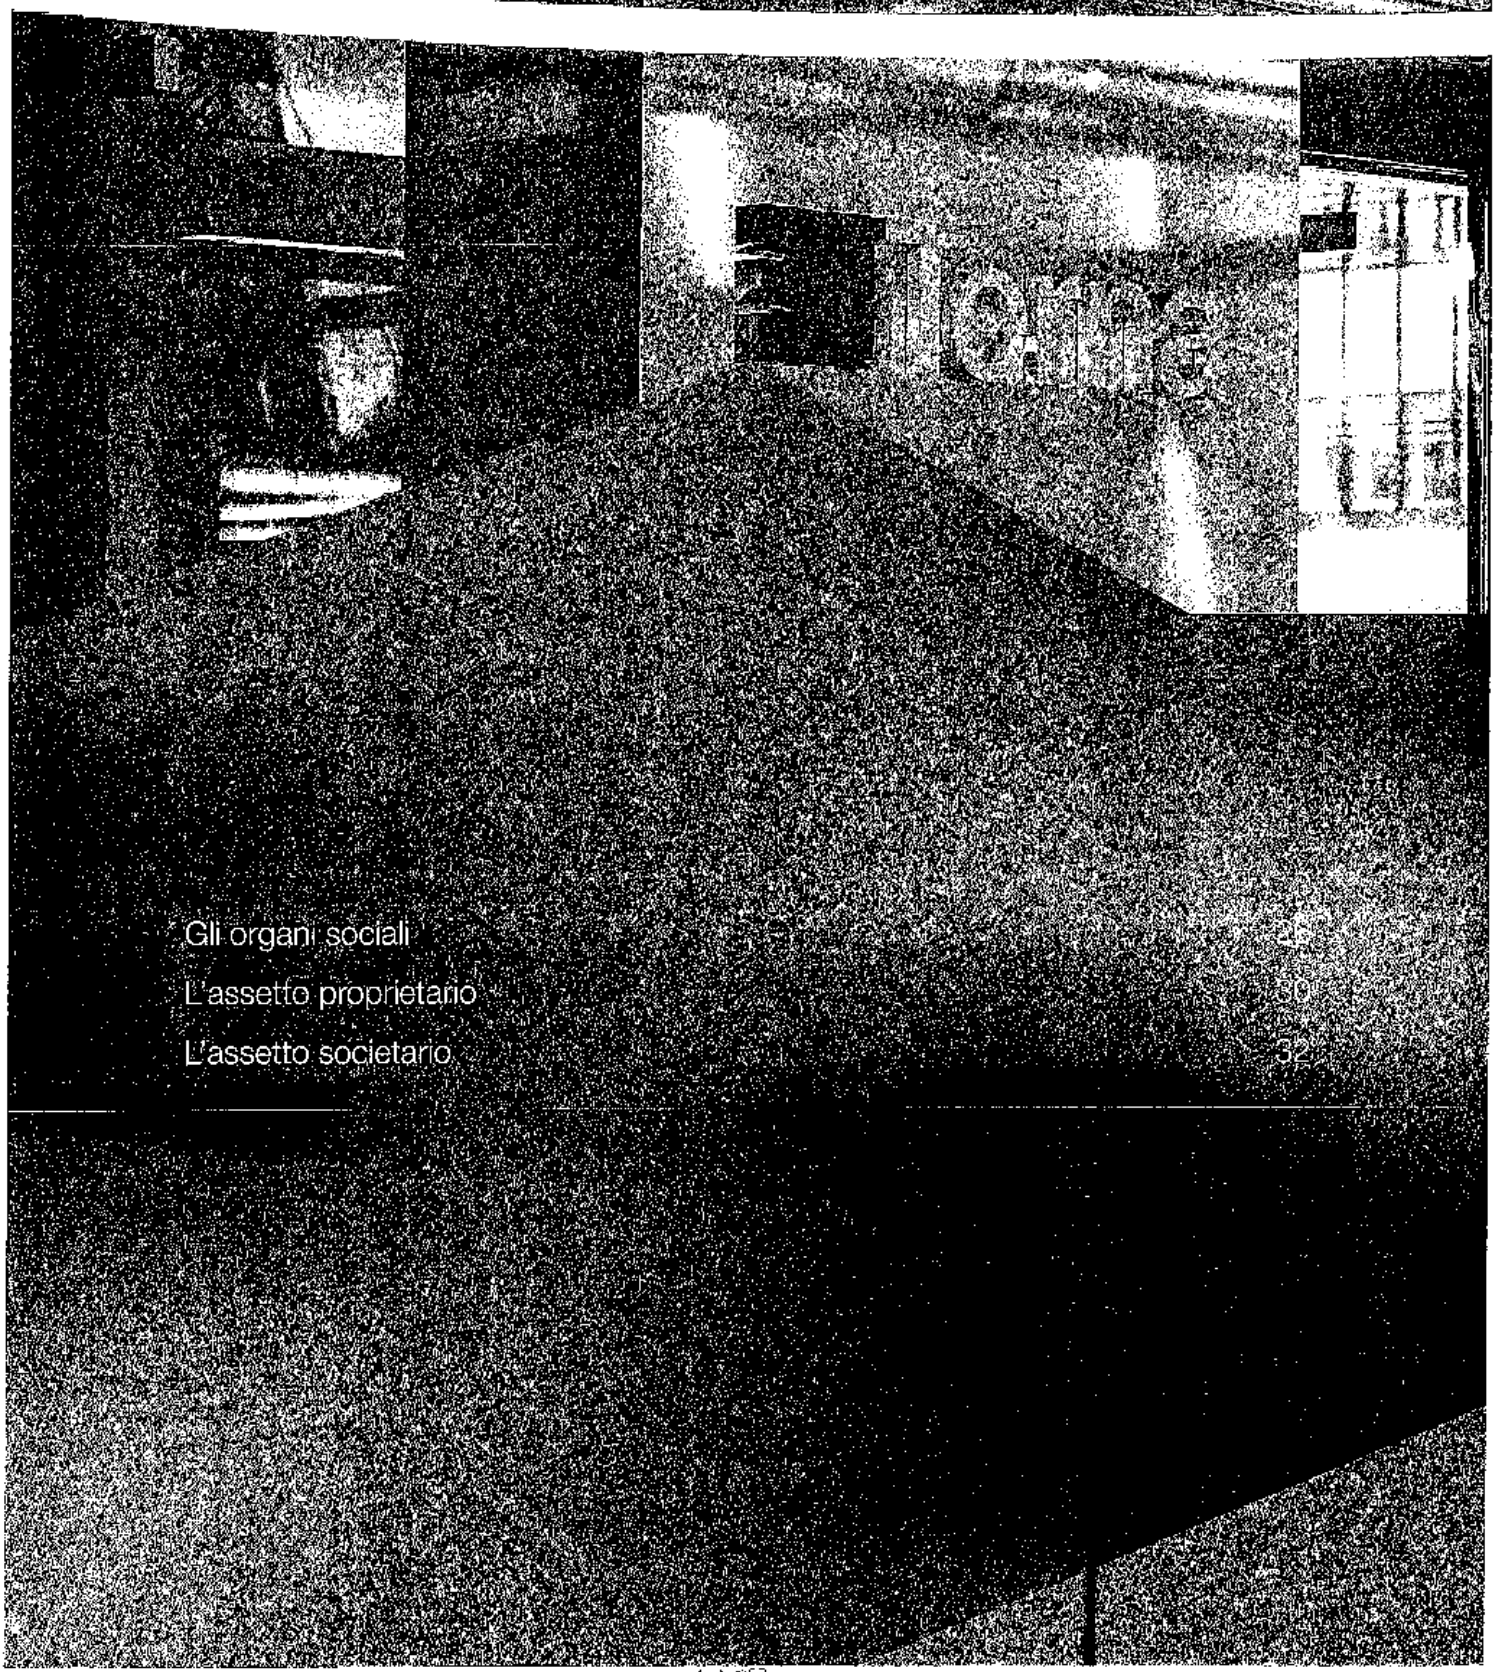


L'impegno nello sviluppo della rete elettrica è tangibile anche dagli **interventi autorizzati** nel **2024** pari a **oltre 2,3 miliardi** di euro di investimenti. Tra questi, via libera del **MASE** all'**Adriatic Link**, elettrodotto sottomarino tra Marche e Abruzzo, all'infrastruttura "**Bolano-Annunziata**", collegamento elettrico sottomarino in corrente alternata a 380 kV tra Sicilia e Calabria e a **Elmed**, elettrodotto sottomarino Italia-Tunisia, realizzato da Terna e Steg, società tunisina dell'elettricità e del gas, per cui è stato stanziato dalla Commissione Ue un finanziamento di 307 milioni di euro, su un investimento totale di circa 850 milioni. È la prima volta che l'Unione Europea finanzia un progetto in cui uno dei Paesi coinvolti non fa parte dell'UE. Nei primi mesi del **2025** prende il via a Fiumetorto, nel comune di Termini Imerese (PA), la **prima fase della posa** del cavo sottomarino del ramo **est** (Sicilia-Campania) del **Tyrrhenian Link**, di cui nel 2023 il **MASE autorizza** il ramo **ovest** (Sicilia-Sardegna); partono inoltre i lavori terrestri del Sa.Co.I.3, progetto di interconnessione elettrica che collegherà Sardegna, Corsica e Toscana, autorizzato nel 2023 dal MASE. Sempre **nel 2023 entrano in esercizio** il collegamento elettrico sottomarino tra l'**Isola d'Elba** e **Piombino**, per cui Terna ha investito 90 milioni di euro, e l'interconnessione **Italia-Austria**, da 80 milioni di investimenti complessivi, che favorirà lo sviluppo delle energie rinnovabili, aumentando il livello di sicurezza della rete elettrica europea.

Terna acquista nel 2023 il 100% di **Edyna Transmission S.r.l.**, proprietaria di 2 stazioni elettriche e di circa 70 km di linee in Alto Adige già parte della RTN. Un'operazione strategica per unificare l'infrastruttura nazionale di trasmissione dell'energia elettrica.



Il 23 giugno 2024 si celebrano i **20 anni dalla quotazione** sul mercato telematico di Borsa Italiana: il valore del titolo è quadruplicato e la capitalizzazione è tra le più alte del FTSE MIB. Nel 2025 si conclude con successo l'**emissione obbligazionaria green**, single tranche, da 750 milioni di euro, che ha ottenuto grande favore da parte del mercato con una richiesta massima pari a quasi 5 volte l'offerta.



Annunciato a marzo 2025 il **nuovo assetto di Terna Energy Solutions** (TES), società del Gruppo Terna che gestisce le attività non regolate svolte sui mercati competitivi. **Altenia**, evoluzione societaria di LT in cui confluiscono tutte le attività di system integrator per la transizione energetica, si affianca al **Gruppo Tamini**, leader nel settore dei trasformatori, e al **Gruppo Brugg Cables**, azienda che produce cavi terrestri.

L'AD e DG di Terna, Giuseppina Di Foggia, assume la carica di Vice Presidente di **GO15**, associazione mondiale dei cosiddetti Very Large Power Grid Operators per la trasmissione dell'energia elettrica da giugno a dicembre 2023. Dal 30 luglio 2024 è Presidente Onorario della **Fondazione Terna**, costituita nello stesso anno.

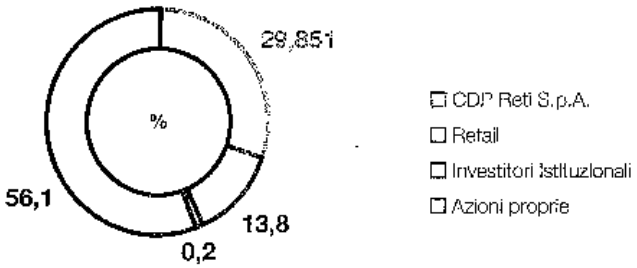
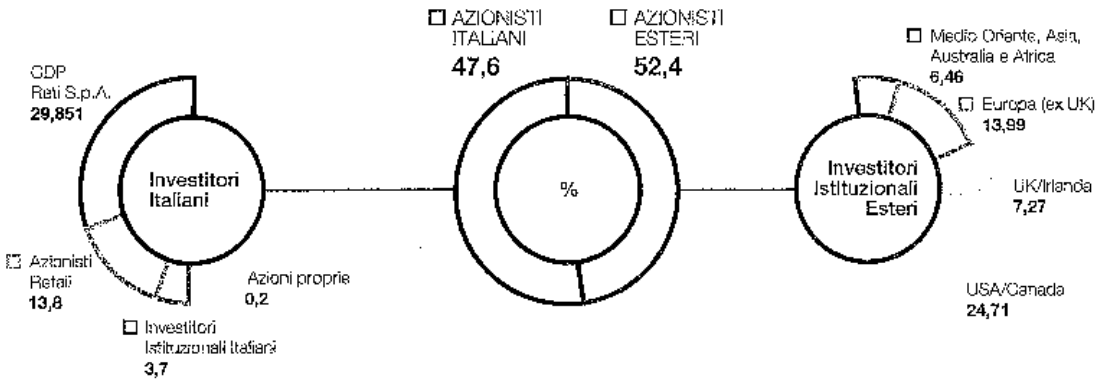
La struttura di vertice di Terna al 25 marzo 2025 ha il seguente assetto:

Teleborsa: distribution and commercial use strictly prohibited



L'assetto proprietario

Alla data di redazione della presente relazione, il **capitale sociale di Terna ammonta a 442.198.240 euro** ed è rappresentato da 2.009.992.000 azioni ordinarie del valore nominale di 0,22 euro ciascuna interamente liberate.



In base alle periodiche ricognizioni effettuate dalla Società, risulta che le azioni di Terna sono detenute per il 47,6% da Azionisti Italiani e per il restante 52,4% da Investitori Istituzionali Esteri, prevalentemente negli USA e in Europa (ex UK).

In base alle risultanze del libro soci e ad altre informazioni a disposizione, al mese di febbraio 2025, l'azionariato di Terna è rappresentato nel grafico che segue.

Azionariato per Tipologia

Azionariato per area geografica e tipologia

Concluso a settembre l'acquisto da parte della Capogruppo di **n. 998.428 azioni proprie** (pari allo 0,050% del capitale sociale) per un controvalore complessivo di 7.999.999,09 euro, a servizio del nuovo Piano Performance Share 2024-2028.

Teleborsa: distribution and commercial use strictly prohibited

Azionisti rilevanti[6]

CDP RETI S.p.A.[7] **29,851%**

(società controllata da Cassa Depositi e Prestiti S.p.A.)

Investitori SRI

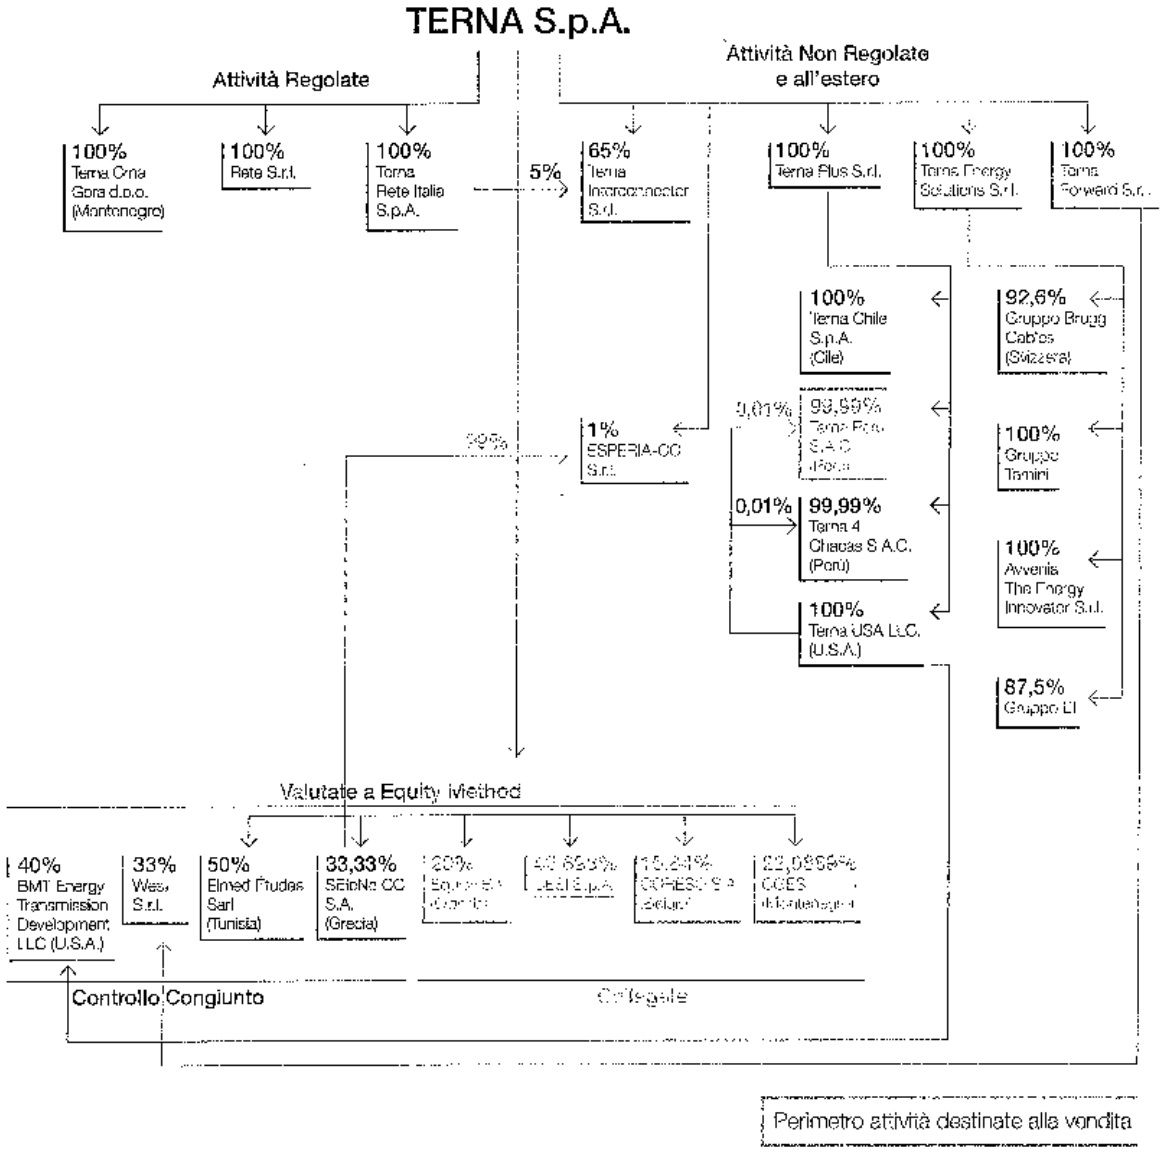
A fine 2024 gli investitori SRI (Socially Responsible Investors), che hanno investito nelle azioni di Terna in applicazione di un approccio basato sulla considerazione di aspetti ESG (Environmental, Social, Governance), erano 176 (178 nel 2023 e 173 nel 2022). Nel complesso, gli investitori SRI rappresentavano, a fine 2024, il 24,9% del flottante di Terna (24,2% nel 2023 e 20,4% nel 2022) e il 31,1% del capitale detenuto da investitori istituzionali identificati (30,1% a fine 2023 e il 26,1% nel 2022).

Terna ha adottato una politica che prevede il pagamento dei dividendi due volte l'anno.

L'acconto del dividendo 2024 è stato pari a 11,92 euro/centesimi per azione (in pagamento dal 20 novembre 2024) mentre il saldo proposto dal Consiglio di Amministrazione all'Assemblea che si terrà in unica convocazione in data 21 maggio 2025 è pari a 27,70 euro/centesimi. Ulteriori informazioni sull'evoluzione dei dividendi distribuiti sono disponibili sul sito www.terna.it.

Le informazioni su assetti proprietari, restrizioni al trasferimento di titoli, titoli che conferiscono diritti speciali e restrizioni al diritto di voto, così come sui patti parasociali, sono riportate nella "Relazione sul governo societario e gli assetti proprietari" relativa all'esercizio 2024, pubblicata congiuntamente alla Relazione Finanziaria Annuale del Gruppo Terna, e disponibile nella sezione "Sistema di Corporate Governance – Governance Report" del sito internet di Terna.

[6] Azionisti che, sulla base delle informazioni a disposizione e delle comunicazioni CONSOB ricevute, partecipano al capitale sociale di Terna S.p.A. in misura superiore alle soglie di rilevanza indicate dalla Delibera CONSOB n. 11971/99 e dal D.lgs. n. 58/98 e s.m.i..



[7] In data 27 novembre 2014 è stato stipulato un patto parasociale tra Cassa Depositi e Prestiti S.p.A. (CDP), da un lato, e State Grid Europe Limited (SGEL) e State Grid International Development Limited (SGID), dall'altro lato, in relazione a CDP Reti S.p.A., Snam S.p.A. e Terna S.p.A., successivamente modificato e integrato per estenderne le previsioni anche in relazione a Italgas S.p.A..

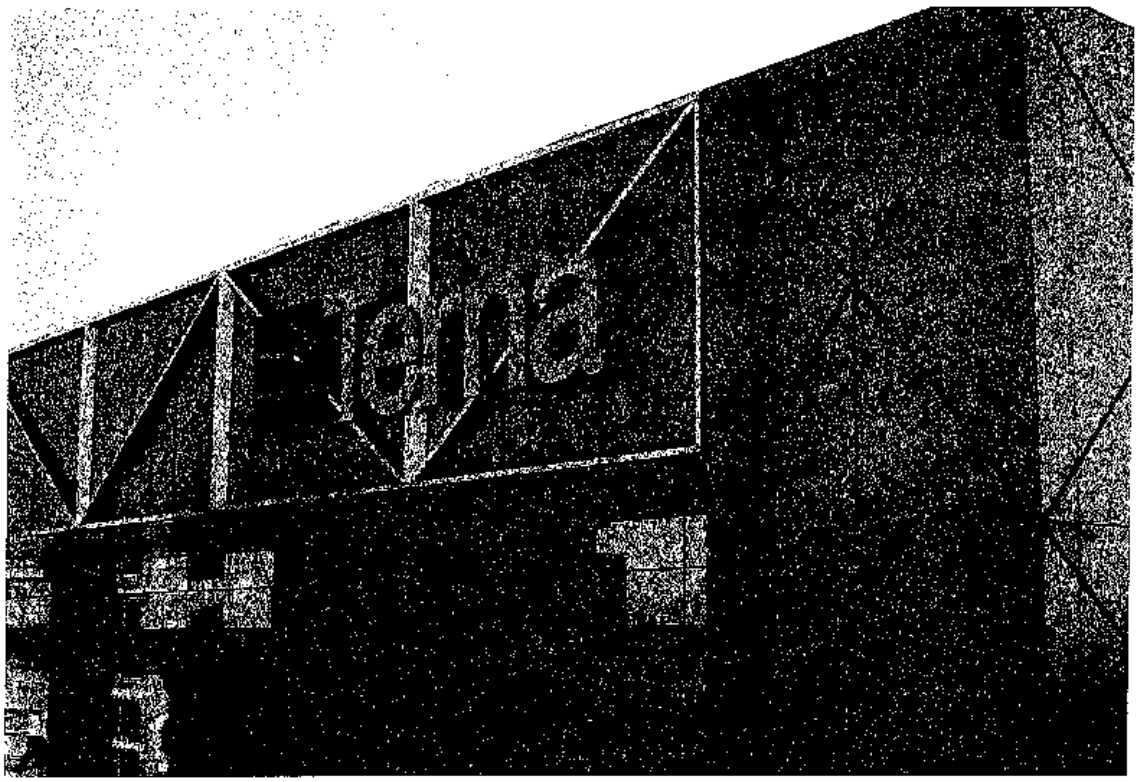
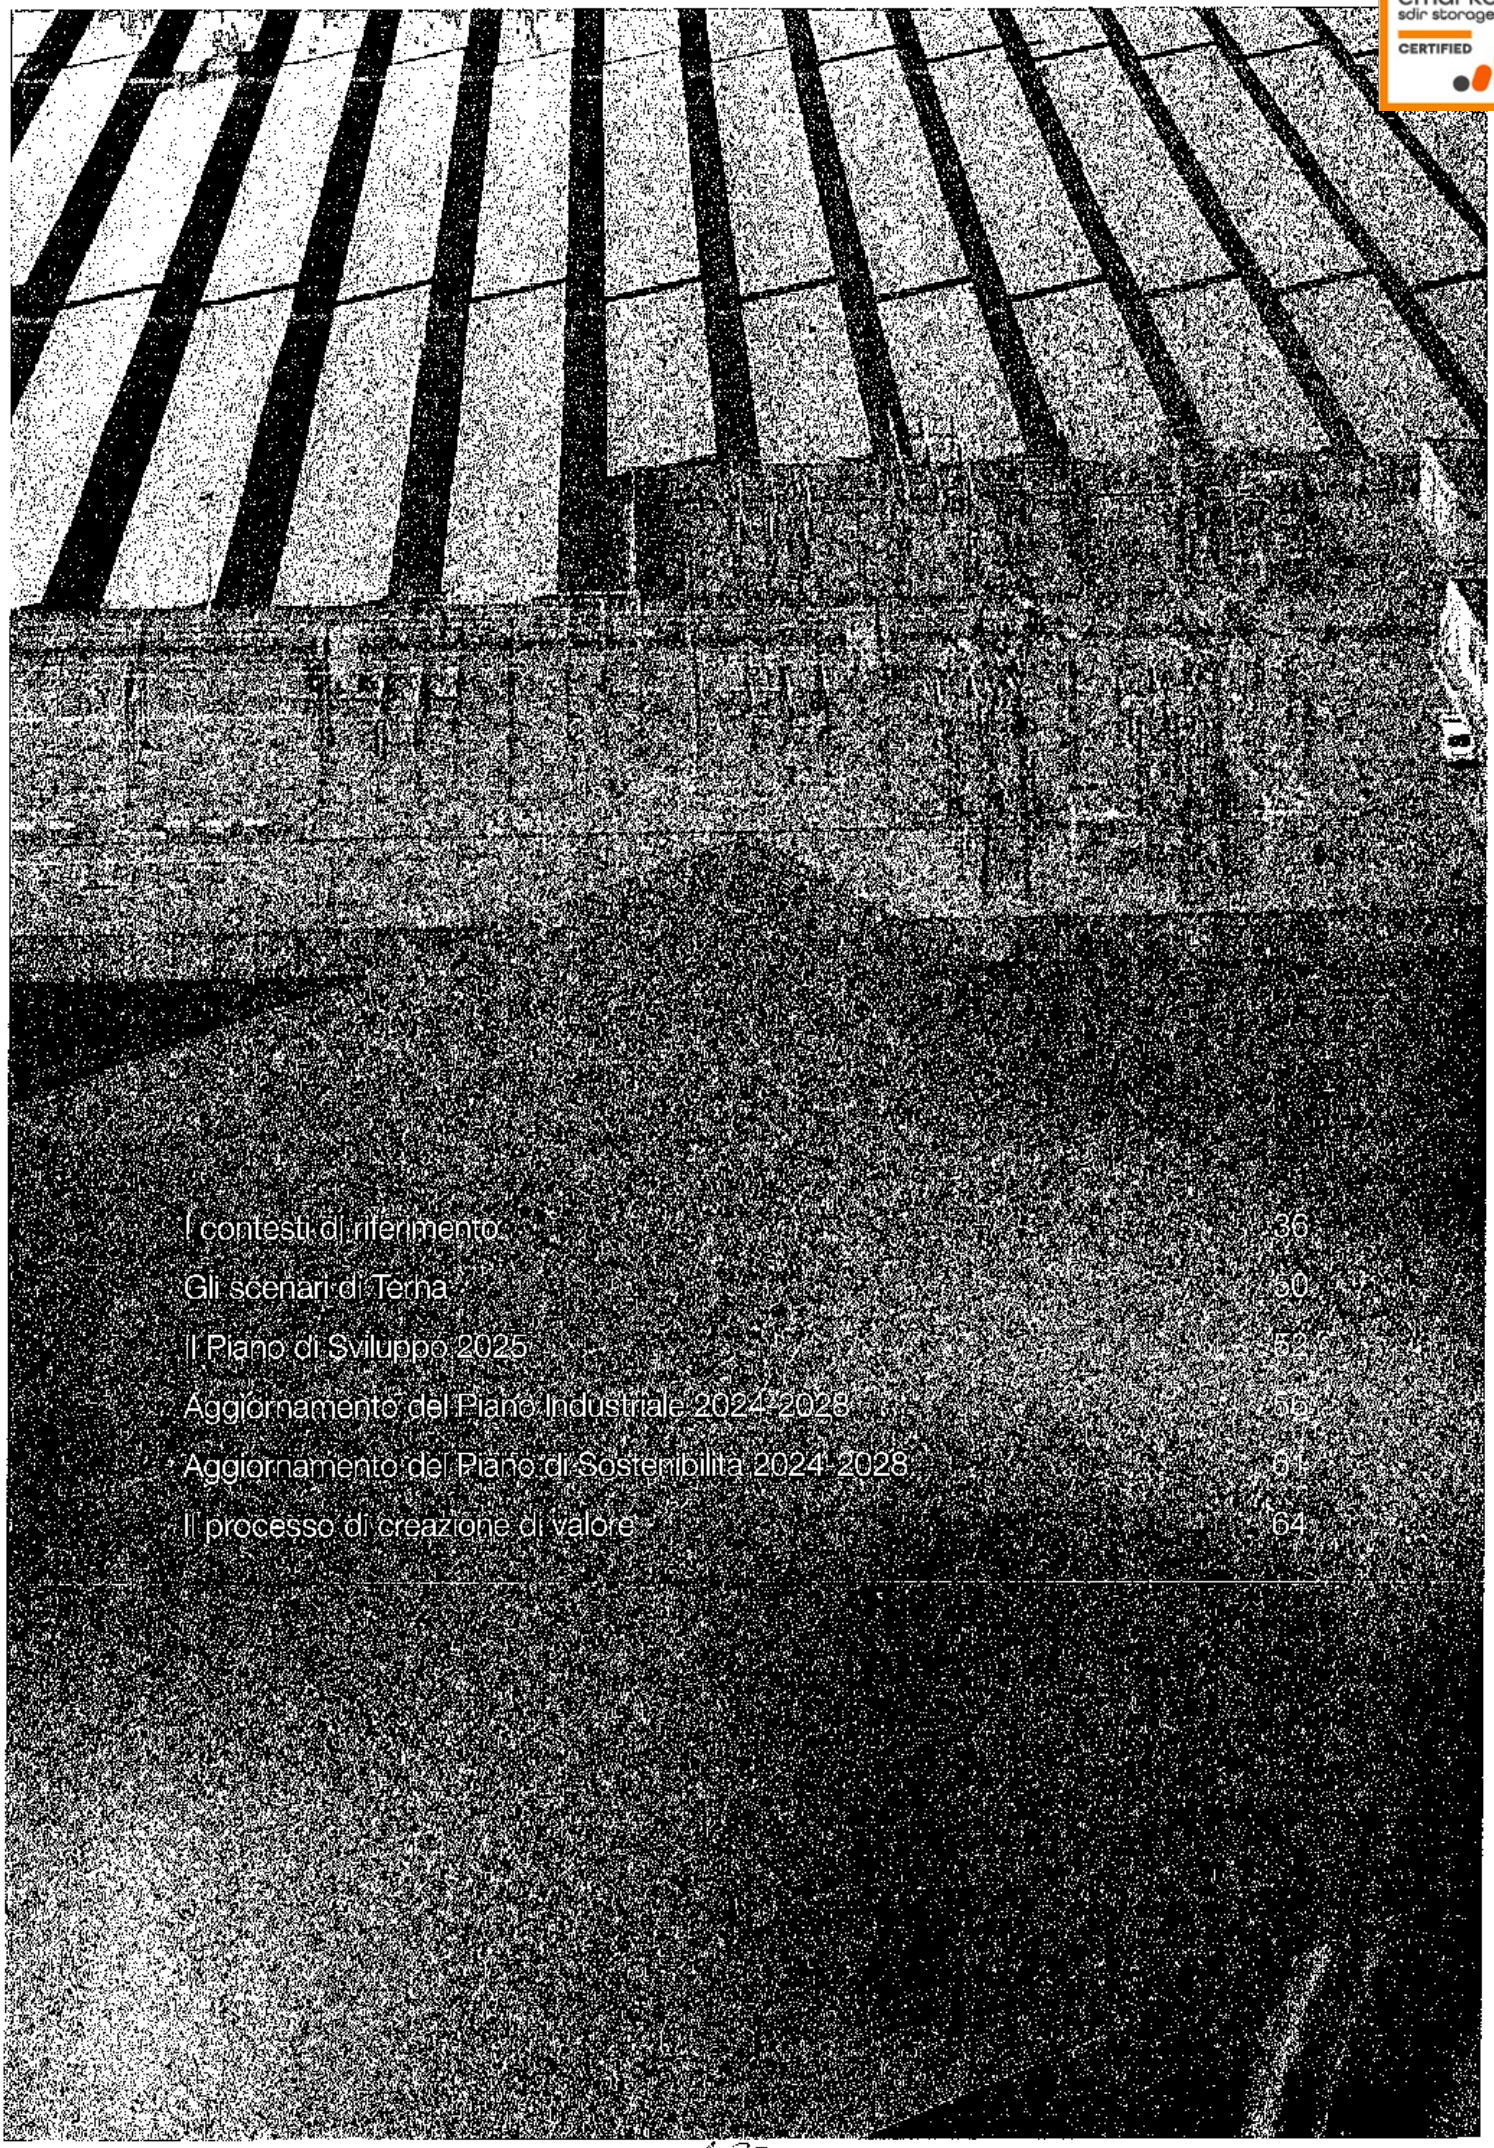
L'assetto societario

In linea con il ruolo e gli obiettivi di abilitatore della transizione energetica e digitale in atto, di seguito l'assetto societario di Gruppo al 31 dicembre 2024.



Teleborsa: distribution and commercial use strictly prohibited



Rispetto alla situazione al 31 dicembre 2023 si segnala che:

- In data **7 marzo 2024** la società controllata Terna Forward S.r.l. ha perfezionato l'acquisizione di una quota pari al 33% del capitale della società Wesii S.r.l., società italiana leader di mercato nei servizi di ispezione e telerilevamento nel settore delle energie rinnovabili con sede legale in Chiavari (GE);
- In data **18 novembre 2024** è stato perfezionato il terzo closing per la cessione a CDPQ della società SPE Transmissora de Energia Linha Verde I S.A.. A partire da tale data la società non è più parte del Gruppo Terna. Si ricorda inoltre che, in data 7 febbraio 2024, la società controllata Terna Plus S.r.l. aveva perfezionato l'acquisizione della restante quota di minoranza pari al 25% della società controllandola integralmente;
- In data **4 dicembre 2024** la società Terna Chile S.p.A. ha ceduto a Terna USA LLC le quote di partecipazione nelle due società controllate Terna Peru S.A.C. e Terna 4 Chacas S.A.C., entrambe pari allo 0,01% del capitale sociale. A seguito dell'operazione, Terna Peru S.A.C. e Terna 4 Chacas S.A.C. sono quindi controllate al 99,9% da Terna Plus S.r.l. e allo 0,01% da Terna USA LLC;
- In data **20 dicembre 2024** la società controllata Terna Energy Solutions S.r.l. ha perfezionato l'acquisto di una percentuale, pari al 12,5%, dalla quota di minoranza detenuta dal socio Solaris S.r.l. nella società LT S.r.l.. La partecipazione nella società è quindi passata dal 75% all'87,5%.

Si precisa inoltre che, in data **17 dicembre 2024**, è stato formalmente avviato il processo di liquidazione della società Terna Chile S.p.A.. Tale procedura si prevede che sarà conclusa nel corso del 2025.

Teleborsa: distribution and commercial use strictly prohibited

I contesti di riferimento

Macroeconomico

Il contesto macroeconomico del 2024 è stato caratterizzato da un ulteriore rientro degli indici inflazionistici che hanno iniziato a stabilizzarsi a partire dal 2023, dopo aver raggiunto livelli record nel 2022 a causa di una serie di fattori concomitanti, tra cui la crisi energetica, le tensioni geopolitiche come la guerra tra Russia e Ucraina e la ripresa economica post-pandemica.

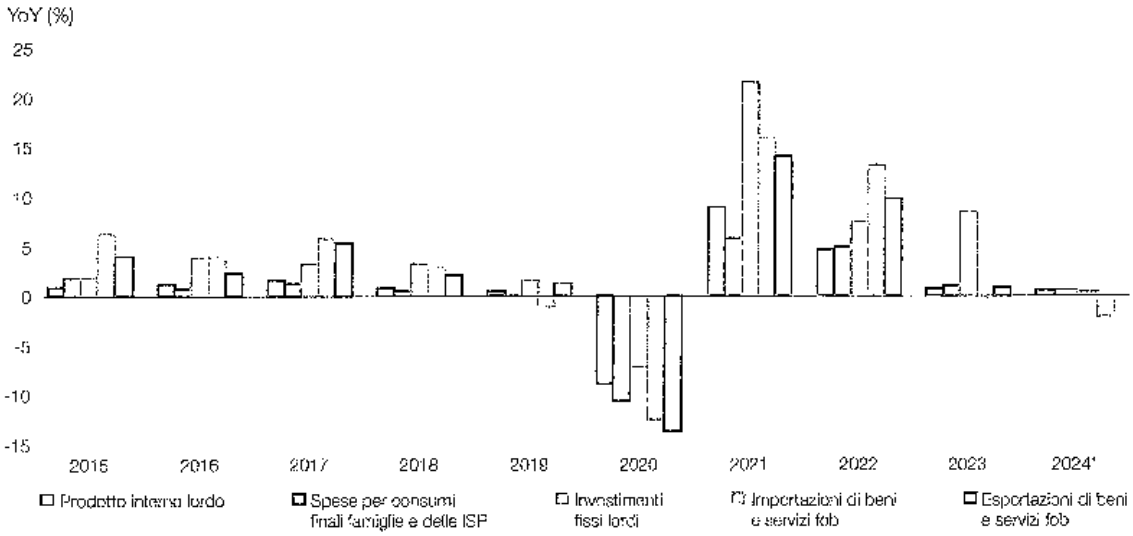
Secondo il Fondo Monetario Internazionale (FMI), la battaglia globale contro l'inflazione è stata in gran parte vinta grazie alla stretta monetaria globale, e si prevede che i livelli pre-crisi verranno raggiunti entro il 2025 nella maggior parte dei Paesi. Tuttavia, persistono divergenze significative tra regioni, con le economie emergenti che affrontano difficoltà più marcate rispetto ai Paesi avanzati.

Nelle economie emergenti e in via di sviluppo, l'inflazione è passata dal +8,1% nel 2023 al +7,9% nel 2024[8]. Il Fondo monetario internazionale (FMI) prevede che l'inflazione in queste economie continuerà a decelerare, scendendo al +5,9% nel 2025. Nelle economie avanzate invece l'inflazione è passata dal +4,6% nel 2023 al +2,6% (dato provvisorio) nel 2024 e le previsioni per il 2025 indicano un +2,0%.

Nel 2024 il PIL globale è cresciuto del +3,2%, rimanendo pressoché stabile rispetto al 2023, quando l'aumento era stato del +3,3%. Tali valori risultano inferiori rispetto al periodo pre-crisi: tra il 2010 e il 2019, infatti, l'aumento medio annuo del PIL in termini reali era pari al +3,8%. Le proiezioni del FMI per il 2025 prevedono una crescita stabile, pari al +3,2%.

Anche in Europa il contesto macroeconomico nel 2024 è risultato in ulteriore miglioramento rispetto al 2023. Nel 2022 si è registrato un inasprimento delle condizioni finanziarie, con la Banca Centrale Europea (BCE) che ha iniziato ad aumentare gradualmente i tassi di interesse. Il tasso sui depositi ha raggiunto un picco del 4% a dicembre 2023, per poi essere progressivamente ridotto al 3% a dicembre 2024, rimanendo comunque nettamente superiore ai livelli vicini allo 0% registrati in precedenza per quasi un decennio. Si segnala che nel corso del 2025 (fino al 6 marzo) la BCE ha tagliato i tassi di interesse di ulteriori 50 bps, riducendo quello sui depositi al 2,50%.

L'inflazione dell'area euro ha registrato un +2,4% nel 2024, in miglioramento rispetto a +5,5% registrato nel 2023; le previsioni del FMI indicano un +2,0% nel 2025 e nel 2026.



Il PIL dell'area euro è passato dal +0,4% nel 2023 al +0,9% nel 2024 e le previsioni indicano un +1,2% nel 2025.

[8] Dato provvisorio; International Monetary Fund, World Economic Outlook, ottobre 2024.

** Dati provvisori 2024: Le prospettive per l'economia italiana nel 2024-2025, dicembre 2024.*

Similmente all'Europa, anche l'**Italia ha registrato una riduzione dell'inflazione**, guidata principalmente da un progressivo rientro dei prezzi dei beni energetici (abitazione, acqua, elettricità e combustibili) e dei trasporti, passando dal +6% registrato nel 2023, al **+1,1% nel 2024**[9].

Il PIL italiano è cresciuto del +0,7% nel 2024[10], in linea rispetto ai valori registrati nel 2023. La crescita del PIL al 2025 è prevista dello +0,8%[11].

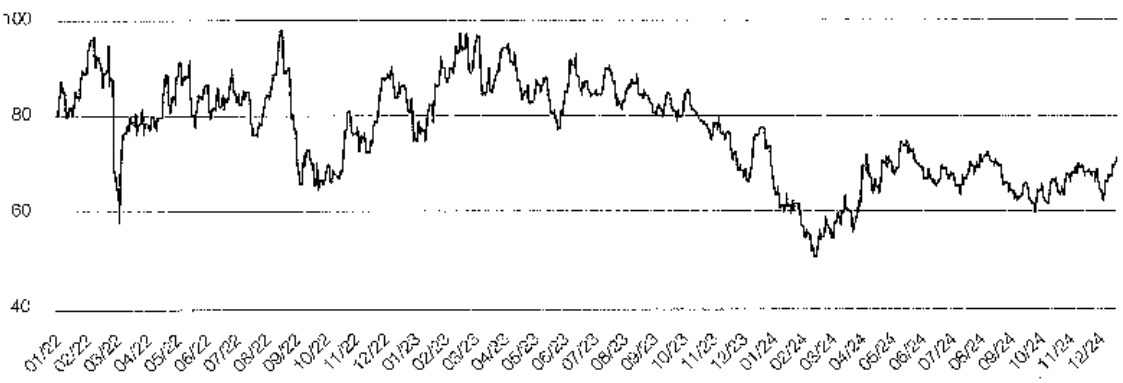
Andamento del costo delle commodities e ripercussioni sul prezzo dell'energia

Nel corso degli ultimi due anni, i prezzi gas si sono stabilizzati intorno ai 40-50 €/MWh, in significativa riduzione rispetto al forte aumento dei prezzi registrato nel 2022[12], con una media di 123 €/MWh e picchi di oltre 300 €/MWh ad agosto. Tuttavia, sia i prezzi che la relativa volatilità rimangono a livelli più alti rispetto ai valori pre-crisi (10-15 €/MWh), indicando che il mercato sia in un equilibrio fragile. Il mercato gas resta molto influenzato da tensioni geopolitiche, da timori di possibili rischi di approvvigionamento e da dinamiche climatiche di breve periodo (temperature invernali, eventi di "Dunkelflaute"[13]).

Andamenti prezzo storico del gas TTF

(€/MWh)



Il mercato gas europeo di oggi è caratterizzato da un crescente volume importato tramite Gas Naturale Liquefatto (GNL) rispetto a quelli importati tramite gasdotto. In tale contesto, la bassa liquidità del mercato globale di GNL comporta alti rischi di volatilità dei prezzi gas europei. Infatti, piccoli cambiamenti dell'equilibrio di mercato sono sufficienti a produrre impatti notevoli sui prezzi, perché l'offerta GNL è relativamente rigida e la domanda gas poco flessibile (in particolare quella per il termoelettrico e per il riscaldamento).

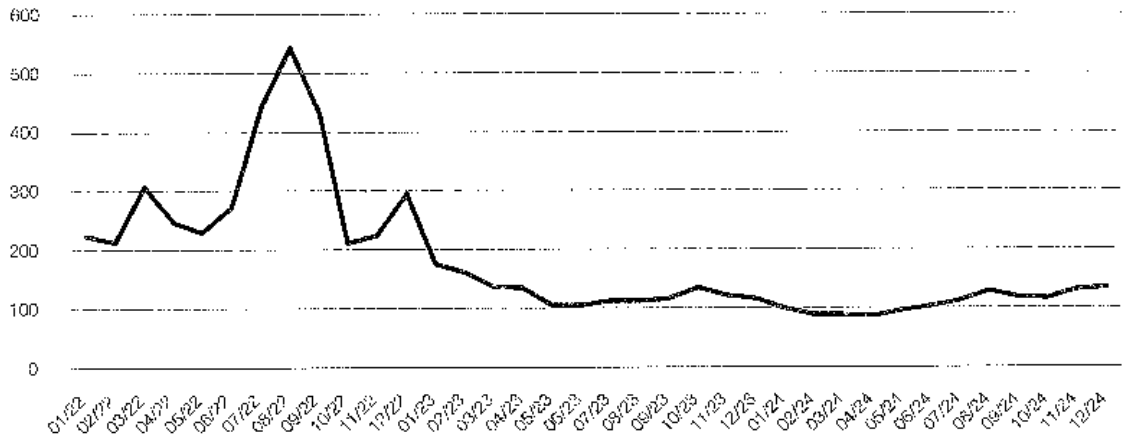
Nel 2024 i consumi di gas naturale in Italia, pari a 652 TWh[14], **sono risultati in diminuzione del 2,5% rispetto al 2023**, registrando il valore più basso da oltre 15 anni.

Anche il prezzo della CO_2, dopo aver raggiunto un picco di quasi 100 euro per tonnellata ad agosto 2022, **si è stabilizzato intorno ai 60-70 euro per tonnellata nel corso del 2024**, valori comunque più alti rispetto al periodo pre-crisi (20-30 euro per tonnellata).

Andamenti prezzo storico della CO_2

(€/t)

[12] Prezzi del gas TTF - Title Transfer Facility.
[13] Periodo di più giorni consecutivi di bassa produzione da fonti eoliche e solari e alta domanda di energia.
[14] GME, Newsletter n. 118, gennaio 2025.

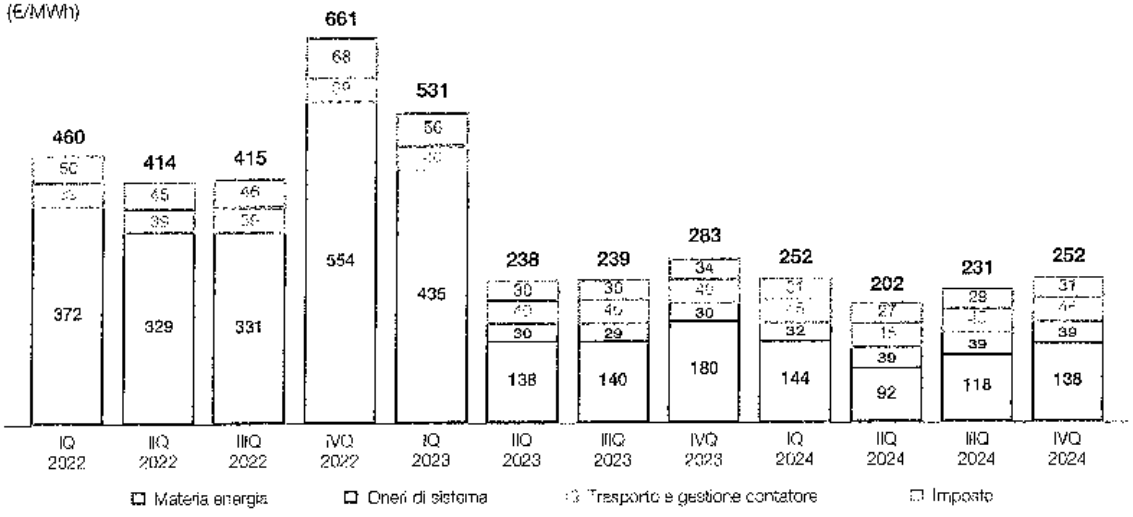


482

Teleborsa: distribution and commercial use strictly prohibited

Come conseguenza degli alti prezzi della CO_2 e soprattutto del gas, anche i valori del PUN risultano più alti rispetto a quelli del periodo pre-crisi. L'andamento del prezzo dei combustibili fossili, in particolare quello del gas, incide fortemente sul mercato elettrico a causa del meccanismo di formazione dei prezzi sul mercato c.d. *system marginal price*, che valorizza tutte le offerte accettate al costo marginale del sistema (determinato tipicamente da impianti a gas). Conseguentemente, anche i valori del PUN risultano più elevati rispetto ai valori pre-crisi. **Nel 2023 e nel 2024, il PUN medio è stato rispettivamente di 127 €/MWh e 109 €/MWh**, in calo rispetto ai 304 €/MWh del 2022, ma ancora ben al di sopra dei 52 €/MWh registrati nel 2019.

Andamento mensile del PUN



(€/MWh)

Gli alti valori del PUN hanno aumentato la spesa per l'energia elettrica dei clienti finali. Il prezzo dell'energia per il consumatore domestico tipo[15] in maggior tutela per il 2023 e il 2024 è mediamente pari a 279 €/MWh, un valore comunque più basso rispetto ai picchi registrati durante il 2022, ma più del doppio rispetto ai valori del 2019.

Prezzo energia elettrica per consumatore tipo in maggior tutela

(€/MWh)

L'utilizzo del gas naturale come vettore energetico espone comunque l'Italia a rischi di approvvigionamento di natura geopolitica ed economica, con una rilevante vulnerabilità in relazione alla variabilità dei prezzi delle commodity collegata a tensioni sui mercati internazionali. Le tensioni sui prezzi dell'energia potrebbero peraltro perdurare nei prossimi anni in considerazione dei suddetti fattori, determinando per l'Italia un rischio di tensioni inflazionistiche destinate a incidere sui consumi. Si pone, inoltre, un tema di sicurezza energetica, tenuto conto che quasi la totalità del gas consumato in Italia viene importato da Paesi terzi.

[15] Utenza con 3 kW di potenza impegnata e 2.700 kWh di consumo annuo.

Teleborsa: distribution and commercial use strictly prohibited

Energetico

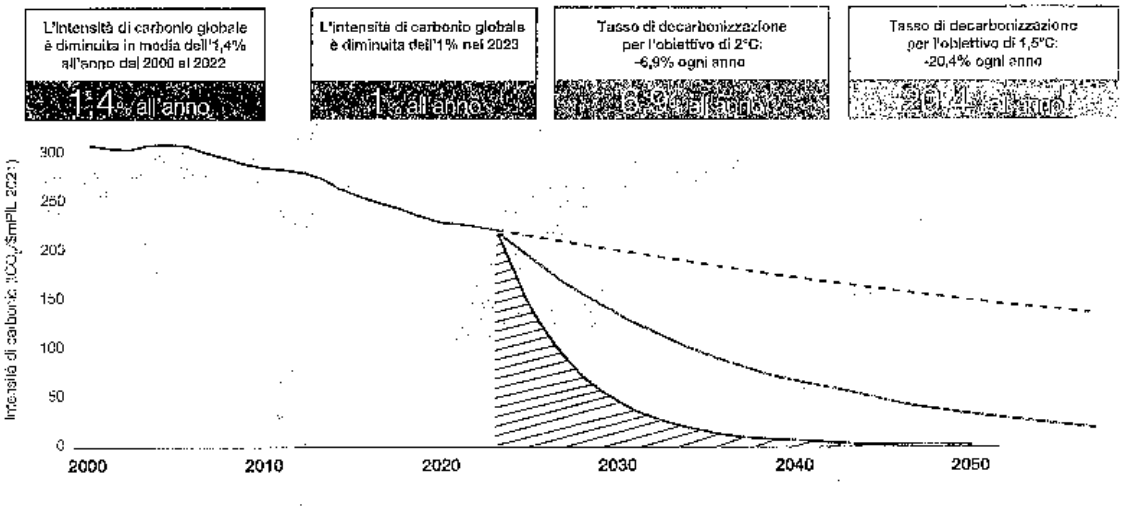
Cambiamento climatico e impatto del settore elettrico

I cambiamenti climatici rappresentano una sfida urgente e non rinunciabile per la società e per il pianeta. Oggi il riscaldamento prodotto dalle attività umane ha già raggiunto il livello di circa +1°C rispetto al periodo preindustriale. **Ognuna delle ultime 4 decadi, infatti, è stata più calda della precedente:** la temperatura superficiale media terrestre **è stata più calda di 1,1 °C nel periodo 2011-2020 rispetto al periodo 1850-1900.**

IPCC - cambiamenti globali delle temperature

Tale incremento sta provocando un inasprimento della frequenza e dell'intensità degli eventi climatici estremi, sia in termini di temperature estreme (caldo e freddo), sia in termini di precipitazioni violente e imprevedibili. Gli oltre 18.000 eventi naturali rilevanti registrati a livello globale dal NatCatSERVICE-Munich Re a partire dal 1980 mostrano come questi si siano triplicati in 40 anni. Gli effetti dei cambiamenti climatici hanno poi risvolti negativi anche nel settore energetico.

Gli eventi climatici estremi in Europa sono oramai sempre più frequenti. Tali eventi provocano non solo danni economici e infrastrutturali ingenti, ma possono anche portare centinaia di morti, come nel caso dell'evento alluvionale di Valencia del 2024. In Italia, nel 2024, si sono registrati 350 eventi climatici estremi, circa sei volte il numero rilevato nel 2015. Ad esempio, l'Emilia-Romagna è stata tra le regioni più colpite da eventi estremi, avendo dovuto affrontare ben 4 alluvioni nel biennio 2023-2024. Questi eventi dimostrano ancora una volta la necessità di azioni più incisive per contrastare il cambiamento climatico e prevenire i rischi legati agli eventi estremi.



La lotta al cambiamento climatico richiede un costante impegno nella decarbonizzazione del sistema. Tuttavia, nel 2023, il **tasso globale di decarbonizzazione[16] è stato di appena l'1%[17]**, un valore molto al di sotto del tasso globale annuo di decarbonizzazione del 20,4% richiesto per limitare il riscaldamento globale a 1,5°C rispetto ai livelli preindustriali. Persino contenere il riscaldamento globale entro i 2°C, il livello minimo di ambizione previsto dall'Accordo di Parigi, richiede un'accelerazione significativa, con un tasso di decarbonizzazione annuale stimato al 6,9%.

[16] La riduzione dell'intensità di carbonio o delle emissioni di CO_2 del settore energetico per dollaro di PIL.
[17] PWC - Net Zero Economy Index 2023.

689

Teleborsa: distribution and commercial use strictly prohibited

Net Zero Economy Index 2024

Fonte: Net Zero Economy Index 2024, Pwc.

Guardando al settore energetico, secondo le analisi Enea[18], nel 2024 l'Eurozona ha registrato un calo marginale dei consumi di energia primaria rispetto al 2023, stimato intorno a mezzo punto percentuale. Più nel dettaglio, il consumo di carbone è diminuito drasticamente del 14%, mentre i consumi di petrolio hanno subito una contrazione dell'1,5%. Il calo dei consumi di gas si è invece arrestato, con valori rimasti invariati. La produzione di elettricità da fonti rinnovabili e nucleare è aumentata del 5%. Questo cambiamento nel mix energetico ha portato a una riduzione delle emissioni di CO_2 di circa il 3,5% nel 2024, anche se il raggiungimento dei target di decarbonizzazione al 2030 richiederebbero una riduzione media annua di oltre il 7%.

In Italia, Enea[19] riporta che i consumi di energia primaria risultano in calo marginale (-0,5% circa), mentre i consumi finali di energia registrano un aumento di oltre l'1%. A trainare la ripresa dei consumi energetici sono soprattutto i trasporti (+3%), sostenuti dalla crescita della mobilità stradale e aerea. Anche il settore civile mostra un incremento significativo (+2,5%), con un aumento dei consumi di gas per riscaldamento e della domanda di elettricità nei servizi (+4%). In contrasto, i consumi energetici industriali continuano a diminuire (-3%), in linea con il calo della produzione industriale. Per quanto riguarda le emissioni di CO_2[20], nel 2024 le emissioni sono stimate in contrazione di poco meno del 3% rispetto al 2023. La riduzione delle emissioni è stata guidata dal settore elettrico, grazie a una marcata diminuzione della componente fossile.

Infatti, i dati Terna[21] per il 2024, riportano che nel settore elettrico i consumi hanno registrato un aumento del 2,2% rispetto al 2023, raggiungendo 312,3 TWh. **Le fonti rinnovabili hanno contribuito in modo significativo, coprendo il 41,2% della domanda elettrica,** il valore più alto mai registrato, in aumento rispetto al 37,1% del 2023. Questo risultato è stato trainato principalmente dalla crescita della produzione idroelettrica e fotovoltaica.

Secondo la IEA[22], **il settore energetico è complessivamente responsabile della maggior parte delle emissioni** di origine antropica e la sua decarbonizzazione rappresenta quindi la chiave per evitare i possibili effetti del cambiamento climatico. Secondo il percorso net-zero elaborato da IEA, l'economia globale nel 2030 sarà cresciuta del 40% ma dovrà usare il 7% in meno di energia rispetto ad oggi. Pertanto, l'**efficienza energetica e l'elettrificazione dei consumi finali** (avendo il vettore elettrico un'elevata efficienza intrinseca) saranno gli strumenti principali per la decarbonizzazione. Il vero fattore abilitante di questa trasformazione è infatti il **vettore elettrico,** in quanto gli usi finali basati su tale vettore presentano una elevata efficienza intrinseca (che deriva dalle leggi della termodinamica e quindi indipendente dall'effettiva evoluzione tecnologica): un veicolo elettrico è da 3 a 5 volte più efficiente di qualsiasi tecnologia basata sull'utilizzo di combustibili liquidi o gassosi e una pompa di calore è 5-6 volte più efficiente di qualsiasi alternativa basata sulla combustione.

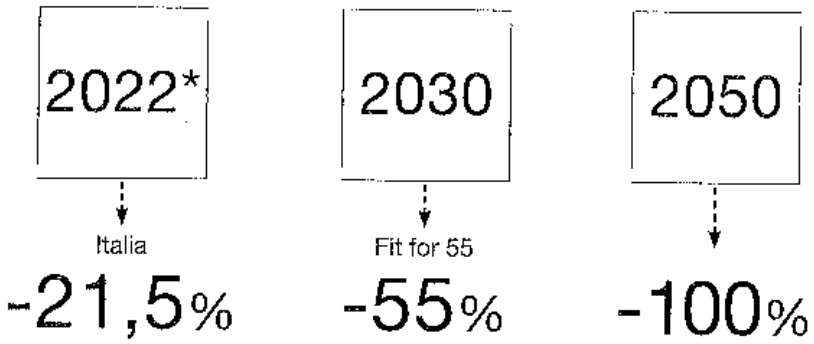
Proposte in ambito europeo e nazionale



A fine 2019 è stato pubblicato il Green Deal Europeo che sancisce l'obiettivo dell'Unione Europea di raggiungere la neutralità climatica entro il 2050 e l'obiettivo intermedio di ridurre le emissioni di gas a effetto serra (GHG) di almeno il 55% entro il 2030 rispetto ai livelli del 1990. Elemento centrale del Green Deal è la Legge Europea sul Clima (Regolamento UE 2021/1119), formalmente adottata dal Consiglio dell'Unione Europea il 28 giugno 2021 ed entrata in vigore il 29 luglio 2021.

Sempre a luglio 2021, la Commissione Europea ha presentato un pacchetto di proposte legislative denominate **Fit for 55 (FF55)**, volte a definire come si intende raggiungere gli obiettivi EU di decarbonizzazione, traguardando una riduzione delle emissioni di gas a effetto serra (GHG) del -55% al 2030 rispetto ai valori del 1990 e la neutralità climatica al 2050.

Tutte le proposte legislative contenute nel pacchetto FF55, con la sola esclusione della direttiva sulla tassazione dell'energia, sono ad oggi state approvate in maniera definitiva. Di particolare rilevanza per il settore energetico sono la Direttiva sulle Energie Rinnovabili (Renewable Energy Directive) entrata in vigore il 20 novembre 2023 e la Direttiva sull'Efficienza Energetica (EU Energy Efficiency Directive) entrata in vigore il 10 ottobre 2023. In particolare, la prima sancisce che la quota di energia da fonti rinnovabili nel consumo finale lordo di energia dell'Unione Europea al 2030 sia almeno pari al 42,5%, mentre la seconda impone una riduzione dei consumi energetici dell'11,7% al 2030[23].

Inoltre, la Commissione Europea ha assegnato le quote di "effort sharing" tra Stati membri dell'UE. Per l'Italia, il target di riduzione delle emissioni del settore residenziale e trasporti (c.d. non-ETS[24]) al 2030 rispetto al 2005 è pari al 43,7%. Per i settori ETS (principalmente industria e termoelettrico) il target resta esclusivamente europeo, lasciando decidere al mercato ETS in quale Paese e in quale misura ridurre le emissioni associate a queste attività.

Riduzione emissioni totale di CO_{2eq} rispetto ai livelli del 1990

** Riduzione effettiva delle emissioni totali (UNFCCC) di tutti gas serra al 2022 (ultimo dato disponibile per l'Italia) vs 1990.*
Fonte: European Environment Agency.

A livello nazionale, al fine di riflettere i nuovi obiettivi definiti in ambito europeo, a luglio 2024, il Ministero dell'Ambiente e della Sicurezza Energetica (MASE) ha pubblicato e trasmesso alla Commissione Europea **il Piano Nazionale Integrato per l'Energia e il Clima (PNIEC)**, che offre un indirizzo fondamentale sulle politiche di sviluppo del Sistema Energetico nazionale. Il PNIEC delinea gli obiettivi nazionali al 2030 riguardanti l'efficienza energetica, l'utilizzo di fonti rinnovabili e la riduzione delle emissioni di CO_2, oltre a quelli relativi alla sicurezza energetica, alle interconnessioni, al mercato unico dell'energia, alla competitività, allo sviluppo e alla sostenibilità della mobilità.

Fattori abilitanti la transizione energetica

La realizzazione delle opere strumentali al raggiungimento degli obiettivi di politica energetica nei tempi preventivati richiede inevitabilmente una forte accelerazione degli investimenti nel settore energetico e ancor di più in quello elettrico. Investimenti che dovranno essere convogliati, in larga misura, a supporto dello sviluppo della nuova capacità FER, degli accumuli e reti di trasmissione e distribuzione, da effettuare attraverso un approccio coordinato così da rendere il sistema più efficiente nel suo complesso.

[23] In base all'articolo 1 della Direttiva UE n. 2023/1791, gli Stati membri garantiscono collettivamente una riduzione del consumo di energia pari almeno all'11,7% nel 2030 rispetto alle proiezioni dello scenario di riferimento UE 2020, così che il consumo di energia finale dell'Unione non superi 763 Mtep.
[24] ETS: Emissions Trading System.

Teleborsa: distribution and commercial use strictly prohibited

La transizione energetica non serve solo per contrastare i cambiamenti climatici e aumentare la sostenibilità ambientale, ma anche per ridurre la dipendenza energetica del Paese dall'estero, limitare le tensioni sui prezzi dell'energia dovute ai costi delle commodity (gas e CO_2), e fare da volano per la crescita economica, la ricerca e l'innovazione tecnologica.

Le azioni necessarie

SVILUPPO DELLA RETE	Rafforzamento della rete e interconnessione con l'estero. Investimenti per compensare la perdita di inerzia, controllo della tensione e interventi per la resilienza.	>	Terna sviluppa l'infrastruttura per abilitare l'integrazione delle FER. Terna gestisce le interlocuzioni con le istituzioni, finalizzate ad accelerare gli iter autorizzativi che ad oggi costituiscono il primo ostacolo agli obiettivi di decarbonizzazione.
MARKET DESIGN	Definire un assetto del mercato che integri in modo ottimale i mercati a termine (aste FER, aste accumulo, CM) e i mercati spot, sia per i mercati dell'energia che per i mercati dei servizi. Ampliamento della partecipazione all'erogazione dei servizi di flessibilità da parte di nuova risorse (RES, EV, DSR).	>	Terna gestisce l'apertura del mercato dei servizi di dispacciamento (MSD) a risorse attualmente non abilitate.
SVILUPPO DELLE FER	Aumentare i ritmi di installazione. Garantire un'adeguata sicurezza degli approvvigionamenti, facendo leva sulla differenziazione tecnologica. Dare priorità amministrativa all'installazione di FER e realizzare campagne di sensibilizzazione più efficaci per migliorare l'accettabilità sociale.	>	Terna indirizza correttamente il mix tecnologico e la localizzazione degli impianti diversificando le fonti di approvvigionamento.
SISTEMI DI ACCUMULO	Realizzazione di nuovi sistemi di accumulo idroelettrico ed elettrochimico per gestire le rampe di *overgeneration* e carico residuo e fornire al sistema servizi di valore.	>	Terna identifica il fabbisogno di nuova capacità di accumulo, tenendo conto della evoluzione attesa degli impianti FER.

Ambito diretto Terna

Fonte: elaborazione Terna

Lo sforzo da compiere è sfidante e prolungato nel tempo. È quindi necessaria una **programmazione coordinata a livello temporale e geografico al fine di indirizzare gli ingenti investimenti degli operatori in modo coerente rispetto a quanto pianificato**. Ad oggi, si stanno già finalizzando gli strumenti per garantire lo sviluppo sia delle FER che della capacità di stoccaggio. Per quanto riguarda le FER, a giugno 2024 è stato siglato il Decreto Ministeriale Aree Idonee, che definisce la ripartizione tra Regioni e Province autonome dell'obiettivo nazionale al 2030 di potenza aggiuntiva da fonti rinnovabili e stabilisce criteri per l'individuazione delle superfici idonee. Inoltre, la bozza di **decreto FER X[25] prevede di finanziare 67,15 GW di nuova capacità FER entro il 2030**, di cui 57,15 GW tramite procedure competitive e 10 GW con accesso diretto all'incentivo per impianti inferiori a 1 MW. In attesa di una sua approvazione definitiva, a dicembre 2024 la Commissione Europea ha approvato il Decreto FER X Transitorio per supportare la realizzazione di 17,65 GW di nuova capacità rinnovabile entro il 31 dicembre 2025[26]. Per quanto concerne gli accumuli, il Ministero dell'Ambiente e della Sicurezza Energetica ha ufficialmente approvato, con D.M. 346 del 10 ottobre 2024, la Disciplina **MACSE** (Meccanismo di Approvvigionamento di Capacità di Stoccaggio Elettrico) che **consentirà al sistema di acquisire nuova capacità di stoccaggio elettrico**. Le aste per l'approvvigionamento di tale capacità saranno svolte da Terna, come disciplinato dal Decreto Legislativo 210/2021. La prima asta è prevista per il 30 settembre 2025, con consegna nel 2028.

Questa trasformazione può rappresentare una grande opportunità per la competitività del Paese: la carenza di risorse energetiche dell'Italia ha comportato storicamente un costo dell'energia superiore alla media europea e una forte dipendenza dall'import energetico. In questo nuovo scenario l'Italia vedrebbe ridotta la propria dipendenza energetica.

Gli investimenti previsti per i prossimi anni determineranno il posizionamento strategico del Paese nel futuro sistema economico globale. L'impegno di Terna all'interno del percorso di decarbonizzazione del sistema italiano si concretizza anche nella promozione di una sempre più **forte condivisione strategica con altri player di settore**, ad esempio attraverso la partecipazione in diversi organismi a livello europeo (es. ENTSO-E) e la collaborazione con altri TSO europei (ad es. l'iniziativa Equigy, nella cui governance figurano oltre Terna i TSO TenneT, TransnetBW, Swissgrid e APG).

Teleborsa: distribution and commercial use strictly prohibited

Fabbisogno e produzione di energia elettrica in Italia nel 2024

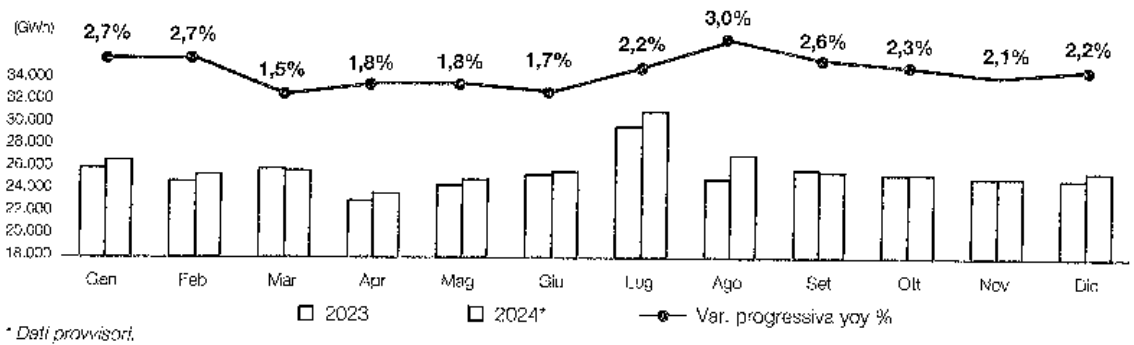
Terna monitora l'andamento del fabbisogno nazionale e adotta azioni conseguenti alla piena attuazione delle direttive comunitarie.

Andamento fabbisogno degli ultimi 10 anni

(GWh)

** Dati provvisori.*

Domanda di energia elettrica in Italia



Nel 2024 la richiesta di energia elettrica in Italia è stata pari a 312.285 GWh (dati provvisori), con un **aumento del 2,2% rispetto al 2023**, che si era chiuso con una riduzione (-2,8%) rispetto all'anno precedente.

BILANCIO DELL'ENERGIA ELETTRICA IN ITALIA (GWh)*	2024**	2023	Δ	Δ %
Produzione netta	263.500	256.562	6.938	2,7%
Prevenuta da fornitori esteri	55.904	54.568	1.336	2,4%
Ceduta a clienti esteri	(4.905)	(3.317)	(1.588)	47,9%
Destinata ai pompaggi***	(2.073)	(2.186)	113	(5,2%)
Assorbimento accumuli standalone****	(141)	(12)	(129)	1.075%
Richiesta totale Italia	**312.285**	**305.615**	**6.670**	**2,2%**

* *Non include il fabbisogno di energia elettrica connessa ai servizi ausiliari all'attività di produzione elettrica.*
** *Dati provvisori.*
*** *Energia elettrica impiegata per il sollevamento di acqua a mezzo pompe, allo scopo di essere utilizzata successivamente per la produzione di energia elettrica o per bilanciare in modo immediato una produzione eccessiva.*
**** *Energia elettrica assorbita dagli accumuli standalone (sistemi di accumulo elettrochimici non integrati a impianti di produzione) allo scopo di essere utilizzata, successivamente, per la produzione di energia elettrica o per bilanciare in modo immediato una produzione eccessiva. Tale attività è stata inclusa nel dato del fabbisogno totale a partire dal 2024 e il dato 2023 è stato pertanto rideterminato.*

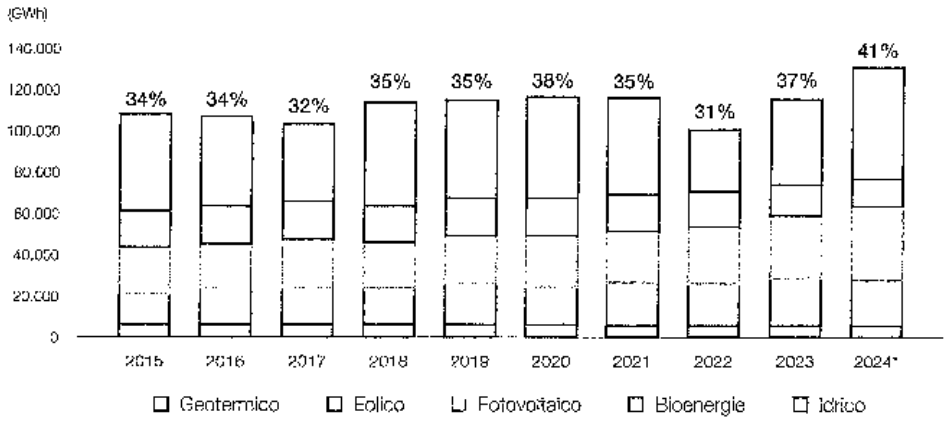
L'incremento del fabbisogno di energia elettrica è il risultato di variazioni positive in quasi tutto il corso dell'anno rispetto all'anno precedente, in particolare nei mesi di luglio e agosto, caratterizzati da temperature superiori alla media decennale.

Fabbisogno mensile di energia elettrica

** Dati provvisori.*

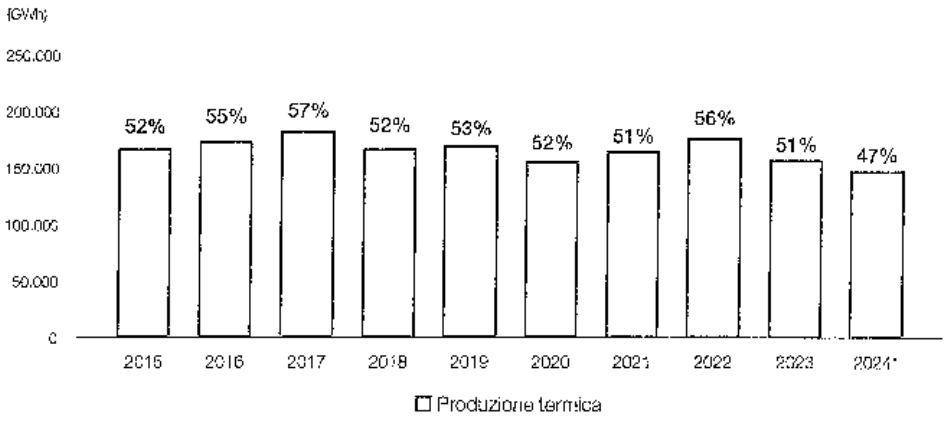
Teleborsa: distribution and commercial use strictly prohibited

Copertura del fabbisogno e produzione di energia



Nel 2024 (dati provvisori) circa il **41,2% del fabbisogno totale di energia è stato coperto da fonti rinnovabili.** Il valore della produzione da fonti rinnovabili è aumentato (+13,4%) rispetto all'anno precedente.

Relativamente all'andamento delle singole fonti rinnovabili è aumentata la produzione da fonte idrica (+30,4%) e da fonte fotovoltaica (+19,3%) mentre si registra una riduzione delle bioenergie (-9,5%), dell'eolico (-5,6%).



In questo contesto, con uno scenario europeo proiettato alla decarbonizzazione e a una forte penetrazione delle energie rinnovabili, le reti in alta tensione rappresentano un fattore abilitante della crescita della generazione rinnovabile. La robustezza dell'infrastruttura di rete e le azioni di gestione del sistema intraprese da Terna hanno permesso di accogliere in sicurezza di produzione intermittente, pari a 36,1TWh da fonte fotovoltaica e 22,1TWh da fonte eolica.

Andamento delle fonti di produzione in rapporto al fabbisogno[27]

Fonti rinnovabili

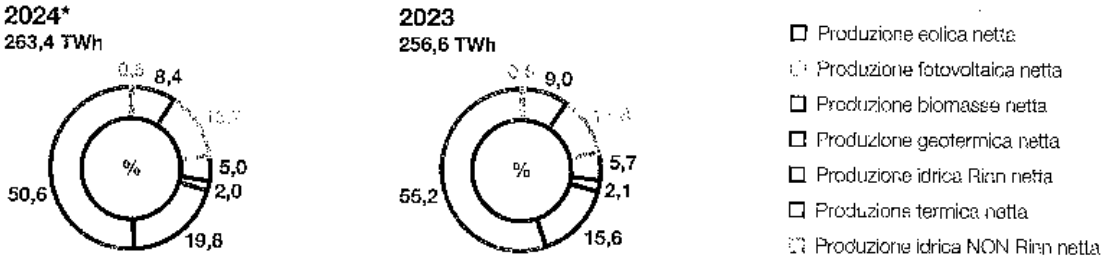
Fonti tradizionali

Nei due grafici a fianco è evidenziato l'andamento della produzione rinnovabile in Italia negli ultimi anni con confronto, nello stesso arco temporale, dell'andamento della produzione termica.

* *Dati provvisori.*

[27] Le percentuali indicate nei due grafici posti a raffronto si riferiscono alla quota di fabbisogno coperto da fonte rinnovabile e da fonte termica (fonte tradizionale).

Teleborsa: distribution and commercial use strictly prohibited



Numero di ore nell'anno* in cui la copertura del fabbisogno da fonti rinnovabili supera le soglie

	>30%	>40%	>50%
2022	3.948	1.433	421
2023	6.021	3.287	1.392
2024**	**6.920**	**4.193**	**2.131**

* *Un anno ordinario è composto da 8.760 ore, mentre un anno bisestile (2024) è composto da 8.784 ore.*
** *Dati provvisori.*

Nel 2024 si evidenzia un aumento dei valori numero di ore nelle quali la copertura del fabbisogno da fonti energetiche rinnovabili supera le soglie del 30%, 40% e 50% rispetto ai valori precedenti all'anno 2023.

Produzione netta di energia elettrica per tipo di fonte

* *Dati provvisori.*

La **produzione di energia elettrica** nel 2024 registra un aumento del 2,7% rispetto al 2023, imputabile prevalentemente alle fonti rinnovabili. Si segnala che nell'anno la produzione da fonti rinnovabili (+13,4% rispetto al 2023) ha sostanzialmente raggiunto la produzione da fonti fossili (in contrazione del 5,9%).

Regolatorio

Terna opera in un regime di monopolio naturale e all'interno di un mercato regolato dall'**Autorità di Regolazione per Energia, Reti e Ambiente (ARERA)**, che determina i ricavi regolati relativi alle attività di trasmissione e dispacciamento, che ad oggi rappresentano circa l'84,1% dei ricavi totali del Gruppo.

Con Delibera n. 615/2023/R/eel ARERA ha definito i criteri di regolazione tariffaria per il servizio di trasmissione e dispacciamento per il VI periodo di regolazione (2024-2027) con cui trovano applicazione i nuovi principi della Regolazione per Obiettivi di Spesa e di Servizio (cosiddetta ROSS) validi per il periodo 2024-2031 e introdotti con Delibere n. 163/2023/R/com e n. 497/2023/R/com, che prefigurano a tendere il graduale passaggio a logiche di riconoscimento dei costi in funzione della spesa complessiva sostenuta (costi di esercizio/operativi e costi di investimento) e a un maggior focus sugli output conseguiti e sui livelli di servizio reso.

Per il VI periodo è prevista una sostanziale conferma dei principi di riconoscimento dei costi di capitale (*rate of return*) e operativi (*price cap e profit sharing*) già in vigore nel quadriennio 2020-2023. Le modifiche più significative riguardano:

- il trattamento delle immobilizzazioni in corso per cui è stato disposto, in discontinuità con il precedente periodo, la rivalutazione ai fini del calcolo della relativa remunerazione secondo tassi di remunerazione costanti e non più differenziati in funzione dell'anzianità della spesa (pari al WACC calcolato con rapporto D/E pari a 4) con un'estensione del periodo di remunerazione da 4 a 6 anni per i grandi progetti (interventi con spese di investimenti superiori a 1 miliardo di euro e tempo di costruzione stimato ex ante superiore a quattro anni);
- l'introduzione del fattore correttivo (*z-factor*) per il riconoscimento in corso di periodo regolatorio di costi operativi incrementali legati agli investimenti connessi alla transizione energetica o a variazioni del perimetro di attività svolte per l'erogazione dei servizi regolati;

495

Teleborsa: distribution and commercial use strictly prohibited

- il riconoscimento, a partire dagli investimenti che entreranno in esercizio nel 2024 e con effetto dal 2025, della quota di ammortamento già l'anno successivo l'entrata in esercizio, con un anticipo di un anno rispetto alle attuali tempistiche;
- la ripartizione convenzionale della spesa totale (costi operativi e costi di investimento) sostenuta a partire dal 2024 nelle componenti *slow money* (a incremento del capitale investito netto regolatorio) e *fast money* (immediatamente riconosciuta in tariffa) tramite l'applicazione di un tasso convenzionale - cosiddetto tasso di capitalizzazione - determinato ex-ante da ARERA sulla base di dati storici e valutazioni prospettiche nell'ottica di garantire la finanziabilità del piano di investimenti;
- l'introduzione di appositi meccanismi di correzione dei ricavi effettivi rispetto al livello ammesso ex-ante (c.d. *tariff decoupling*) finalizzati alla gestione a conguaglio delle nuove voci di riconoscimento costi (quali, ad esempio, slow e fast money) legato ai consuntivi di spesa;
- riduzione del *delay* temporale di aggiornamento dei parametri inflattivi con cui sono rivalutati i costi operativi riconosciuti (FOI - indice nazionale dei prezzi al consumo per le famiglie di operai e impiegati, al netto dei tabacchi) e i costi di capitale (dato ISTAT sulla variazione del deflatore degli investimenti fissi lordi) con correzione positiva una tantum per recuperare variazioni pregresse del deflatore degli investimenti fissi lordi segnalate da ISTAT.

Con la Delibera n. 614/2021/R/com, l'ARERA ha definito le modalità valide per il periodo 2022-2027 di determinazione e aggiornamento del tasso di remunerazione del capitale investito riconosciuto, denominato **Weighted Average Cost of Capital (WACC)** per i diversi servizi infrastrutturali regolati dei settori elettrico e gas, fissando per il servizio di trasmissione un WACC pari al 5,0% per il 2022; con tale Delibera l'ARERA ha confermato l'adozione di un meccanismo di aggiornamento dei principali parametri macro-economici al termine del primo triennio (2022-2024) e ha inoltre previsto la possibilità di un ulteriore aggiornamento annuale – cosiddetto meccanismo *trigger* – qualora la variazione registrata nei principali parametri di mercato utilizzati nella formula di calcolo generino una variazione del WACC almeno pari a 50 bps. Con la Delibera n. 654/2022/R/com l'ARERA ha confermato per il 2023 il valore del WACC dei servizi infrastrutturali elettrico e gas in vigore nel 2022 mentre, con Delibera n. 556/2023/R/com, ha previsto l'aggiornamento del WACC per il 2024 per il servizio di Trasmissione a un valore pari a 5,8%, in virtù dell'attivazione del meccanismo *trigger*.
Con Delibera n. 513/2024/R/com l'ARERA, infine, ha aggiornato il WACC riconosciuto per i servizi infrastrutturali elettrico e gas per il secondo triennio 2025-2027, fissando per il servizio di Trasmissione un valore del WACC pari a 5,5% e ha confermato l'applicazione del meccanismo trigger anche per il nuovo triennio, riducendo la soglia di attivazione da 50 bps a 30 bps.

Si riportano di seguito alcuni elementi caratterizzanti la regolazione nel VI periodo regolatorio, con riferimento alla remunerazione dei servizi di trasmissione e di dispacciamento.

I ricavi di trasmissione rappresentano la porzione più significativa dei ricavi regolati

I **ricavi di trasmissione** rappresentano la porzione più significativa dei ricavi regolati e derivano dall'applicazione del corrispettivo di trasmissione **(CTR)**, fatturato da Terna ai distributori connessi alla Rete di Trasmissione Nazionale. Tale corrispettivo remunera l'attività di trasmissione, e presenta un'articolazione binomia: componente in potenza (pari al 93% dei ricavi, espressa in cent.€/kW/anno) e componente in energia (pari al 7% dei ricavi, espressa in cent.€/kWh).

Il **corrispettivo per il servizio di dispacciamento (DIS)** è finalizzato a remunerare Terna per le attività connesse al servizio di dispacciamento ed è fatturato da Terna agli utenti del dispacciamento in prelievo in proporzione alle rispettive quantità di energia dispacciata.

I costi riconosciuti possono essere ricondotti alle principali categorie sintetizzate di seguito.

Teleborsa: distribution and commercial use strictly prohibited

Le principali voci di costo riconosciuto e i principali meccanismi di incentivazione output-based

1. Remunerazione del capitale (RAB)	Prodotto tra la *Regulated Asset Base* (RAB) e il *Weighted Average Cost of Capital* (WACC). La RAB rappresenta il capitale investito netto regolatorio, è rivalutata annualmente in base al dato ISTAT sulla variazione del deflatore degli investimenti fissi lordi ed è aggiornata sulla base della dinamica di investimenti e dismissioni. Il WACC rappresenta il costo medio ponderato del capitale di rischio e del capitale di debito. Le modalità di determinazione e aggiornamento del WACC sono stabilite con apposita delibera da parte dell'Autorità.
2. Ammortamenti	Gli ammortamenti riconosciuti (funzione della vita utile regolatoria degli asset) sono rivalutati annualmente in base alla variazione del deflatore degli investimenti fissi lordi.
3. Costi operativi	I costi operativi riconosciuti sono determinati dall'Autorità all'inizio di ciascun periodo regolatorio, sulla base dei costi operativi rilevati nell'anno di riferimento, eventualmente adeguati sulla base dei correttivi *z-factor* (per la copertura di costi legati alla realizzazione di nuovi investimenti per la transizione energetica o variazioni del perimetro di attività) e *y-factor* (per la copertura di costi derivanti da eventi imprevedibili ed eccezionali e da mutamenti del quadro normativo). I costi riconosciuti sono rivalutati annualmente sulla base dell'inflazione (FOI - indice nazionale dei prezzi al consumo per le famiglie di operai e impiegati, al netto dei tabacchi) e decurtati di un fattore percentuale volto a trasferire agli utenti finali parte delle extra-efficienze realizzate anche durante il precedente periodo regolatorio.
4. Incentivazione output based	Oltre alle voci sopra indicate, parte della remunerazione dei servizi di trasmissione e dispacciamento deriva da meccanismi incentivanti ed è legata al raggiungimento di specifici obiettivi, come di seguito riportati: • sistema di incentivazione per la realizzazione di interventi finalizzati all'aumento della capacità di trasporto interzonale: prevede premi proporzionali al rapporto tra la capacità realizzata e una capacità target, con l'aggiunta di premi addizionali in caso di realizzazione di capacità con soluzioni efficienti anche di tipo *capital light*. Tale meccanismo, inizialmente previsto per il quinquennio 2019-2023 (Delibera n. 567/2019/R/eel) è stato prorogato sino al 2024 con Delibera n. 55/2024/R/eel che ha innalzato il *cap* a 180 milioni di euro rispetto ai 150 milioni previgenti. È confermata la clausola di possibile riduzione nei casi in cui il rapporto tra la capacità di trasporto media resa disponibile per il mercato del giorno prima e la capacità di trasporto *winter peak* sia significativamente inferiore rispetto ai valori storici di tale rapporto, in uno o più dei tre anni successivi alla messa in esercizio dell'investimento che ha reso disponibile capacità di trasporto addizionale. La Delibera n. 55/2024/R/eel prevede inoltre, un aggiornamento per il periodo 2025-2027 dei principali parametri di determinazione dell'incentivo per la realizzazione di capacità incrementale stabilendo il valore massimo del premio a 90 milioni di euro. Con riferimento ai premi legati all'efficienza degli interventi per la realizzazione della nuova capacità, il provvedimento ARERA ha esteso per il biennio 2024-2025 l'attuale meccanismo di incentivazione fissando un *cap* pari a 60 milioni di euro. A integrazione del premio di 143,6 milioni di euro riconosciuto da ARERA con Delibera n. 23/2022/R/eel per la capacità incrementale realizzata nel 2020 e del premio riconosciuto con la Delibera n. 473/2023/R/eel pari a 36,5 milioni di euro per interventi messi in esercizio nel 2022, la Delibera n. 445/2024/R/eel ha riconosciuto a Terna un ulteriore premio, complessivamente pari a 21,6 milioni di euro, per gli interventi realizzati nel 2023. Tale premio, pagato da CSEA a novembre 2024 a valere sul conto "Qualità dei servizi elettrici", è riferito per 14,4 milioni di euro alla realizzazione di capacità addizionale di trasporto interzonale e per 7,2 milioni di euro all'efficienza nei costi di investimento degli stessi interventi;

Teleborsa: distribution and commercial use strictly prohibited

- meccanismo di incentivazione, di durata triennale (2022-2024), finalizzato all'efficientamento dell'attività di dispacciamento e, conseguentemente, alla riduzione dei costi del MSD, della mancata produzione eolica e dell'essenzialità (Delibera n. 597/2021/R/eel e Delibera n. 132/2022/R/eel). L'incentivo è calcolato annualmente in funzione della performance di Terna, valutata confrontando i costi di dispacciamento effettivi dell'anno incentivato con i costi dell'anno di riferimento, opportunamente aggiustato per tenere conto della variazione dei prezzi delle commodity e degli altri fattori correttivi (in un'ottica triennale il premio riconosciuto a Terna è pari al 12% del risparmio complessivamente realizzato nei tre anni). I premi (penalità), definiti su base annuale, sono posti a valere sul corrispettivo Uplift di cui all'articolo 44 dell'Allegato A alla deliberazione 111/06 ed erogati a partire dal 2024 secondo le modalità definite nella Delibera n. 132/2022. In aggiunta al premio di 795,6 milioni di euro riconosciuto con Delibera n. 367/2023/R/eel (da recuperare tramite il corrispettivo Uplift, in quote uguali in tre anni e su base trimestrale a partire dal 2024) per le attività svolte nel corso del 2022 ai fini della riduzione dei costi di dispacciamento, con Delibera n. 327/2024/R/eel l'ARERA ha riconosciuto a Terna un ulteriore premio pari a 117,7 milioni di euro per le attività svolte nel corso del 2023 da recuperare tramite il corrispettivo Uplift, in quote uguali in due anni e su base trimestrale a partire dal 2025. Con Delibera n. 326/2024/R/eel l'ARERA ha confermato tale meccanismo anche per i trienni 2025-2027 e 2028-2030 prevedendo, per ciascun anno del periodo 2025-2030, il riconoscimento a Terna di un premio annuale pari al 12% della riduzione dei costi del MSD rispetto alla spesa sostenuta nell'anno di riferimento del relativo triennio ovvero il pagamento di una penale del 6% in caso di aumento dei costi rispetto al medesimo riferimento;
- miglioramento della qualità del servizio nel periodo 2016-2023 tramite un meccanismo incentivante basato su premi/penalità calcolati rispetto alla differenza tra il livello effettivo annuale dell'energia non fornita sulla RTN (cosiddetto indicatore ENSR-RTN) e il livello obiettivo fissato da ARERA, con un premio annuale massimo pari a 30 milioni di euro a fronte di una penalità massima pari a 12 milioni di euro (Delibera n. 653/2015/R/eel); la Delibera n. 55/2024/R/eel ha prorogato l'attuale meccanismo per il 2024-2025 con alcune modifiche che prevedono un premio annuale massimo pari a 20 milioni di euro e una penalità massima pari a 8 milioni di euro e una riduzione del parametro per la valorizzazione premi/penali. Con riferimento all'anno 2023, con Delibera n. 444/2024/R/eel l'ARERA ha stabilito per Terna un premio pari a 15,3 milioni di euro, riconosciuto dalla CSEA alla fine di novembre 2024, a valere sul conto "Qualità dei servizi elettrici".

Teleborsa: distribution and commercial use strictly prohibited

Gli scenari di Terna

A livello nazionale, a luglio 2024, il Ministero dell'Ambiente e della Sicurezza Energetica (MASE) ha pubblicato il Piano Nazionale Integrato per l'Energia e il Clima (PNIEC), che traduce gli obiettivi al 2030 del pacchetto legislativo europeo Fit for 55 nel contesto italiano. Il PNIEC svolge un ruolo cruciale nel delineare possibili traiettorie di sviluppo del sistema energetico nazionale, fornendo una base strategica per pianificare investimenti e infrastrutture necessari alla transizione energetica.

Terna insieme a Snam, il gestore della rete di trasporto gas, elabora ogni due anni il **Documento di Descrizione degli Scenari**[25] (DDS), con l'obiettivo di declinare gli scenari energetici nazionali di medio e lungo termine. Tale documento è propedeutico ai piani di sviluppo delle reti di entrambi i settori. La collaborazione fra Terna e Snam nella stesura del DDS permette di mettere a fattor comune le competenze specifiche dei due operatori, nella consapevolezza che l'interazione tra gli scenari nei settori dell'energia elettrica e del gas costituisce, sia a livello nazionale che comunitario, un elemento caratterizzato da notevoli complessità.

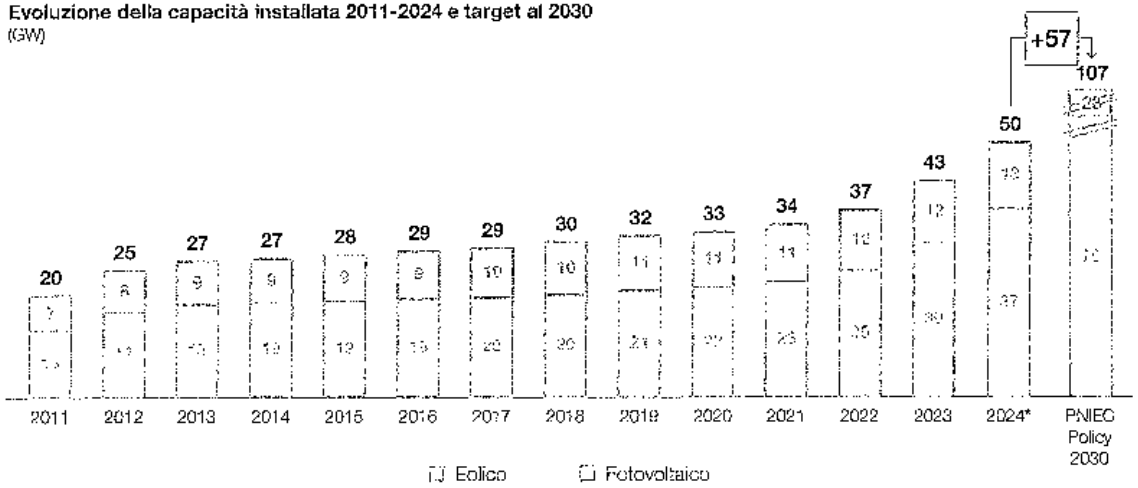
L'ultimo DDS, pubblicato il primo ottobre 2024, costituisce il fondamento per la definizione del Piano di Sviluppo 2025 di Terna e risulta allineato con lo scenario di policy presente all'interno del PNIEC.

Coerentemente con le indicazioni di ARERA, con gli scenari del PNIEC e degli ENTSOs[26], Terna e Snam hanno sviluppato:

- Scenari che raggiungono i target di policy:
  - al 2030 uno scenario PNIEC Policy (coerente con il PNIEC 2024);
  - per il 2035 e 2040 due scenari, *Global Ambition* Italia (GA-IT) e *Distributed Energy* Italia (DE-IT), in linea con quelli elaborati a livello europeo dagli ENTSOs.
- Scenari contrastanti (elaborati al fine di valutare l'impatto delle infrastrutture pianificate su scenari differenti come richiesto dalla regolazione vigente):
  - al 2030, 2035 e 2040 uno scenario PNIEC Slow, rappresentativo di una transizione più lenta (rispetto agli scenari di policy) verso i target di decarbonizzazione.

Gli scenari GA-IT e DE-IT sono da considerarsi scenari di sviluppo, entrambi allineati alle *storyline* degli scenari predisposti dagli ENTSOs *Global Ambition* e *Distributed Energy*, che proiettano percorsi alternativi coerenti con l'obiettivo di raggiungere un sistema Net Zero al 2050.

Lo scenario PNIEC policy riveste un ruolo particolare, non solo perché traguarda gli obiettivi di policy al 2030, ma soprattutto perché ipotizza un mix efficiente di investimenti in infrastrutture di rete, fonti rinnovabili, accumuli e nuove tecnologie digitali compatibili con i principali vincoli tecnici, economici e amministrativi che altrimenti ne potrebbero impedire la realizzabilità in tempi così stretti. In particolare, lo scenario individua la necessità di:



- **sviluppare 107 GW di nuova capacità eolica e solare al 2030**, rispetto ai 50 GW installati al 2024; tale capacità permetterà di traguardare il **63% di penetrazione della quota FER** nel fabbisogno di energia elettrica al 2030, in linea con quanto previsto nel PNIEC 2024;
- realizzare **quasi +50 GWh di nuovi accumuli utility-scale al 2030**, oltre a sviluppare un'adeguate capacità di trasporto, al fine di garantire la piena integrazione dell'energia elettrica prodotta da fonti rinnovabili all'interno del sistema elettrico italiano.

[25] Documento disponibile al seguente link: https://www.terna.it/it/sistema-elettrico/rete/piano-sviluppo-rete/scenari.
[26] Gli ENTSOs (European Network of Transmission System Operators) sono le organizzazioni che raggruppano gli operatori dei sistemi di trasmissione dell'energia in Europa, rispettivamente per l'elettricità (ENTSO-E) e per il gas (ENTSO-G).

Teleborsa: distribution and commercial use strictly prohibited

In tale contesto, Terna è coinvolta su più fronti all'interno del processo della transizione energetica, in primo luogo sullo sviluppo della rete elettrica (l'Aggiornamento del Piano Industriale 2024-2028 di Terna approvato a marzo 2025 prevede investimenti complessivi pari a 17,7 miliardi di euro, per accelerare l'impegno a servizio del Paese per la transizione energetica, l'indipendenza energetica e la decarbonizzazione). Inoltre, Terna ha anche redatto il **MACSE** (Meccanismo di Approvvigionamento di Capacità di Stoccaggio Elettrico), **lo strumento finanziario che consentirà al sistema di acquisire nuova capacità di stoccaggio elettrico**, garantendo quindi l'integrazione di quote di energia rinnovabile sempre più importanti all'interno del sistema elettrico. Sia la rete che gli accumuli saranno fondamentali non soltanto per il raggiungimento dei target di decarbonizzazione, ma anche per il miglioramento della sicurezza degli approvvigionamenti.

Evoluzione della capacità installata 2011-2024 e target al 2030
(GW)

** Dati provvisori. Fonte: dati Terna*

Si segnala che, a seguito della pubblicazione dei nuovi scenari Terna-Snam nel 2024, il nome dello scenario di riferimento per il 2030 è stato cambiato da FF55 a PNIEC Policy.

Parallelamente, dal punto di vista del disegno dei mercati, è necessario proseguire con decisione nel percorso, già avviato dal nostro Paese, di affiancare progressivamente ai mercati spot gli strumenti di mercato basati su contratti a termine. In particolare, i Contratti per Differenza (CfD), previsti dal decreto FER-X per promuovere la realizzazione di nuovi impianti rinnovabili, consentiranno di coprire il rischio commerciale della commodity gas, che negli ultimi tre anni ha inciso significativamente sulle bollette delle famiglie e imprese.

Teleborsa: distribution and commercial use strictly prohibited

Il Piano di Sviluppo 2025

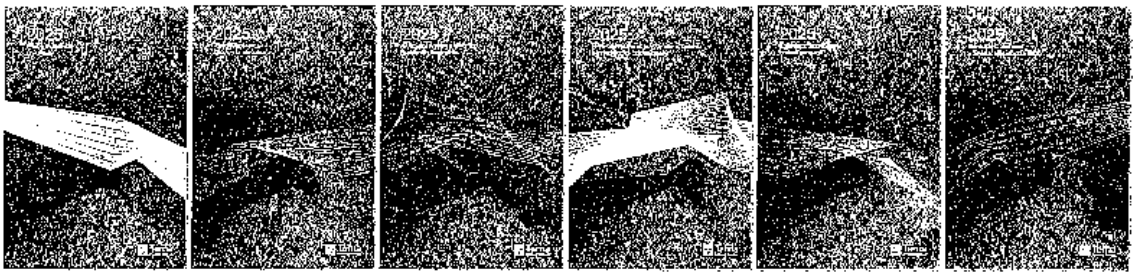
Il Piano di Sviluppo 2025 è stato trasmesso al Ministero dell'Ambiente e della Sicurezza Energetica (MASE) il 27 gennaio 2025, conseguentemente all'approvazione del Consiglio di Amministrazione di Terna il 21 gennaio, in linea con quanto previsto dal decreto legislativo 93/11, modificato dalla Legge 120/2020[35].

Il nuovo Piano 2025, successivo alla precedente edizione 2023, per il quale l'Autorità di Regolazione per Energia Reti e Ambienti (ARERA) si è espressa favorevolmente con il parere 4/2025/I/eel del 14 gennaio 2025, consolida il ruolo di Terna al servizio del Paese per un **futuro decarbonizzato e sostenibile.**

Terna riveste infatti un ruolo centrale nel processo di transizione energetica, sia come abilitatore di un sistema basato sempre più sulle fonti rinnovabili, sia come leader strategico di questo grande processo. Per raggiungere l'obiettivo globale di decarbonizzazione, infatti, la rete elettrica è il principale fattore abilitante, a cui si aggiungono anche una serie di temi fondamentali, legati proprio alla complessità del contesto attuale.

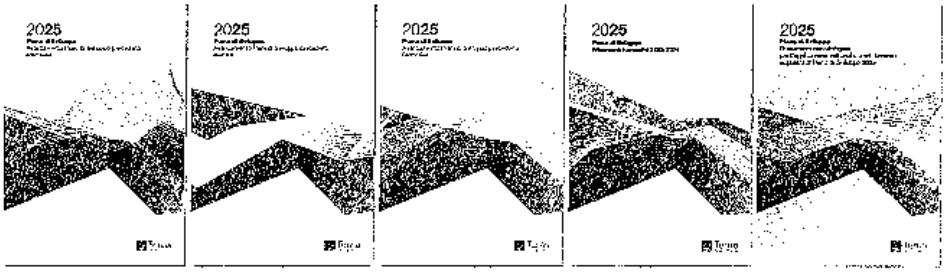
A tale fine sono pianificati interventi essenziali per il **perseguimento degli obiettivi nazionali ed europei di transizione energetica, indipendenza, resilienza ed efficienza del sistema elettrico**, in continuità con la precedente edizione del Piano 2023.

Il Piano è coerente con il **PNIEC 2024**, con gli scenari aggiornati Terna-Snam (**Documento di Descrizione degli Scenari 2024**) e con gli obiettivi di decarbonizzazione, che impongono nuove sfide al settore elettrico in coerenza con la previsione dell'andamento del fabbisogno energetico e della domanda da soddisfare.



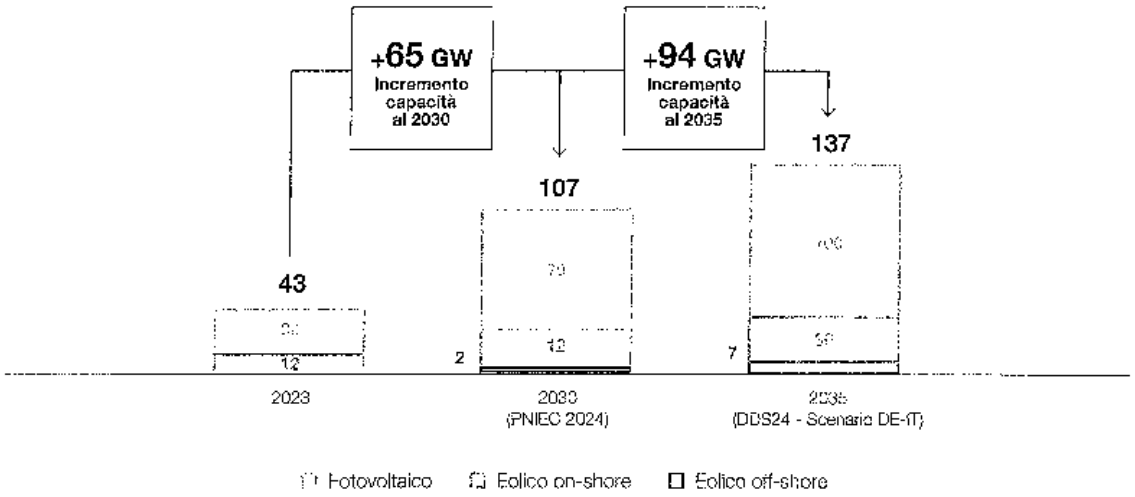
Si prevede un incremento della capacità installata solare ed eolica di oltre **65 GW** al 2030, rispetto l'installato al 2023, e di oltre **94 GW** al 2035.

Considerato il complesso e sfidante contesto elettrico, sono state pianificate le opere più utili e urgenti secondo una priorità elettrica, ricercando al tempo stesso soluzioni innovative a bassa intensità di capitale, per ridurre i costi e massimizzare l'efficacia degli investimenti.



[35] L'art. 36 c.12 del decreto legislativo 93/11, come modificato dalla legge 120/2020, stabilisce che Terna debba predisporre ogni due anni un Piano di Sviluppo decennale della rete di trasmissione nazionale, sottoponendolo all'approvazione del Ministero per l'Ambiente e la Sicurezza Energetica (MASE), una volta acquisiti i pareri delle regioni interessate e tenuto conto delle valutazioni formulate dall'Autorità di regolazione per energia reti e ambiente (ARERA).

Teleborsa: distribution and commercial use strictly prohibited



Fascicoli del Piano di Sviluppo 2025

Allegati al Piano di Sviluppo 2025

Il Piano di Sviluppo 2025 prevede un **programma di investimenti di oltre 23 miliardi di euro nell'orizzonte decennale 2025-2034** (+10% rispetto al precedente Piano decennale), con valore complessivo, oltre l'orizzonte decennale, fino a circa 40 miliardi di euro, con l'intento di abilitare la transizione energetica e traguardare gli obiettivi in materia ambientale delineati dalle normative comunitarie sia nel medio che nel lungo termine.

Teleborsa: distribution and commercial use strictly prohibited

Obiettivi e strategia di sviluppo

Alla luce delle sfide che caratterizzeranno il sistema elettrico in ragione dei trend di evoluzione attesi negli scenari energetici previsionali e dei cambiamenti climatici in atto, nell'ambito della pianificazione dello sviluppo della rete di trasmissione è necessario soddisfare i seguenti **obiettivi del sistema elettrico**:

INTEGRARE le FER ACCUMULI, CP e UTENTI DI CONSUMO

Nuovi interventi di sviluppo abilitanti e funzionali all'**integrazione di nuova capacità rinnovabile e degli utenti di consumo**

INCREMENTARE LA CAPACITÀ DI TRASPORTO e RISOLVERE LE CONGESTIONI DEL SISTEMA

Incremento della capacità di trasporto tra zone di mercato passando dagli **attuali 16 GW a oltre 35 GW**

SVILUPPARE le INTERCONNESSIONI CON L'ESTERO

In continuità con i precedenti piani l'obiettivo è garantire una **maggiore sicurezza**, attraverso la possibilità di mutuo soccorso tra sistemi interconnessi

MIGLIORARE i livelli di QUALITÀ e RESILIENZA DEL SISTEMA ELETTRICO, al fine di garantire la **COSTANTE COPERTURA DELLA DOMANDA ELETTRICA**, nonché la **CONTINUITÀ DEL SERVIZIO**

Attività legate al potenziamento della rete ma anche alla realizzazione di nuove vie di alimentazione

GARANTIRE LA ROBUSTEZZA DELLA RETE e SMORZARE LE OSCILLAZIONI INTERSISTEMICHE A BASSA FREQUENZA

Interventi per un **sistema elettrico sempre più stabile**, in grado di mantenere o controllare la forma d'onda di tensione a seguito di un guasto o disturbo

Di seguito le **principali numeriche del Piano di Sviluppo 2025** e i **benefici attesi** dal raggiungimento di tali obiettivi:

PIANO INVESTIMENTI
per oltre 23 miliardi di euro
nel decennio 2025-2034 e oltre 40 miliardi di euro considerando il valore a vita intera degli interventi
(+ 10% vs PdS 23)

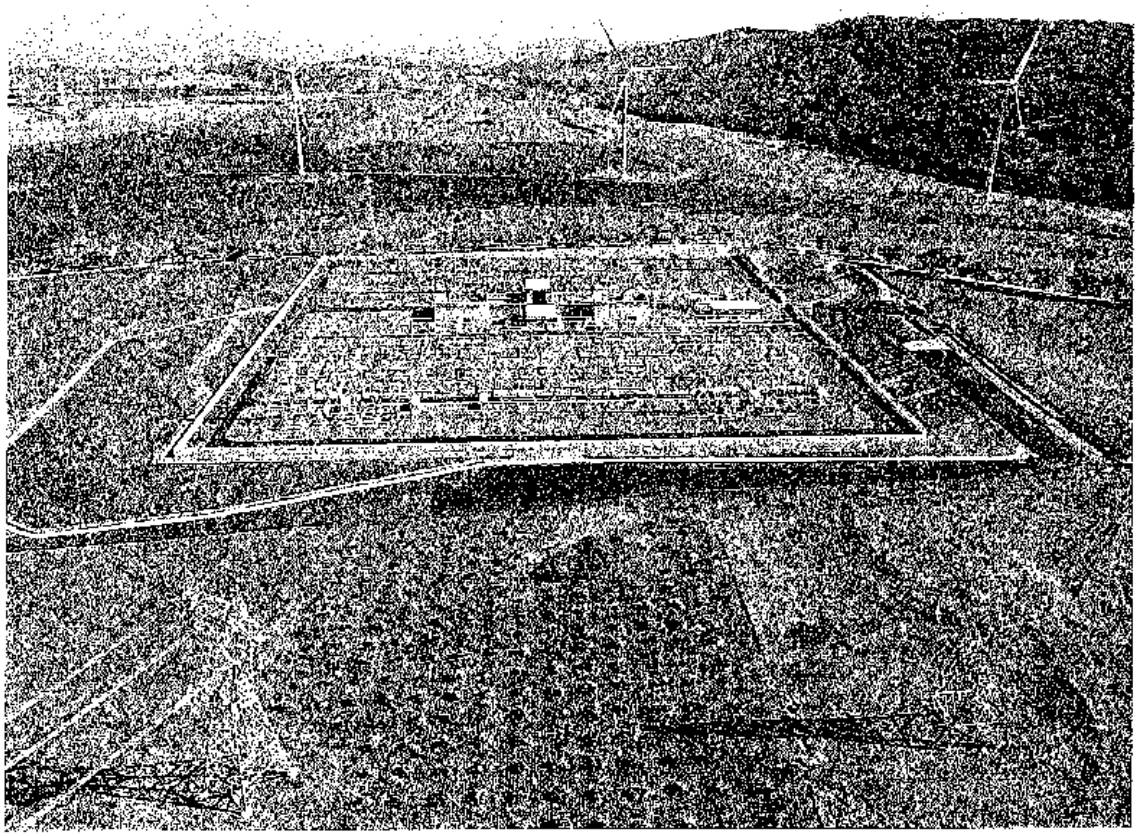
MAGGIORE INTEGRAZIONE FER
almeno +65 GW al 2030
+84 GW al 2035[1]
(in linea con il PNIEC e il DDS 24)

RIDUZIONE EMISSIONI CO_2
fino a circa **2.000 kt/anno** entro il **2030**
e quasi **12.100 kt/anno** entro il **2040**
(+2,5% vs PdS 23)

INCREMENTO DELLA CAPACITÀ DI TRASPORTO
passando dagli attuali >6 GW a circa **39 GW**
(+22% vs PdS 23)

INCREMENTO DELLA CAPACITÀ DI TRASPORTO CON L'ESTERO
di circa il **40%** rispetto ai valori attuali[2]

PERDITE EVITATE
di circa
0,4 - 1 TWh/anno



[1] *Di cui +43 GW da connettere su rete AT.*
[2] *Considerando tutte le opere incluse nel Piano di Sviluppo anche oltre l'orizzonte decennale.*

Necessità del Sistema e principali interventi pianificati

Il Piano di Sviluppo 2025 risponde alle esigenze del Paese in termini di infrastrutture, cercando di definire le priorità di sviluppo, ovvero quegli **interventi che offrono il massimo valore per il sistema**, facilitando gli **investimenti necessari per la transizione energetica**. Gli investimenti previsti dal Piano di Sviluppo 2025, abilitanti al raggiungimento dei benefici per il sistema, sono raggruppati nelle principali categorie di intervento: Connessioni NON FER, Connessioni FER, Grandi Progetti HVDC e Hypergrid, Interconnessioni, Interventi AAT.

SD3

Teleborsa: distribution and commercial use strictly prohibited

Tali interventi rispondono a quattro finalità principali:

- **Sviluppare infrastrutture abilitanti e innovative**, funzionali al raggiungimento della capacità obiettivo efficiente, per aumentare i limiti di transito tra le sezioni di mercato e massimizzare lo scambio di energia;
- **Risolvere le congestioni locali**, garantendo l'esercizio in sicurezza all'interno delle zone di mercato, tramite la pianificazione di interventi infrazonali;
- **Garantire la sicurezza dei sistemi elettrici e l'integrazione dei mercati tramite le interconnessioni,** che consentono una gestione flessibile e bilanciata delle risorse energetiche, favorendo gli scambi tra le reti nazionali;
- **Gestire le ingenti richieste di connessione rinnovabili attraverso soluzioni innovative**, quale la definizione di un nuovo modello – la **Programmazione Territoriale Efficiente** - con lo scopo di assicurare efficienza nella realizzazione delle opere di rete abilitanti l'integrazione delle nuove risorse.

Relativamente all'ultima necessità sopra illustrata, la gestione di un ingente quantitativo di richieste di connessione, aumentate sempre di più negli ultimi anni, ha causato congestioni amministrative e difficoltà autorizzative, oltre che costi infrastrutturali più elevati per via della potenziale ridondanza di opere di rete. L'ampiezza del fenomeno richiede di considerare nuove variabili nella gestione della rete, in considerazione dell'obbligo normativo in capo a Terna di connettere alla Rete di Trasmissione Nazionale (RTN) tutti i soggetti che ne facciano richiesta.

Per tale motivo è stato introdotto il nuovo modello già citato di **Programmazione Territoriale Efficiente**, adottato da Terna per assicurare efficienza nella realizzazione delle opere abilitanti la connessione delle nuove risorse, minimizzando i costi per il sistema e l'impatto delle infrastrutture sul territorio.

Terna ha definito un nuovo processo di **pianificazione territoriale e ambientale integrata e di programmazione efficiente delle infrastrutture di rete**. Tale approccio consentirà di ottenere benefici sulla velocizzazione nell'autorizzazione delle opere, accelerando l'entrata in esercizio dei nuovi impianti, tenuto conto dei minori sviluppi di rete necessari. Ne conseguono anche una riduzione della complessità legata alla semplificazione nelle dinamiche dei tavoli tecnici, la contrazione dei costi complessivi di sistema e un minor impatto territoriale delle opere di rete.

Teleborsa: distribution and commercial use strictly prohibited

Aggiornamento del Piano Industriale 2024-2028

Di fronte alla crescente complessità del sistema energetico, che negli ultimi anni ha posto nuove e importanti sfide a tutti gli operatori della filiera, il Gruppo Terna rafforza il proprio ruolo nell'ambito del processo di transizione attraverso l'aggiornamento del Piano Industriale 2024-2028 – Empowering Tomorrow. Pur mantenendo inalterate le linee strategiche di fondo, l'aggiornamento del **Piano Industriale**, approvato dal Consiglio di Amministrazione del 25 marzo 2025, rafforza il concetto di **Duplice Transizione - Energetica e Digitale** - ritenuta fondamentale per garantire una Just Transition equa e inclusiva per tutti gli stakeholder.

L'aggiornamento del Piano Industriale 2024-2028 prevede **investimenti complessivi per 17,7 miliardi di euro**, attraverso i quali Terna accelera l'impegno a servizio del Paese per la transizione energetica, l'indipendenza energetica e la decarbonizzazione, in coerenza con gli sfidanti obiettivi del Piano Nazionale Integrato Energia e Clima (PNIEC) e i target del Green Deal fissati a livello internazionale, che prevedono una riduzione delle emissioni di gas serra di almeno il 55% rispetto ai livelli del 1990 entro il 2030.

Al centro dell'aggiornamento del Piano Industriale 2024-2028 c'è la **sostenibilità degli investimenti**, elemento essenziale per la creazione di valore per l'Azienda e per il sistema nel suo complesso. Gli interventi di Terna, che in base al criterio di ammissibilità introdotto dalla **Tassonomia Europea** sono considerati per loro natura **interamente sostenibili**, sono finalizzati a favorire lo sviluppo delle fonti rinnovabili. Saranno pertanto potenziate le dorsali di trasporto dell'energia dai punti di produzione localizzati sempre più nelle regioni del sud Italia, verso i centri di maggior consumo del nord, grazie alla risoluzione delle attuali congestioni di rete e all'ulteriore sviluppo delle interconnessioni con l'estero. Ciò permetterà al nostro Paese di consolidare il suo **ruolo di hub elettrico dell'Europa e dell'area mediterranea**.

Le attività di sviluppo del Gruppo Terna continueranno a essere focalizzate lungo due direttrici strategiche: **Attività Regolate in Italia** e **Attività Non Regolate**.

Le **Attività Regolate in Italia** rappresenteranno il core business del Gruppo Terna, che con un investimento complessivo di **16,6 miliardi di euro** intende perseguire lo sviluppo e il rafforzamento della Rete di Trasmissione elettrica Nazionale. Il target anzidetto rappresenta il Piano Investimenti più alto di sempre e fa segnare un incremento del +7% rispetto al precedente Piano Industriale 2024-2028, in particolare per maggiori investimenti in macchinari per la sicurezza del sistema, per il potenziamento di iniziative di cyber security e di digitalizzazione degli asset e dei processi. L'elevata copertura sia in termini di autorizzazioni, dove circa il 90% degli investimenti è stato già autorizzato, sia in termini di procurement, dove circa l'80% dei fabbisogni è già stato coperto da contratto, garantisce la sostenibilità complessiva del Piano Investimenti.

Grazie agli investimenti previsti, il **valore degli asset regolati (RAB)** raggiungerà circa **32 miliardi di euro nel 2028**, con un CAGR nell'arco di Piano pari al 9%.

Nell'aggiornamento del Piano Industriale 2024-2028, Terna conferma gli **investimenti per lo Sviluppo della Rete elettrica di Trasmissione Nazionale**, per un totale di **10,8 miliardi di euro**, principalmente legati alla realizzazione di linee ad alta tensione in corrente continua - per risolvere le congestioni di rete, incrementare la capacità di trasporto tra le diverse zone di mercato, integrare pienamente le fonti rinnovabili e migliorare la qualità del servizio - e alla costruzione di collegamenti sottomarini in cavo. Il progetto di punta è rappresentato dal Tyrrhenian Link, l'elettrodotto che unirà Sardegna, Sicilia e Campania, che contribuirà allo sviluppo delle fonti rinnovabili e al phase-out delle centrali

Teleborsa: distribution and commercial use strictly prohibited

a carbone e di quelle a olio più inquinanti. Tra gli altri progetti figurano: l'Adriatic Link (elettrodotto sottomarino che unirà Abruzzo e Marche), il Sa.Co.I.3 (interconnessione Sardegna-Corsica-Toscana), Elmed (interconnessione Italia-Tunisia), e l'elettrodotto a 380 kV Chiaramonte Gulfi-Ciminna in Sicilia.

Con riferimento agli investimenti ordinari, le cui attività principali sono quelle di **rinnovo ed efficienza degli asset**, volte alla razionalizzazione delle infrastrutture esistenti e alla sostituzione delle componenti obsolete, Terna prevede un incremento degli investimenti che ammonteranno complessivamente a **3,6 miliardi di euro**, rispetto ai circa 2,9 miliardi di euro previsti nel precedente Piano.

Infine, è prevista una crescita degli investimenti anche per quanto riguarda il **Piano di Sicurezza**, finalizzato a rafforzare e potenziare le funzionalità tecniche e tecnologiche del sistema elettrico, dove il Gruppo dedicherà complessivamente **2,3 miliardi di euro**, rispetto ai circa 1,7 miliardi di euro previsti nel precedente Piano.

Le **Attività Non Regolate** proseguiranno nel generare nuove opportunità di business attraverso lo sviluppo di soluzioni tecnologiche innovative e digitali in coerenza con il ruolo istituzionale di Terna.

I mercati di riferimento sono in rapida espansione, guidata in larga misura dalle tendenze legate alla transizione energetica: aumento delle richieste per sviluppo impianti di generazione da fonti rinnovabili, rinnovamento delle reti e crescita di nuovi sotto-segmenti industriali quali i data center e grandi consumatori di energia elettrica.

Nello specifico, le attività Non Regolate del Gruppo comprendono:

- *Equipment:* business dedicati alla produzione di componenti per garantire l'approvvigionamento di macchinari essenziali allo sviluppo della rete, come trasformatori (Gruppo Tamini) e cavi (Gruppo Brugg Cables);
- *Energy services:* attività a mercato complementari e adiacenti al business core. Queste includono tutte le attività di system integrator con competenze specializzate e diversificate per la progettazione, costruzione, manutenzione ed efficientamento di impianti elettrici in media e alta tensione, rinnovabili e sistemi di accumulo (Altenia);
- *Connectivity:* offerte di connettività per operatori di telecomunicazioni attraverso la fornitura di dark fiber e servizi di housing;
- *Interconnectors:* sviluppo e gestione di linee di interconnessione.

Il Piano prevede diverse azioni per valorizzare il portfolio di attività, introducendo misure di ottimizzazione per rafforzare le prestazioni finanziarie e consolidare la posizione di leadership sul mercato. Queste azioni mirano a mantenere i business competitivi rispetto ai concorrenti nel settore *Equipment* e a rafforzare ulteriormente la leadership in *Energy Services*, prevedendo che le **Attività Non Regolate** apporteranno un **contributo all'EBITDA** del Gruppo pari a circa **730 milioni di euro** cumulati nell'arco di Piano, a fronte di un limitato impegno in termini di investimenti e un basso profilo di rischio.

Per Terna, la **digitalizzazione e l'innovazione** restano pilastri fondamentali per il raggiungimento degli obiettivi nazionali di transizione energetica. In linea con questo orientamento, l'aggiornamento del Piano Industriale 2024-2028 prevede di spendere **2,4 miliardi di euro** nel digitale, pari al 15% circa dei *capital expenditures* (capex) nelle Attività Regolate in Italia, in linea con le previsioni internazionali e con le ambizioni dei principali concorrenti europei.

Teleborsa: distribution and commercial use strictly prohibited

Il piano digitale mira a consolidare ulteriormente l'importanza della digitalizzazione nel sostegno del Piano di Sviluppo, prevedendo una serie di iniziative ambiziose lungo l'intera catena del valore. Tra queste:

- l'ingegneria introdurrà l'uso del *Building Information Modeling* (BIM) per digitalizzare i cantieri e ottimizzare la gestione delle commesse, assicurando così la tempestiva realizzazione dei progetti;
- il dispacciamento rinnoverà l'architettura ICT di stazione tramite l'adozione di soluzioni *Substation Automation System* (SAS) e svilupperà modelli avanzati di previsione e ottimizzazione della rete per il funzionamento in sicurezza e in economia del Sistema Elettrico Nazionale;
- l'asset management manterrà inalterati gli attuali standard di qualità mediante la digitalizzazione del processo di O&M avvalendosi di tecnologie quali *digital twin*, *Internet of Things* (IoT) e strumenti predittivi.

In conclusione, verrà costantemente assicurata la sicurezza, promossa l'innovazione e potenziata l'efficacia della forza lavoro attraverso l'impiego di soluzioni digitali avanzate.

Le **persone di Terna**, con le loro competenze tecniche di eccellenza, sono un asset strategico fondamentale per raggiungere gli sfidanti obiettivi che il Gruppo si è posto. La *people strategy* si fonda su tre pilastri fondamentali: *empowerment*, *experience* ed *excellence*. L'obiettivo è porre la Persona al centro, promuovendo il suo sviluppo e benessere attraverso la responsabilizzazione e un patto di coinvolgimento reciproco per la crescita collettiva. Si punta a migliorare l'esperienza lavorativa anticipando i cambiamenti, investendo in competenze emergenti e facilitando modalità di lavoro più efficaci, anche grazie al supporto della tecnologia. Inoltre, si ambisce a valorizzare il merito, per accelerare la crescita organizzativa e raggiungere l'eccellenza nei risultati. La centralità delle persone del Gruppo Terna è confermata dall'importante accelerazione nella creazione di posti di lavoro, dove l'aggiornamento del Piano Industriale 2024-2028 conferma le stime del precedente Piano che prevedevano l'aumento del numero dei dipendenti oltre le 7.000 unità.

Inoltre, il mantenimento di una struttura di capitale solida, sostenuta da una robusta generazione di cassa, continuerà a garantire un'attrattiva politica dei dividendi.

Infine, si segnala che l'impegno costante del Gruppo Terna alla realizzazione delle attività previste nel Piano Industriale e al conseguimento dei relativi obiettivi economico-finanziari è confermato dal raggiungimento e superamento delle *guidance* comunicate ai mercati finanziari per il 2024, che costituiscono una solida base di partenza per la realizzazione dei nuovi obiettivi previsti nell'aggiornamento del Piano Industriale 2024-2028.

	2024 (€/mld)

Identificazione e valutazione rischi Piano Industriale

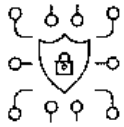
Al fine di valutare la robustezza e l'affidabilità del Piano Industriale di Terna e di rispondere alle esigenze dei principali stakeholder aziendali, il Gruppo Terna ha adottato una metodologia per l'integrazione dell'analisi e della quantificazione dei rischi nel processo di pianificazione industriale.

Per lo svolgimento di tale attività, la Direzione Amministrazione Finanza e Controllo utilizza uno strumento che valuta il grado di compatibilità del profilo di rischio del Gruppo con gli obiettivi strategici. L'identificazione e la quantificazione dei rischi/opportunità sono applicate all'intero perimetro del Gruppo Terna e richiedono il coinvolgimento diretto di tutte le funzioni aziendali competenti, tramite interviste dedicate con un approccio bottom-up.

Il processo prevede, una volta identificate e quantificate le incertezze, che le stesse siano aggregate tramite un modello proprietario di simulazione Montecarlo che, a partire dai dati raccolti, genera un elevato numero di scenari alternativi, basati sull'evoluzione probabilistica delle variabili sottostanti il Piano Industriale. La metodologia, pertanto, consente di stimare la volatilità complessiva dei target economico-finanziari derivante dall'accadimento dei principali eventi di rischio/opportunità e la valutazione del livello di resilienza del Piano Industriale.

Teleborsa: distribution and commercial use strictly prohibited

Strategia di innovazione



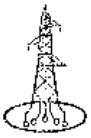
La **Twin Transition**, ovvero la **doppia transizione, digitale ed energetica**, rappresenta il cuore della strategia di Terna per costruire un sistema elettrico sempre più sostenibile, efficiente, affidabile e accessibile. Si tratta di un obiettivo ambizioso e complesso, che richiede un **impegno costante in innovazione e tecnologie all'avanguardia**.

Per affrontare questa sfida, non basta semplicemente adottare nuove soluzioni: serve una visione chiara del futuro, un futuro in cui la **digitalizzazione** e la **decarbonizzazione** siano i **pilastri di un sistema energetico "future-proof"**. Proprio per questo, **Terna investe** nelle **tecnologie più avanzate** e **collabora** con diversi **attori dell'ecosistema dell'innovazione** (università, centri di ricerca, grandi realtà industriali, startup e piccole-medie imprese).

L'azienda crede fortemente nel **valore delle idee innovative** e per questo supporta startup capaci di trasformare intuizioni ambiziose in modelli concreti e strumenti tecnologici in grado di migliorare la gestione della rete elettrica nazionale. Una rete che, con la crescente integrazione delle fonti rinnovabili, necessita di soluzioni sempre più intelligenti per garantire stabilità ed efficienza.

In questo percorso, la sinergia tra digitale ed energia diventa la chiave per affrontare le sfide del futuro e per guidare la **transizione verso un sistema elettrico più sostenibile e innovativo.**

Queste **le direttrici di sviluppo tecnologico** alla base del Piano Innovazione 2025-2028, le **quattro ambizioni** che guidano ogni iniziativa di innovazione aziendale mirando ad avere sempre più impatto sul business attraverso l'adozione di approcci di Open Innovation:



GESTIRE L'INCERTEZZA in un sistema elettrico decarbonizzato, garantendo la sicurezza al minimo costo

Nuove Risorse di flessibilità: abilitare la flessibilità delle nuove risorse energetiche nel mercato dei servizi ancillari.

Stabilità del sistema: mantenere la stabilità in un sistema elettrico dominato da risorse energetiche inverter-based.

Digitalizzare le System Operation: rendere più efficienti le attività del system operator grazie all'automazione AI-based e allo sviluppo del concept di «co-pilota».

EVOLVERE verso una infrastruttura sempre più «robusta», resiliente e integrata

Resilienza di sistema: incrementare la resilienza del sistema a fronte di eventi meteo-climatici estremi.

Ottimizzare l'integrazione delle RES: volte al miglioramento delle attività di progettazione e realizzazione asset.

Ottimizzare le attività di progettazione e realizzazione: soluzioni volte al miglioramento delle attività di progettazione e realizzazione asset.

Digitalizzazione rete e Sostenibilità: soluzioni volte a digitalizzare la rete e al miglioramento del profilo di sostenibilità degli asset Terna.

MASSIMIZZARE L'AFFIDABILITÀ degli asset esistenti e l'efficienza dell'O&M, riducendo i rischi

Operational improvement: nuove attrezzature, metodologie e strumentazioni al fine di incrementare l'efficienza operativa e la sicurezza nelle attività di ispezione, manutenzione e rinnovo.

Asset optimization: tecnologie innovative per migliorare le performance di componenti e apparecchiature, in ottica di minimizzazione dei guasti e dei rischi di indisponibilità, nonché degli impatti ambientali.

Automazione robotica: metodi di lavoro innovativi attraverso l'utilizzo di robot e droni avanzati, al fine di automatizzare le attività O&M su linee e impianti, anche in ottica collaborativa.

FACILITARE e RENDERE PIÙ SICURI i processi e il lavoro delle nostre Persone

Digitalizzazione processi staff: sviluppo di soluzioni innovative in ambito AI, RPA, piattaforme intelligenti che digitalizzino e automatizzino ed efficientino i processi aziendali staff.

New ways of learning: nuovi strumenti ingaggianti nell'ambito del metaverso e VR a supporto delle attività di learning e training.

Stakeholder engagement: nuove soluzioni per ingaggiare gli stakeholders circa le tematiche chiave della twin transition.

Teleborsa: distribution and commercial use strictly prohibited

Il modello di **Open Innovation** di Terna rompe le barriere tra settori e territori, favorendo lo scambio di conoscenze, idee e risorse con un'intera comunità di innovatori secondo un **approccio concreto, aperto, inclusivo e distribuito**, rispondendo alle esigenze di innovazione identificate con l'obiettivo di **sviluppare, proteggere e valorizzare le competenze e la proprietà intellettuale aziendale**.

A servizio della strategia di Terna per l'Open Innovation è presente la **piattaforma Terna Ideas**[31], lo spazio virtuale che rappresenta un **punto di incontro tra la creatività interna all'azienda e il talento esterno di startup, ricercatori, aziende innovative e solver** provenienti da tutto il mondo. Attraverso sfide dedicate alla transizione energetica, le idee più promettenti sono trasformate in soluzioni operative, a testimoniare la volontà di Terna di integrare le migliori competenze disponibili e di valorizzare il capitale umano.

Terna guarda anche oltre il territorio italiano e rafforza la sua presenza a livello internazionale con l'obiettivo di esplorare nuovi modelli e approcci innovativi, creando un **network globale capace di accelerare la trasformazione del settore energetico**. A questo scopo, ha dato vita alle **Terna Innovation Zone**, veri e propri punti di riferimento all'interno degli ecosistemi di innovazione più avanzati del mondo.

Il primo passo in questa direzione è stato l'apertura di un centro nella **Silicon Valley**, l'Innovation Zone a San Francisco, inaugurato durante l'Innovation Zone Forum tenutosi nel mese di ottobre e organizzato da Terna con il supporto del Centro Italiano di Innovazione presso INNOVIT (Italian Innovation and Culture Hub), del Consolato Generale d'Italia a San Francisco e del partner Mind the Bridge. Qui, Terna ha avviato un dialogo costante con startup, investitori e ricercatori per identificare soluzioni all'avanguardia che possano rivoluzionare il sistema elettrico. L'Innovation Zone di Terna a San Francisco non è solo un avamposto tecnologico, ma un catalizzatore di sinergie, in cui l'eccellenza italiana incontra le migliori menti internazionali per affrontare insieme le sfide della Twin Transition. Si segnala inoltre che il 29 gennaio 2025 è stato inaugurato il Terna Innovation Zone di Tunisi, primo hub di innovazione in Africa che rafforza il partenariato strategico tra Italia e Tunisia.

Oltre al consolidamento del modello di innovazione definito in Azienda, il Gruppo Terna si è dotato alla fine del 2022 di un ulteriore importante strumento per perseguire le proprie ambizioni. A novembre 2022 è nata infatti **Terna Forward**, il veicolo di **Corporate Venture Capital** del Gruppo Terna.

Con l'obiettivo di sostenere le realtà italiane più innovative e accelerare le soluzioni ad alto impatto per la transizione energetica, **Terna Forward supporta startup promettenti attraverso investimenti strategici**, favorendo lo sviluppo di tecnologie in grado di migliorare l'efficienza e la resilienza delle infrastrutture elettriche. Con un approccio basato sull'Open Innovation, Terna Forward non si limita a finanziare le iniziative più disruptive, ma mette a disposizione le proprie competenze per accompagnarle nella crescita, contribuendo concretamente alla trasformazione del sistema energetico. Nel corso del 2024 Terna Forward, oltre agli investimenti portati avanti in modalità "indiretta" attraverso l'adesione e attiva partecipazione al fondo Corporate Parter I di CdP Venture Capital, ha completato quattro operazioni di investimento diretto in Start Up: Wesii S.r.l. società italiana leader di mercato nei servizi di ispezione e telerilevamento nel settore energetico, per una quota pari al 33%, Melaworks, D-orbit e Unusuals World.

Il cammino di Terna nella Twin Transition dimostra come l'**innovazione** possa diventare un **motore di sostenibilità**. Attraverso queste iniziative, l'Azienda si impegna attivamente nel **guidare il cambiamento** con visione e determinazione.

Tra i principali risultati realizzati sino al 31 dicembre 2024 si evidenziano:

- 67 progetti in corso;
- 73 titoli IP in portafoglio brevettuale (brevetti ottenuti e domande IP depositate);
- 14 Scouting e 8 Workshop.

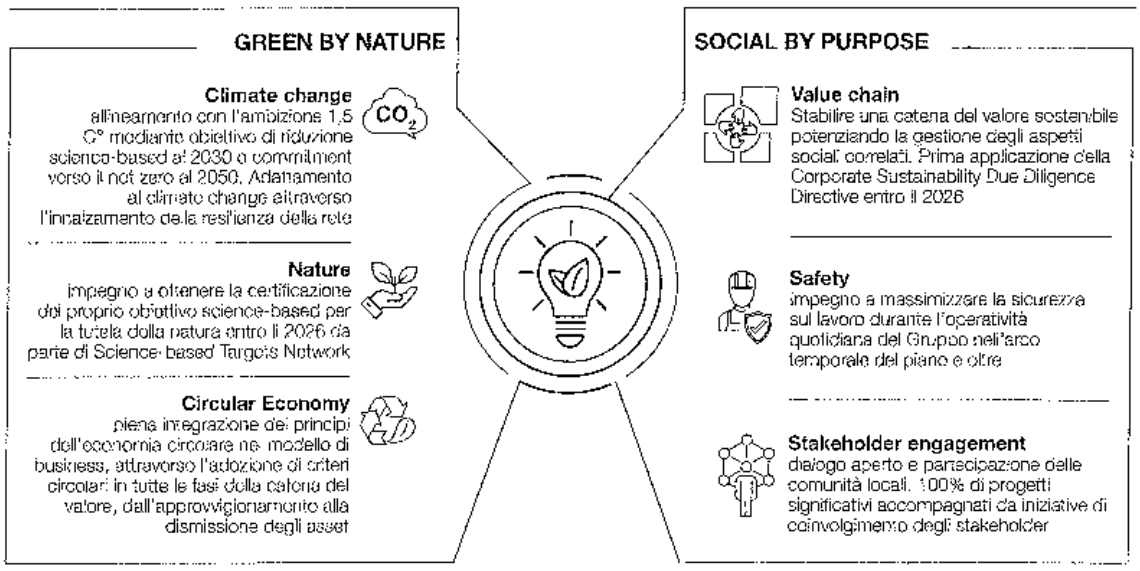
SBM-1

Aggiornamento del Piano di Sostenibilità 2024-2028



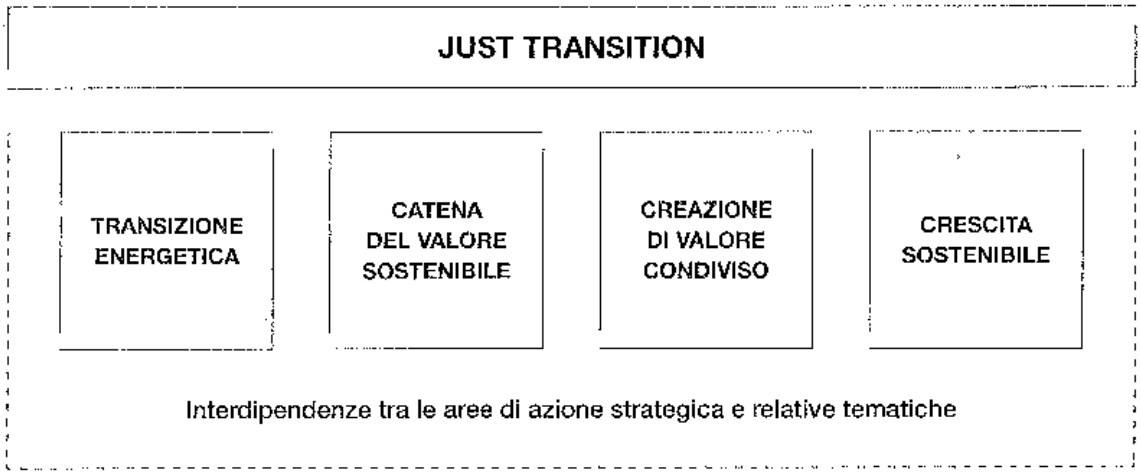
La strategia del Gruppo Terna per il quinquennio 2024-2028, aggiornata nel 2025, è caratterizzata da una visione unitaria del suo ruolo al servizio del Paese e si traduce nella piena integrazione tra il nuovo Piano Industriale e il Piano di Sostenibilità, con l'equiparazione degli obiettivi ESG agli obiettivi industriali e finanziari.

La struttura del Piano di Sostenibilità, confermata anche a seguito dell'aggiornamento, valorizza tutti gli obiettivi ESG coerentemente con gli obiettivi del Piano Industriale.

Il punto di sintesi tra il Piano di Sostenibilità e il Piano Industriale coincide con due macro-filoni riconducibili a considerazioni ambientali e sociali, entrambe alimentate da tematiche materiali per il Gruppo. Questi concetti esprimono, infatti, due diverse caratteristiche fondamentali di Terna: da un lato, essendo il ruolo di TSO vitale di per sé per la realizzazione della transizione energetica e quindi per lasciare alle generazioni future un ambiente decarbonizzato, la sostenibilità è insita nella natura stessa di Terna **"Green by Nature"**. Dall'altro, le attività di business di Terna sono portate avanti nel quadro di una solida struttura di presidi e di salvaguardie volte alla massima tutela dei diritti e delle istanze dei propri stakeholder, con un impegno costante verso l'ascolto delle comunità locali. Il Gruppo è quindi sostenibile per scelta **"Social by purpose"**. Gli elementi che caratterizzano i due filoni *Green by nature* e *Social by purpose* indicano, pertanto, rispetto all'obiettivo prioritario di realizzare una Transizione Energetica e Digitale (la ***Twin Transition***), la necessità di considerarne anche le ricadute sociali ovvero di innalzare l'ambizione del Gruppo e di realizzare una ***Just Transition***.

Una Transizione Energetica e Digitale che sia al contempo equa e inclusiva è dunque, al tempo stesso, l'obiettivo prioritario del Piano di Sostenibilità 2024-2028 ma anche il contributo che questo dà al Piano Industriale, orientandolo ulteriormente verso un obiettivo di creazione di valore nel tempo e di successo sostenibile.

Green by nature, social by purpose



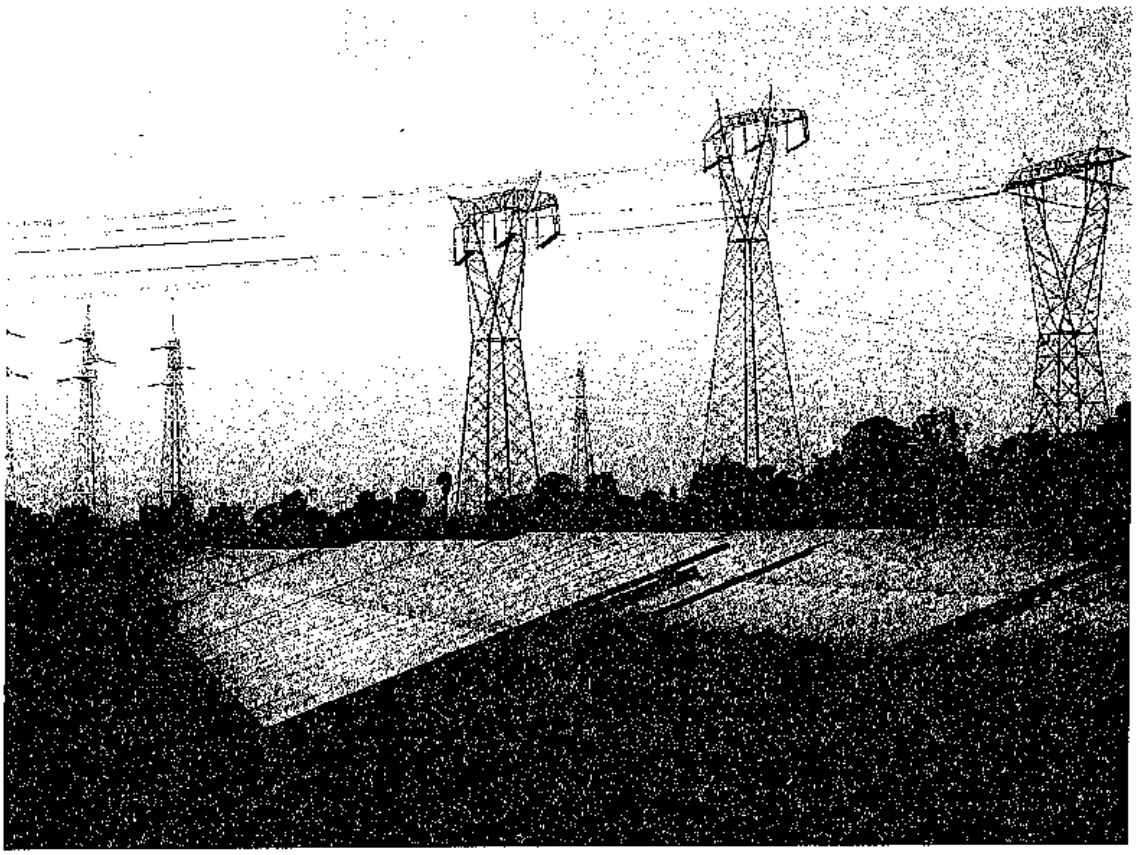
Teleborsa: distribution and commercial use strictly prohibited

L'architettura del Piano di Sostenibilità, che considera anche i risultati dell'Analisi di Doppia Rilevanza (si veda pag. 182), gli orientamenti della letteratura scientifica in materia e le evoluzioni del contesto normativo, prevede un'articolazione dei contenuti in:

- pilastri;
- aree strategiche;
- temi;
- ambiti di azione;
- attività fondamentali.

Piano di Sostenibilità 2024-2028: pilastri e aree strategiche

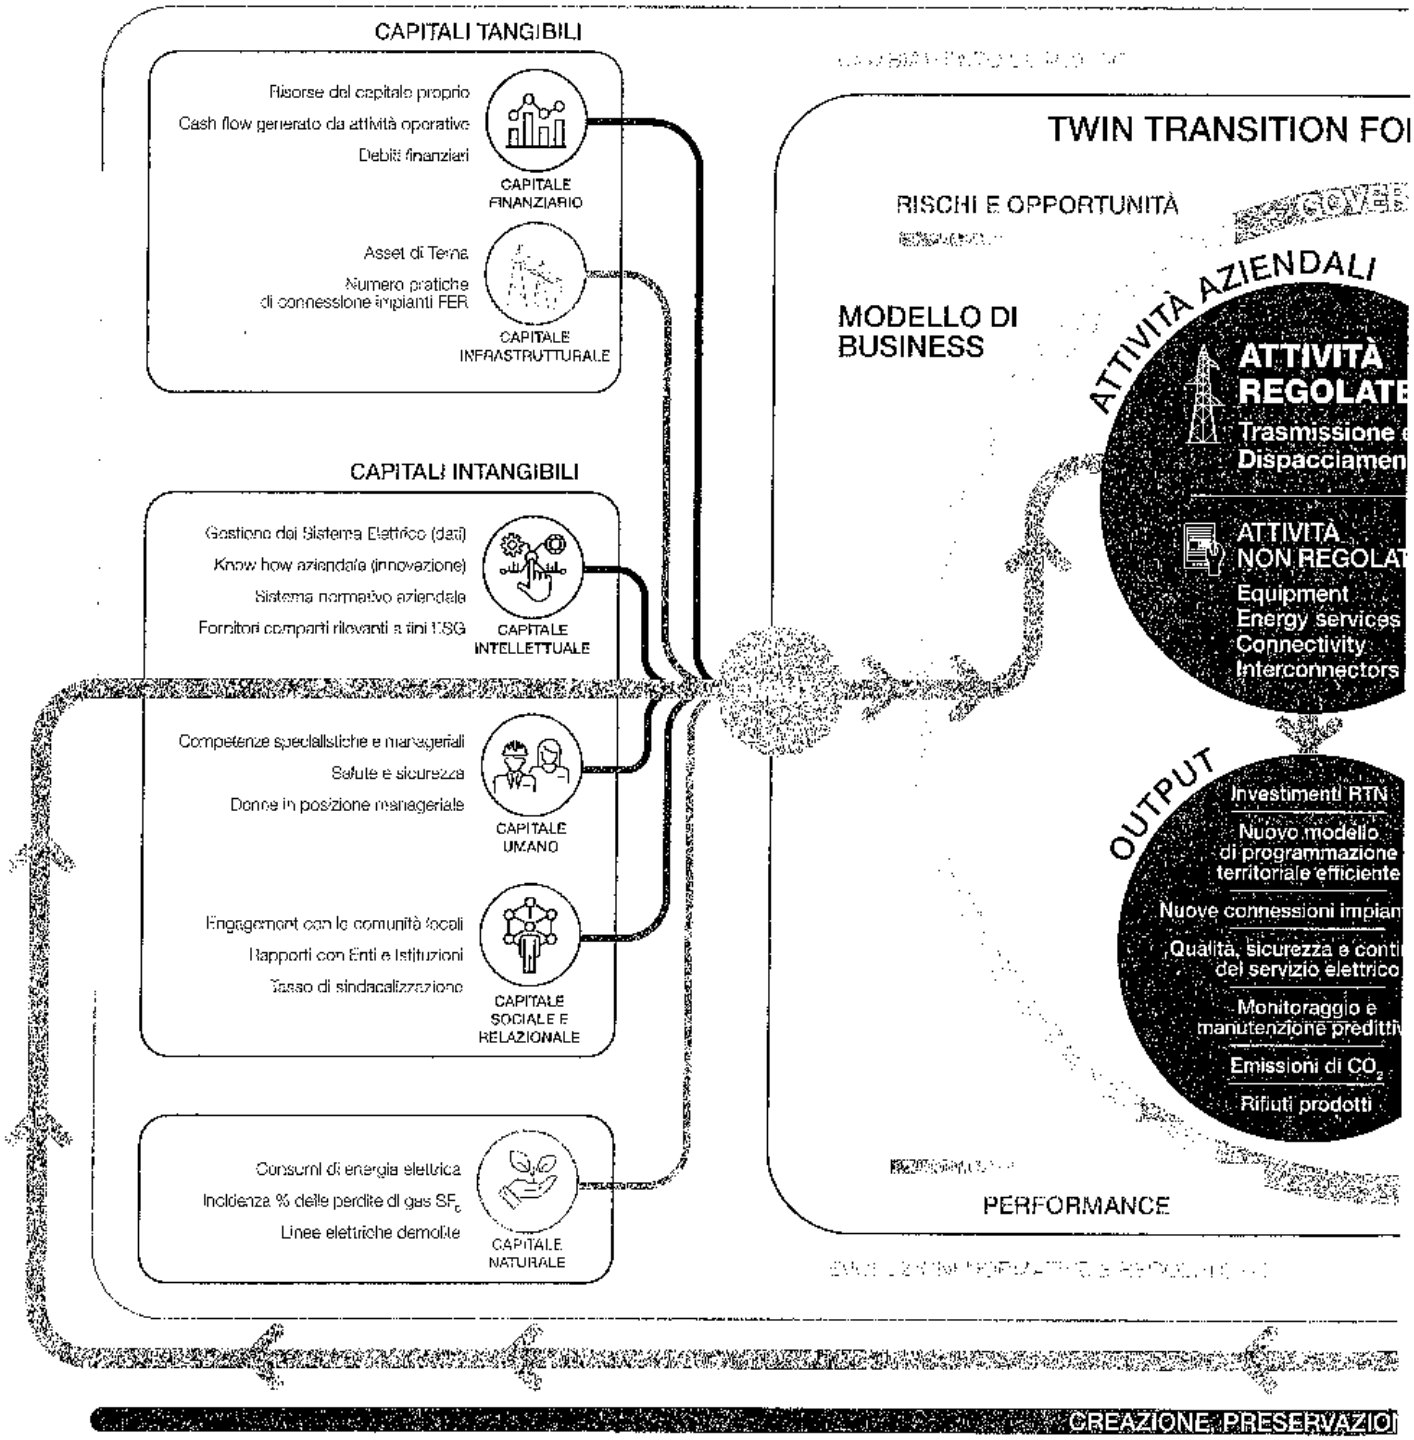
Il Piano si sviluppa su quattro pilastri (i *pillars*), tutti funzionali all'obiettivo prioritario della *Just Transition* e caratterizzati da contenuti fortemente ancorati al *Purpose* aziendale e al modo in cui Terna intende svolgere un ruolo di leadership in una transizione energetica equa e inclusiva del Paese. In particolare:



- **Transizione Energetica:** questo pilastro si concentra sulla realizzazione di una transizione verso un nuovo paradigma energetico più sostenibile, basato sull'utilizzo di energia da fonti rinnovabili. All'obiettivo di una progressiva riduzione dell'impronta carbonica e delle conseguenti emissioni in atmosfera di CO_2 – necessaria ai fini del contenimento del surriscaldamento del Pianeta – si aggiungono considerazioni sulla sicurezza e resilienza del Sistema Elettrico Nazionale (SEN) e, quindi, del sistema produttivo e sociale del Paese;
- **Catena del valore sostenibile:** questo pilastro punta ad affermare una nuova catena del valore, sempre più inclusiva e sostenibile attraverso l'adozione di nuovi modelli di sviluppo che promuovano la gestione sostenibile della supply chain, la creazione di valore per lo stakeholder interno, la trasparenza nel rapporto con i clienti e lo sviluppo della circolarità delle pratiche aziendali;
- **Creazione di valore condiviso:** l'obiettivo è l'irrobustimento del modello di business in termini di sostenibilità ovvero di bilanciamento tra profitto, attenzione al capitale naturale, e *social license* intesa come *engagement* e sostegno alle comunità interessate dalla presenza e dalle attività di Terna;
- **Crescita sostenibile:** questo pilastro mira a garantire che la crescita economica sia sostenibile nel lungo termine. Ciò comporta l'innovazione e la digitalizzazione focalizzate sulla transizione energetica, lo sviluppo di un ecosistema e nuovi business che supportino tale crescita e l'impegno in finanziamenti che supportino la transizione giusta.

Teleborsa: distribution and commercial use strictly prohibited

Il processo per la definizione del Piano di Sostenibilità coinvolge tutte le direzioni aziendali che annualmente sono chiamate, oltre che a rendicontare le performance dell'anno trascorso, a valutare nuovi obiettivi per il futuro sulla base degli input provenienti dal contesto esterno e dall'evoluzione del business. Si segnala, a tal proposito, che l'ultimo aggiornamento del Piano ha tenuto in conto le richieste della Corporate Sustainability Reporting Directive, ampliando, nell'arco di piano, il perimetro dei target a tutto il Gruppo in linea con il perimetro consolidato richiesto dalla normativa, e includendo le tematiche emerse come rilevanti a partire dai nuovi European Sustainability Reporting Standards (ESRS). L'aggiornamento ha incluso anche obiettivi legati alla Corporate Sustainability Due Diligence Directive, garantendo un approccio sempre più trasparente e strutturato nella rendicontazione e nella gestione degli impatti di sostenibilità lungo la catena del valore. Il meccanismo di revisione e aggiornamento del Piano prevede, a valle del confronto della funzione di Sostenibilità con le diverse direzioni aziendali, la condivisone con il comitato del Consiglio di amministrazione "Sostenibilità, Governance e Scenari".



Per il monitoraggio del Piano, cruciale per garantire il raggiungimento degli obiettivi prefissati, è stato adottato un apposito sistema di procedure e presidi. È stato istituito, infatti, un Gruppo di coordinamento interdirezionale responsabile del monitoraggio del Piano, che presidia, per la prima volta nella storia del Gruppo su base trimestrale, l'avanzamento rispetto ai target fissati in ambito di Sostenibilità. Il Gruppo di Coordinamento mantiene un continuo scambio di informazioni con le strutture aziendali owner dei KPI e dei target di Piano, assicurando così un aggiornamento costante e una gestione efficace delle attività. Su base periodica poi, i principali KPI previsti nel Piano sono oggetto di apposite comunicazione ai comitati endoconsiliari. Nell'ultimo trimestre 2024, in ottica di miglioramento continuo, è stata inoltre prevista un'attività di "light assessment" da parte di un ente terzo per valutare il modello di monitoraggio trimestrale previsto per il Piano e raccogliere possibili spunti di miglioramento da implementare nell'arco dei monitoraggi 2025.

All'interno del presente documento, sono richiamati, per le diverso sezioni di riferimento, alcuni tra i principali obiettivi previsti all'interno del Piano di Sostenibilità.

Il processo di creazione di valore

SC3

Teleborsa: distribution and commercial use strictly prohibited

Teleborsa: distribution and commercial use strictly prohibited

La creazione di valore di Terna

Nell'ambito della Relazione sulla Gestione 2024 viene rappresentata la capacità del Gruppo Terna di creare valore nel tempo attraverso un **Modello di business sostenibile** fondato sull'interazione tra i capitali, tangibili e intangibili, a disposizione dell'organizzazione. Il corretto funzionamento dello stesso è costantemente monitorato, misurato e rendicontato mediante specifici indicatori economico-finanziari, operativi, sociali e ambientali.

Il processo di creazione di valore nel tempo[32] del Gruppo Terna è guidato da una **Governance** orientata al successo sostenibile che mira alla definizione e realizzazione di una chiara **strategia** di medio e lungo termine. Questa, che si basa sugli indirizzi contenuti all'interno del **Piano di Sviluppo 2025** e dell'aggiornamento del **Piano Industriale 2024-2028**, mira a favorire e realizzare una transizione energetica e digitale, che tenga conto anche delle ricadute sociali (la cosiddetta ***just transition***). Elemento fondamentale per la realizzazione di tale obiettivo strategico risulta essere la corretta **allocazione delle risorse**, intraprendendo investimenti che puntino a potenziare e migliorare l'efficienza e la resilienza della Rete di Trasmissione Nazionale (RTN), garantendo allo stesso tempo un'adeguata valutazione e gestione dei **rischi** economico-finanziari, tra cui anche quelli a carattere ESG connessi al business, e delle possibili **opportunità** a essi correlate.

SBM-1 Nella rappresentazione del proprio modello di business e degli eventuali aggiornamenti, il Gruppo Terna tiene conto, tra gli altri, anche degli impatti, dei rischi e delle opportunità legati ai settori significativi di operatività e che potenzialmente potrebbero verificarsi nell'ambito delle proprie operazioni o di quelle legate alla catena del valore, al fine di rendere lo stesso più resiliente e adattabile alle evoluzioni del contesto esterno in cui opera. Il Modello di business del Gruppo Terna, in linea con i fattori abilitanti dell'aggiornamento del Piano Industriale 2024-2028, è strutturato in due distinti ambiti principali di attività (Attività Regolate e Attività Non Regolate) che corrispondono al *core business* (Trasmissione e Dispacciamento dell'energia elettrica) e al filone complementare che agisce in regime di libero mercato, con un nuovo assetto per la società di mercato controllata del Gruppo Terna che integra competenze diversificate lungo tutta la catena del valore dell'energia per la progettazione, l'ingegnerizzazione, l'esercizio e la manutenzione di soluzioni al mercato dell'energia (Attività Non Regolate). Per la comprensione del modello di business del Gruppo nell'anno 2024 e dei relativi costi e ricavi associati ai settori di attività, si faccia riferimento alla nota C "Settori operativi" del Bilancio consolidato.

I **capitali** sono le risorse essenziali di cui il Gruppo Terna dispone per creare e preservare valore nel tempo attraverso le loro combinazioni e interazioni continue, sia all'interno del perimetro aziendale sia con l'ambiente esterno, includendo in quest'ultimo le legittime istanze e aspettative degli stakeholder di riferimento. Nell'ambito del processo di creazione di valore, i capitali svolgono un ruolo fondamentale, dal momento che gli stessi sono sia **input** del processo, i quali risultano misurabili da un anno all'altro (nella parte sinistra dell'infografica), sia **output** dello stesso, da intendere come l'insieme di prodotti, servizi, sottoprodotti e scarti di un'organizzazione[33] (nella parte centrale dell'infografica), che **outcome**, da intendersi come capacità del processo di far accrescere nuove risorse e garantire una trasformazione delle stesse in coerenza con gli obiettivi stabiliti dal Gruppo Terna (sulla destra). Come anticipato, i capitali che considera il Gruppo Terna per creare valore e raggiungere gli obiettivi aziendali sono sia di natura tangibile – nello specifico il capitale finanziario e il capitale infrastrutturale, rappresentato da tutti gli asset di Terna – sia di natura intangibile – nello specifico il capitale intellettuale, il capitale umano e il capitale sociale-relazionale.

In particolare, il capitale intellettuale è, tra tutti gli intangibili, quello più trasversale, infatti la sua qualità e robustezza, e quindi la sua capacità di creare valore, interseca quella del capitale umano e del capitale sociale e relazionale. Al fine di guidare la Transizione energetica, è necessaria una costante analisi e gestione corretta dei big data, la cui integrità è tutelata da solidi processi di Cyber Security e un adeguato sistema elettrico, la cui operatività è garantita anche dai processi di innovazione e digitalizzazione, che garantiscano la possibilità di fronteggiare le sfide e le incertezze derivanti da un contesto esterno sempre più complesso. Per ulteriori informazioni in merito si faccia riferimento, alla sezione "La Strategia per la creazione del valore – Strategia di innovazione" della Relazione sulla gestione, alla sezione "Informazioni di governance" della Rendicontazione Consolidata di Sostenibilità e alla Nota 15 – Attività immateriali del Bilancio consolidato.

[32] Terna adotta il framework principle based proposto dall'International Integrated Reporting Council (IIRC) i cui principi guida sono: (1) Focus strategico e orientamento al futuro, (2) Connettività delle informazioni, (3) Relazione con gli stakeholder, (4) Materialità, (5) Sintesi, (6) Attendibilità e completezza, (7) Coerenza e comparabilità sono i principi-guida sui cui si base il framework. La loro quasi totale coincidenza con i principi-guida indicati dallo standard GRI 101 – Foundation per identificare i contenuti di un reporting ESG di qualità rafforza ulteriormente la struttura di questo Rapporto.

[33] https://www.integratedreporting.org/wp-content/uploads/2021/09/IRFRAMEWORK_ITALIANO.pdf

SeS

Teleborsa: distribution and commercial use strictly prohibited

Con riferimento al capitale umano, la qualità dello stesso è cruciale per la crescita dell'Azienda e, di conseguenza, per alimentare la creazione di valore nel tempo. Le persone, con la loro istruzione di base, le competenze sviluppate e consolidate nel tempo, le loro capacità manageriali, la motivazione, la lealtà e il senso di appartenenza, sono un elemento centrale di tutte le attività aziendali, a cui, allo stesso tempo, è necessario garantire il rispetto dei diritti. Per ulteriori informazioni in merito si faccia riferimento alla sezione "Informazioni sociali" della Rendicontazione Consolidata di Sostenibilità.

Infine, in relazione al capitale sociale-relazionale, la qualità dello stesso è subordinata alla capacità del Gruppo di ascoltare i suoi stakeholder considerando i loro interessi e analizzandone la compatibilità con i suoi obiettivi di business. Per maggiori dettagli in merito si faccia riferimento alla sezione "Contesto di sostenibilità" della Rendicontazione Consolidata di Sostenibilità.

La rappresentazione del modello di business per capitali permette al Gruppo Terna di sottolineare gli output e i relativi *outcome* generati, evidenziando i vantaggi che i propri stakeholder ottengono sia da un punto di vista finanziario, in termini di ritorni economici legati agli investimenti effettuati, che da un punto di vista di impatti sociali-relazionali e ambientali prodotti. A tal proposito, e più in generale nel prendere decisioni strategiche e operative, il Gruppo Terna utilizza conoscenze e dati, quali: SBM-1

- dati di mercato, quali ad esempio analisi della domanda e trend di settore;
- requisiti legislativi e standard di settore;
- report interni sulla performance aziendale/KPI operativi.

La catena del valore del Gruppo Terna

SBM-1

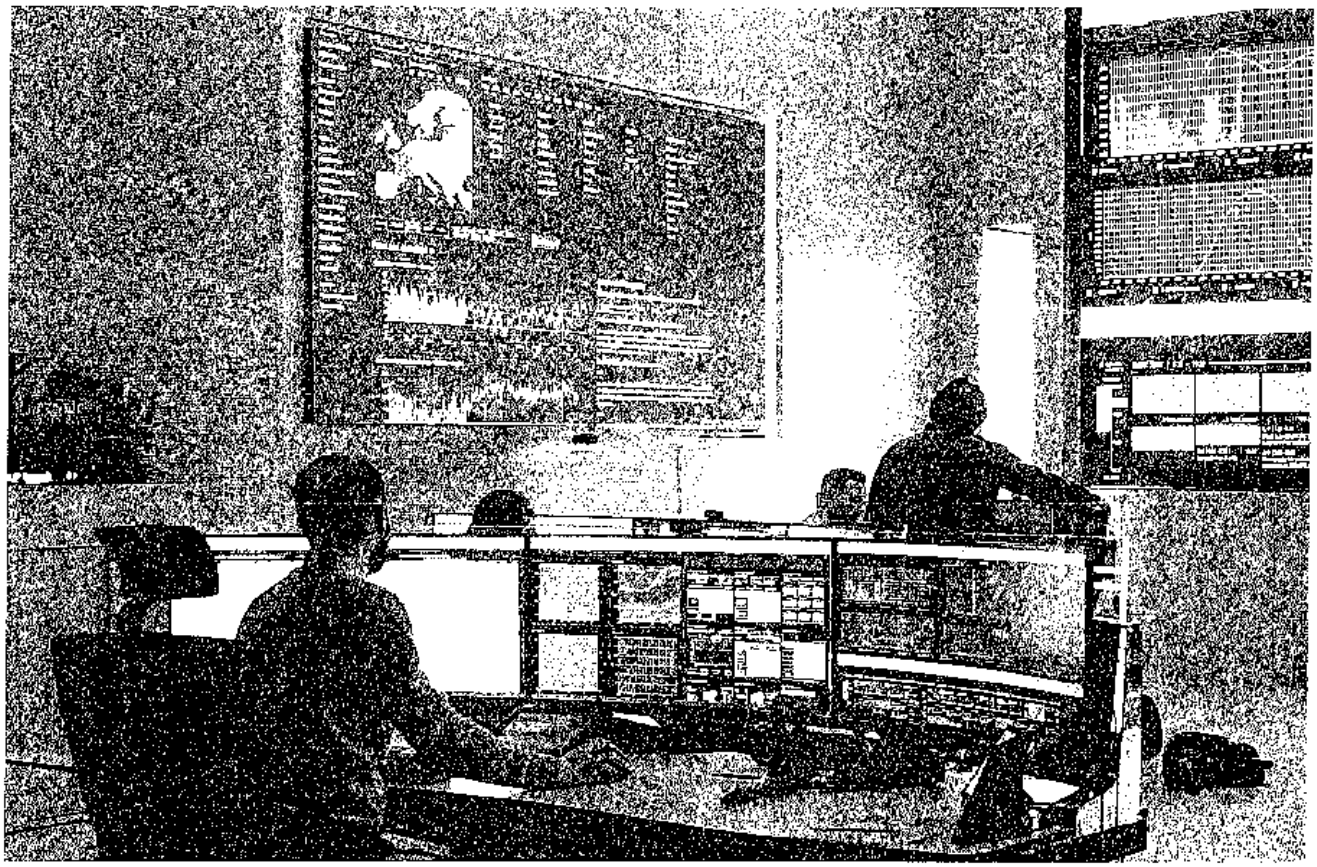
Al fine di fornire una rappresentazione quanto più esaustiva del modello di business di Gruppo, nel 2024 è stata realizzata una mappatura della catena del valore, considerando tre macrofasi relative alle attività a monte, le operazioni svolte direttamente dal Gruppo e quelle esercitate a valle. La mappatura tiene anche conto dei principali attori di ciascuna di queste fasi.

Nello specifico, le **attività a monte della catena del valore** tengono conto dell'approvvigionamento di materiali e prodotti finiti necessari per i processi produttivi delle Società controllate e, in generale, per le attività del Gruppo, e l'approvvigionamento di lavoro da parte di imprese terze (mediante contratti di appalti di lavoro e servizi). Tra gli attori principali di questa fase rientrano, pertanto, i fornitori di materiali e prodotti finiti e le ditte appaltatrici. Data la specificità del business del Gruppo, che si distingue per la necessità di effettuare interventi di manutenzione in tempi brevi garantendo la sicurezza del sistema elettrico, tra i contratti di fornitura si registra una prevalenza di acquisti di lavori, rispetto a forniture e servizi, e di operatori nazionali. Il ricorso a fornitori locali consente, inoltre, di ridurre i costi di trasporto di materiali ingombranti e pesanti, contribuendo anche alla diminuzione del proprio impatto ambientale[34].

La fase relativa alle **operazioni proprie**, si suddivide a sua volta in:

- **Pianificazione:** individuazione delle modifiche strutturali necessarie affinché il sistema di trasmissione possa svolgere in modo ottimale la sua funzione di garantire, in condizioni di sicurezza ed economicità, il trasporto dell'energia prodotta dalle aree di produzione verso i centri di distribuzione e di carico. Sono inoltre ricomprese anche le attività correlate alla progettazione degli impianti fotovoltaici sulla base delle esigenze dei clienti;
- **Sviluppo:** attività di sviluppo della rete e, dall'altro, la produzione dei prodotti finiti necessari per lo sviluppo della rete, come trasformatori e cavi elettrici ad alta tensione e le attività di costruzione e realizzazione degli impianti fotovoltaici;
- **Manutenzione:** attività di manutenzione preventiva e correttiva delle linee e delle stazioni elettriche, attraverso ispezioni regolari e interventi di riparazione per prevenire e risolvere guasti e la manutenzione degli impianti fotovoltaici, attraverso attività di riparazione e rigenerazione degli inverter fotovoltaici;

[34] Per maggiori dettagli circa la gestione dei rapporti con i fornitori, è possibile fare riferimento alla specifica sezione all'interno del capitolo "Informazioni di governance".



Teleborsa: distribution and commercial use strictly prohibited

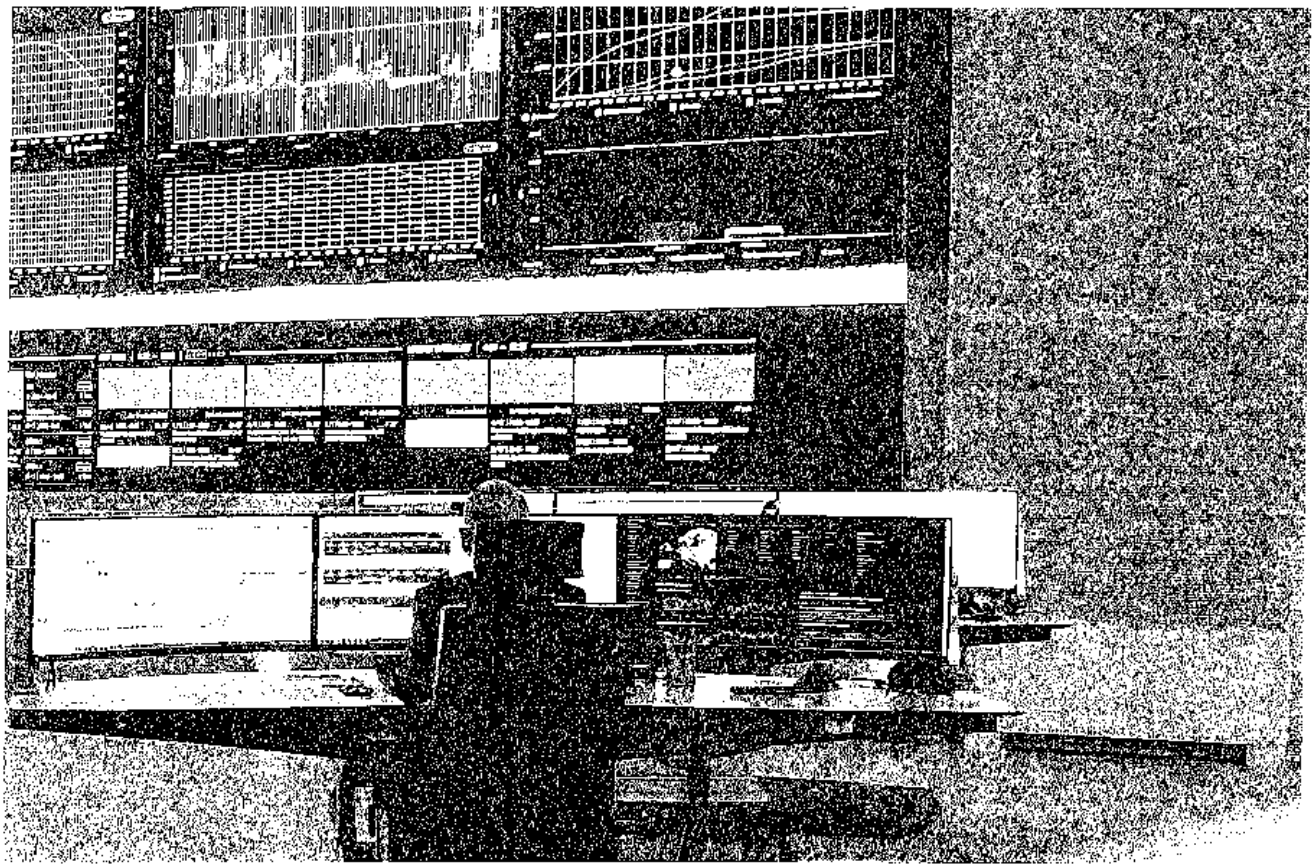
- **Erogazione di prodotti e servizi:** attività di dispacciamento di energia finalizzate a garantire che la richiesta di energia elettrica sia sempre bilanciata dall'energia prodotta dalle centrali elettriche, tramite il coordinamento delle centrali di produzione e la gestione delle emergenze per il corretto funzionamento del sistema elettrico. Rientrano inoltre in questa sottofase le attività di consulenza e vendita di prodotti finiti nei confronti dei propri clienti, l'installazione e la connessione degli impianti fotovoltaici alla rete elettrica e le ordinarie attività di staff propedeutiche allo svolgimento delle attività del Gruppo.

Tra gli attori principali di questa fase rientrano i lavoratori del Gruppo. Oltre a questi, nello svolgimento delle c.d. "Attività Regolate", il Gruppo intrattiene rapporti commerciali con categorie di operatori di varia natura. Tra questi sono annoverabili gli **utenti del dispacciamento**, ovvero produttori, grossisti e clienti. Un ulteriore gruppo significativo è rappresentato dalle società di distribuzione e dai gestori di reti private, coinvolti nelle attività di trasmissione e aggregazione delle misure necessarie ai fini della regolazione del servizio di dispacciamento.

Ulteriori rapporti commerciali riguardano i **soggetti che richiedono la connessione** dei propri impianti alla Rete di Trasmissione Nazionale, siano essi produttori o consumatori, nonché i cosiddetti clienti interrompibili, ovvero coloro che, a fronte del riconoscimento di un corrispettivo, accettano di interrompere temporaneamente la propria fornitura di energia elettrica per contribuire alla sicurezza del sistema. A questi ultimi, il Gruppo offre contratti specifici per il servizio di interrompibilità, finalizzati a mitigare il rischio di disalimentazioni diffuse e a garantire la stabilità del sistema elettrico.

Nel contesto le c.d. "Attività Non Regolate", i rapporti commerciali del Gruppo coinvolgono **clienti corporate** di numerose realtà appartenenti a diversi settori. Nell'ambito dell'attività di progettazione, produzione, commercializzazione e riparazione di trasformatori, il Gruppo si trova a servire soggetti appartenenti al settore siderurgico, metallurgico ed elettrochimico. Il Gruppo opera, inoltre, con l'obiettivo di garantire connessioni digitali, veloci e affidabili supportando i

Teleborsa: distribution and commercial use strictly prohibited



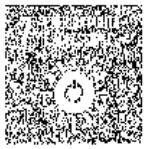
propri partner anche nell'attività di sviluppo di soluzioni smart. In quest'ottica si inserisce anche l'attività di concessione di diritto d'uso di fibra ottica, nell'ambito della quale il Gruppo ha in essere contratti con diversi clienti appartenenti principalmente al settore delle telecomunicazioni. Infine, Terna sviluppa delle "energy solutions" per imprese che vogliono valutare e integrare impianti rinnovabili, sistemi di storage e soluzioni di cogenerazione all'interno del proprio ciclo produttivo, offrendo anche soluzioni di revamping/repowering di impianti fotovoltaici.

Infine, le **attività svolte a valle della catena del valore** si concentrano su:

- **Trasporto e logistica:** attività, affidate a partner esterni specializzati in grado di garantire la tracciabilità dei prodotti, connesse al trasporto e alla logistica dei prodotti finiti dai siti di produzione ai clienti finali;
- **Smaltimento rifiuti e fine vita dei prodotti:** attività di trasporto e di smaltimento dei rifiuti, relative anche alla gestione del fine vita degli asset e delle opere.

Tra gli attori principali di questa fase rientrano le imprese terze adibite allo smaltimento.

Per maggiori informazioni circa la metodologia che il Gruppo ha adottato al fine di procedere con la mappatura della propria catena del valore, si prega di far riferimento al paragrafo "La Doppia Rilevanza" all'interno della Rendicontazione Consolidata di Sostenibilità.
Inoltre, sempre con riferimento alla catena del valore, il Gruppo pone grande attenzione alla misurazione e alla valutazione dei risultati in termini di vantaggi attuali o previsti dei soggetti con cui si confronta. Gli outcome generati vengono valutati, in linea con quanto effettuato anche con riferimento al modello di business, in qualità di vantaggi che gli stakeholder ottengono sia da un punto di vista finanziario, che da un punto di vista di impatti sociali-relazionali e ambientali prodotti. Ne risulta che il modello di business di Terna, oltre a generare impatti positivi per il Gruppo, contribuisce a creare i presupposti per la generazione di risultati positivi anche per gli attori della catena del valore.



Teleborsa: distribution and commercial use strictly prohibited

SDGs di riferimento

I Sustainable Development Goals (SDGs) delle Nazioni Unite, fulcro dell'Agenda 2030, sono per Terna un riferimento valoriale che trova negli SDGs 7 (Energia pulita e accessibile), 9 (Industria, Innovazione e Infrastrutture) e 13 (Agire per il clima) una piena correlazione con la sua mission e l'obiettivo strategico della just transition la cui realizzazione identifica nel SDG 17 (Partnership per gli obiettivi) un ulteriore stimolo in termini di acceferazione.

Gli SDGs sintetizzano anche la coerenza del processo di creazione di valore di Terna con l'obiettivo di realizzare un successo sostenibile i cui risultati operativi sono misurati attraverso puntuali indicatori riportati in tutta la Relazione.

SDGs di riferimento per Terna

Assicurare a tutti l'accesso a sistemi di energia economici, affidabili, sostenibili e moderni.

Costruire una infrastruttura resiliente e promuovere l'innovazione e una industrializzazione equa, responsabile e sostenibile.

Adottare misure urgenti per combattere il cambiamento climatico e le sue conseguenze.

Rafforzare i mezzi di attuazione e rinnovare il partenariato mondiale per lo sviluppo sostenibile.

Il mutato contesto socioeconomico, negli ultimi anni pesantemente influenzato a livello globale dalla successione di eventi quali la crisi inflazionistica ed energetica e le ricadute dei conflitti tuttora in corso in Ucraina e in Medioriente, se da un lato rende ancora più urgente una piena realizzazione della transizione energetica – anche nei termini di una piena autonomia e sicurezza energetica del Paese – dall'altro ne ridefinisce la portata includendo considerazioni in termini di equità e inclusione sociale.

In altre parole, è necessario che il percorso verso la decarbonizzazione coincida con una ripartenza delle economie allineata a modelli inclusivi e resilienti anche in termini sociali che considerino prioritaria la necessità di contrastare la progressiva erosione della coesione sociale e, più in generale, del rispetto dei diritti umani.

Teleborsa: distribution and commercial use strictly prohibited

Nel loro insieme gli SDGs rappresentano un punto di riferimento anche per gli aspetti gestionali che caratterizzano l'operatività di Terna, indirizzandola verso obiettivi ambientali (ad esempio l'uso efficiente delle risorse naturali, il rispetto dell'ambiente, della vita sott'acqua, la riduzione delle emissioni di CO_2, la riduzione e il riciclo dei rifiuti), sociali (istruzione di qualità, rispetto dei diritti umani e della parità di genere) e di buona governance (contrasto alla corruzione e trasparenza nel reporting).

In tal senso Terna persegue anche gli SDGs 4 (Istruzione di qualità), 5 (Uguaglianza di genere), 8 (Lavoro dignitoso e crescita economica), 10 (Ridurre le disuguaglianze), 11 (Città e comunità sostenibili), 12 (Consumo e produzione responsabile), 14 (La vita sott'acqua), 15 (La vita sulla terra) e 16 (Pace, giustizia e istituzioni solide).

SDGs di riferimento per la gestione delle attività di Terna

Assicurare un'istruzione di qualità, equa e inclusiva, e promuovere opportunità di apprendimento permanente per tutti.

Ridurre l'ineguaglianza all'interno di e fra le Nazioni.

Conservare e utilizzare in modo durevole gli oceani, i mari e le risorse marine per uno sviluppo sostenibile.

Raggiungere l'uguaglianza di genere e l'*empowerment* (maggiore forza, autostima e consapevolezza) di tutte le donne e le ragazze.

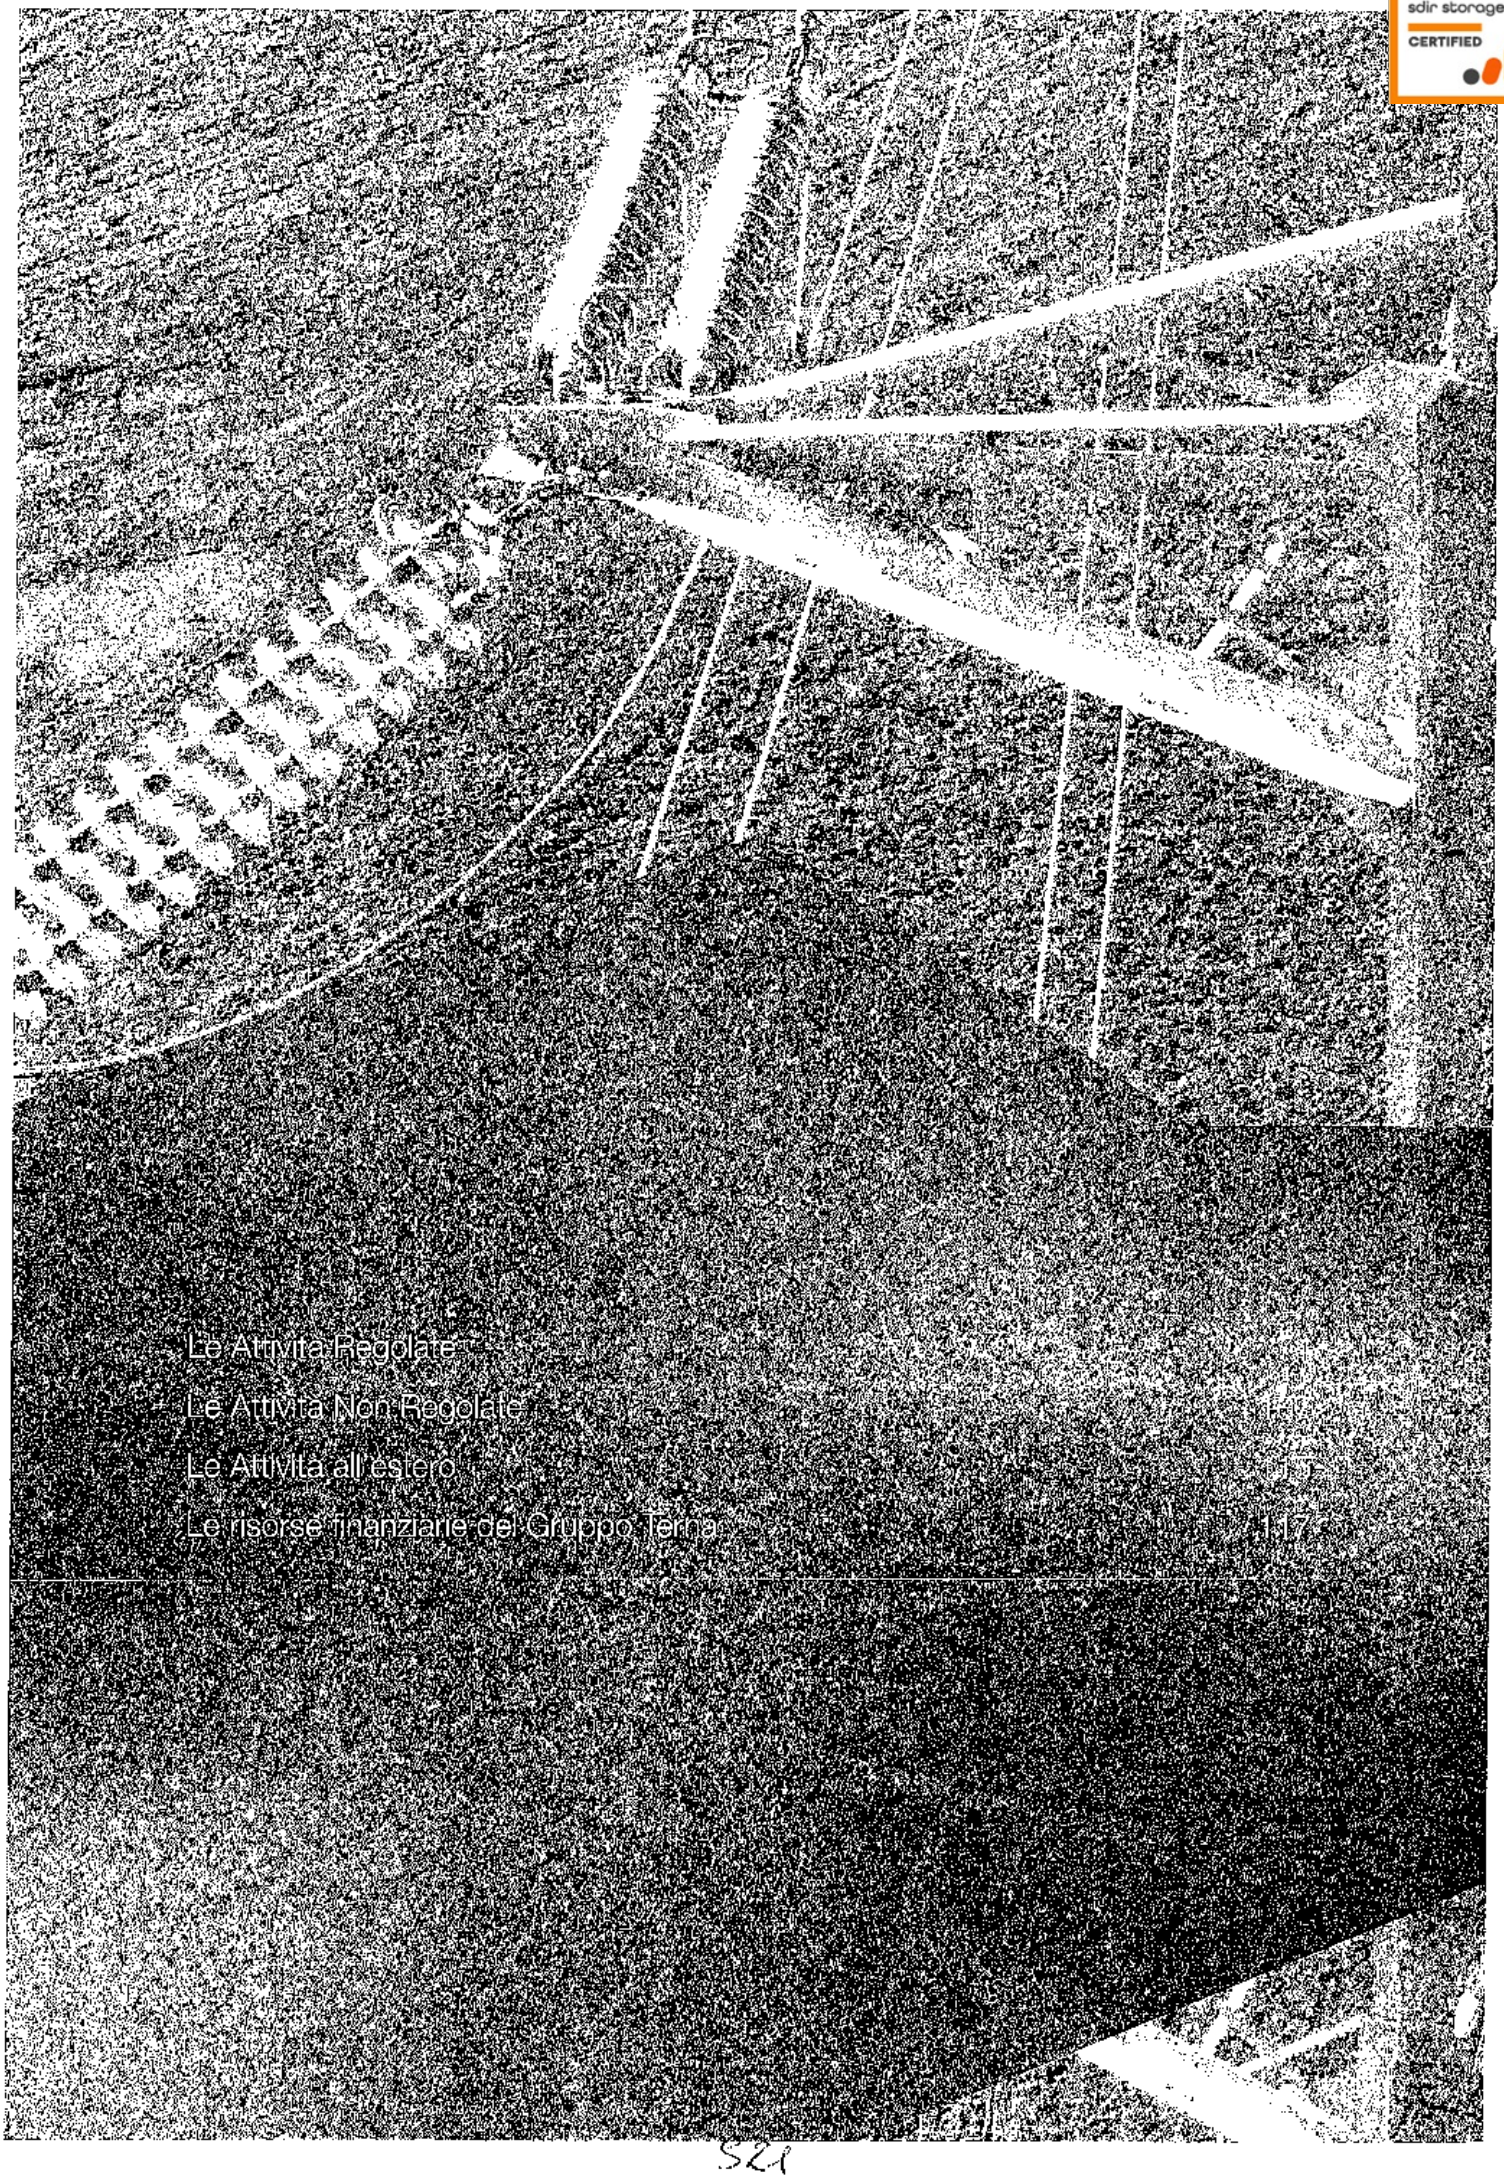
Rendere le città e gli insediamenti umani inclusivi, sicuri, duraturi e sostenibili.

Proteggere, ripristinare e favorire un uso sostenibile dell'ecosistema terrestre, gestire sostenibilmente le foreste, contrastare la desertificazione, arrestare o far retrocedere il degrado del terreno e fermare la perdita di diversità biologica.

Incentivare una crescita economica duratura, inclusiva e sostenibile, un'occupazione piena e produttiva e un lavoro dignitoso per tutti.

Garantire modelli sostenibili di produzione e consumo.

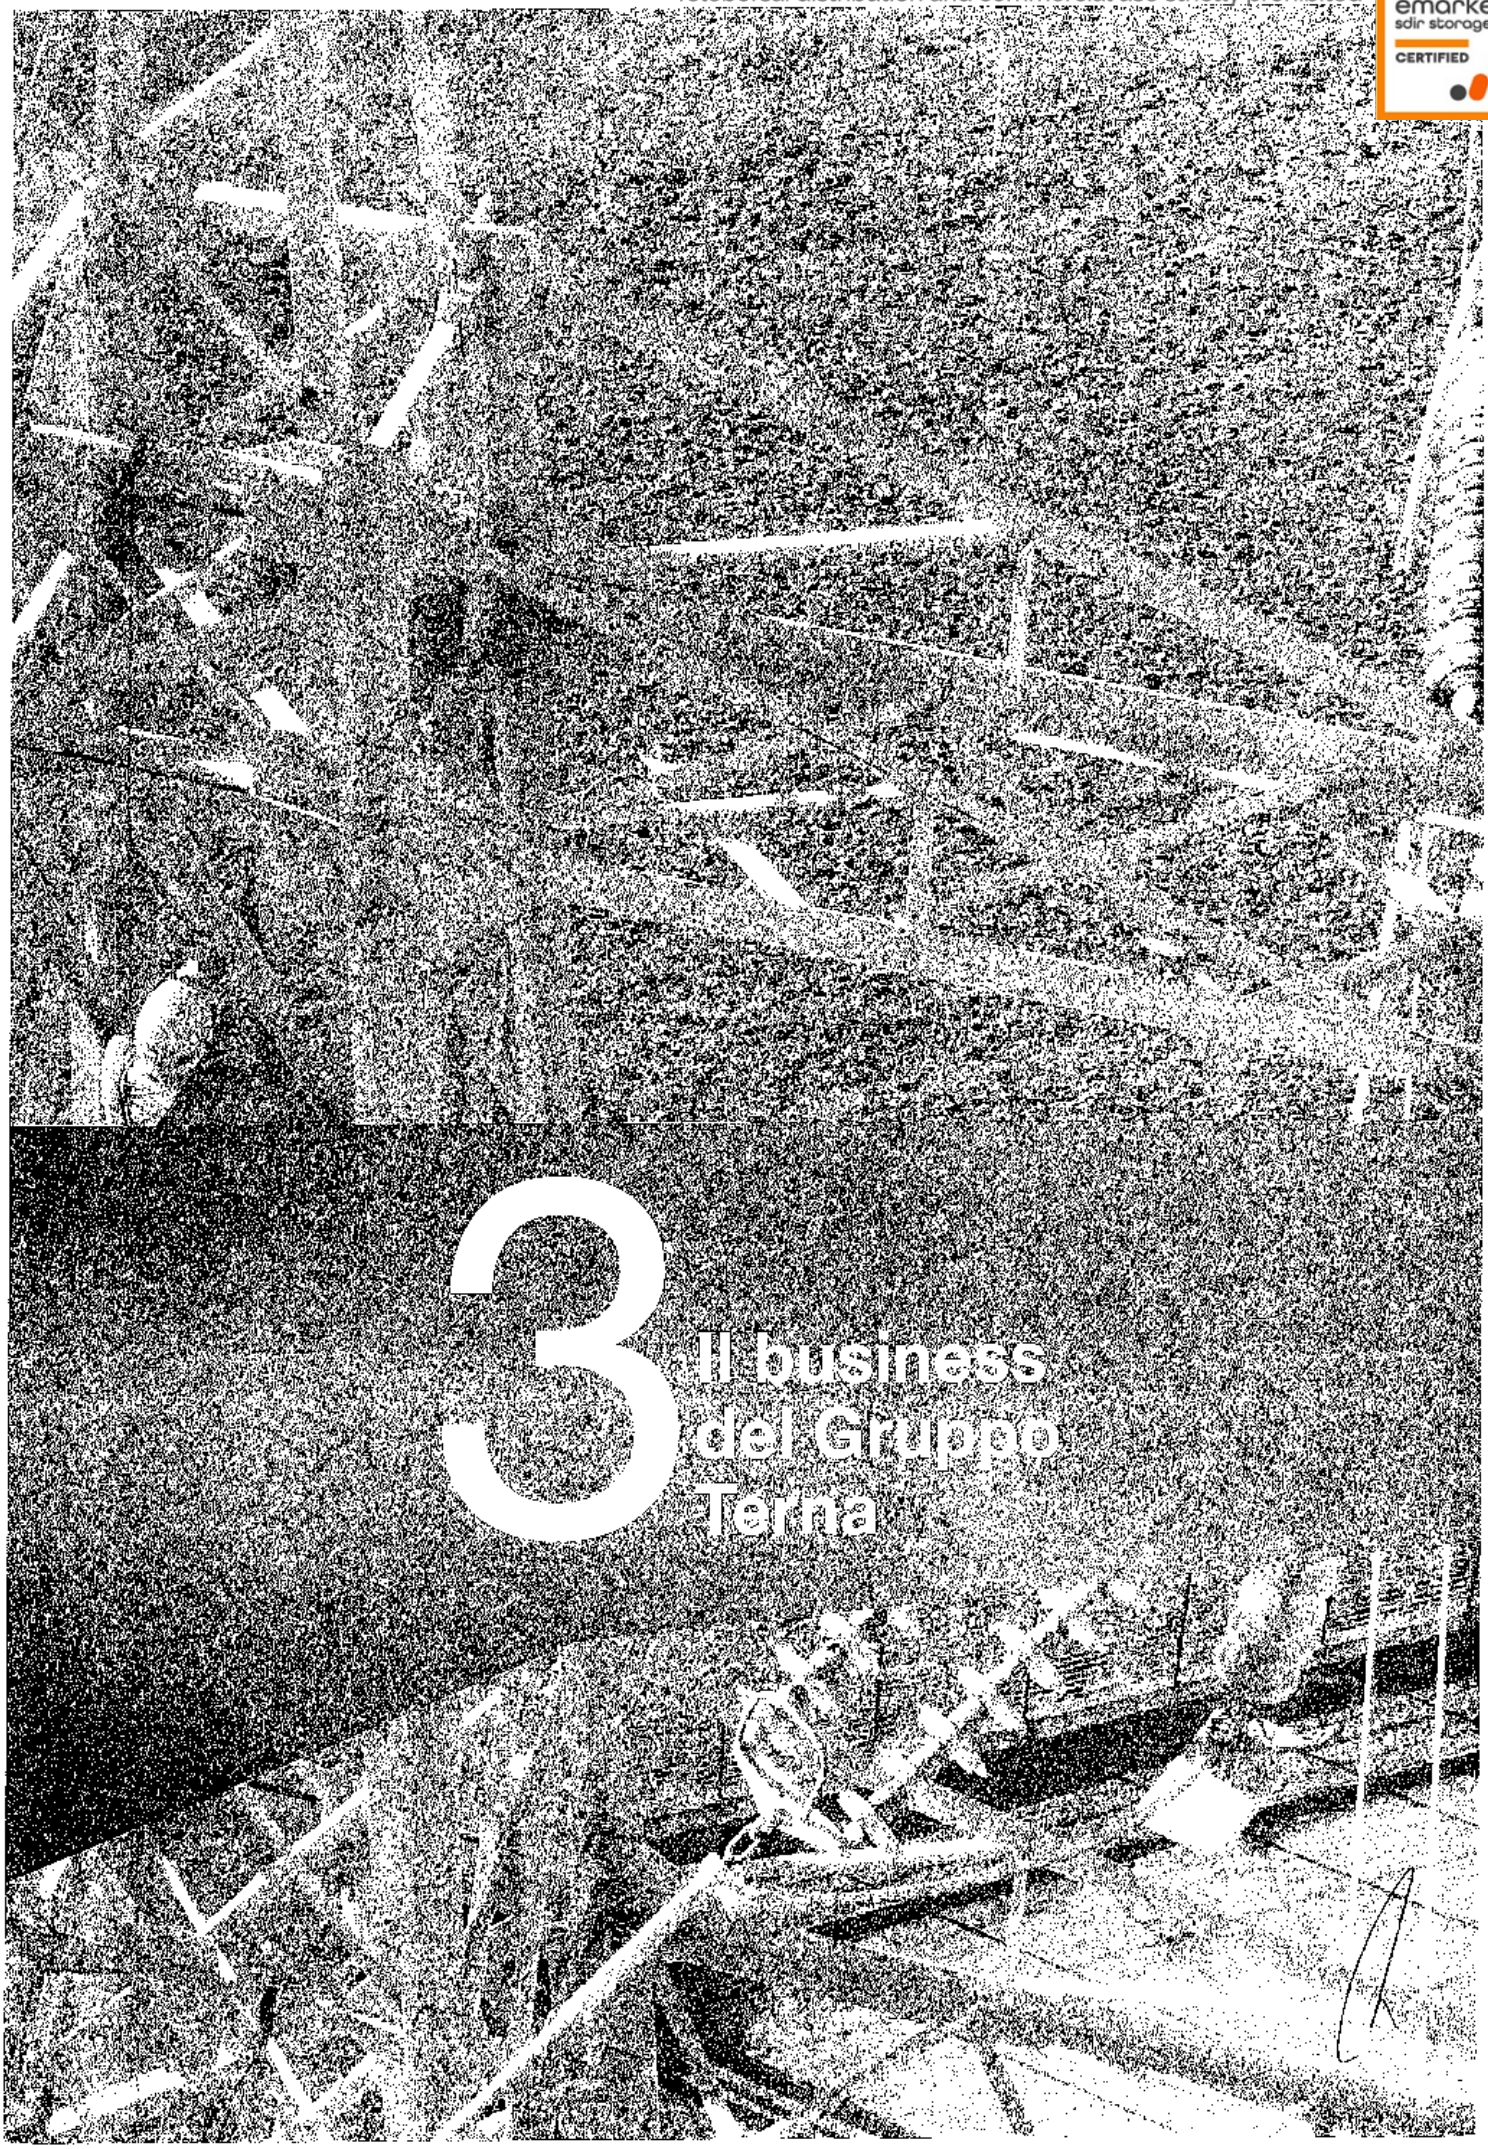
Promuovere società pacifiche e più inclusive per uno sviluppo sostenibile; offrire l'accesso alla giustizia per tutti e creare organismi efficienti, responsabili e inclusivi a tutti i livelli.



Gli SDGs rappresentano indubbiamente un caposaldo per Terna, essendo parte integrante dell'orientamento delle attività aziendali e trasversali in diversi ambiti strategici presenti all'interno delle Politiche del Gruppo.

Si richiama, infatti, agli SDGs, la Politica del Sistema di Gestione Integrato del Gruppo Terna come anche la Politica di Sostenibilità, attraverso la quale vengono delineati i principali impegni da parte del Gruppo in materia di sostenibilità.

Un'ulteriore Politica che si rifà agli SDGs è quella di Corporate Giving, i cui indirizzi e priorità sono stabiliti in attuazione delle strategie aziendali, degli obiettivi di sostenibilità, di eventuali rilevazioni ad hoc presso gli stakeholder, del posizionamento dell'Azienda, della valutazione delle attività e dei piani già realizzati e dei risultati ottenuti. In particolare, le cause verso le quali il Gruppo Terna rivolge la sua attenzione sono legate prioritariamente al perseguimento degli obiettivi n. 4, 9 e 11.



Si segnala, infine, che il Piano di Audit del Gruppo Terna tiene in considerazione anche tematiche legate agli SDGs che permeano quindi il modello di governance e del sistema di controllo interno, in coerenza con la missione e gli obiettivi aziendali.

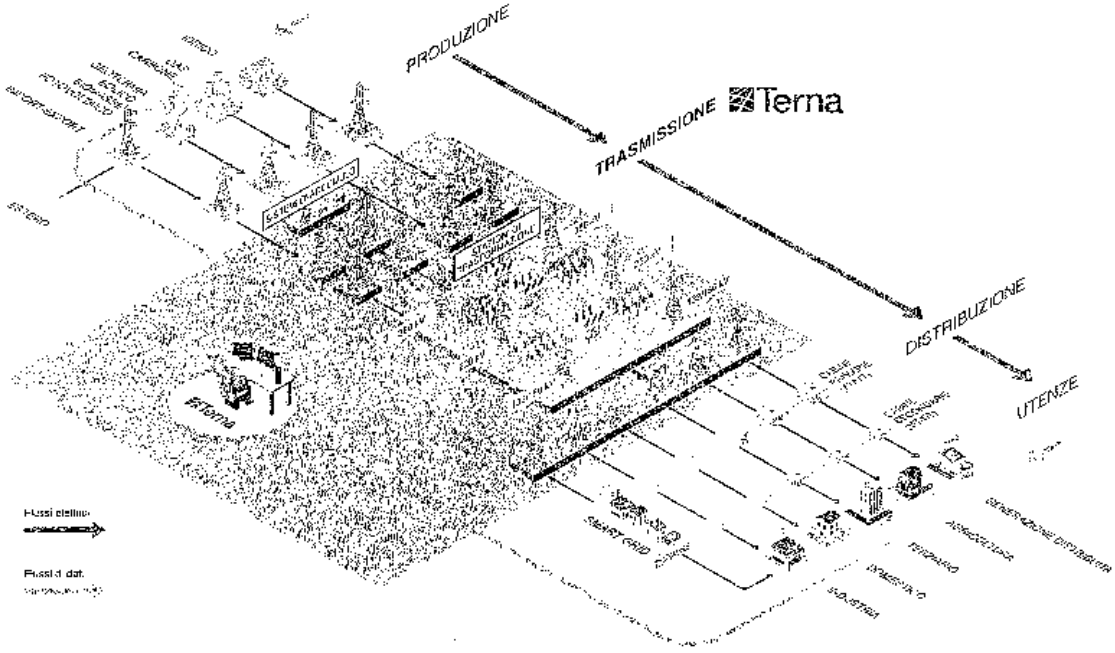
3 Il business del Gruppo Terna

Teleborsa: distribution and commercial use strictly prohibited



Il business model dell'anno 2024 del Gruppo Terna si è articola in tre filoni di attività. Il principale è costituito dalle Attività Regolate (AR) e coincide con gli obblighi derivanti dalla concessione governativa cui si affiancano le Attività Non Regolate (ANR) e le Attività all'estero.

Le Attività Regolate

La Trasmissione dell'energia elettrica: il ruolo di Terna per il Paese

La filiera del sistema elettrico si compone di diversi segmenti: produzione, trasmissione, distribuzione e vendita di energia elettrica. Con le attività di trasmissione e dispacciamento, Terna occupa il segmento fondamentale della trasmissione.

La filiera del sistema elettrico nazionale

In qualità di **Transmission System Operator (TSO)**, infatti, Terna deve non solo disegnare una rete in grado di gestire la progressiva decarbonizzazione e una sempre maggiore integrazione delle rinnovabili (*transmission operator*), ma anche garantire, istante per istante, che l'energia richiesta dai consumatori sia sempre in equilibrio con quella prodotta, attraverso il cosiddetto **dispacciamento** (*system operator*). Terna ha il fondamentale e delicato compito di garantire questo equilibrio attraverso un sistema di controllo altamente tecnologico, utilizzando un apposito mercato dove acquista i servizi necessari per assicurare costantemente la continuità e la sicurezza della fornitura di energia elettrica.

Terna, oltre ad avere l'obiettivo di rinforzare la rete interna, è tenuta a sviluppare la capacità di **interconnessione con i sistemi elettrici degli altri Paesi**. L'Italia, infatti, è interconnessa elettricamente con la Francia, la Svizzera, l'Austria, la Slovenia, il Montenegro e la Grecia attraverso 30 linee di interconnessione.

Teleborsa: distribution and commercial use strictly prohibited

Rete di Trasmissione Nazionale

Terna **gestisce** la rete di trasmissione nazionale italiana (RTN) dell'elettricità in alta e altissima tensione, tra le più moderne e tecnologiche d'Europa. La pianificazione degli interventi di sviluppo della Rete Elettrica Nazionale, le attività di realizzazione delle opere e di manutenzione delle infrastrutture elettriche sono i tre ambiti nei quali si articola il processo operativo dell'Attività Regolata di Trasmissione dell'energia elettrica.

Tale processo è caratterizzato, in ogni sua fase, da un **approccio di sostenibilità** che si concretizza in una trasparente gestione del capitale sociale e relazionale di Terna attraverso il coinvolgimento di tutti gli stakeholder interessati dagli interventi di sviluppo del Gruppo, nell'ottica di una sempre maggiore sensibilizzazione sull'importanza della realizzazione e gestione di tali infrastrutture elettriche.

Le infrastrutture di Terna*

915 stazioni elettriche	75.236 km di terne	68.374 km di linee 94% aeree	n° 4 centri di controllo
781 trasformatori	5 siti di accumulo	7.329 stalli	236.707 campate

** Dati aggiornati al 31 dicembre 2024, tranne quello delle campate che è aggiornato ai primi mesi del 2025.*

La connessione di nuovi impianti

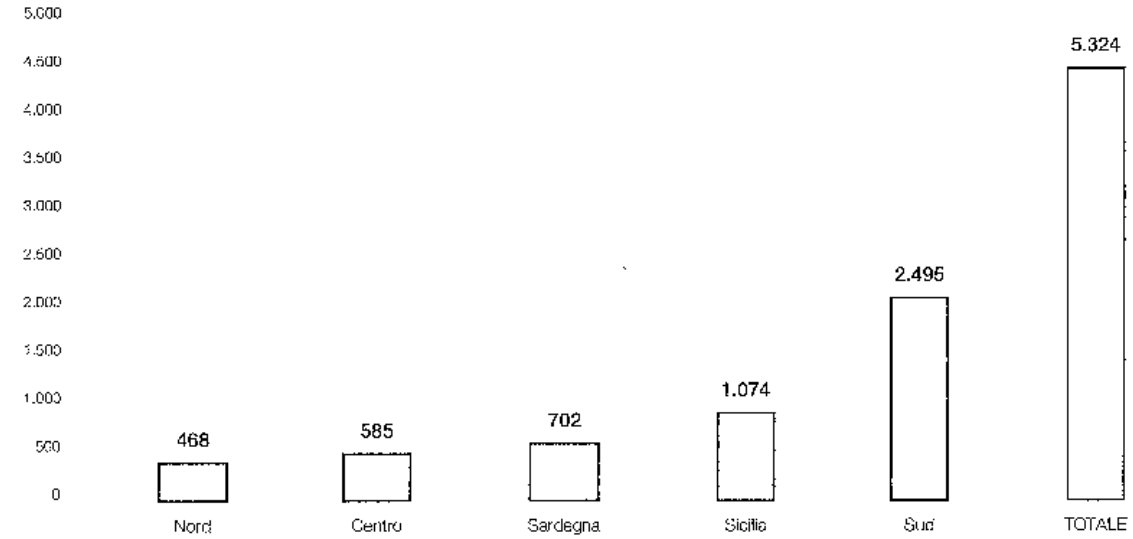
Terna ha l'obbligo di connettere alla rete tutti i soggetti che ne facciano richiesta, individuando le soluzioni di connessione in base a criteri che garantiscano la continuità e la sicurezza di esercizio della rete su cui il nuovo impianto del richiedente va a inserirsi. In particolare, Terna è competente per la connessione alla RTN di impianti con una potenza uguale o superiore a 10 MW.

Le richieste di connessione gestite da Terna, corrispondenti a pratiche di connessione su RTN con preventivo di connessione accettato per iniziative future o in corso, sono circa 9.000. Per quanto riguarda gli impianti da Fonte Energetica Rinnovabile (FER), risultano oltre 5.300 pratiche di connessione con Soluzione Tecnica Minima Generale (STMG) per la connessione accettata su RTN per una potenza di circa 305 GW.

In particolare, i nuovi progetti in fase di sviluppo riguardano soprattutto impianti da fonte eolica e solare.

Tutte le informazioni sulle richieste di connessione di impianti rinnovabili sono consultabili nella dashboard **Econnextion**[35].

Si evidenzia che:



- il Sud e le Isole coprono numericamente l'80% delle richieste, per una potenza equivalente di oltre l'82% del totale;
- si registra un forte incremento delle richieste di connessione per nuovi impianti di distribuzione o potenziamenti di impianti esistenti da parte dei distributori locali, finalizzati alla raccolta di fonti rinnovabili;
- nel corso del 2024 sono stati **siglati 33 contratti di connessione** (per una **potenza di circa 1.120 MW**) per la realizzazione di nuovi impianti di fonti rinnovabili.

Dispacciamento dell'energia elettrica

Salvo specifici e limitati casi, l'energia elettrica non si può immagazzinare. È quindi necessario produrre, istante per istante, la quantità di energia richiesta dall'insieme dei consumatori (famiglie e aziende) e gestirne la trasmissione in modo che l'offerta e la domanda siano sempre in equilibrio, garantendo così la continuità e la sicurezza della fornitura del sistema elettrico. Terna gestisce questi flussi di energia sulla rete attraverso l'attività di dispacciamento.

L'attività di dispacciamento include la programmazione delle indisponibilità di rete e degli impianti di produzione con diversi orizzonti temporali, la previsione del fabbisogno elettrico nazionale, il suo confronto di coerenza con il programma delle produzioni determinato come esito del mercato libero dell'energia (Borsa Elettrica e contratti fuori Borsa), l'acquisizione di risorse per il dispacciamento e la verifica dei transiti di potenza per tutte le linee della rete.

In tale ambito rientra inoltre la gestione del **Mercato dei Servizi di Dispacciamento (MSD)**, attraverso il quale vengono approvvigionate le risorse per i servizi di dispacciamento.

In particolare, il controllo in tempo reale del Sistema Elettrico Nazionale è assicurato dal **Centro Nazionale di Controllo**, centro nevralgico del Sistema Elettrico Nazionale italiano, rinnovato nel 2024 a oltre sessant'anni dalla sua nascita (1963). Il Centro Nazionale di Controllo coordina gli altri centri sul territorio, effettua il monitoraggio del sistema ed esercita l'attività di dispacciamento intervenendo, con comandi ai produttori e ai Centri di Teleconduzione, in modo da modulare l'offerta e l'assetto della rete. Per evitare il rischio di disalimentazioni estese, può intervenire in emergenza anche a riduzione della domanda.

Teleborsa: distribution and commercial use strictly prohibited

Principali eventi 2024 dell'attività del dispacciamento

Nonostante il verificarsi di condizioni di esercizio particolarmente sfidanti, anche nel 2024 Terna ha **garantito sempre al Paese la continuità e la sicurezza del servizio elettrico.** La rete, infatti, è stata sottoposta a livelli record di produzione da fonti rinnovabili e a variazioni nei profili di consumo, con alta volatilità delle condizioni meteo. Terna ha comunque assicurato l'esercizio in sicurezza grazie agli interventi di sviluppo della rete e all'ottimizzazione dei processi operativi a supporto della pianificazione e della gestione in tempo reale. Terna continua il proprio impegno nel permettere il massimo ritiro di energia prodotta da fonti rinnovabili.

Fonti Rinnovabili Dispacciate (Picco di produzione)

Nel 2024 la produzione di energia rinnovabile ha fatto registrare valori record, coprendo il 41,2% dell'intero fabbisogno del 2024, quest'ultimo in crescita rispetto al 2023 (+2,2%), con picchi elevati nei mesi estivi (allineati a quelli degli anni precedenti).

In particolare, nel 2024 la copertura con fonte eolica è stata in riduzione del -5,6% rispetto al 2023 a causa dei lunghi periodi di scarsa ventosità; nonostante la flessione, il dato di massima produzione nazionale oraria ha toccato un valore di energia pari a 8,4 GWh. Il giorno 20 dicembre alle ore 13:00-14:00, in linea con il dato record del 2023, la produzione eolica ha coperto circa il 21% del fabbisogno italiano di energia elettrica.

La produzione da fonte fotovoltaica ha continuato a superare i record storici nel 2024 anche grazie alla crescita dell'installato, raggiungendo i 19,55 GWh (dato provvisorio soggetto a ricalcolo) di produzione il giorno 10 maggio 2024 alle ore 12:00-13:00. La produzione fotovoltaica in tale occasione ha coperto circa il 49% del fabbisogno italiano di energia elettrica.

Allargando il perimetro e considerando la copertura del fabbisogno italiano di energia elettrica da FER - includendo dunque l'energia da fonte idroelettrica, fotovoltaica, geotermoelettrica e biomassa – nel 2024 è stato registrato un massimo di energia oraria pari a 33,62 GWh (dato provvisorio soggetto a ricalcolo) il 22 giugno alle ore 13:00-14:00 con una copertura oraria del 89,5% del fabbisogno nazionale (37,6 GWh). Il massimo carico si è registrato nel mese di luglio con un picco di 57,5 GW, il 18 luglio alle ore 15:00-16:00.

Il 2024 è stato caratterizzato da un'alta idraulicità con dato di energia prodotta pari a 53,5 TWh, in aumento del 30% rispetto all'anno precedente. A questo aumento hanno contribuito le maggiori piogge e nevicate che hanno caratterizzato il 2024.

Continua l'impegno di Terna nella massimizzazione del ritiro di energia prodotta da fonti rinnovabili attraverso interventi caratterizzati da basso costo di investimento (cosiddetti capital light) sia tra zone di mercato per l'aumento dei limiti di transito, che all'interno delle medesime zone. Fanno parte di queste azioni, ad esempio, la rimozione di elementi limitanti dagli stalli in alta tensione delle stazioni elettriche appartenenti alla rete rilevante (di Terna o di terzi) e l'ampliamento del perimetro del Dynamic Thermal Rating (DTR). Particolarmente significativa è stata altresì la profonda revisione dei principi di controllo dinamico dei limiti di transito e il potenziamento dei Sistemi di Difesa. Inoltre, l'impegno continuo riguarda anche l'ottimizzazione dell'utilizzo degli asset in tempo reale per assicurare il massimo ritiro possibile dell'energia eolica prodotta in sicurezza.

Prove di riaccensione e di rialimentazione anti "Black-out"

Nel corso del 2024 sono state eseguite due prove reali di ripristino da blackout, necessarie per verificare le condizioni di funzionamento del sistema elettrico e migliorarne l'efficienza garantendo rapidità nella ripresa del servizio in caso di blackout.

Alla fine del mese di settembre, è stata eseguita la prova di una nuova direttrice di rialimentazione in Sicilia. La prova ha coinvolto parte della rete 220 kV tra la Stazione Elettrica di Sorgente e la Centrale di Termini Imerese, sincronizzando il nuovo gruppo della stessa centrale con la rete di trasmissione.

Nel mese di ottobre è stata eseguita la prova di un nuovo nucleo di ripartenza in Veneto. La prova ha coinvolto la Centrale di Soverzene, la nuova Stazione Elettrica Auronzo, parte della rete 220 kV, la Centrale Pelos e rialimentando i carichi 132 kV dell'Alto Bellunese e di Cortina D'Ampezzo.

Teleborsa: distribution and commercial use strictly prohibited

Accumuli elettrochimici (Fast Reserve e Capacity Market)

La progressiva riduzione dell'inerzia di un sistema elettrico determina generalmente un inasprimento delle variazioni della frequenza, le quali devono essere contenute con tempi di risposta estremamente rapidi, non sempre compatibili con l'attuale contributo della regolazione primaria del parco di generazione tradizionale, soprattutto nello scenario di phase-out degli impianti a carbone caratterizzati da tempi di risposta particolarmente veloci durante i fronti iniziali dei disturbi di frequenza.

A supporto della gestione della rete, Terna ha attivato il progetto pilota Fast Reserve, approvato dall'ARERA con la Delibera n. 200/2020 nell'ambito dei progetti pilota definiti nella Delibera n. 300/2017, che prevede una sperimentazione per migliorare la risposta dinamica del sistema nei primi istanti dei transitori di frequenza grazie all'utilizzo di accumuli elettrochimici (BESS). Questo nuovo servizio è stato approvvigionato tramite un'asta con contratti quinquennali: a fine 2024 risultano in esercizio circa 160 MW.

Gli asset che partecipano al progetto sono in grado di fornire risposte in potenza con tempi di attivazione non superiori a un secondo, innescabili per mezzo di opportune logiche automatiche su base locale o tramite telepilotaggio remoto da parte degli operatori del Centro Nazionale di Controllo.

Al fine di affrontare le sfide legate ai nuovi scenari di produzione con crescente penetrazione delle fonti rinnovabili e fornire un ampio spettri di servizi per il sistema, sono stati introdotti inoltre ulteriori approvvigionamenti di capacità di accumuli elettrochimici (BESS), tramite le aste del Capacity Market, per un totale di circa 1850 MW di potenza contrattualizzata, di cui 950 MW in esercizio a fine 2024. Tali impianti, oltre a supportare l'adeguatezza del sistema elettrico accumulando energia nelle ore di alta disponibilità delle fonti rinnovabili per poi restituirla al sistema quando più utile, presentano anche una risposta in potenza molto rapida che li rende fondamentali nel processo di gestione del phase-out delle generazioni tradizionali, in quanto capaci di erogare/assorbire potenza attiva/reattiva dalla rete in tempi brevissimi contribuendo tempestivamente a supportare in modo efficiente le varie regolazioni della rete.
Tali impianti sono utilizzati per la regolazione primaria di frequenza (FCR), secondaria (FRR) e terziaria (RR) di potenza: in particolare a fine dicembre 2024 risultano abilitati circa 150 MW di semi banda asserviti al regolatore nazionale frequenza/potenza.

Grazie alla loro flessibilità, i BESS sono inoltre utilizzati anche per i servizi ancillari non rolativi alla frequenza (es. regolazione di tensione e modulazione straordinaria).

Mezzi di compensazione

Nell'ambito del Piano di Miglioramento dei Sistemi di Difesa per la Sicurezza del Sistema Elettrico Nazionale (Piano Sicurezza), al fine di intervenire nel contenimento delle alte tensioni, Terna ha definito un rilevante piano di installazione di dispositivi di regolazione della potenza reattiva.

Al 2024 sono stati installati 12 reattori, localizzati principalmente nel centro e sud Italia e nelle isole.

Infine, si confermano al 2024 le 16 macchine dal piano di installazione che contribuiranno alla regolazione delle tensioni nelle aree di installazione, oltreché fornire al sistema un contributo in termini di inerzia e di potenza di corto circuito, tradizionalmente fornita da impianti convenzionali basati su generatori sincroni, che nei prossimi anni vedranno una riduzione nel numero di ore di presenza in servizio e/o dismissioni.

ENTSO-E (European Network of Transmission System Operators for Energy)

Nel corso del 2024 è stata implementata la Roadmap per la Sincronizzazione dei TSO Baltici con l'area sincrona della Continental Europe (CESA); la Synchronization Roadmap era stata approvata nel novembre 2023 dal Regional Group Continental Europe (RGCE) ENTSO-E.

L'accordo per la sincronizzazione dei sistemi elettrici Baltici con la CESA era entrato in vigore inizialmente nel 2019, tuttavia il processo di sincronizzazione è stato accelerato a seguito dell'invasione dell'Ucraina nel febbraio del 2022.

Nell'ambito della Synchronization Roadmap, a giugno 2024 sono state validate le analisi di conformità dei TSO Baltici nei confronti dei requisiti tecnici e di framework operativo stabiliti in ambito ENTSO-E attraverso il Catalogue of Measures (CoM); queste analisi sono state approvate dal Regional Group Continental Europe (RGCE) all'interno del System Operations Committee (SOC) ENTSO-E.

In data 16 luglio 2024 i TSO di Lettonia (AST), Estonia (Elering) e Lituania (Litgrid) hanno notificato agli operatori di Russia e Bielorussia la loro volontà di non rinnovare l'accordo di interconnessione tra i sistemi elettrici Baltici e i sistemi Russi e Bielorussi, accordo noto come BRELL Agreement (Belarus, Russia, Estonia, Latvia and Lithuania Agreement).

Nel mese di ottobre 2024 è stato revisionato in ambito RGCE il Baltic Power System Island Operation Test program, mentre a novembre è stato approvato il framework complessivo per il test di funzionamento in isola dei sistemi elettrici baltici "Framework for BSPS island operation test preparation and performance".

La sincronizzazione di prova tra TSO Baltici ed Europa Continentale è stata effettuata nel mese di febbraio 2025.

Scambio estero

L'anno 2024 si è chiuso con valori record in termini di volumi scambiati con gli altri Paesi accoppiati nel Market Coupling (+8% rispetto al 2023). I volumi scambiati tramite SDAC (Single Day-Ahead Coupling) e SIDC (Single Intra-Day Coupling) nel 2024 rappresentano circa il 54% dei volumi totali scambiati con l'estero.

Il saldo estero 2024 registra un valore in importazione di energia elettrica pari a 51,0 TWh, in linea con il 2023. Tale netto incremento è conseguenza di una forte aumento dell'export (+47,9%) e di un aumento dell'import (+2,4%) rispetto all'anno 2023. Rilevante per tale aumento il ruolo delle interconnessioni, come strumento di efficienza e sicurezza per il sistema elettrico.

Prevenzione e gestione delle emergenze sul sistema elettrico

Come rilevato da Legambiente[37], nel 2024 il territorio italiano è stato interessato da oltre 350 eventi meteorologici estremi, in linea con le numeriche dell'anno precedente. Si registra un incremento significativo degli allagamenti da piogge intense (+12%) ed esondazioni fluviali (+24%), particolarmente rilevanti in Emilia-Romagna tra settembre e ottobre. A esse si aggiungono le copiose nevicate cadute in Piemonte a marzo, le elevate temperature e gli incendi boschivi della stagione estiva al Centro-Sud e i violenti nubifragi con forti venti che si sono abbattuti sull'intera Penisola nel mese di novembre.

In questo contesto sfidante, Terna ha assicurato un elevato livello di resilienza della Rete di Trasmissione Nazionale grazie all'adozione di strategie operative e misure per il rapido ripristino del servizio elettrico. Un impegno costante che ha permesso di ridurre al minimo gli impatti sulla fornitura di energia elettrica alle utenze, garantendo elevati standard di qualità del servizio anche in condizioni critiche.

Tale risultato è il frutto di un approccio sistematico alla prevenzione e alla gestione dei rischi per il sistema elettrico, come testimoniato dalla partecipazione di Terna all'esercitazione nazionale "Exe Flegrei" organizzata nel mese di ottobre dal Dipartimento di Protezione Civile e dalla Regione Campania. Il medesimo approccio ha consentito di garantire la continuità e la sicurezza del servizio di trasmissione durante i 24 eventi del G7 ospitati dall'Italia nel corso dell'anno.

Testo Integrato del Dispacciamento Elettrico (TIDE)

Con la Delibera n. 499/2024, l'Autorità ha approvato le proposte di modifica al Codice di Rete trasmesse, proposte da Terna lo scorso 15 novembre, tese al recepimento del Testo Integrato del Dispacciamento Elettrico (TIDE).
Con la precedente Delibera n. 304/2024, ARERA aveva altresì disciplinato una implementazione per fasi del TIDE, prevedendo una fase transitoria (dal 1° gennaio 2025 al 31 gennaio 2026), una fase di consolidamento (dal 1° febbraio 2026) e una successiva fase di regime in cui troverà attuazione la piena applicazione del TIDE.
L'avvio della fase transitoria dal 1° gennaio 2025 ha richiesto nel corso del 2024 modifiche rilevanti a sistemi e procedure del Dispacciamento; il Go-Live del 1° gennaio ha visto i seguenti principali elementi di innovazione con impatto sui processi Terna:

- l'introduzione dell'unità temporale per la fatturazione degli sbilanciamenti (ISP) pari a 15 minuti;
- la separazione fra le nomine ai fini della programmazione e la posizione commerciale delle singole unità in esito ai Mercati dell'Energia;
- la facoltà per i Balancing Service Provider (BSP) di presentare offerte sul Mercato per il Bilanciamento e Ridispacciamento (MBR) riferite ad aggregati zonali, secondo quanto disciplinato dal Regolamento UVA valido per la fase transitoria del TIDE.

Le attività propedeutiche alle fasi di consolidamento e di regime proseguiranno durante l'intero 2025.

Principali interventi previsti nel Piano di Sviluppo

MDR-A

Gli interventi del Piano di Sviluppo 2025 perseguono l'obiettivo di **creare sinergia con le opere di sviluppo già pianificate** (nel Piano di Sviluppo 2023 e precedenti) **e con le infrastrutture esistenti**, al fine di garantire la massima sicurezza e flessibilità di esercizio, come descritto nell'ambito della sezione "La strategia per la creazione di valore".

L'architettura di rete al 2034 e post 2034 tiene conto della sinergia tra il progetto Hypergrid e gli interventi su rete AAT già pianificati, con **investimenti previsti per oltre 23 miliardi di euro nell'orizzonte decennale 2025-2034**.

Di seguito sono riportati principali interventi di sviluppo pianificati negli anni 2030, 2034 e post 2034.

* Sono in corso di valutazioni sulla possibilità di anticipo del progetto completo nell'orizzonte temporale di piano 2025-2034.

Si tratta di un Piano di Sviluppo molto sfidante ma caratterizzato al tempo stesso da **elementi di solidità**:

- gli interventi previsti al 2030 sono stati già autorizzati e alcuni di essi sono in fase di costruzione;
- gli interventi al 2034 hanno già avviato gli iter autorizzativi;
- quelli previsti post 2034 sono in fase di concertazione delle opere.

A conferma dei benefici relativi agli interventi che maggiormente concorrono al raggiungimento degli obiettivi di decarbonizzazione e al raggiungimento della transizione energetica, **l'analisi costi-benefici ne ha dimostrato anche la piena sostenibilità** attraverso solidi indici di utilità per il sistema (IUS), nonostante uno sfidante contesto di costi crescenti.

Nel Piano di Sviluppo 2025 della Rete elettrica di Trasmissione Nazionale, Terna si pone l'obiettivo di estrarre maggior valore dagli asset esistenti, tramite interventi di tipo **capital light**, che si basano su strumenti e soluzioni innovative a bassa intensità di capitale, che si affiancano ai tradizionali interventi infrastrutturali, consentendo di perseguire benefici per la rete in termini di:

- incremento dei limiti di transito tra Zone di Mercato;
- mitigazione congestioni intrazonali;
- massimizzazione della produzione FER e riduzione del curtailment;
- massimizzazione e anticipo dei benefici attesi dall'entrata in servizio delle singole opere degli interventi di Sviluppo, anche durante le fasi intermedie.

Il progetto Hypergrid unitamente a tutti gli interventi previsti sulla rete AAT e gli interventi Capital Light inclusi nel Piano di Sviluppo 2025, in continuità con il Piano di Sviluppo 2023, consentiranno di traguardare gli obiettivi di decarbonizzazione comunitari, favorendo la connessione degli impianti rinnovabili attesi.

Piano Sicurezza e Piano Resilienza

MÀSA

Il Piano di Miglioramento dei Sistemi di Difesa per la Sicurezza del Sistema Elettrico Nazionale, detto anche Piano Sicurezza, è un programma quadriennale di interventi a tutela della sicurezza del sistema elettrico predisposto da Terna ai sensi della Legge 290 del 27 ottobre 2003, e presentato entro il 31 maggio di ciascun anno al Ministero dell'Ambiente e della Sicurezza Energetica (MASE) per l'approvazione.

Il **Piano Sicurezza 2024** rappresenta l'edizione n.21 e aggiorna le iniziative a tutela della sicurezza del sistema elettrico previste per il quadriennio 2024-2027 con investimenti per oltre 1,3 miliardi di euro.

Il **Piano Sicurezza 2024** rafforza i propri investimenti e iniziative per abilitare la transizione energetica del sistema elettrico nazionale sulla base dei seguenti tre indirizzi strategici:

- **tecnologia e innovazione a supporto della sicurezza del sistema** fondamentale per affrontare l'evoluzione del settore energetico (incremento rinnovabili, dismissioni impianti termoelettrici) con una gestione sempre più complessa e delicata del sistema elettrico, mantenendone gli elevati standard di sicurezza, efficienza e affidabilità. In particolare, l'adozione di soluzioni tecnologiche innovative rappresenta strumento chiave per consentire all'infrastruttura di autoregolarsi e di migliorare la stabilità, ottimizzando il funzionamento e la flessibilità di esercizio;
- **digitalizzazione per migliorare il funzionamento della rete,** ovvero una trasformazione digitale del sistema elettrico che coinvolge ogni ambito della sua gestione, dalla supervisione al controllo e difesa della rete fino a impattare le infrastrutture e gli asset di cui si compone. L'introduzione di nuove tecnologie digitali porta grandi benefici ma anche inevitabili rischi di natura cyber per i quali è necessario adottare soluzioni volte a prevenire e mitigare gli attacchi informatici incrementando il livello di resilienza digitale della rete elettrica;
- **incremento della resilienza delle infrastrutture verso eventi climatici severi**, affrontando una trasformazione climatica, caratterizzata dal susseguirsi di eventi meteorologici contrastanti e sempre più intensi e frequenti, attraverso sia la realizzazione di una rete robusta e resiliente sia sfruttando il potenziale offerto dalla digitalizzazione delle infrastrutture per garantire un funzionamento sicuro ed efficiente del sistema elettrico a seguito di eventi climatici severi.

Il Piano prevede, pertanto, iniziative per potenziare gli strumenti di gestione, controllo e difesa della rete innovandone le logiche di funzionamento, digitalizzare le proprie infrastrutture, installare macchine per la regolazione della tensione e la stabilità dinamica del sistema, implementare soluzioni per la sicurezza fisica e cibernetica degli asset della rete.

Allegato al Piano Sicurezza vi è il **Piano Resilienza**, piano aziendale trasversale che definisce tutte le iniziative finalizzate a prevenire e/o ridurre i danni sulla rete elettrica provocati da eventi meteorologici sempre più severi in intensità e frequenza e che comprende interventi di tipo infrastrutturale, valutati con la **Metodologia Resilienza** per neve e vento, ma anche iniziative di natura *capital-light* per mitigare gli effetti e/o ridurre i tempi di disalimentazione a seguito di un evento meteorologico severo.

L'edizione 2024 del Piano Resilienza presenta anche l'avanzamento delle attività di sviluppo e affinamento della Metodologia Resilienza per modellizzare i fenomeni meteoclimatici legati al dissesto idrogeologico.

FOCUS

Resilienza della rete elettrica e Metodologia Resilienza

Il cambiamento climatico sta evolvendo sempre più velocemente, con impatti su ogni aspetto della vita dell'uomo e sull'ambiente, sebbene le **strategie** adottate per il **cambiamento climatico**, previste sia dagli accordi di Parigi per il contenimento del riscaldamento globale entro la soglia di 1,5 C° sia dalle proposte del Fit for 55 e del RepowerEU, stiano definendo la strada per il raggiungimento della **decarbonizzazione** e della **neutralità climatica**.

In tale contesto, e ancor più negli scenari futuri, l'**energia** rappresenta un **elemento chiave** per guidare la **transizione energetica** e affrontare la **crisi climatica**.

Avere un'**infrastruttura elettrica sostenibile**, in grado di integrare e utilizzare fonti di energia "pulita", e **resiliente al clima** e ai possibili danni causati dalla crescente intensità e severità degli eventi meteorologici estremi, diventa uno dei **fattori abilitanti** per rispondere al **cambiamento climatico**.

Oltre a **sviluppare una rete robusta e resiliente** è, allo stesso tempo, fondamentale anche saper sfruttare il potenziale offerto dalla **digitalizzazione delle infrastrutture** per affrontare al meglio tale sfida e poter garantire un funzionamento sicuro ed efficiente del sistema elettrico a seguito di eventi climatici severi.

Nell'ambito del **climate assessment**, Terna, a partire dal 2020, si è dotata di uno strumento, la **Metodologia Resilienza**, il cui **carattere prospettico** per intercettare l'evoluzione e l'impatto del clima nei prossimi decenni, nonché il carattere **probabilistico** necessario a valutare guasti e contingenze multiple e il conseguente rischio di energia non fornita sulla rete a seguito del verificarsi di eventi meteorologici severi, consentono di implementare una **pianificazione efficace ed efficiente degli interventi per l'incremento della resilienza della rete**.

Nel corso di questi anni, la Metodologia Resilienza è stata oggetto di continue evoluzioni e affinamenti, proseguendo anche le analisi dei fenomeni meteoclimatici legati al dissesto idrogeologico con l'obiettivo di individuare la tipologia di eventi potenzialmente più impattante per la Rete di Trasmissione Nazionale (RTN) e di introdurne la modellizzazione all'interno della Metodologia Resilienza.

Il tema della resilienza, oltre al carattere prospettico e probabilistico, sta assumendo anche un carattere digitale, supportato dalle misure definite a livello europeo con il REpowerEU, attraverso il quale sono stati approvati, nel 2024, i finanziamenti a fondo perduto per 140 milioni di euro. In tale ambito è inclusa l'iniziativa per l'utilizzo di tecniche IoT finalizzate alla raccolta capillare delle informazioni sugli asset Terna, afferente al cluster della digitalizzazione della RTN con finalità anche per l'incremento della resilienza per eventi climatici severi. Tali finanziamenti si aggiungono ai 150 milioni di euro del PNRR, già approvati per Terna e finalizzati all'incremento della resilienza di 1.500 km di linee della RTN.

Teleborsa: distribution and commercial use strictly prohibited

Manutenzione delle infrastrutture

MDR-A

La manutenzione degli impianti della RTN è un'attività essenziale per garantire la qualità del servizio, la sicurezza degli asset gestiti (linee e stazioni elettriche) e il mantenimento delle prestazioni degli stessi durante il loro ciclo di vita, e è svolta in maniera continuativa durante e nel corso degli anni, e segue un approccio principalmente su condizione; sono tuttavia in corso una serie di progettualità per traghettare quota parte di attività verso un modello di manutenzione predittiva e basata sul rischio. **Gli strumenti informativi e digitali a oggi utilizzati a supporto delle attività manutentive** sono principalmente:

- il sistema a supporto delle decisioni **MBI (Monitoring and Business Intelligence)** il quale propone le attività manutentive da eseguire (monitoraggio, manutenzione e rinnovo) indicandone la differibilità di intervento;
- il software **WFM (Work Force Management)** deputato alla gestione della forza lavoro tramite la programmazione, schedulazione e consuntivazione delle attività manutentive di MBI.

Al contempo, in un contesto di grande cambiamento e trasformazione digitale, è in corso di sviluppo una nuova piattaforma, **Enterprise Asset Management (EAM)**, che permetterà di ottimizzare la gestione degli asset di un'organizzazione durante l'intero ciclo di vita ottimizzando la gestione dell'anagrafica degli asset, la gestione dei cataloghi delle attività, delle anomalie, delle policy (inclusi i modelli diagnostici e di calcolo degli indici di eleggibilità[39]) e del catalogo dei metodi di lavoro in linea con i processi di Asset Management (AM); e infine la pianificazione e la consuntivazione tecnico-economica del Piano Asset Management e dei Programmi AM.

Terna, inoltre, partecipa da numerosi anni ad attività di benchmarking internazionali finalizzati alla condivisione delle best practice in ambito O&M e rinnovo, attestandosi costantemente tra i migliori TSO in termini di efficienza del processo di asset management e ottimale qualità del servizio erogato[40].

Monitoraggio della rete

Gli interventi di monitoraggio, che avvengono con cadenza periodica nel corso dell'anno, sono finalizzati a verificare mediante misurazione, osservazione o prova delle caratteristiche pertinenti, lo stato di un determinato componente di linea o stazione ad alta tensione (AT) durante il suo ciclo di vita. Per le linee aeree e in cavo il monitoraggio viene effettuato mediante ispezioni a vista da terra e da elicottero (a vista, con strumentazione IR[41] e Lidar[42]). Per le stazioni, analogamente, sono effettuati controlli di sorveglianza periodici, controlli tecnici su intere unità funzionali e su Sistemi di Protezione Comando e Controllo, controlli tecnici termovisivi degli equipment di stazione e controlli dei servizi ausiliari[43].

Manutenzione ordinaria

Gli interventi di manutenzione ordinaria da effettuare, nel corso dell'anno, vengono individuati sulla base dei segnali di degrado derivanti dal processo di monitoraggio in sito oppure tramite analisi dati derivanti da sensoristica on-line. I segnali e le anomalie rilevate vengono elaborate tramite i modelli ingegneristici degli asset presenti in MBI e sviluppati da Asset Management in accordo con altre strutture organizzative aziendali; le risultanze dei modelli ingegneristici definiscono il piano manutentivo da attuare sugli asset per il mantenimento delle loro performance nel tempo.

[39] Parametri tramite i quali si definiscono le tempistiche di intervento degli asset.
[40] Come certificato dal report IAMS 2022, Terna si è confermata tra i top performance dei processi Asset Management e sulle operational performance.
[41] Raggi infrarossi.
[42] Lidar è una tecnologia di telerilevamento che permette di determinare la distanza dell'interferenza arboree dalle linee aeree.
[43] I servizi ausiliari sono l'insieme dei componenti elettrici che distribuisco le alimentazioni ai dispositivi elettrici presenti in stazione (relè, motori, componenti elettronici) del sistema primario e del Sistema di Protezione Comando e Controllo (SPCC). Tra i servizi ausiliari si trovano le batterie.

536

Teleborsa: distribution and commercial use strictly prohibited

Piano di Rinnovo

Il Piano di Rinnovo (PdR), sviluppato su base quinquennale, riferibile agli anni 2024-2028, si basa su una metodologia analitica che, a partire da parametri tecnici oggettivi e omogenei, individua e valida gli **interventi di manutenzione straordinaria** (rinnovo) valutando lo stato e le condizioni tecniche dei componenti di linea e delle apparecchiature di stazione, rapportati alle effettive condizioni di esercizio cui essi sono sottoposti e dando priorità a componenti e impianti di maggiore importanza per l'esercizio della rete elettrica.

Il processo di rinnovo impianti su condizione ha come obiettivo quello di realizzare interventi limitati alle sole parti di impianto che effettivamente lo richiedano, massimizzare l'utilizzo degli impianti al minimo costo (mantenendo in servizio e in efficienza ogni singolo componente il più a lungo possibile) e realizzare un piano di interventi a lungo termine basato sull'ordine di priorità di intervento.

Il Piano di Rinnovo è stato strutturato con le seguenti categorie di beneficio, di cui fanno parte le "Finalità di Rinnovo":

- **Sostenibilità:**
  - **Qualità dell'ambiente:** introduzione di asset maggiormente ecocompatibili e sostenibili per l'ambiente, come ad esempio trasformatori a olio vegetale, cavi a olio fluido o alcune tipologie di terminali cavo, oppure l'adeguamento tecnico di linee/interramenti e sostituzione di trasformatori di corrente e trasformatori di tensione;
  - **Qualità del servizio:** realizzazione di soluzioni atte al miglioramento dell'affidabilità degli asset, sulla base di analisi di Asset Management (finalizzate alla valutazione della condizione tecnica degli asset). Tali interventi migliorando l'affidabilità, riducono il valore di HI (*Health Index*) e il rischio di disservizio. Fanno parte di questa famiglia, ad esempio, gli investimenti relativi al rinnovo delle linee, il programma RIGEL (Riduzione Guasti Elettrodotti) e il rinnovo stazioni (apparati e macchinario).
- **Innovazione e digitalizzazione:**
  - **Qualità del processo O&M:** introduzione di nuove soluzioni e tecnologie per la maggiore efficacia del processo di esercizio e manutenzione, come ad esempio gli investimenti relativi al nuovo sistema di controllo digitale delle stazioni, alla diagnostica on-line delle apparecchiature di stazione, al monitoraggio dei cavi e alle separazioni funzionali.
- **Resilienza:**
  - Rafforzamento della rete dagli effetti del rischio neve, del rischio idrogeologico linee e rischio sismico stazioni. Fanno parte di questa famiglia, ad esempio, gli investimenti relativi all'incremento della resilienza di linee e stazioni in caso di neve e l'installazione di dispositivi per monitoraggio idrogeologico e l'installazione di smorzatori sismici.

Programmi di digitalizzazione asset

Al fine di migliorare e digitalizzare il processo della gestione degli asset (linee e stazioni elettriche) sono attivi da tempo i seguenti programmi di digitalizzazione:

- **DIgiS (Digitalizzazione stazioni):** prevede l'*upgrade* delle funzionalità rese disponibili dai Sistemi di Automazione Stazioni (SAS o SPCC), favorendo il processo di transizione di Terna verso una gestione degli asset sempre più efficiente, innovativa e *smart-digital*. Le attività sono rivolte sia a ottimizzare le prestazioni dei Sistemi di Automazione Stazioni per l'esercizio in sicurezza e affidabilità della rete, sia a fornire un monitoraggio sempre più spinto dello stato di funzionamento/degrado dei sistemi in sé, delle apparecchiature e dei macchinari di stazione;
- **DIgiC (Digitalizzazione cavi):** avviato già nel 2018, il piano prevede l'installazione di sistemi di monitoraggio su collegamenti esistenti già in esercizio. In aggiunta a ciò, è previsto che tutti i collegamenti in cavo di nuova realizzazione siano già progettati e posati con sistema di monitoraggio integrato. Le informazioni raccolte, riguardanti la condizione tecnica del cavo, saranno utilizzate per implementare una manutenzione preventiva di tipo predittivo, ovvero volta a individuare il tempo residuo prima del guasto e quindi ad agire preventivamente;
- **DIgiL (Digitazione linee):** il piano ha l'obiettivo di realizzare un sistema integrato di misura, raccolta ed elaborazione dati in tempo reale riferito ai parametri di esercizio delle linee elettriche aeree. Le campate interessate a tali interventi vengono opportunamente individuate tra le linee in alta tensione critiche al fine di ottimizzare l'esercizio delle stesse;
- **Rete mobile privata:** l'iniziativa, promossa da Terna in collaborazione con Wind Tre e avviata nel 2023, ha consentito di realizzare una **piattaforma per il monitoraggio** della rete elettrica nazionale, un'infrastruttura di rete privata in radiofrequenza che consente a Terna di migliorare l'efficienza operativa e gestire ancora più efficacemente le proprie infrastrutture attraverso la digitalizzazione degli asset. In particolare, Terna beneficia del potenziamento dei flussi

S3E

Teleborsa: distribution and commercial use strictly prohibited

informativi provenienti dalla sensoristica distribuita sulle proprie linee, sviluppando un modello di gestione sempre più digitalizzato, performante e proattivo. WindTre ha fornito una soluzione di accesso mobile tagliata su misura per le esigenze specifiche di Terna in modalità 4G e 5G e ha messo a disposizione le più avanzate tecnologie di telecomunicazioni mobili per gestire da remoto e in tempo reale un numero sempre maggiore di asset, raccogliendo ed elaborando dati a supporto della gestione e manutenzione della rete elettrica. Terna proseguirà nello sviluppo della propria infrastruttura di rete in radiofrequenza, con l'obiettivo di integrare ulteriori soluzioni capaci di garantire una gestione e un monitoraggio ottimali della RTN, sfruttando le tecnologie più avanzate e moderne disponibili sul mercato.

Interventi di manutenzione

MDR-M

Di seguito un riepilogo dei principali dati riferiti agli interventi di manutenzione degli impianti della RTN svolti nell'anno 2024, raccolti tramite report specifici per il monitoraggio e la quantificazione degli stessi.

MONITORAGGIO E CONTROLLO IMPIANTI

~44.500
controlli nelle stazioni per i vari livelli di tensione

~3,2
ispezioni in media all'anno per ogni linea aerea

~230.000 km
ispezioni da terra ed elioportate su linee aeree

~112.600 km
ispezioni su linee in cavo interrato

~186.000 km
ispezioni elioportate su linee aeree

~44
ispezioni in media all'anno per ogni linea in cavo interrato

MANUTENZIONE ORDINARIA

~19.000 km
di elettrodotti con taglio piante effettuato per garantire il corretto e sicuro esercizio delle linee

~1.100
controlli di monitoraggio e interventi di manutenzione sotto tensione

MANUTENZIONE STRAORDINARIA

Linee

~1.100 km
di conduttori sostituiti

~2.550 km
di funi di guardia sostituite

204
sostegni sostituiti

Stazioni

16
macchine statiche sostituite

130
interruttori sostituiti

174
sezionatori sostituiti

410
trasformatori di corrente sostituiti

705
trasformatori di tensione sostituiti

Principali interventi regolati dell'esercizio

> PIANO DI SVILUPPO – 1.534,1 milioni di euro

Ramo Est

Tyrrhenian Link
(633,0 milioni di euro)

Collegamenti in Cavo: completate le perforazioni terra-mare in Sicilia e Campania, completata la produzione del cavo marino di polo 1 e in corso le attività propedeutiche alle pose marine. Completato il 50% dei cavidotti terrestri in Sicilia e Campania e avviate le pose dei cavi terrestri.

Stazioni di Conversione: in corso la produzione del primo trasformatore; completata la prefabbricazione degli edifici controllo di Eboli e Termini Imerese, e dell'edificio valvole e corrente continua di polo 1 a Eboli. In fase di realizzazione le fondazioni degli altri edifici a Eboli e Termini Imerese.

Ramo Ovest

Collegamenti in cavo: completate le perforazioni terra-mare in Sicilia; completata la produzione della prima pezzatura di cavo marino del polo 1 e terminate le attività di survey marina e terrestre. Completata la validazione della progettazione esecutiva in Sicilia. In corso la progettazione esecutiva in Sardegna. In fase di avvio la realizzazione delle opere civili in Sicilia.

Stazioni di Conversione: completata la delimitazione dell'area di cantiere di Selargius e avviate dall'appaltatore le attività di allestimento cantiere. In Sicilia completata la delocalizzazione dell'Acquedotto Cornelio, consegnate le aree per avviare il cantiere della stazione a Termini Imerese dove sono in corso le attività sui residui contesti archeologici.

Adriatic Link
(113,4 milioni di euro)

A valle del recepimento delle intese regionali, a gennaio è stato emesso il decreto autorizzativo. Nel mese di febbraio è stato poi sottoscritto il contratto per la fornitura e realizzazione delle stazioni di conversione.

Collegamenti in Cavo: avviate le opere civili del cavo terrestre nelle Marche. Prodotti i primi 110 km di cavo marino e in fase di esecuzione le prove di qualifica.

Stazioni di Conversione: in corso, in entrambe le aree di Cepagatti e Fano, le attività geognostiche preliminari, avviate le attività di progettazione e gli approvvigionamenti delle principali forniture.

Progetti Olimpiadi
(96,3 milioni di euro)

CP Livigno: eseguito lo scavo e la posa, rispettivamente per circa l'80% e il 33% dei 19,8 km complessivi di collegamento; l'esecuzione dei giunti con il completamento di circa il 25% dei 70 giunti/terminali complessivi.

CP Laion-CP Corvara: in ultimazione lo scavo e in corso la posa, rispettivamente per circa il 97% e il 65% dei 22,9 km complessivi di tubiera; avviata l'esecuzione dei giunti con il completamento di circa il 37% dei 35 giunti/terminali complessivi.

CP Brunico-SE Vandoies: in corso l'attività di scavo e la posa, rispettivamente per circa il 60% e il 20% dei 21,5 km complessivi di tubiera e avviato il montaggio dei primi giunti.

SE Moena-CP Campitello: in corso l'attività di scavo e la posa, rispettivamente per circa l'80% e il 56% dei 19,5 km complessivi di tubiera; avviata l'esecuzione dei giunti con il completamento di circa il 38% dei 26 giunti/terminali complessivi.

Sa.Co.I.3
(78,1 milioni di euro)

In data 28 marzo 2024 è stato firmato da Terna il contratto per la fornitura delle stazioni di conversione.

Collegamenti in Cavo: concluse le survey marine di dettaglio in Italia e Corsica, in corso indagini terrestri, progettazione esecutiva e produzione cavo terrestre.

Stazioni di Conversione: proseguono progettazione esecutiva e le indagini preliminari nei siti di Suvereto e Codrongianos, sono in corso le attività di produzione delle apparecchiature elettriche.

Linea aerea: proseguono indagini e preparazione piste, avviati i cantieri.

Teleborsa: distribution and commercial use strictly prohibited

Elettrodotto Colunga-Calenzano *(37,5 milioni di euro)*	**Elettrodotto 380 kV Colunga-Calenzano:** completato circa il 47% delle fondazioni e avviato il montaggio dei primi sostegni e la tesatura dei conduttori delle prime tratte, a valle della riattivazione cantieri per parere positivo ARPAT (Agenzia regionale per la protezione ambientale della Toscana) definitivo per il lotto 3 dell'elettrodotto 380 kV. **Varianti in cavo:** entrate in esercizio le varianti in cavo Calenzano-Vaiano e Calenzano-Barberino interferenti con il nuovo elettrodotto 380 kV.
Bolano-Annunziata *(29,9 milioni di euro)*	**Variante cavo 380 kV Bolano-Annunziata e SE Annunziata:** in corso attività realizzative, eseguito lo scavo per circa l'81% dei 3,4 km complessivi di collegamento; aggiudicata la gara per le opere civili della stazione di Annunziata e avviata la realizzazione del piano di stazione. **Raddoppio 380 kV Bolano-Annunziata:** il collegamento è stato autorizzato il 23 settembre 2024 dal Ministero dell'Ambiente e della Sicurezza Energetica. La gara cavi per la fornitura e la realizzazione della parte marina del collegamento è stata aggiudicata lo scorso giugno. È in corso la progettazione esecutiva.
Elettrodotto Cassano-Chiari *(26,3 milioni di euro)*	**Elettrodotto 380 kV Cassano-Chiari:** completata la realizzazione di circa il 54% delle fondazioni e il montaggio di circa 54% dei sostegni rispetto ai 69 complessivi; completata la tesatura di circa il 50% dei conduttori su 35,3 km complessivi di collegamento. **Variante 132 kV linea Ricevitrice Ovest Brescia-Chiari:** entrata in esercizio la variante sull'elettrodotto 132 kV interferente.
Paternò-Pantano-Priolo *(22,1 milioni di euro)*	**Elettrodotto 380 kV Pantano-Priolo:** completata la realizzazione di circa l'83% delle fondazioni e di circa l'81% montaggio dei sostegni rispetto ai 116 complessivi, completata la tesatura di circa il 50% dei conduttori su circa 45 km complessivi di collegamento. **Stazione Pantano 380/220/150 kV:** entrata in esercizio la residua sezione 150 kV, a seguito dell'entrata in esercizio nel mese di dicembre 2023 della sezione 380 kV, la sezione 220 kV e il relativo trasformatore.

Teleborsa: distribution and commercial use strictly prohibited

> PIANO DELLA SICUREZZA[1] – 291,5 milioni di euro

Reattore Sandrigo: completata la produzione del macchinario.

Reattore Nogarole: completata la produzione del macchinario, in ultimazione la realizzazione delle opere civili e avviati i montaggi elettromeccanici e del sistema di controllo.

Reattore Chiari: completata la realizzazione della fondazione del reattore e consegnata la macchina in sito.

Reattori
(25,1 milioni di euro)

Compensatore Aurelia: a seguito del completamento della realizzazione delle principali fondazioni e dell'edificio prefabbricato e della produzione delle principali forniture con il collaudo in fabbrica del compensatore, trasportati i principali macchinari e montati in sito, avviate le attività di commissioning.

Compensatori sincroni
(21,0 milioni di euro)

Il progetto, finalizzato all'ampliamento del rilievo di informazioni dal campo a vantaggio della gestione in sicurezza del sistema elettrico, consiste nel potenziamento o ampliamento della rete in fibra ottica.

Nel 2024 sono state raggiunte 16 stazioni tramite fibra ottica proprietaria, per un totale di 571 stazioni telecondotte.

Fiber for the Grid
(9,4 milioni di euro)

Rizziconi: entrato in esercizio il trasformatore step-up e relativo stallo, in fase avanzata il commissioning del sistema convertitore.

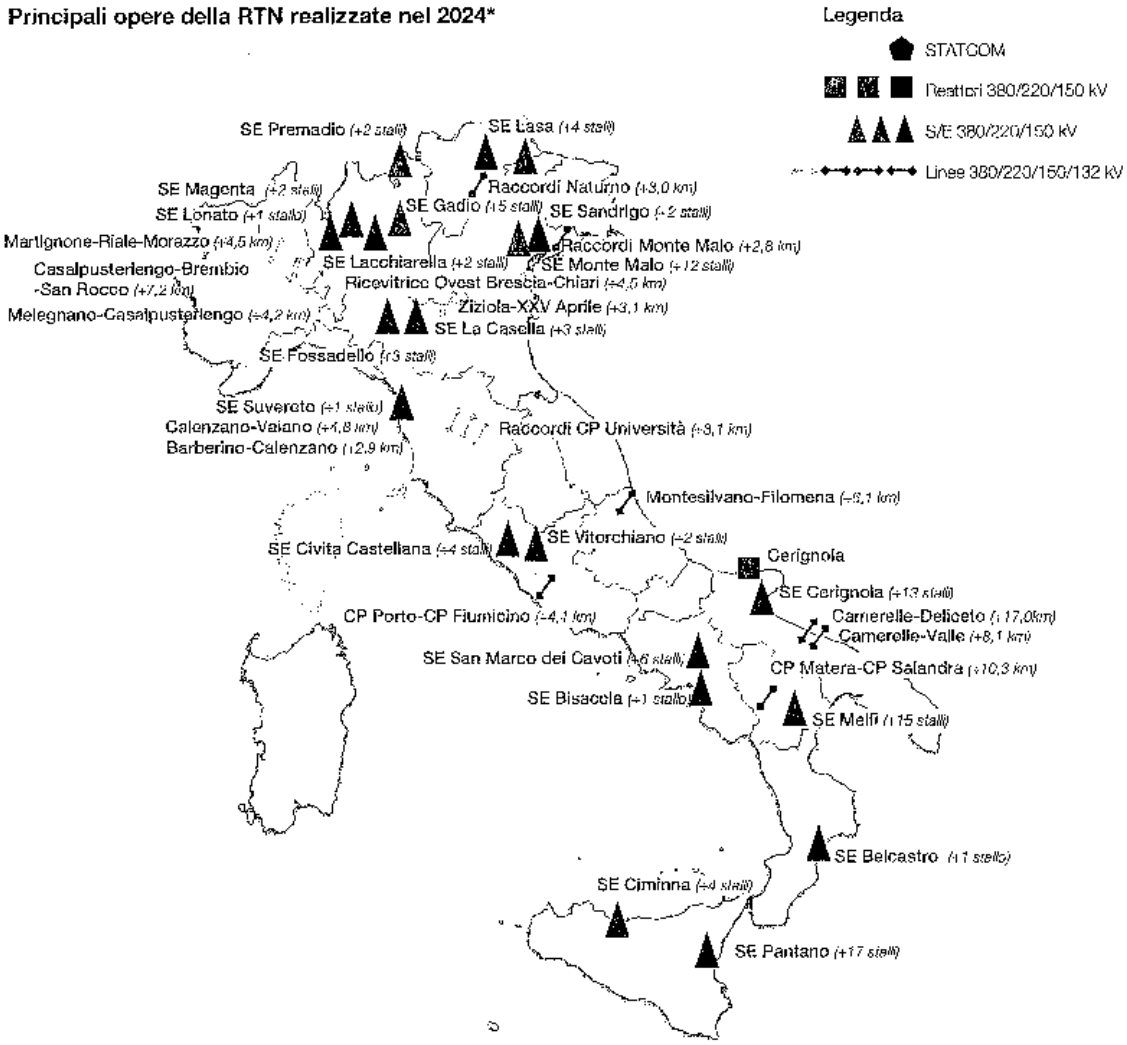
Scandale: completata la progettazione esecutiva e dopo l'apertura del cantiere avviata la realizzazione delle opere civili.

Altri siti (Feroleto, Melilli, Brindisi): in corso la progettazione e la produzione delle principali forniture.

Resistori stabilizzanti[2]
(5,2 milioni di euro)

> INTERVENTI DI RINNOVO ASSET ELETTRICI – 526,6 milioni di euro

Si conferma l'impegno nella realizzazione di interventi di rinnovo degli asset elettrici finalizzati al miglioramento dell'affidabilità e della resilienza della RTN.



A valle delle attività di rinnovo di linee aeree e dei macchinari di stazione eseguite, al 31 dicembre 2024 risultano sostituiti circa 1.124 km di terne e 16 macchine (6 trasformatori, 7 autotrasformatori e 3 reattori).

Rinnovo asset elettrici

[1] *Compensatori sincroni e reattori sono elementi di rete che svolgono una funzione di compensazione reattiva.*
[2] *I resistori stabilizzanti sono dispositivi in grado di garantire la stabilità dinamica e lo smorzamento delle oscillazioni di rete e in grado di essere utilizzati nelle strategie di riaccensione permettendo di mitigare i disturbi delle fonti rinnovabili.*

Teleborsa: distribution and commercial use strictly prohibited

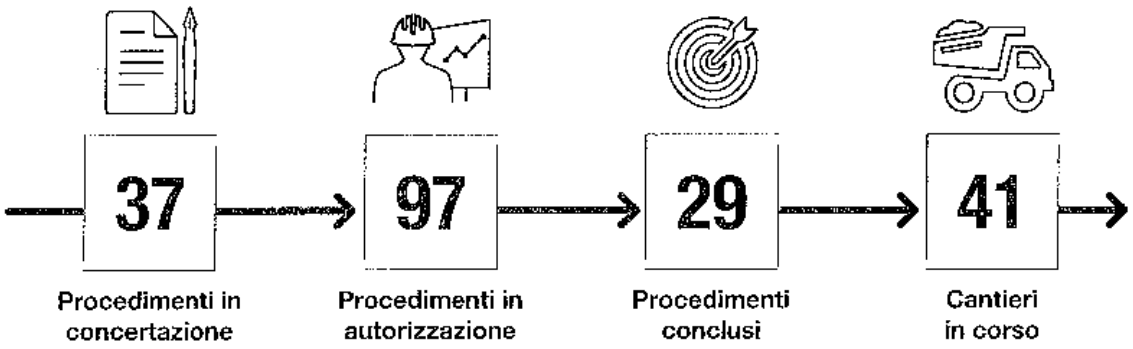
Principali opere della RTN realizzate nel 2024*

** I dati esposti includono anche le opere realizzate in sostituzione di eventuali dismissioni/demolizioni. La lunghezza delle linee è espressa in Km di terna.*

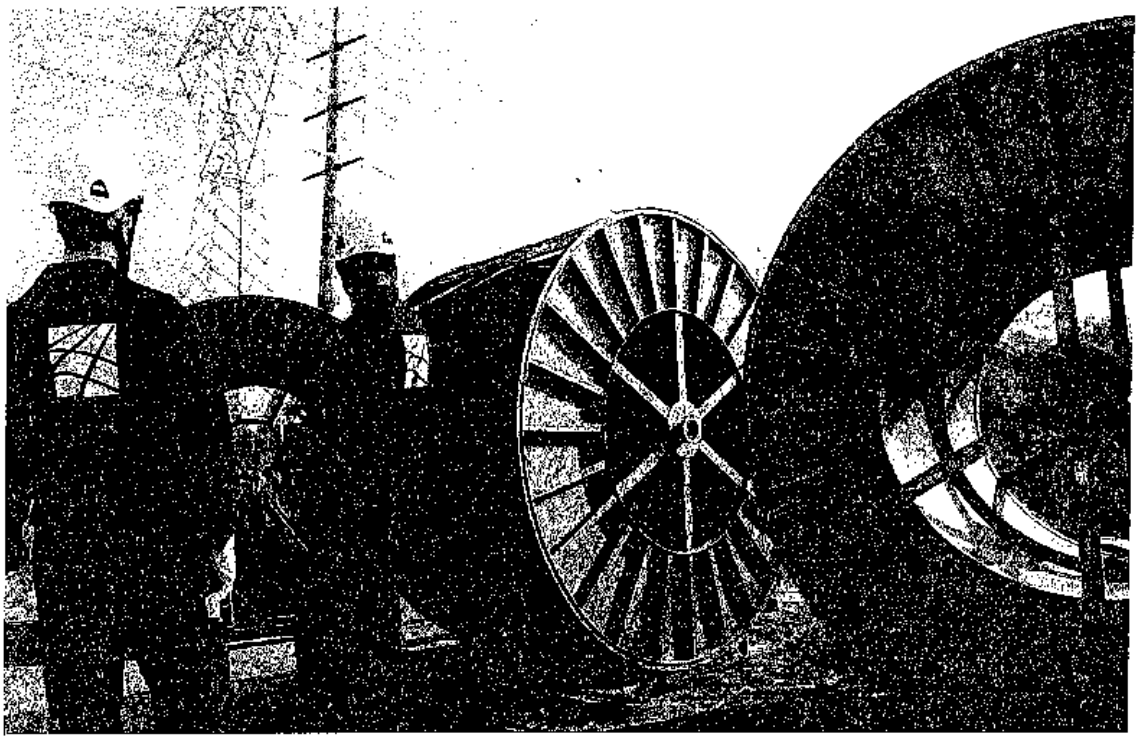
Ricerca e sviluppo

Nel corso del 2024 il Gruppo Terna, con riferimento alle attività di ricerca e sviluppo, ha sostenuto investimenti per circa 8,9 milioni di euro e costi per circa 9,2 milioni di euro.

S63



Teleborsa: distribution and commercial use strictly prohibited



Procedimenti autorizzativi

Nel corso del 2024, il Ministero dell'Ambiente e della Sicurezza Energetica e gli Assessorati regionali competenti hanno autorizzato 25 progetti di sviluppo della rete elettrica nazionale di Terna, per un **valore complessivo di oltre 2,3 miliardi di euro**, che confermano il ruolo cruciale dell'azienda nella transizione energetica italiana e sottolineano l'efficace collaborazione con le istituzioni. Ulteriori quattro interventi sono stati firmati nel mese di dicembre ma pubblicati dal MASE a gennaio 2025.

Tra questi i più rilevanti in termini di investimento sono l'Adriatic Link, il collegamento elettrico sottomarino che unirà le Marche e l'Abruzzo, Elmed, l'elettrodotto tra Italia e Tunisia che collegherà i sistemi elettrici dell'Europa e del Nord Africa, e l'elettrodotto Bolano-Annunziata che unirà Sicilia e Calabria.

Le opere autorizzate porteranno benefici ambientali, sociali ed economici di rilievo: oltre **560 km di nuove linee sottomarine o interrate** garantiranno una significativa riduzione degli impatti paesaggistici e ambientali. Inoltre, grazie a questi interventi, saranno eliminati circa **100 sostegni** e liberati oltre **70 ettari di territorio**, con effetti positivi per le comunità locali.

Telebors a: distribution and commercial use strictly prohibited

FOCUS

Grandi Progetti

Collegamento HVDC

Sardegna – Corsica – Italia (SA.CO.I.3)

Il nuovo collegamento tri-terminale ad altissima tensione in corrente continua (HVDC) consiste nel **rinnovo** e **ammodernamento** dell'attuale collegamento elettrico tra la Sardegna, la Corsica e la penisola italiana. Consentirà di utilizzare una capacità di trasporto complessiva fino a **400 MW**.
L'opera avrà uno sviluppo complessivo tra Toscana-Corsica-Sardegna di oltre **380 km** per polo (di cui circa 140 km di cavi marini e terrestri e circa 240 km di linee aeree).

PROGRESSI RAGGIUNTI

In data 26 marzo 2024 è stato firmato da Terna il contratto per la fornitura delle stazioni di conversione.

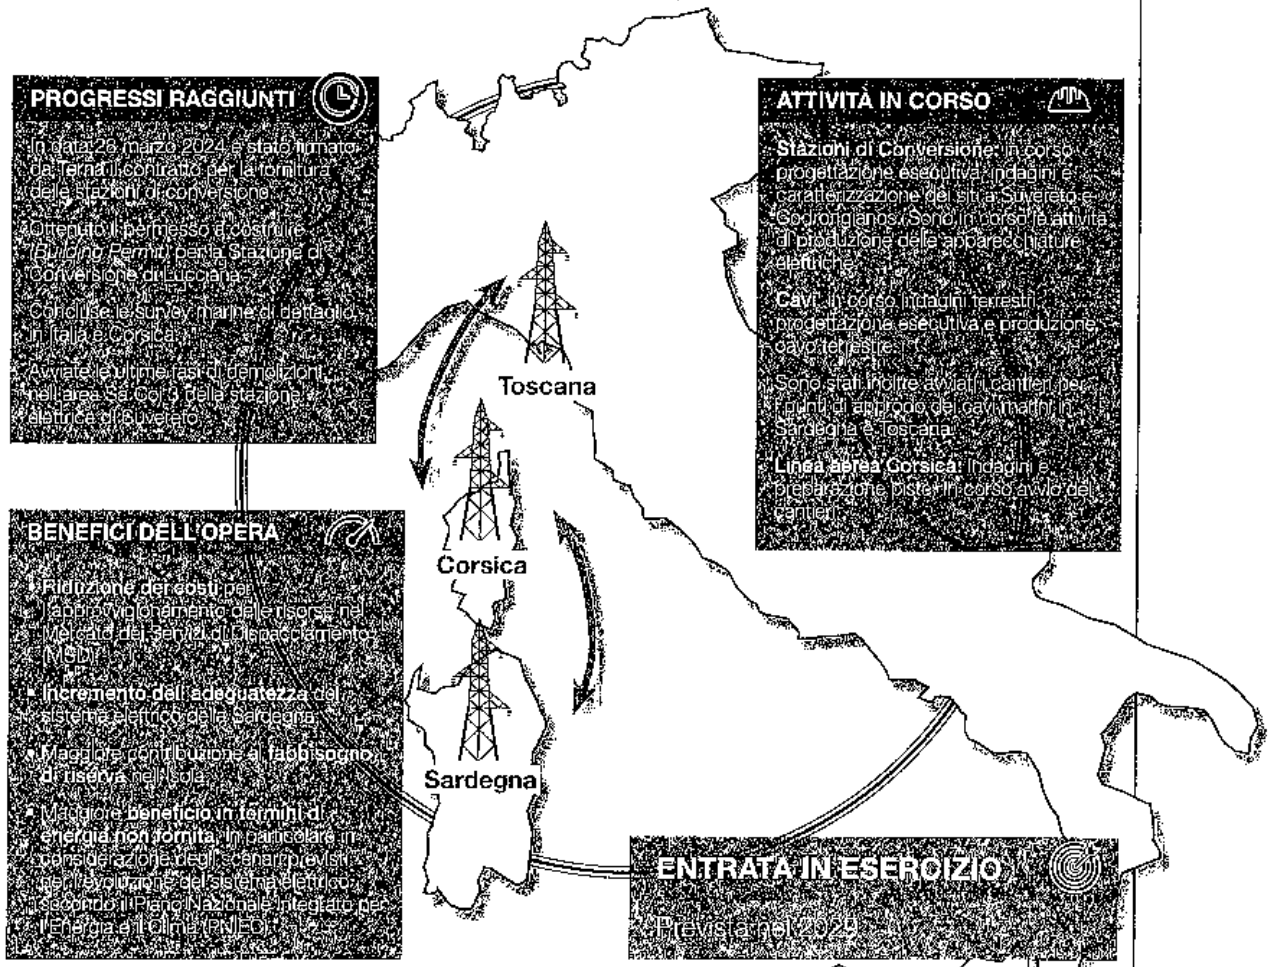
Ottenuto il permesso di costruire (*Building Permit*) per la Stazione di Conversione di Lucciana.

Condotte le survey marine di dettaglio in Italia e Corsica.

Avviate le ultime fasi di demolizioni nell'area Sa.Co.I 3 della stazione elettrica di Suvereto.

ATTIVITÀ IN CORSO

Stazioni di Conversione: in corso progettazione esecutiva, indagini e caratterizzazione dei siti a Suvereto e Godorigianos. Sono in corso le attività di produzione delle apparecchiature elettriche.

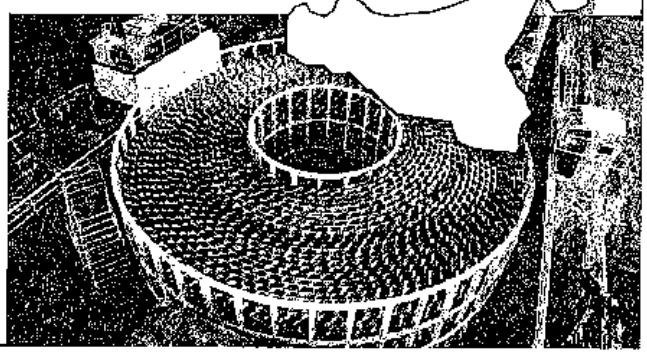


Cavi: in corso indagini terrestri, progettazione esecutiva e produzione cavo terrestre.

Sono stati inoltre avviati i cantieri per i giunti di approdo dei cavi marini in Sardegna e Toscana.

Linea aerea Corsica: indagini e preparazione piste in corso avvio dei cantieri.

BENEFICI DELL'OPERA



- **Riduzione dei costi** per l'approvvigionamento delle risorse nel Mercato dei Servizi di Dispacciamento (MSD).
- **Incremento dell'adeguatezza** del sistema elettrico della Sardegna.
- Maggiore **contribuzione** e **fabbisogno di riserva** nell'isola.
- Maggiore **beneficio in termini di energia non fornita**, in particolare in considerazione degli scenari previsti dall'evoluzione del sistema elettrico secondo il Piano Nazionale Integrato per l'Energia e il Clima (PNIEC).

4

Collegamento HVDC

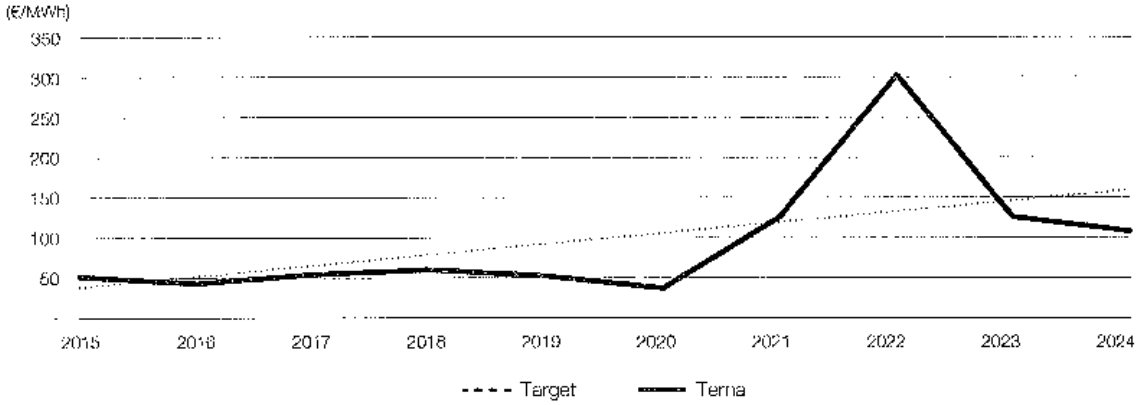
Italia - Tunisia (PROGETTO ELMED)

Il nuovo collegamento 500 kV in corrente continua (HVDC) **collegherà la Sicilia con la penisola di Capo Bon in Tunisia** permettendo uno scambio di potenza fino a 600 MW. L'opera si svilupperà per circa 224 km (di cui circa 200 km di cavo marino).

548

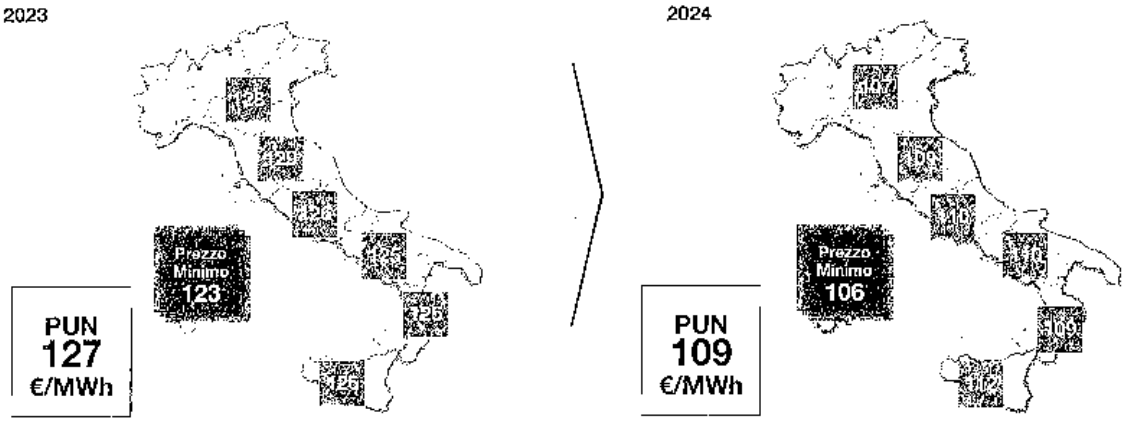
Teleborsa: distribution and commercial use strictly prohibited

Andamento del mercato dell'energia elettrica e dei costi dell'energia elettrica



Prezzi dell'energia

Il prezzo medio orario della borsa italiana dell'energia (IPEX/PUN[44] – Prezzo Unico Nazionale) per l'esercizio 2024 è risultato pari a 109 €/MWh, in riduzione (-14%) rispetto al 2023. Tale riduzione è principalmente giustificata dalla riduzione dei prezzi delle materie prime, in particolare del gas.



Il Mercato del Giorno Prima (MGP), dove si forma il PUN[45], è fissato dal meccanismo di domanda/offerta, ma necessariamente, in Italia, deve fare i conti con la geografia del Paese, con la fisicità della rete elettrica, con la dislocazione degli impianti e dei luoghi di consumo, fattori che possono portare a congestioni di rete. Sulla rete di trasmissione esistono infatti vari punti sensibili che, di fatto, hanno reso necessario identificare le cosiddette zone di mercato e fissarne i limiti di trasmissione. Eliminare questi colli di bottiglia fa parte dei compiti di Terna, grazie soprattutto allo sviluppo della rete.

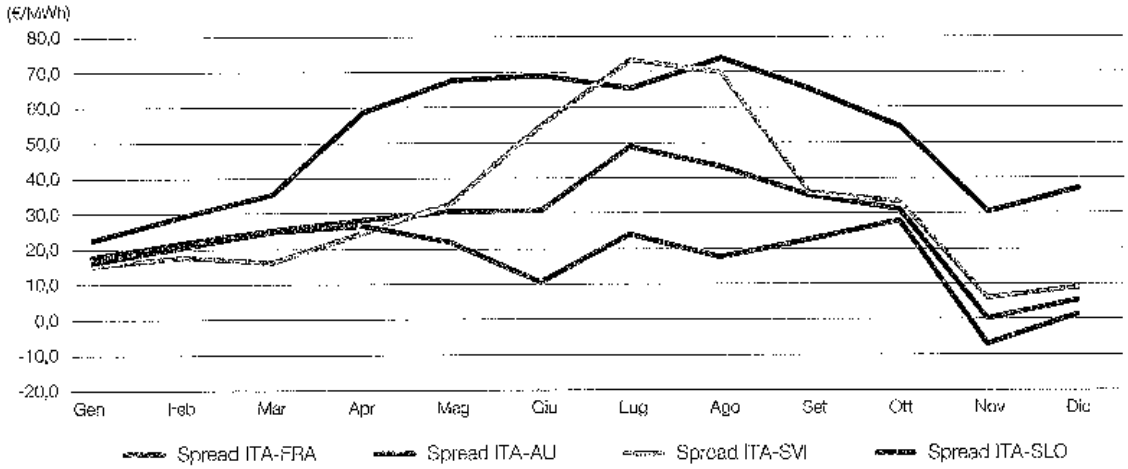
Il grafico che segue mostra l'andamento del PUN negli ultimi 10 anni (dal 2015 al 2024), evidenziando che il **trend, in decrescita fino al 2020, ha subito una netta inversione a causa dei forti aumenti del 2021 e del 2022 per poi ripiegare sui livelli 2021**, annullando quindi gli incrementi record registrati l'anno scorso, ciò è dovuto alla riduzione dei prezzi delle commodities, in particolare del gas anch'esso tornato sostanzialmente sui livelli del 2021.

Andamento del prezzo unico nazione (PUN) dal 2015

Negli anni si è assistito a un allineamento dei prezzi tra le principali zone in cui il mercato elettrico italiano è suddiviso e il Prezzo Unico Nazionale (PUN).

[44] IPEX: Italian Power Exchange (Borsa Elettrica Italiana); PUN: Prezzo Unico Nazionale.
[45] Si segnala che il 2024 è l'ultimo anno di validità del Prezzo Unico Nazionale, superato dal 1° gennaio 2025 e transitoriamente sostituito dal PUN Index GME (indice di riferimento calcolato in continuità al PUN, sebbene a consuntivo).

Teleborsa: distribution and commercial use strictly prohibited



Scambi con l'estero

Gli scambi commerciali con l'estero con la Frontiera Nord, pari nel 2024 a circa 49 TWh, sono in lieve aumento rispetto al 2023, quando il valore era di 48 TWh.

I prezzi delle borse estere francese (PNX), austriaca (EEX), svizzera (EPEX Spot) e slovena (BSP SouthPool) nel 2024 risultano in riduzione rispetto all'anno precedente coerentemente con l'andamento dei prezzi delle *commodities* (in particolare del gas).

La crescente variabilità dei prezzi dell'energia è una diretta conseguenza del mix elettrico in evoluzione, sempre più dominato da fonti intermittenti come eolico e solare. In passato, il mix europeo era caratterizzato da fonti programmabili come nucleare, carbone e gas, con Paesi come Germania e Francia che offrivano prezzi più bassi grazie a centrali a carbone e nucleari, esportando energia verso l'Italia. Oggi, la diffusione delle rinnovabili e la transizione verso la decarbonizzazione stanno portando a fluttuazioni di prezzo più frequenti e a condizioni di mercato che possono invertire i tradizionali equilibri dei costi energetici. Questa tendenza spiega perché, nel seguente grafico, si osserva uno spread mensile negativo dei prezzi dell'energia tra Italia e Slovenia nei mesi di novembre e dicembre, e prossimo allo zero tra Italia e Austria e tra Italia e Svizzera.

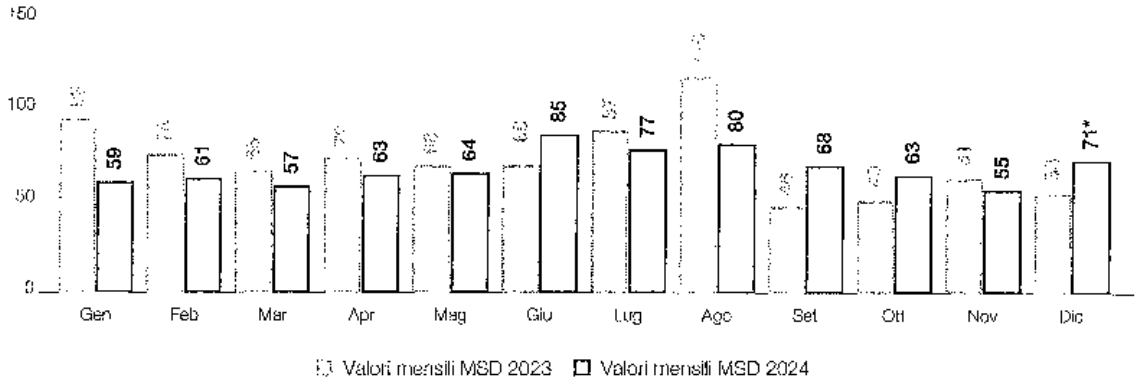
Spread mensile del prezzo dell'energia rispetto a Francia (PNX9), Austria (EEX), Svizzera (EPEX Spot) e Slovenia (BSP SouthPool)

Anche i prezzi di Francia, Austria, Slovenia e Svizzera nel 2024 hanno subito consistenti riduzioni. In particolare:

- Powernext (prezzo francese): il prezzo medio annuo è stato pari a 58 €/MWh (-38,9€/MWh pari al -40% rispetto all'anno precedente);
- EEX (prezzo austriaco): ha avuto lo stesso andamento rispetto al prezzo francese. Il prezzo medio annuo è stato pari a 81 €/MWh (-20,9€/MWh pari al -20% rispetto all'anno precedente);
- BSP SouthPool (prezzo sloveno): i differenziali di prezzo rispetto all'Italia mostrano un andamento più contenuto rispetto a quello di Francia e Svizzera. Il prezzo medio annuo è stato pari a 76 €/MWh (-13,41€/MWh pari al -13% rispetto all'anno precedente);
- EPEX SPOT (prezzo svizzero): il prezzo medio annuo è stato pari a 91,2 €/MWh (-31,83€/MWh pari al -30% rispetto all'anno precedente).

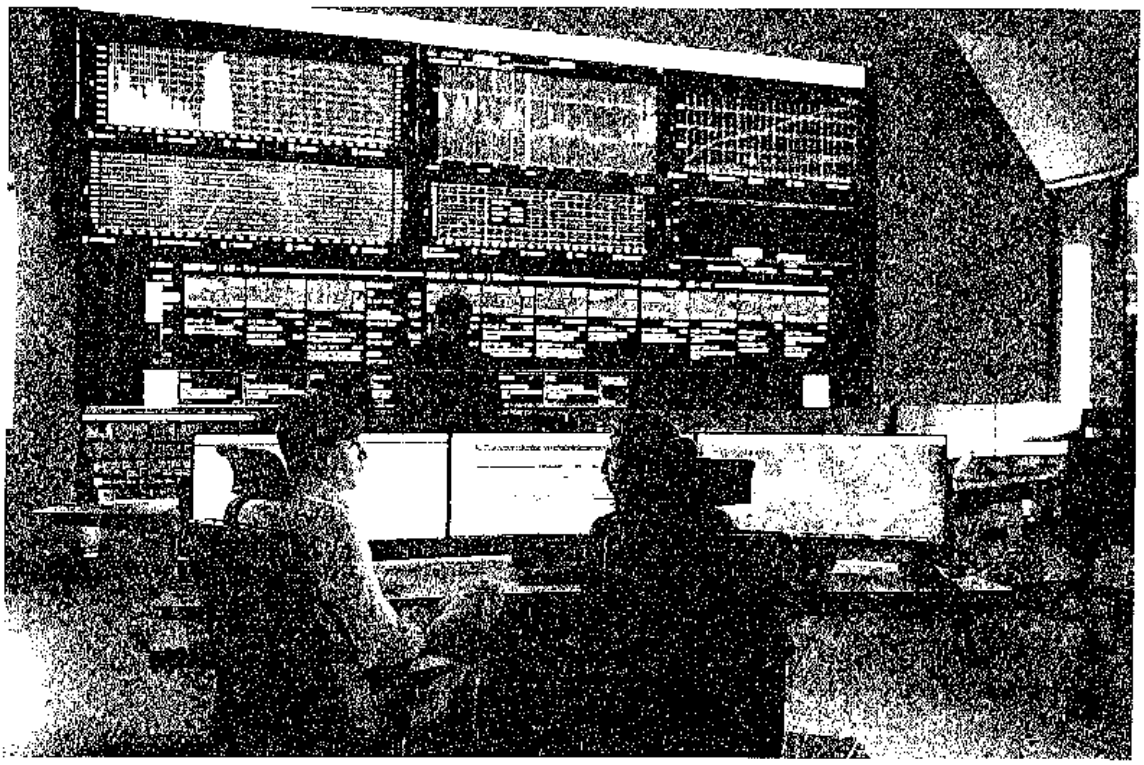
550

Teleborsa: distribution and commercial use strictly prohibited



Mercato dei Servizi di Dispacciamento (MSD)

Sul Mercato dei Servizi di Dispacciamento (MSD) Terna si approvvigiona delle risorse necessarie alla gestione e al controllo del sistema (risoluzione delle congestioni intrazonali, creazione della riserva di energia, bilanciamento in tempo reale) per garantirne la sicurezza e l'adeguatezza.



Nell'anno 2024, l'onere netto MSD è risultato pari a circa 803 milioni di euro (dato provvisorio), in riduzione del 6% rispetto all'anno 2023 (852 milioni di euro circa).

Tale riduzione è dovuta principalmente alla diminuzione dei costi sul Mercato dei Servizi di Dispacciamento sia per effetto volume, per riduzione delle selezioni sia per effetto prezzo, per riduzione del differenziale.

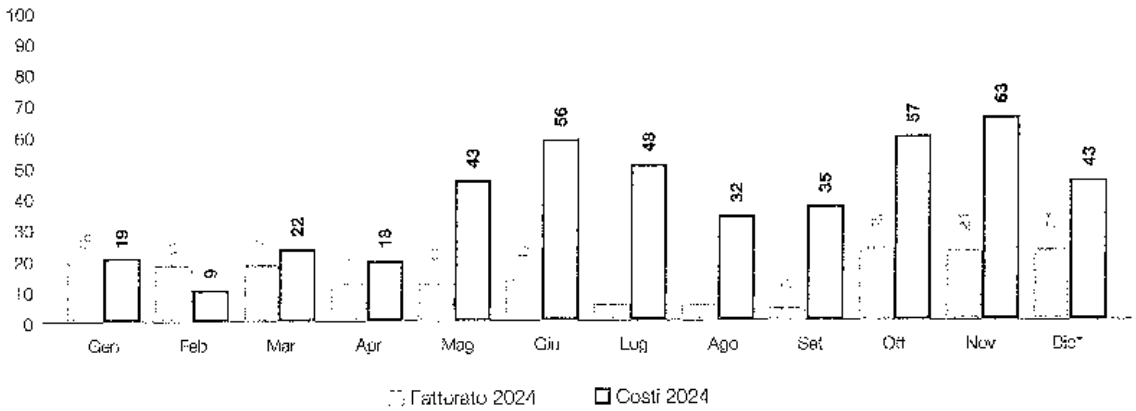
Andamento mensile dell'onere MSD
(milioni di euro)

* *Dato provvisorio*

Teleborsa: distribution and commercial use strictly prohibited

Corrispettivo per l'approvvigionamento delle risorse nel Mercato dei Servizi di Dispacciamento (Uplift)

Il corrispettivo Uplift è lo strumento attraverso il quale il sistema recupera dall'utente finale gli oneri netti derivanti dalle partite energia tra cui l'approvvigionamento dei servizi e dell'energia a copertura dello sbilanciamento di sistema sul MSD, i corrispettivi di sbilanciamento[46], le rendite da congestione[47] e le relative coperture (c.d. CCT, CCC, CCP e DCT[48]) e il servizio dell'interconnessione virtuale[49] (c.d. Interconnector).



La Delibera ARERA n. 111/06 (Titolo 4) regola i corrispettivi per il servizio di dispacciamento e delle connesse garanzie. Tra i corrispettivi di dispacciamento figura il corrispettivo per l'approvvigionamento delle risorse nel mercato per il servizio di dispacciamento (c.d. Uplift) di cui all'art. 44 e ss.mm..

Tale corrispettivo viene fatturato pro-quota agli utenti del dispacciamento in base all'energia prelevata, a copertura del costo mensile di competenza previsto, nonché di scostamenti pregressi.

Nell'anno 2024, il costo complessivo Uplift è risultato pari a circa 445 milioni di euro (dato provvisorio), in leggero aumento rispetto all'anno precedente (401 milioni di euro).

Tale aumento è dovuto alla riduzione dei ricavi generati dalle Rendite di Congestione interne alle zone di mercato italiane ed estere[50], all'aumento del controvalore associato al costo dei Gettoni di Avviamento e dei Gettoni di Cambio Assetto[51] in parte compensata dalla riduzione del costo per il Mercato dei Servizi di Dispacciamento e del costo per il servizio dell'interconnessione virtuale.

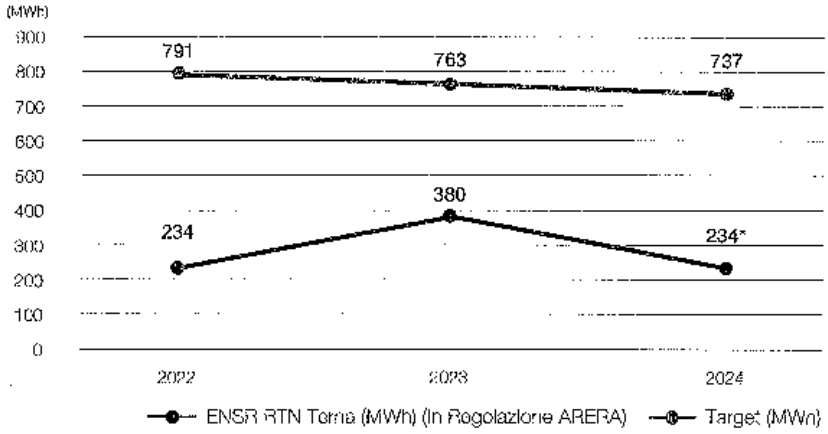
Andamento mensile fatturato e costi Uplift
(milioni di euro)

** Dati provvisori.*

[46] Il corrispettivo di sbilanciamento è pagato/ricevuto, ai sensi della Delibera n. 111/06, da tutti gli utenti sulla minore/maggiore energia immessa/prelevata rispetto al programma.
[47] Le rendite da congestione sono ricavi e si generano quando nelle diverse zone di mercato si formano prezzi di equilibrio diversi tra loro nei Mercati dell'Energia.
[48] CCT - Corrispettivo per l'assegnazione dei diritti di utilizzo della capacità di trasporto.
CCC - Copertura del rischio di volatilità del corrispettivo diritti di utilizzo della capacità di trasporto (tra zone).
CCP - Copertura del rischio di volatilità del corrispettivo diritti di utilizzo della capacità di trasporto (tra poli industriali).
DCT - Corrispettivo per l'assegnazione dei diritti di utilizzo della capacità di trasporto per le interconnessioni con l'estero.
[49] L'Interconnessione virtuale è un costo netto: Terna programma, costruisce ed esercisce nuove infrastrutture di interconnessione con l'estero, i cui costi sono in parte coperti dai ricavi di aste alle quali partecipano soggetti finanziatori terzi, i quali potranno avere accesso alla capacità di trasporto disponibile.
[50] Le rendite da congestione sono ricavi e si generano quando nelle diverse zone di mercato si formano prezzi di equilibrio diversi tra loro nei Mercati dell'Energia.
[51] I gettoni di avviamento e di cambio assetto corrispondono alla remunerazione corrisposte alle unità produttive che ne hanno diritto in caso di richiesta di Terna di accensione o di cambio dell'assetto.

552

Teleborsa: distribution and commercial use strictly prohibited



Continuità e qualità del servizio

Tutti i segmenti del sistema elettrico (generazione, trasmissione e distribuzione) concorrono al risultato di assicurare alla collettività la disponibilità di energia elettrica garantendo adeguati standard di qualità e un numero di interruzioni inferiore a soglie prestabilite.

Terna monitora la continuità del servizio fornito attraverso diversi indici, definiti dall'ARERA (Delibera n. 55/2024) e dal Codice di Rete.

Tali indici di continuità sono rilevanti per il sistema in quanto monitorano la frequenza e l'impatto degli eventi verificatisi sulla rete elettrica e riconducibili a guasti oppure a fattori esterni quali gli eventi meteorologici. Per tutti viene riportato un periodo di osservazione di un triennio in cui non si notano variazioni significative a testimonianza della buona qualità del servizio raggiunta.

Indice ENSR RTN[52]

** Dati provvisori.*

L'indicatore **ENSR RTN**, basato sui dati preliminari di esercizio **ENSR RTN** nel periodo gennaio-dicembre 2024, si attesta a 234 MWh (dato provvisorio, target annuo fissato da ARERA pari a circa 737 MWh).

Indici di continuità

ENSR*

Cosa misura
Energia non fornita a seguito di eventi che hanno origine sulla rete rilevante. **

Come si calcola
Somma dell'energia non fornita agli Utenti connessi alla RTN (a seguito di eventi che hanno origine sulla rete rilevante, ai sensi della disciplina ARERA sulla qualità del servizio).

** Energia non Fornita di Riferimento.*
*** Per "rete rilevante" si intende tutta la rete ad Alta e Altissima tensione.*

ASA***

Cosa misura
Disponibilità del servizio della RTN.

Come si calcola
Complementare del rapporto tra la somma dell'energia non fornita agli Utenti connessi alla RTN (ENS) e l'energia immessa in rete.

***Average Service Availability*

Per quanto concerne l'indicatore **ASA**, nel 2024 si è registrata una disponibilità pari al 99,99989% (dato provvisorio), a fronte del 99,99960% dell'esercizio precedente. I risultati di esercizio conseguiti mostrano una performance stabile negli anni e valori molto elevati dell'indicatore (più è elevato il valore e migliore è la performance). Tale indicatore evidenzia che l'energia non fornita, a seguito di guasti sulla rete di proprietà, rappresenta una minima parte rispetto all'energia complessiva fornita agli utenti della rete.

La regolazione vigente (stabilita in particolare dalla Delibera n. 55/2024/R/eel) prevede diversi meccanismi volti a regolare e incentivare la qualità del servizio fornito da Terna. Gli effetti economici complessivi di tali meccanismi sono consuntivati a fine esercizio (ivi incluso l'ENSR).

[52] I target di riferimento per gli anni 2024-2025 (di cui alla Delibera ARERA n. 55/2024/R/eel) sono stati definiti in continuità con i target del periodo regolatorio 2016-2023, ovvero con miglioramento del 3,5% richiesto per ciascun anno rispetto al precedente. Dal 2016 l'indicatore ENSR RTN include anche la performance della rete di Terna Rete Italia S.r.l. (fusa in Terna S.p.A. il 31 marzo 2017).

Teleborsa: distribution and commercial use strictly prohibited

Nell'ambito dei costi, determinati periodicamente in base agli eventi accaduti, nel 2024 Terna rileva un saldo pari a 2,5 milioni di euro rispetto ai 5,3 milioni di euro rilevati nel 2023. Nella tabella sotto riportata sono riepilogati gli effetti economici complessivi dei meccanismi di premi/penalità sulla qualità del servizio rilevati nell'esercizio 2024 raffrontato con il 2023. Si precisa che tali informazioni sono conformi a quanto esposto nell'ambito del Bilancio consolidato, nella nota 1. Ricavi delle vendite e prestazioni e nella nota 7. Altri costi operativi. MDR-M

Risultati economici delle Attività Regolate

La ripartizione dei risultati del Gruppo Terna per il settore Regolato, riferiti agli esercizi 2024 e 2023, è dettagliata nel prospetto seguente[53]. Si precisa che tali informazioni sono conformi a quanto esposto nell'ambito del Bilancio consolidato, in linea con quanto disposto dall'IFRS 8, nella nota "C. Settori operativi".

(€/milioni)

	2024	2023	Δ
Totale ricavi Attività Regolate	**3.096,2**	**2.669,8**	**426,4**
Ricavi tariffari e incentivi	2.923,5	2.538,5	385,0
- Corrispettivo trasmissione	*2.423,8*	*2.107,6*	*316,2*
- Corrispettivo dispacciamento, misura e altri	*499,7*	*430,9*	*68,8*
Altri ricavi regolati	59,8	50,7	9,1
Ricavi da costruzione attività in concessione in Italia	112,9	80,6	32,3
Totale costi Attività Regolate	**634,7**	**584,2**	**50,5**
Personale	295,2	285,2	10,0
Risorse esterne	193,1	187,2	5,9
Altri oneri	33,5	31,2	2,3
Costi di costruzione attività in concessione in Italia	112,9	80,6	32,3
EBITDA Attività Regolate	**2.461,5**	**2.085,6**	**375,9**

L'EBITDA relativo alle Attività Regolate si attesta a 2.461,5 milioni di euro, in aumento di 375,9 milioni di euro rispetto al dato dell'esercizio precedente, imputabile principalmente all'impatto sui ricavi tariffari e incentivi (+385,0 milioni di euro) dell'aggiornamento del WACC riconosciuto per il 2024 e per l'ampliamento della Regulated Asset Base (RAB).

[53] I settori di attività del Gruppo Terna sono coerenti con il sistema di controllo di gestione interno adottato dalla Capogruppo, in linea con il Piano Industriale 2024-2028.

Teleborsa: distribution and commercial use strictly prohibited

I **ricavi delle Attività Regolate**, al netto dei ricavi di costruzione per le attività in concessione (+32,3 milioni di euro), registrano un incremento pari a 394,1 milioni di euro, imputabile principalmente:

- all'impatto sul Corrispettivo di trasmissione dell'incremento del WACC riconosciuto per il 2024 (ex Delibera n. 556/2023, passato dal 5% nel 2023 al 5,8% nel 2024), dell'ampliamento della *Regulated Asset Base* (RAB) e degli ammortamenti riconosciuti, considerati i nuovi criteri di Regolazione Tariffaria 2024-2027 introdotti con Delibera ARERA n. 615/2023 (+383,0 milioni di euro);
- ai maggiori ricavi per il Corrispettivo di dispacciamento (+26,7 milioni di euro), principalmente per maggiori costi riconosciuti in tariffa DIS;
- ai minori incentivi output-based (-24,7 milioni di euro) dovuti essenzialmente ai minori incentivi relativi all'incremento della capacità di trasporto tra le zone di mercato previsti dalla Delibera n. 567/2019, pari a -66,8 milioni di euro, al netto dei maggiori ricavi riferiti al sistema di incentivazione per la riduzione dei costi del mercato dei servizi di dispacciamento (Delibera n. 597/2021 e Delibera n. 132/2022), pari a +42,1 milioni di euro;
- ai maggiori ricavi relativi al meccanismo di incentivazione della qualità del servizio – ENSR (+9,3 milioni di euro), dovuto alla performance 2024 (6,8 milioni di euro) e alle sopravvenienze rilevate per la riqualificazione di alcuni eventi emersi nel corso dell'esercizio 2023 (2,5 milioni di euro);
- alle minori plusvalenze per alienazione cespiti (-9,0 milioni di euro, essenzialmente di rottami, trasformatori e autoveicoli);
- ai maggiori ricavi derivanti dalle maggiori richieste e dai maggiori corrispettivi per i servizi di connessione alla RTN (+5,1 milioni di euro).

I **costi delle Attività Regolate**, al netto dei costi di costruzione per le attività in concessione (+32,3 milioni di euro), rilevano un incremento di 18,2 milioni di euro, derivante principalmente:

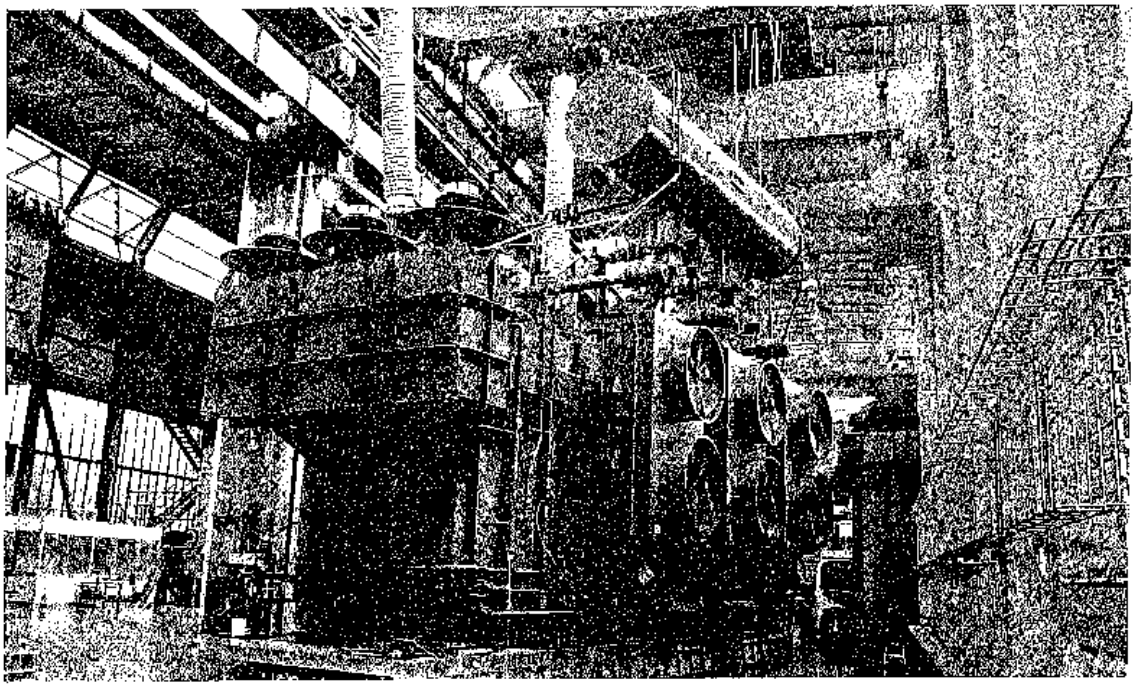
- dall'impatto sul costo del personale (+10,0 milioni di euro) dell'incremento della consistenza media e delle incentivazioni straordinarie erogate nel 2024, in parte compensate dai maggiori accantonamenti relativi alle incentivazioni effettuate nel primo semestre 2023 e dalle maggiori capitalizzazioni;
- dai maggiori costi per risorse esterne (+5,9 milioni di euro) dovuti alle maggiori attività e alle nuove iniziative poste in essere dal Gruppo;
- dai minori oneri relativi alla qualità del servizio (-2,8 milioni di euro), riconducibili principalmente ai maggiori oneri sostenuti per gli eventi di disalimentazione avvenuti nel primo semestre 2023;
- all'adeguamento fondi rischi e oneri (+7,0 milioni di euro), dovuto all'accantonamento per i canoni di attraversamento di elettrodotti e cavidotti parzialmente compensati dal rilascio di alcune vertenze del periodo.

555

Telebo'sa: distribution and commercial use strictly prohibited

Le Attività Non Regolate

Le Attività Non Regolate sono sempre orientate al supporto della transizione energetica, in coerenza con il *core business*. Il *know how* di Terna è utilizzato per la progettazione, ingegnerizzazione, esercizio e manutenzione di soluzioni complesse, anche grazie all'integrazione delle reti di telecomunicazione e di sistemi proprietari alle competenze nelle FER, nella produzione di cavi e trasformatori. Il nostro obiettivo è infatti quello di mettere al servizio di clienti commerciali e industriali competenze ed esperienza con una vasta gamma di soluzioni.



I principali ambiti in cui nel 2024 sono state sviluppate tali attività sono:

- **Equipment**
- **Connectivity**
- **Energy services**
- **Interconnector privati ex legge 99/2009**

Equipment

Attraverso due società leader nel proprio settore Terna ha la possibilità di controllare know-how e approvvigionamenti relativi a due elementi fondamentali per lo sviluppo della Rete:

- **Trasformatori - Gruppo Tamini:** leader mondiale nella produzione di trasformatori industriali e nel after-sales;
- **Cavi terrestri - Gruppo Brugg Cables:** un centro di eccellenza per la ricerca, lo sviluppo e il testing nel settore dei cavi terrestri, basato in Svizzera ma con numerose controllate all'estero.

556

Teleborsa: distribution and commercial use strictly prohibited

Trasformatori – Gruppo Tamini

Tamini opera nel settore elettromeccanico ed è leader nella progettazione, produzione, commercializzazione e riparazione di trasformatori di potenza per reti di trasmissione e distribuzione di energia elettrica, di trasformatori industriali per il settore siderurgico e metallurgico e di trasformatori speciali per convertitori con applicazioni in ambito elettrochimico. Tamini, con più di cento anni di attività industriale, rappresenta un marchio consolidato in Italia e all'estero grazie alle capacità tecnologiche e ingegneristiche unite alla capacità di customizzazione e flessibilità produttiva.

Ordinativi

Gli ordini di trasformatori acquisiti sono pari a circa 315 milioni di euro, in aumento rispetto all'esercizio precedente (+6%).

In particolare, nel comparto Power gli ordini sono pari a circa 236 milioni di euro, in crescita rispetto all'esercizio precedente (pari a circa 230 milioni di euro), mentre nel comparto Industrial gli ordini sono pari a circa 80 milioni di euro, in aumento rispetto al 2023 (+19%).

Gli ordini di Service sono pari a circa 19 milioni di euro, in aumento rispetto all'esercizio precedente (+12%).

Il carico delle fabbriche è pari a circa 422 milioni di euro, in forte aumento rispetto a fine 2023 (+38%).

Risultati

I ricavi del 2024 sono in forte aumento rispetto al 2023 (+23%) principalmente per il maggior valore della produzione di trasformatori.

Per il comparto Power, si segnala il collaudo di alcune macchine molto importanti come:

- 1 Phase-Shifting Transformer da 400 MVA per un importante TSO nel Nord Europa;
- 1 Trasformatore di potenza da 440 MVA per alimentare un'importante centrale elettrica in Italia;
- 2 Trasformatori Step up da 290 MVA per il collegamento di un compensatore sincrono alla Rete Elettrica Nazionale;
- 5 trasformatori di potenza (1 da 200 MVA, 2 da 170 MVA e 2 da 40 MVA) per alimentare 3 datacenter in Italia;
- 3 Autotrasformatori da 160 MVA per un importante TSO nel Nord Europa.

Per il comparto Industrial sono stati collaudati:

- 5 Trasformatori da raddrizzamento da 122,6 MVA per un'importante acciaieria negli Stati Uniti;
- 1 trasformatore da forno da 240 MVA per un importante azienda metallurgica in Europa;
- 1 trasformatore da raddrizzamento da 112 MVA per un importante player nel settore dell'alluminio in Nord Europa.

Trasformatori a olio Vegetale

Il Gruppo Tamini si è specializzato, negli ultimi anni, nella progettazione e produzione di Trasformatori Verdi di alta potenza e tensione, che tra i principali vantaggi presentano:

- un significativo aumento della potenza a parità di peso;
- un'aspettativa di vita estesa;
- infiammabilità ridotta;
- eco-compatibilità.

Si conferma nel 2024 l'impegno di Tamini nella produzione di trasformatori a olio vegetale per il settore Power. Nel 2024 è stato collaudato un Autotrasformatore da 400 MVA/400 kV in Italia e un trasformatore da 50 MVA/118 kV per un parco eolico in Finlandia.

SSF

Teleborsa: distribution and commercial use strictly prohibited

Cavi terrestri - Gruppo Brugg Cables

Il Gruppo Brugg Cables opera nel settore dei cavi terrestri di ogni livello di tensione, dalla bassa all'altissima, ed è attivo nella progettazione, sviluppo, produzione, installazione e manutenzione di cavi elettrici di ogni tensione e accessori per cavi ad alta e altissima tensione.

Ordinativi

Gli ordini acquisiti nel 2024 ammontano a circa 293 milioni di CHF, registrando un incremento del 4% rispetto al 2023. Un contributo significativo proviene dal segmento High Voltage System, che ha totalizzato circa 201 milioni di CHF. Anche il segmento Low Medium Voltage ha dato un apporto rilevante con circa 42 milioni di CHF, mentre il segmento High Voltage Accessories ha contribuito con circa 49 milioni di CHF.

La produzione di cavi ad alta tensione ha registrato un calo del 16% rispetto al 2023, attribuibile alla maggiore complessità dei cavi realizzati; conseguentemente, anche la produzione di cavi a bassa e media tensione è diminuita del 10% a causa della priorità assegnata alla produzione di cavi ad alta tensione.

Risultati

I ricavi del 2024, pari a circa 239 milioni di CHF, risultano sostanzialmente in linea rispetto al 2023 (circa -1%). La marginalità è in netto miglioramento rispetto all'anno precedente, grazie a significative azioni mirate all'efficientamento dei costi, a una rigorosa selezione degli ordini e al perfezionamento delle strategie di *pricing*.

Attività operativa

Il segmento High Voltage Accessories registra, nel 2024, una performance decisamente positiva con un incremento degli ordini, dei volumi e della marginalità, in netto miglioramento rispetto all'anno precedente.

Per i sistemi ad alta e altissima tensione, il 2024 ha registrato un trend positivo e in crescita nell'acquisizione di ordini, con marginalità in aumento rispetto agli anni precedenti e uno sviluppo particolarmente favorevole nel mercato europeo.

Nel segmento bassa e media tensione, la rinegoziazione degli accordi quadro avviata nel 2023 ha avuto esiti positivi, portando a una stabilizzazione del margine. L'attenzione rimane localizzata sull'elevata qualità richiesta dal mercato e sul consolidamento della forte posizione nel mercato locale svizzero.

Teleborsa: distribution and commercial use strictly prohibited

Connectivity

L'infrastruttura di fibra ottica, capillare sul territorio, viene messa a disposizione per rispondere alla sempre crescente necessità di connessioni digitali, veloci e affidabili. I partner vengono supportati anche per sviluppare soluzioni smart in ambito connettività, attraverso la concessione di diritto d'uso di fibra ottica, affitto dei tralicci e Housing e facility (installazione di apparecchiature di telecomunicazione all'interno di spazi Terna già operativi).

Terna, attraverso la concessione di diritti d'uso di fibra ottica permette al cliente di avere a disposizione un'infrastruttura nuova, con performance superiori agli standard dei cavi interrati sia in termini di affidabilità (nr. di guasti annui per km molto inferiore), che per qualità (attenuazione bassa), con risparmi significativi in termini di lunghezza rispetto a collegamenti terrestri (>al 20% sui long distance).

Complessivamente, a partire dal 2017, sono stati concessi in IRU circa 42.700 km di coppia di fibra ottica, per i quali Terna provvede alla manutenzione e al servizio di Housing per rigenerazione. Nel 2024 sono stati consegnati complessivamente circa 6.205 km di coppie di fibra.

Energy Services

Servizi di ingegneria, approvvigionamento e costruzione (EPC), esercizio e manutenzione (O&M) e servizi digitali. In particolare, tra questi, si rappresentano nel seguito le principali iniziative dell'anno.

Smart grid

Realizzazione di soluzioni chiavi in mano per le imprese che vogliono valutare, progettare e integrare nel proprio ciclo produttivo impianti rinnovabili (fotovoltaici o eolici), sistemi di storage (batterie) o soluzioni di cogenerazione/trigenerazione. Si realizzano sistemi complessi di generazione, storage, active demand behind the meter, utility scale e di controllo evoluto degli impianti stessi in grado di ottimizzarne l'esercizio.

Rinnovabili – Gruppo LT

Il Gruppo LT è attivo nel settore O&M di impianti fotovoltaici, nella progettazione e nella realizzazione di interventi di revamping e repowering di impianti esistenti e nella costruzione di nuovi impianti fotovoltaici per conto terzi. I ricavi realizzati nel corso dell'esercizio 2024, pari a circa 119,5 milioni di euro, risultano in linea rispetto a quanto pianificato. Rispetto alla chiusura dell'esercizio 2023 si registra un incremento di ricavi di circa 12,5 milioni di euro imputabile principalmente alle attività di EPC, cresciute di oltre il 20%, e una sostanziale conferma dei ricavi relativi alle attività di O&M e alle attività di revamping e repowering.

Altri progetti

Nel corso 2024, a seguito dell'entrata in servizio dell'impianto Storage sull'isola di Pantelleria, è stato effettuato il fine tuning in condizioni di esercizio reali.

In merito ai contratti di revamping/repowering di impianti fotovoltaici, sono in corso o in fase di conclusione le attività sui siti nelle regioni Emilia-Romagna, Puglia e Sicilia. Sono inoltre in corso le attività di revamping inverter su diversi siti nazionali di un unico cliente.

Teleborsa: distribution and commercial use strictly prohibited

Alta tensione

Nel corso del 2024 sono proseguite le attività operative per la realizzazione di due stazioni elettriche, nel Lazio e in Sardegna, destinate alla connessione di impianti fotovoltaici Utility Scale. In particolare, per quanto riguarda l'impianto del Lazio, si è raggiunta la fase di mechanical completion.

Per l'impianto fotovoltaico Utility Scale in Sicilia, è stata completata la prima fase (soluzione di connessione provvisoria - stazione elettrica realizzata tramite utilizzo di modulo SCRI), e avviata la seconda fase (soluzione di connessione definitiva).

Proseguono inoltre le attività relative all'accordo quadro con Rete Ferroviaria Italiana (RFI) relativo alla "Progettazione, fornitura, posa in opera, certificazione e messa in servizio delle Apparecchiature di Misura (AdM)". Al 31 dicembre 2024 sono state effettuate 41 installazioni, per un totale di 101 impianti installati, in linea con i contratti applicativi in essere.

In corso le attività relative a un progetto di realizzazione, chiavi in mano, di un'infrastruttura di connessione alla RTN (stazione elettrica e Cavo AT[54]) per un importante cliente operante nel settore dei data center in provincia di Milano.

Nel corso del 2024 sono state altresì completate le attività di cantiere su due progetti di revamping inerenti a stazioni elettriche presso due importanti clienti industriali, rispettivamente del settore automobilistico e chimico/materie plastiche, in Emilia-Romagna.

Sono state inoltre avviate le attività relative ad alcuni progetti di recente contrattualizzazione, quali un revamping d'impianto AT in Sicilia, un rinnovo parziale d'impianto (sez MT e SPCC[55]) in Toscana, nonché un'ulteriore attività di revamping a San Marino.

Nel 2024 sono stati acquisiti inoltre un contratto per revamping Gruppi di Misura 220 kV e 132 kV in Valle d'Aosta, e un contratto per Revamping AT stallo trasformazione 132 kV in Lombardia, per un cliente operante nel settore della produzione industriale, per i quali è stato avviato il processo di procurement per materiali e prestazioni dei progetti.

Sono state inoltre acquisite e concluse due attività, relative a interventi non programmabili, per la sostituzione di componenti AT obsoleti presso clienti industriali nel Triveneto.

Sono state completate le attività finalizzate alla fornitura, posa cavo AT e rispettivi terminali alle estremità presso l'impianto primario di distribuzione nell'area metropolitana di Palermo e le attività relative all'installazione e messa in servizio di un trasformatore AT/MT[56] presso un cliente gestore dell'infrastruttura pubblica di approvvigionamento idrico-potabile della regione Puglia e di alcuni comuni della Campania.

Al 31 dicembre 2024 sono concluse le attività di revamping di una SSE a 132 kV, che alimenta l'acciaieria di un cliente in provincia di Arezzo.

Nell'ambito di un contratto di O&M pluriennale, sono in corso le attività di adeguamento di un impianto BESS da 14 MW, sito ad Assemini (CA), ai sensi dell'allegato A79 del Codice di Rete.

Si segnala inoltre un incremento delle attività di revamping delle stazioni elettriche in ambito AT, i cui principali contratti riguardano clienti del settore oil&gas, della cantieristica navale e della produzione industriale.

[54] Alta tensione.
[55] Sistema Protezione Controllo e Comando.
[56] Media tensione.

Teleborsa: distribution and commercial use strictly prohibited

Interconnector Privati ex Legge 99/2009

Per sviluppare un mercato unico dell'energia elettrica attraverso il potenziamento della capacità di interconnessione con l'estero, la normativa comunitaria ha tracciato le linee guida per la realizzazione di infrastrutture di interconnessione con l'estero anche da parte di soggetti distinti dai gestori delle reti.

La normativa italiana ha recepito le indicazioni europee nella **Legge 99/2009**, che ha affidato a Terna il compito di selezionare, sulla base di gare pubbliche, le Società (Soggetti Selezionati) disposte a finanziare specifiche interconnessioni a fronte dei benefici loro derivanti dall'ottenimento di un Decreto di esenzione dall'accesso di terzi sulla capacità di trasporto che le relative infrastrutture renderebbero disponibile.

La Legge prevede che tali soggetti, a fronte del rilascio dell'esenzione, si impegnino a finanziare le infrastrutture di interconnessione, affidando a Terna un mandato per la realizzazione e l'esercizio delle interconnessioni.

Nell'ambito del quadro legislativo definito dalla Legge 99/2009 Terna gestisce le attività di manutenzione (ordinaria e straordinaria) ed esercizio degli interconnector realizzati ed entrati in esercizio. In particolare:

Progetto Interconnector Italia – Montenegro

Il progetto, completato il 28 dicembre 2019, è di proprietà della società Monita Interconnector S.r.l., ceduta dal Gruppo Terna ai finanziatori privati il 17 dicembre 2019.

Progetto Interconnector Italia – Francia

Il progetto, completato il 7 novembre 2022, è di proprietà della società Piemonte Savoia S.r.l., ceduta dal Gruppo Terna ai finanziatori privati il 4 luglio 2017.

Progetto Interconnector Italia – Austria

Il progetto, entrato in esercizio il 15 dicembre 2023, è di proprietà della società Resia Interconnector S.r.l., ceduta dal Gruppo Terna ai finanziatori privati il 15 settembre 2021.

Sono inoltre in fase di sviluppo due ulteriori interconnector, con Svizzera e Slovenia:

Progetto Interconnector Italia – Svizzera

Il progetto, che prevede lo sviluppo di nuove linee di trasmissione fra Italia e Svizzera, è finalizzato a incrementare la capacità di interconnessione con l'estero sulla frontiera con la Svizzera. Il progetto è attualmente in fase di studio.

Progetto Interconnector Italia – Slovenia

È prevista la realizzazione di una linea in corrente continua, in parte in cavo marino, fra le stazioni di Salgareda (IT) e Divaça/Beričevo (SI), nonché alcuni interventi di adeguamento della rete interna in Italia e in Slovenia. Il progetto è attualmente in autorizzazione lato Italia. L'incremento atteso della capacità transfrontaliera per circa 1 GW consentirà di portare la capacità di scambio a un valore più che doppio rispetto a quello attuale.

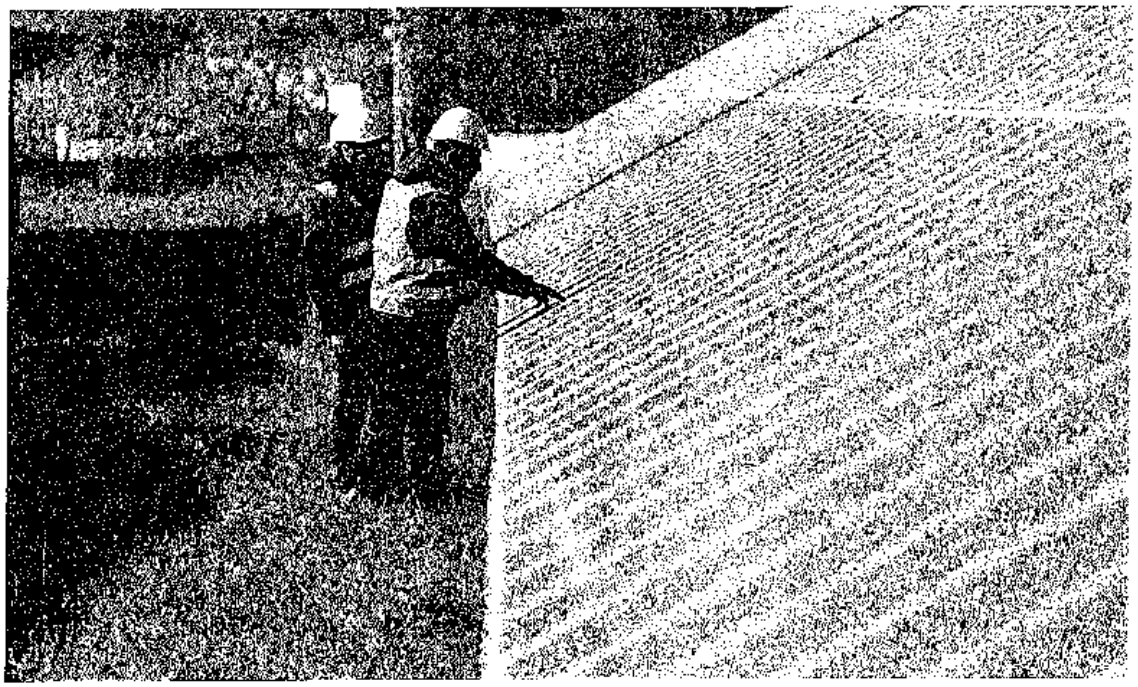
FOCUS



Riorganizzazione nell'ambito delle Attività Non Regolate

Coerentemente con la strategia di supporto alla twin transition di cui al Piano Industriale 2024-2028, ad agosto 2024 è stata costituita una nuova Direzione "Soluzioni A Mercato" per il coordinamento operativo delle attività del Gruppo sui mercati competitivi, svolte in particolare dalla società Terna Energy Solutions S.r.l. (di seguito anche "TES") e dalle società da questa controllate, i.e. LT S.r.l., Avvenia S.r.l., Tamini Trasformatori S.r.l. e Brugg Kables Services AG e loro controllate, con l'obiettivo di eccellere sui mercati guidati dalla transizione energetica e digitale, facendo forte leva sulle competenze specialistiche.

La nuova Direzione consta di quattro divisioni di business: i) servizi, per l'offerta al mercato di servizi di progettazione, costruzione e manutenzione di impianti elettrici; ii) apparati, per la fornitura di componenti di impianti quali trasformatori; iii) per la fornitura di componenti di impianti quali cavi e iv) connectivity, per la messa a disposizione di un'infrastruttura ottica spenta per lo sviluppo di connessioni digitali veloci.

Con particolare riferimento alla divisione servizi, allo scopo di una migliore focalizzazione sui mercati guidati dalla transizione energetica, la nuova società Altenia S.r.l. (precedentemente denominata LT S.r.l., che dal mese di marzo 2025 ha modificato la propria denominazione sociale a seguito della suddetta riorganizzazione) dal 1° aprile 2025, tramite un conferimento ramo, ha assunto la gestione del business Energy Services, precedentemente svolto da TES e LT, per la progettazione, costruzione e manutenzione di impianti elettrici in alta tensione e di impianti rinnovabili in particolare fotovoltaici, nonché soluzioni di efficienza energetica. In ragione ed in conseguenza di tale operazione, la partecipazione di TES nella società Altenia S.r.l. è quindi passata dall'87,5% all'89%.

Con lo scopo di espandere ulteriormente le competenze e il posizionamento geografico di Altenia, è stato sottoscritto un accordo preliminare per l'acquisizione del 100% di STE Energy, società attiva da 30 anni nel settore della progettazione, costruzione e manutenzione di impianti di energia rinnovabile e infrastrutture elettriche.

Risultati economici delle Attività Non Regolate

La ripartizione dei risultati del Gruppo Terna per il settore Non Regolato, riferiti agli esercizi 2024 e 2023, è dettagliata nel prospetto seguente[58]. Si precisa che tali informazioni sono conformi a quanto esposto nell'ambito del Bilancio consolidato, in linea con quanto disposto dall'IFRS 8, nella nota "C. Settori operativi".

(€/milioni)

	2024	2023	Δ
Totale ricavi Attività Non Regolate	**584,0**	**516,8**	**67,2**
Equipment	340,4	306,7	33,7
- Gruppo Brugg Cables	*174,3*	*167,6*	*6,7*
- Gruppo Tamini	*166,1*	*139,1*	*27,0*
Connectivity	43,6	40,2	3,4
Energy Services	175,2	147,2	28,0
- Alta tensione	*50,9*	*33,9*	*17,0*
- Smart Grids	*124,3*	*113,3*	*11,0*
Interconnector privato	20,5	19,1	1,4
Altro	4,3	3,6	0,7
Totale costi Attività Non Regolate	**476,2**	**429,9**	**46,3**
Costi operativi	162,3	131,1	31,2
Gruppo Brugg Cables	164,6	167,0	(2,4)
Gruppo Tamini	149,3	131,8	17,5
EBITDA Attività Non Regolate	**107,8**	**86,9**	**20,9**

L'EBITDA relativo alle Attività Non Regolate dell'esercizio 2024, pari a 107,8 milioni di euro, registra un incremento di 20,9 milioni di euro rispetto all'esercizio precedente, dovuto principalmente al maggior contributo dell'Equipment (+9,1 milioni di euro del Gruppo Brugg Cables, che ha tratto vantaggio dalla flessione dei prezzi delle materie prime, e +9,5 milioni di euro del Gruppo Tamini, il quale ha beneficiato dell'espansione complessiva del settore di riferimento), e della Connectivity (+2,1 milioni di euro).

[58] I settori di attività del Gruppo Terna sono coerenti con il sistema di controllo di gestione interno adottato dalla Capogruppo, in linea con il Piano Industriale 2024-2028.

563

Teleborsa: distribution and commercial use strictly prohibited

Le Attività all'estero

La crescente domanda elettrica e la necessità di integrazione di fonti rinnovabili sono alla base di forti investimenti nel settore della trasmissione elettrica in mercati esteri dove il Gruppo Terna può valorizzare le competenze maturate in Italia nel ruolo di sviluppatore e gestore di reti di trasmissione elettriche (TSO) complesse.

Le attività di *scouting* di opportunità all'estero del Gruppo Terna sono indirizzate verso Paesi caratterizzati da un assetto politico stabile, un sistema regolatorio che consente l'accesso a operatori esterni e da rendimenti non inferiori a quelli italiani.

Nel 2024 sono state poste in essere le seguenti attività:

Sud America – cessione portafoglio LatAm

Nell'ambito delle iniziative all'estero, è proseguito il progetto di valorizzazione delle attività in Sudamerica, avviato nell'ultima parte del 2021, con l'obiettivo di **cessione fino al 100% del portafoglio LatAm**.

Il *closing* dell'operazione, previsto in più fasi, è avvenuto per la maggior parte nei mesi di novembre e dicembre 2022, rispettivamente con la cessione a CDPQ (il gruppo globale di investimenti Caisse de dépôt et placement du Québec) di SPE Santa Maria Transmissora de Energia S.A., SPE Santa Lucia Transmissora de Energia S.A., SPE Transmissora de Energia Linha Verde II S.A. e di Difebal S.A.

A gennaio 2024, in Brasile, è entrata in esercizio commerciale l'infrastruttura elettrica a 500 kV Governador Valadares-Mutum, lunga circa 150 km e situata nello Stato del Minas Gerais, relativa alla società **SPE Transmissora de Energia Linha Verde I S.A.** ceduta in data 18 novembre 2024 a CDPQ.

Proseguono in **Perù** le attività di esercizio e mantenimento della linea di 132 km a 138 kV tra Aguaytia e Pucallpa, in seguito all'entrata in esercizio commerciale dell'opera effettuata in data 16 maggio 2021.

Si precisa inoltre che, in data **17 dicembre 2024**, è stato formalmente avviato il processo di liquidazione della società Terna Chile S.p.A.. Tale procedura si prevede che sarà conclusa nel corso del 2025.

Nord America

Sono proseguite le attività di monitoraggio del mercato statunitense con riferimento ai progetti infrastrutturali di trasmissione elettrica attraverso le società **Terna USA LLC** (controllata al 100% da Terna Plus S.r.l.) e **BMT Energy Transmission Development LLC**, joint venture partecipata al 40% da Terna USA LLC e al 60% da Meridian (società di investimenti indipendente).

Risultati economici delle Attività all'estero

La ripartizione dei risultati del Gruppo Terna per l'area di business all'estero, riferita agli esercizi 2024 e 2023, è di seguito esposta[58]. Si precisa che tali informazioni sono conformi a quanto esposto nell'ambito del Bilancio consolidato, in linea con quanto previsto dall'IFRS 8, nella nota "C. Settori operativi".

L'EBITDA del 2024 e del 2023 delle attività all'estero, non accoglie i risultati delle iniziative in America Latina coinvolte nel progetto di cessione descritto in precedenza; questi ultimi sono invece rappresentati nella voce "Risultato netto dell'esercizio delle attività cessate e destinate alla vendita" come previsto dal principio contabile internazionale IFRS 5, nel prospetto di conto economico riclassificato nell'ambito del paragrafo delle "Le performance economiche, finanziarie e patrimoniali 2024 del Gruppo Terna".

L'EBITDA relativo alle Attività all'estero del 2024 pari a -2,9 milioni di euro, è relativo sostanzialmente ai costi sostenuti dalle strutture centrali per il supporto alle iniziative all'estero. Il dato è in linea rispetto allo stesso periodo dell'esercizio precedente.

Il risultato netto dell'esercizio delle attività cessate e destinate alla vendita è rappresentato da un utile pari a 11,6 milioni di euro e rileva un incremento di 9,1 milioni di euro rispetto all'esercizio precedente, essenzialmente per effetto della plusvalenza derivante dal terzo closing per la cessione a CDPQ della società SPE Transmissora de Energia Linha Verde I S.A., perfezionata nel mese di novembre 2024.

Per maggiori dettagli in merito si rinvia all'apposito paragrafo della Nota Illustrativa di consolidato nota 11.

[58] I settori di attività del Gruppo Terna sono coerenti con il sistema di controllo di gestione interno adottato dalla Capogruppo, in linea con il Piano Industriale 2024-2028.

Le risorse finanziarie del Gruppo Terna

La gestione del Gruppo è guidata da un approccio che mira alla massima efficienza, al conseguimento e mantenimento di una struttura finanziaria solida e all'integrazione del concetto di sostenibilità nella strategia finanziaria, mitigando in maniera particolarmente prudenziale i potenziali rischi.

In particolare, i tratti distintivi della strategia finanziaria che ne derivano sono:

- la **diversificazione** delle fonti di finanziamento, ottenuta facendo ricorso sia al mercato dei capitali sia a finanziamenti sottoscritti da primari istituti di credito e istituti sovranazionali;
- un **bilanciamento** tra strumenti a breve e a medio-lungo termine che sia coerente con la composizione dell'attivo;
- una **gestione proattiva** dell'indebitamento per cogliere tutte le opportunità offerte dal mercato dei capitali;
- l'impegno a conservare un **elevato merito di credito**, basato su un'elevata solidità finanziaria e patrimoniale;
- una **gestione attiva dei rischi finanziari** della Società, meglio dettagliati nella sezione "Gestione dei rischi".

Finanza sostenibile

In totale coerenza con la strategia di Gruppo, volta a coniugare investimenti e sostenibilità come volàno di crescita e creazione di valore, Terna ambisce a imporsi come uno dei leader nel mercato della finanza sostenibile. Questa strategia è stata confermata anche nel corso del 2024.

Al 31 dicembre 2024 i **green bond senior emessi da Terna,** nell'ambito del programma Euro Medium Term Notes (EMTN) da 12.000.000.000 di euro, e non ancora scaduti, sono pari a **2,25 miliardi di euro,** in aggiunta alle **due emissioni ibride green subordinate perpetue**, rispettivamente emesse a febbraio 2022 e aprile 2024 su base *standalone*, **per un importo complessivo di 1,85 miliardi di euro**.

Con riferimento al debito obbligazionario green, in data 4 aprile 2024 è stata lanciata con successo la seconda emissione **obbligazionaria perpetua subordinata ibrida non convertibile green**, a tasso fisso, per un ammontare nominale complessivo pari a **850 milioni di euro**. Il bond è non "callable" per sei anni, il prezzo di emissione è stato fissato al 99,745%, con uno spread di 214,2 punti base rispetto al tasso midswap. L'emissione prevede una cedola fissa annuale del 4,750% che verrà corrisposta fino alla prima data di reset (esclusa), prevista l'11 aprile 2030 e avrà un tasso effettivo pari a 4,800%. A partire da tale data, qualora non sia avvenuto il rimborso anticipato, l'obbligazione ibrida maturerà interessi annui pari al tasso midswap di riferimento a cinque anni, incrementato di un margine iniziale di 214,2 punti base, incrementato di un ulteriore margine di 25 punti base a partire dall'11 aprile 2035 e di un successivo aumento di ulteriori 75 punti base a partire dall'11 aprile 2050.

Inoltre, in data 10 febbraio 2025, Terna ha lanciato **una nuova emissione obbligazionaria green**, single tranche, sempre nell'ambito del Programma EMTN, per un **valore nominale complessivo pari a 750 milioni di euro, una durata pari a 7 anni** e scadenza in data 17 febbraio 2032. Il bond è stato emesso a un prezzo pari a 99,975%, con uno spread di 90 punti base rispetto al tasso midswap e prevede una cedola annuale pari a 3,125%.

566

Teleborsa: distribution and commercial use strictly prohibited

Le emissioni obbligazionarie green sono destinate al finanziamento o al rifinanziamento dei cosiddetti **Eligible Green Projects**, progetti con benefici ambientali che soddisfano i criteri elencati nel **Green Bond Framework** pubblicato da Terna in conformità ai Green Bond Principles 2021, predisposti dall'ICMA - International Capital Market Association, e alla Tassonomia dell'Unione Europea. Il Green Bond Framework di Terna è valutato da un **"Second Party Opinion" provider, Moody's Investors Service** che nell'ottobre 2023 ha assegnato, in continuità col passato, un **"SQS1 Sustainability Quality Score (Excellent)"** nella sua Second Party Opinion, livello di valutazione più alto possibile.

Nello specifico, i proventi netti delle emissioni sono utilizzati per il finanziamento di:

- progetti finalizzati all'aumento della produzione da fonti rinnovabili - ad esempio, infrastrutture che consentono la connessione di impianti di generazione da fonti rinnovabili alla rete o che permettano un maggiore afflusso di energia da fonti rinnovabili nella rete;
- progetti rivolti alla riduzione delle emissioni di CO_2 del sistema attraverso la riduzione di perdite di rete - ad esempio, infrastrutture volte a incrementare l'efficienza della rete di trasmissione elettrica;
- progetti rivolti alla qualità, sicurezza e resilienza dell'infrastruttura di rete;
- progetti indirizzati alla riduzione dello sfruttamento del suolo e alla tutela della biodiversità.

I **green bond senior emessi da Terna** sono altresì quotati nel **segmento ExtraMOT PRO di Borsa Italiana** (in aggiunta alla quotazione sul mercato regolamentato Luxembourg Stock Exchange), nato per offrire agli investitori istituzionali e retail la possibilità di identificare strumenti i cui proventi sono destinati al finanziamento di progetti con specifici benefici o impatti di natura ambientale e sociale. Inoltre, l'ultimo green bond da 750 milioni di euro, emesso il 10 febbraio 2025, è stato altresì quotato sul mercato telematico delle obbligazioni (MOT) gestito da Borsa Italiana.

Al 31 dicembre 2024, Terna può inoltre fare affidamento su diversi **ESG linked Term Loan** per un ammontare complessivo **di 1,25 miliardi di euro, tre ESG linked Revolving Credit Facility** legate a indicatori di sostenibilità per un ammontare complessivo pari a circa **4,2 miliardi di euro e un programma di Euro Commercial Paper (ECP) da 2 miliardi di euro** per l'emissione di titoli obbligazionari a breve termine convenzionali o denominati "ESG Notes".

In particolare, in merito alle **ESG-linked Revolving Credit Facility** si segnala che, in data 15 aprile 2024, è stato sottoscritto un **amendment and restatement agreement volto a incrementare a 2,255 miliardi di euro l'importo di una Revolving Credit Facility** sottoscritta nel maggio 2023 (pari a 1,8 miliardi di euro) e in data 29 maggio 2024 è stata sottoscritta una nuova **ESG-linked Revolving Credit Facility** con Intesa Sanpaolo, per un ammontare complessivo di **250 milioni di euro** e una durata di cinque anni. Si segnala inoltre che il 21 marzo 2025, è stata sottoscritta una **ESG-linked Revolving Credit Facility**, per un importo complessivo **di 1,8 miliardi di euro**, volta a rifinanziare la ESG Revolving Credit Facility sottoscritta il 17 dicembre 2021 per un ammontare complessivo di 1,65 miliardi di euro.

Per quanto concerne gli **ESG linked Term Loan**, il 4 luglio 2024 è stato sottoscritto un **Credit Facility Agreement ESG-linked** con Unicredit per un ammontare complessivo di **200 milioni di euro** e una durata massima di cinque anni. Successivamente, il 31 luglio 2024, è stato sottoscritto un **Credit Facility Agreement ESG-linked** con Banca Nazionale del Lavoro e CaixaBank per un ammontare complessivo di **400 milioni di euro** e una durata di cinque anni; in aggiunta, in data 4 ottobre 2024, è stato sottoscritto un **Credit Facility Agreement ESG-linked** con Intesa Sanpaolo per un ammontare complessivo di **400 milioni di euro** e una durata massima di cinque anni; da ultimo, in data 18 dicembre 2024, sono stati sottoscritti due ulteriori **Credit Facility Agreement ESG-linked**, per un ammontare complessivo di **250 milioni di euro** e una durata di cinque anni, rispettivamente con Banco BPM per 150 milioni di euro e con Mediobanca – Banca di Credito finanziario S.p.A. per 100 milioni di euro.

In linea con l'impegno di Terna sui temi di sostenibilità e di responsabilità socio-ambientale, si è concluso a settembre il **Programma di acquisto di azioni proprie** a servizio del Piano Performance Share 2024-2028, per un esborso complessivo pari a circa 8 milioni di euro e l'acquisto di 998.428 azioni proprie (rappresentative dello 0,050% circa del capitale sociale). Il Programma prevede un meccanismo legato al raggiungimento di specifici obiettivi ESG da parte della Società.

La leadership di Terna nella finanza sostenibile è stata ampiamente riconosciuta dal mercato che, dal 2018, ha accolto con grande favore tutte le emissioni obbligazionarie green della Società. Terna, oltre a essere inclusa nei principali indici ESG, a partire da gennaio 2021, è stata la prima electric utility italiana ad aver aderito al **Nasdaq Sustainable Bond Network**, la piattaforma gestita dal Nasdaq dedicata alla finanza sostenibile che unisce investitori, emittenti, banche d'investimento e organizzazioni specialistiche.

Terna continua, inoltre, la sua partecipazione alla **CFO Coalition for the SDGs**, evoluzione della **CFO Taskforce for the SDGs**, l'iniziativa lanciata a fine 2019 dall'UN Global Compact per lo sviluppo della finanza sostenibile, che ha visto Terna tra i fondatori. La Coalition ha l'obiettivo di proseguire sulla strada della sostenibilità, ampliare la comunità globale, e seguire l'esempio fornito dai CFO fondatori della Task Force.

A ulteriore conferma dell'impegno a svolgere un ruolo attivo nello sviluppo della finanza sostenibile, Terna partecipa al **Corporate Forum on Sustainable Finance**, un network di aziende europee di primario *standing* che si sono impegnate a sviluppare la finanza sostenibile come strumento per promuovere una società più sostenibile e responsabile.

Infine, Terna, sia individualmente sia nell'ambito del Corporate Forum on Sustainable Finance sopra menzionato, monitora costantemente lo sviluppo della normativa europea, con particolare attenzione agli impatti della tassonomia sulla finanza sostenibile.

Ulteriori risorse finanziarie

Con riferimento al **debito di matrice bancaria**, per quanto concerne il progetto **Tyrrhenian Link**, Terna ha sottoscritto l'intero ammontare di 1 miliardo e 900 milioni di euro messo a disposizione dalla Banca Europea per gli Investimenti (BEI). Il contratto relativo all'**ultima tranche del finanziamento per il suddetto progetto**, per un importo pari a **500 milioni di euro**, è stato firmato in data 7 febbraio 2024.

Tale ultima tranche, congiuntamente con la prima tranche da 500 milioni di euro, sottoscritta l'8 novembre 2022 e con la seconda e la terza tranche del finanziamento, sottoscritto il 30 marzo 2023 per complessivi 900 milioni di euro, sono destinate a supportare la costruzione e la messa in esercizio del Ramo Est e del Ramo Ovest del Tyrrhenian Link.

In aggiunta, in data 24 ottobre 2024, Terna ha sottoscritto un nuovo **contratto di finanziamento con la BEI** da **400 milioni di euro** finalizzato a rafforzare l'efficienza e l'affidabilità della rete di trasmissione nazionale. L'accordo consolida ulteriormente la partnership tra la BEI e Terna, una collaborazione fondamentale per raggiungere gli obiettivi di REPowerEU e per promuovere la transizione e la sicurezza energetica in Europa.

I finanziamenti sopra indicati hanno una durata pari a circa ventidue anni dalla prima data di erogazione, sono caratterizzati da una durata più lunga e da costi più competitivi rispetto a quelli di mercato e rientrano così nella politica di ottimizzazione della struttura finanziaria di Terna.

Con riferimento al debito obbligazionario, si ricorda che, in data 10 gennaio 2024, è stata lanciata con successo, nell'ambito del Programma Euro Medium Term Notes (EMTN) di Terna, un'**emissione obbligazionaria single tranche, a tasso fisso** per un valore nominale complessivo di **850 milioni di euro e una durata pari a sette anni** e scadenza in data 17 gennaio 2031. Il bond, emesso a un prezzo pari a 99,385%, con uno spread di 100 punti base rispetto al tasso midswap, prevede una cedola annuale pari a 3,50%.

In aggiunta, in data 7 giugno 2024, Terna ha **rinnovato il proprio programma di emissioni obbligazionarie Euro Medium Term Note Programme (EMTN) incrementando altresì a 12 miliardi di euro l'importo massimo sottoscrivibile.** IMI – Intesa Sanpaolo e UniCredit hanno svolto il ruolo di Joint Arrangers del programma.

L'indebitamento al 31 dicembre 2024 del Gruppo Terna è illustrato dettagliatamente nel paragrafo "Le performance economiche, finanziarie e patrimoniali 2024 del Gruppo Terna".

Terna adotta un approccio dinamico alla gestione dei diversi **rischi finanziari**, quali quelli **di mercato** (rischio di tasso di interesse, di cambio e rischio di inflazione), **di liquidità** e **di credito**. Tale approccio è caratterizzato da un continuo monitoraggio dei mercati finanziari, finalizzato a effettuare le pianificate operazioni di copertura in condizioni di mercato ritenute favorevoli, ma anche a intervenire con fini migliorativi sulle coperture esistenti, qualora i cambiamenti nelle condizioni di mercato rendano queste ultime inadatte o eccessivamente onerose. Per maggiori approfondimenti in merito si rimanda alle Note illustrative del Bilancio consolidato e del Bilancio d'esercizio della Capogruppo.

Le performance
economiche, finanziarie e patrimoniali 2024 del Gruppo Terna

Premessa

La Relazione Finanziaria Annuale 2024 è stata redatta in accordo con le previsioni dell'art. 154-ter del D.Lgs. 58/98 introdotto dal Decreto Legislativo 6 novembre 2007, n. 195 (c.d. "Decreto Transparency"), così come modificato dal Decreto Legislativo del 27 gennaio 2010, n. 27.

In attuazione della previsione del Decreto Legislativo 28 febbraio 2005 n. 38 e del Regolamento CEE n. 1606/2002, il Bilancio d'esercizio della capogruppo Terna S.p.A. e il Bilancio consolidato del Gruppo Terna al 31 dicembre 2024 sono redatti conformemente ai principi contabili internazionali (IFRS) emessi dall'International Accounting Standards Board e omologati dalla Commissione Europea (di seguito IFRS).

Il Consiglio di Amministrazione, in conformità a quanto previsto dall'art. 2364 C.C. e dall'art. 9.2 dello Statuto sociale ha deliberato di convocare l'Assemblea degli Azionisti entro centottanta giorni dalla chiusura dell'esercizio sociale, in quanto Terna S.p.A. è società tenuta alla redazione del Bilancio consolidato.

Base di presentazione

I principi contabili e i criteri di rilevazione e di misurazione applicati nella presente Relazione Finanziaria Annuale sono in linea a quelli adottati nel Bilancio consolidato e nel Bilancio d'esercizio al 31 dicembre 2023.

Al fine di illustrare i risultati economici del Gruppo Terna e di Terna S.p.A. e di analizzarne la struttura patrimoniale e finanziaria, sono stati predisposti schemi riclassificati distinti, diversi da quelli previsti dai principi contabili IFRS adottati e contenuti rispettivamente nel Bilancio consolidato e nel Bilancio d'esercizio al 31 dicembre 2024.

Tali schemi riclassificati contengono indicatori di performance alternativi rispetto a quelli risultanti direttamente dagli schemi del Bilancio consolidato e del Bilancio d'esercizio, che il management ritiene utili ai fini del monitoraggio dell'andamento del Gruppo e di Terna S.p.A. e rappresentativi dei risultati economici e finanziari prodotti dal business.

In linea con l'orientamento ESMA/2015/1415, sono illustrati i criteri utilizzati per la costruzione di tali indicatori attraverso apposite note di riconciliazione con gli schemi contenuti nel Bilancio consolidato e d'esercizio poste in allegato alla presente Relazione sulla gestione.

Sussistendo i requisiti previsti dal principio contabile internazionale IFRS 5, i risultati complessivi degli esercizi 2024 e 2023 attribuibili alle controllate sudamericane oggetto del progetto di cessione sono classificati nella voce "Risultato netto dell'esercizio delle attività cessate e destinate alla vendita" del prospetto di conto economico riclassificato del Gruppo. Le attività e passività al 31 dicembre 2024 e al 31 dicembre 2023 relative allo stesso perimetro sono classificate nella voce "Attività nette cessate e destinate alla vendita" del prospetto della Situazione patrimoniale-finanziaria riclassificata del Gruppo.

SF3

Area di consolidamento

Di seguito le variazioni alla struttura del Gruppo rispetto alla situazione al 31 dicembre 2023:

1. in data 7 marzo 2024 la società controllata Terna Forward S.r.l. ha perfezionato l'acquisizione di una quota pari al 33% del capitale della società Wesii S.r.l., società italiana leader di mercato nei servizi di ispezione e telerilevamento nel settore delle energie rinnovabili con sede legale in Chiavari (GE);
2. in data 18 novembre 2024 è stato perfezionato il terzo closing per la cessione a CDPQ della società SPE Transmissora de Energia Linha Verde I S.A.. A partire da tale data la società non è più parte del Gruppo Terna. Si ricorda inoltre che, in data 7 febbraio 2024, la società controllata Terna Plus S.r.l. aveva perfezionato l'acquisizione della restante quota di minoranza pari al 25% della società controllandola integralmente;
3. in data 4 dicembre 2024 la società Terna Chile S.p.A. ha ceduto a Terna USA LLC le quote di partecipazione nelle due società controllate Terna Peru S.A.C. e Terna 4 Chacas S.A.C., entrambe pari allo 0,01% del capitale sociale. A seguito dell'operazione, Terna Peru S.A.C. e Terna 4 Chacas S.A.C. sono quindi controllate al 99,9% da Terna Plus S.r.l. e allo 0,01% da Terna USA LLC;
4. in data 20 dicembre 2024 la società controllata Terna Energy Solutions S.r.l. ha perfezionato l'acquisto di una percentuale, pari al 12,5%, dalla quota di minoranza detenuta dal socio Solaris S.r.l. nella società I.T S.r.l.. La partecipazione nella società è quindi passata dal 75% all'87,5%.

Si precisa inoltre che, in data **17 dicembre 2024**, è stato formalmente avviato il processo di liquidazione della società Terna Chile S.p.A.. Tale procedura si prevede che sarà conclusa nel corso del 2025.

Il **Margine Operativo Lordo (*EBITDA*)** dell'esercizio si attesta a **2.566,4 milioni di euro**, in crescita di 397,8 milioni di euro rispetto ai 2.168,6 milioni di euro del 2023, per un migliore risultato delle Attività Regolate.

Teleborsa: distribution and commercial use strictly prohibited

Ricavi

(€/milioni)

ATTIVITÀ REGOLATE	2024	2023	Δ
Ricavi tariffari e incentivi	2.925,5	2.538,5	385,0
Altri ricavi regolati	59,8	50,7	9,1
Ricavi di costruzione attività in concessione in Italia	112,9	80,6	32,3
TOTALE	**3.096,2**	**2.669,8**	**426,4**

I ricavi delle **Attività Regolate**, al netto dei ricavi di costruzione per le attività in concessione (+32,3 milioni di euro), registrano un incremento pari a 394,1 milioni di euro imputabile principalmente all'incremento della base asset regolata del periodo e all'aggiornamento del WACC riconosciuto per il 2024 e al netto degli effetti dei meccanismi incentivanti output-based.

(€/milioni)

ATTIVITÀ NON REGOLATE	2024	2023	Δ
Equipment (Gruppo Brugg Cables e Gruppo Tamini)	340,4	306,7	33,7
Servizi per terzi (Connectivity, Energy Services, altro)	223,1	191,0	32,1
Interconnector privati	20,5	19,1	1,4
TOTALE	**584,0**	**516,8**	**67,2**

L'aumento dei ricavi delle **Attività Non Regolate**, pari a 67,2 milioni di euro, riflette prevalentemente l'incremento dei ricavi in ambito Equipment del Gruppo Tamini (+27,0 milioni di euro) e del Gruppo Brugg Cables (+6,7 milioni di euro), in ambito Energy Services del Gruppo LT (+17,7 milioni di euro) e delle commesse per terzi in ambito smart grid (+11,0 milioni di euro).

I ricavi relativi al **business all'estero** sono rappresentati nel "Risultato netto dell'esercizio delle attività cessate e destinate alla vendita", in applicazione di quanto previsto dall'IFRS 5.

Costi

I **costi operativi**, al netto dei costi di costruzione per le attività in concessione (+32,3 milioni di euro), registrano un aumento di 63,4 milioni di euro rispetto all'esercizio precedente, sostanzialmente relativo ai maggiori costi per servizi connessi allo sviluppo delle attività in ambito regolato (con riferimento alle maggiori attività di manutenzione) e in ambito Energy Services e Connectivity (+23,1 milioni di euro del Gruppo LT e +8,1 milioni di euro di Terna Energy Solutions S.r.l.). Rilevano, inoltre, maggiori costi del personale (+25,3 milioni di euro), principalmente per l'incremento della consistenza media e delle incentivazioni straordinarie erogate nel 2024, in parte compensate dai maggiori accantonamenti relativi alle incentivazioni effettuate nel primo semestre 2023 e dalle maggiori capitalizzazioni. Registrano invece una flessione i costi per materiali per le attività in ambito Energy Services (-9,4 milioni di euro del Gruppo LT e -10,3 milioni di euro del Gruppo Brugg Cables al netto dei +10,9 milioni di euro del Gruppo Tamini), dovuto essenzialmente, alle dinamiche delle commesse e a una diminuzione dei costi per le forniture.

La voce **ammortamenti e svalutazioni** dell'esercizio, pari a 889,0 milioni di euro, cresce di 82,7 milioni di euro rispetto al 2023, principalmente per l'entrata in esercizio di nuovi impianti e per le maggiori svalutazioni effettuate.

Il Risultato Operativo (**EBIT**), dopo aver scontato gli ammortamenti e le svalutazioni, si attesta a **1.677,4 milioni di euro**, rispetto ai 1.362,3 milioni di euro del 2023 (+23,1%).

Gli **oneri finanziari netti** dell'esercizio, pari a 171,5 milioni di euro, principalmente riferibili alla Capogruppo (131,2 milioni di euro), rilevano un incremento di 53,8 milioni di euro rispetto ai 117,7 milioni di euro del 2023, dovuto principalmente ai nuovi finanziamenti erogati nel corso del 2024 a tassi d'interesse più elevati rispetto alla media dei finanziamenti esistenti, all'adeguamento della passività per il potenziale acquisto della quota di minoranza di LT S.r.l. e all'incremento degli oneri di attualizzazione. I maggiori oneri sono parzialmente compensati dai maggiori proventi sulle disponibilità

576

Teleborsa: distribution and commercial use strictly prohibited

liquide e sulle altre attività finanziarie, dai minori oneri associati al bond inflation linked scaduto a settembre 2023, dai minori oneri relativi al meccanismo dell'Uplift e dai maggiori oneri finanziari capitalizzati.

A valle degli oneri finanziari netti, il **risultato ante imposte** si attesta a **1.505,9 milioni di euro**, in aumento di 261,3 milioni di euro rispetto all'esercizio precedente (+21,0%).

Le **imposte sul reddito** a carico dell'esercizio sono pari a 455,0 milioni di euro e aumentano rispetto all'esercizio precedente di 90,7 milioni di euro (+24,9%), essenzialmente per il maggior risultato ante imposte e per i maggiori oneri indeducibili rilevati nel corso dell'esercizio. Il tax rate si attesta al 30,2% rispetto al 29,3% del 2023, in crescita, principalmente, a causa dell'abolizione dell'Aiuto alla Crescita Economica (ACE) dal 2024.

L'**utile netto dell'esercizio delle attività continuative** raggiunge gli **1.050,9 milioni di euro**, in crescita di 170,6 milioni di euro rispetto agli 880,3 milioni di euro del 2023.

Il **risultato netto dell'esercizio delle attività cessate e destinate alla vendita è rappresentato da un utile pari a 11,6 milioni di euro** e rileva un incremento di 9,1 milioni di euro rispetto all'esercizio precedente, essenzialmente per effetto della plusvalenza derivante dal terzo closing per la cessione a CDPQ della società SPE Transmissora de Energia Linha Verde I S.A., perfezionata nel mese di novembre 2024.

L'**utile netto dell'esercizio** è quindi pari a **1.062,5 milioni di euro**, rispetto ai 882,8 milioni di euro del 2023 (+20,4%).

L'**utile netto di Gruppo dell'esercizio** (esclusa quindi la quota di pertinenza dei terzi) si attesta a **1.061,9 milioni di euro**, in crescita di 176,5 milioni di euro (+19,9%) rispetto ai 885,4 milioni di euro del 2023.

Flussi finanziari

Il flusso di cassa delle attività operative e la variazione complessiva dell'indebitamento finanziario netto hanno coperto le esigenze di cassa legate agli investimenti del periodo e alla distribuzione dei dividendi agli azionisti.

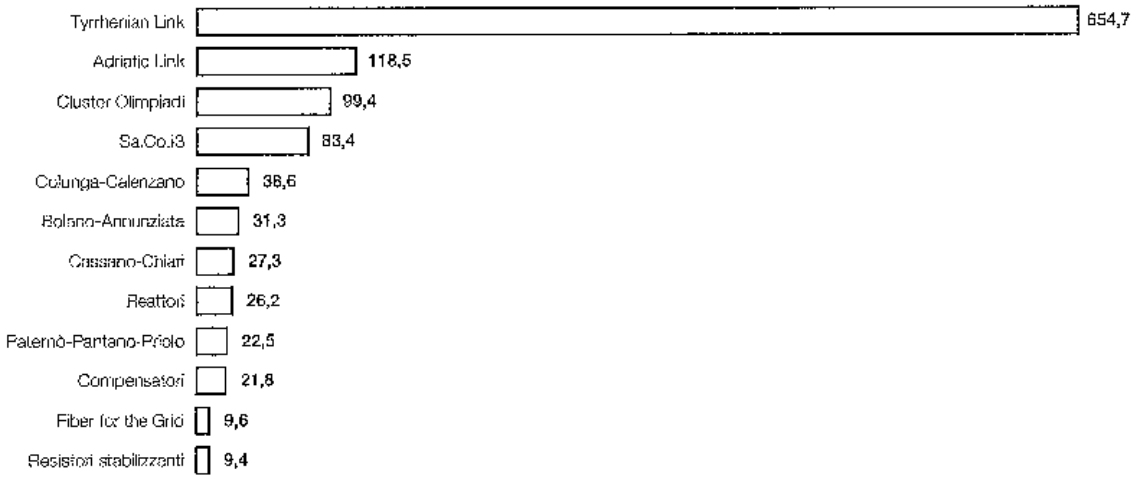
TOTALE	**18.704,4**	**16.837,6**	**1.866,8**



L'incremento delle **immobilizzazioni nette**, pari a 1.739,3 milioni di euro rispetto ai valori del 31 dicembre 2023, è attribuibile prevalentemente all'effetto combinato di:

- investimenti complessivi per 2.692,1 milioni di euro, di cui principali sono riepilogati nel seguito e commentati dettagliatamente nel paragrafo "Attività Regolate";
- ammortamenti dell'esercizio pari a 869,5 milioni di euro;
- altri movimenti dell'esercizio delle voci "Immobili, impianti e macchinari" e "Attività immateriali" per -45,5 milioni di euro che includono in particolare i contributi in conto impianti (-50,8 milioni di euro, prevalentemente per varianti verso terzi e progetti finanziati dal MASE/UE) e i disinvestimenti e svalutazioni pari a -19,7 milioni euro;
- minori attività finanziarie per 16,1 milioni di euro, sostanzialmente per la riclassifica a breve termine, nell'ambito dell'indebitamento finanziario, del valore dei BTP Italia (-119,1 milioni di euro con scadenza maggio 2025 e un tasso pari a 1,4%), al netto dell'incremento dei depositi cauzionali ricevuti dagli operatori che partecipano al mercato della capacità ex Delibera n. 98/2011/R/eel e successive modifiche e integrazioni (+68,3 milioni di euro), del Fondo garanzia Interconnector istituito per la realizzazione delle opere di interconnessione di cui all'art. 32 della Legge 99/09 (+19,1 milioni di euro) e dell'attività a supporto del piano per benefici ai dipendenti del Gruppo Brugg Cables (+7 milioni di euro). Rileva, inoltre, da parte della controllata Terna Forward S.r.l., l'acquisizione a marzo 2024 della quota di partecipazione pari al 33% della società Wesii S.r.l., società a controllo congiunto (+2,9 milioni di euro), dell'investimento nel periodo (complessivo di +1,6 milioni di euro) in tre start up Melaworks, D-Orbit e Unusuals World (altre partecipazioni) e dell'incremento dell'investimento (+2,8 milioni di euro) nei comparti Infra Tech e Energy Tech del Fondo Corporate Partner I di CDP.

Teleborsa: distribution and commercial use strictly prohibited

Gli **investimenti complessivi realizzati** dal Gruppo Terna nel 2024, pari a **2.692,1 milioni di euro**, sono in crescita del **17,6%** rispetto ai 2.090,0 milioni di euro dell'esercizio 2023.

Principali investimenti sulla RTN* (milioni di euro)

** Importi comprensivi di Oneri Finanziari.*

Il **Capitale Circolante Netto** si attesta a -2.025,2 milioni di euro e nel corso dell'esercizio ha assorbito liquidità per 149,4 milioni di euro rispetto al 31 dicembre 2023 riconducibili all'effetto congiunto di:

Liquidità assorbita

riduzione dei **debiti netti per partite energia passanti** per 287,6 milioni di euro, riconducibile principalmente al decremento all'effetto combinato di:

- decremento dei debiti netti legati alle partite di costo e ricavo derivanti dall'erogazione del servizio di dispacciamento (637,7 milioni di euro): la posizione debitoria di Terna a fine 2023, ascrivibile principalmente all'efficientamento e alla riduzione dei costi in ambito MSD, è stata azzerata nel corso dell'esercizio 2024 con il trasferimento del relativo beneficio tramite la componente Uplift fatturata agli utenti;
- decremento dell'esposizione debitoria legata al Mercato della Capacità (68,6 milioni di euro) per i maggiori crediti relativi ai corrispettivi a copertura in essere a fine 2024 rispetto al costo di riferimento del periodo;

parzialmente compensati da:

- maggiori debiti netti riferiti alle unità essenziali per la sicurezza del sistema elettrico – UFSS (352,1 milioni di euro) derivanti dalle partite afferenti alla raccolta al netto dei pagamenti effettuati nel corso del 2024 ai titolari degli impianti[50];
- adeguamento del fondo svalutazione crediti per 57,3 milioni di euro per effetto dell'accantonamento nell'esercizio per il valore dei crediti incagliati ristorato da ARERA con Delibera n. 5/2024[51] (73,6 milioni di euro) al netto di utilizzi e rilasci effettuati nell'anno (16,3 milioni di euro).
- variazione positiva dei **crediti netti partite energia a margine** per 216,6 milioni di euro riferibile principalmente all'effetto combinato di:

  - incremento dei crediti CTR (99,9 milioni di euro) legati all'aggiornamento tariffario ex Delibera ARERA n. 632/2023;

[50] L'ARERA ha disposto pagamenti in favore dei titolari di Unità Essenziali tramite le deliberazioni n. 32-44-65-166-293-308-399-440-460-461-469-470-471-485-486-487-502-503-519-520-537-541-542/2024.

[51] L'ARERA, con la Delibera n. 5/2024, ha definito le modalità per il riconoscimento a Terna dei crediti che, nonostante l'esperimento delle necessarie azioni di recupero, risultino non recuperabili a causa dell'insolvenza degli utenti del dispacciamento e dei titolari dei contratti per il servizio di importazione virtuale (finanziatori degli interconnector e shipper- Delibera ARERA n. 179/09).

Teleborsa: distribution and commercial use strictly prohibited

- incremento delle partite creditorie (58,8 milioni di euro) derivanti dai meccanismi di incentivazione finalizzati alla riduzione dei costi di dispacciamento (incentivo MSD, Delibere n. 597/2021 e 132/2022) per effetto della rilevazione del premio di competenza del 2024 (374,1 milioni di euro) al netto degli incassi dell'anno secondo le modalità previste dalla disciplina di riferimento (316,3 milioni di euro, di cui 50 milioni riferiti agli incentivi intrazonali ex Delibera n. 699/2018);
- riduzione dei debiti netti (32,2 milioni di euro) per gli oneri derivanti dal meccanismo Inter-TSO Compensation (ITC)[62];
- partita creditoria rilevata per effetto del ristoro dei crediti incagliati deliberato con provvedimento ARERA n. 5/2024 (36,3 milioni di euro, al netto degli incassi del periodo).

Liquidità generata

- incremento dei **debiti netti commerciali** per 135,6 milioni di euro, attribuibile in massima parte alle maggiori attività di investimento poste in essere nell'ultimo periodo dell'esercizio;
- incremento dei **debiti tributari netti** per 100,2 milioni di euro imputabili sostanzialmente ai maggiori debiti netti verso l'erario per imposte (+108,4 milioni di euro) per effetto della rilevazione delle imposte sul reddito dell'esercizio al netto della definizione delle imposte relative all'esercizio precedente e degli acconti versati, compensati dalle minori ritenute subite (-8,7 milioni di euro);
- aumento delle **altre passività nette** per 119,0 milioni di euro riferibile principalmente all'aumento del Fondo Garanzia Interconnector (+18,9 milioni di euro), ai maggiori contributi in conto impianti ricevuti da terzi (+66,1 milioni di euro), e all'incremento dei debiti a lungo termine a seguito dell'entrata in esercizio delle interconnessioni Italia-Francia e Italia-Austria e all'adeguamento dell'opzione per il potenziale acquisto della quota di minoranza di LT S.r.l. (+77,4 milioni di euro).

Il **Capitale Investito Lordo**, pertanto, rileva un saldo pari a 18.678,8 milioni di euro e presenta un incremento rispetto al 31 dicembre 2023 pari a 1.888,7 milioni di euro.

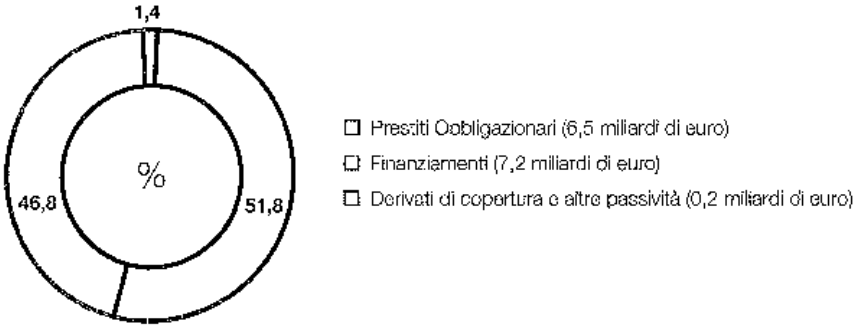
I **fondi diversi** registrano un decremento pari a 43,3 milioni di euro, principalmente attribuibile a:

- accantonamenti netti di attività per imposte anticipate nette per 59,6 milioni di euro, prevalentemente per l'effetto fiscale sulla movimentazione degli strumenti derivati in portafoglio, sugli ammortamenti e sulla movimentazione dei fondi rischi;
- accantonamenti netti dei fondi relativi al fondo esodo (-6,1 milioni di euro), ai depositi a custodia (-3,6 milioni di euro) e ai canoni di attraversamento (-7,5 milioni di euro), al netto degli utilizzi dei fondi relativi ai progetti di riqualificazione urbanistica e ambientale (+2,2 milioni di euro).

Le **Attività nette destinate alla vendita** pari a 15,2 milioni di euro al 31 dicembre 2024, rilevano un decremento rispetto al 31 dicembre 2023 di 65,2 milioni di euro, principalmente imputabile al terzo closing per la cessione a CDPQ della società SPE Transmissora de Energia Linha Verde I S.A., perfezionata nel mese di novembre 2024.

Il **Capitale Investito Netto totale**, incluse le Attività nette destinate alla vendita, si attesta a 18.704,4 milioni di euro con un incremento di 1.866,8 milioni di euro rispetto al 31 dicembre 2023 ed è coperto dal Patrimonio netto di Gruppo per 7.524,2 milioni di euro (a fronte dei 6.324,4 milioni di euro al 31 dicembre 2023), da 19,8 milioni di euro di patrimonio netto di terzi (18,9 milioni di euro al 31 dicembre 2023) e dall'indebitamento finanziario netto per 11.160,4 milioni di euro (+666,1 milioni di euro rispetto agli 10.494,3 milioni di euro al 31 dicembre 2023).

[62] Inter-TSO Compensation: corrispettivo a favore dei TSO per l'utilizzo delle reti di trasmissione nazionale (infrastrutture e perdite) per i flussi in transito, compresi quelli indotti dai flussi transfrontalieri.



Teleborsa: distribution and commercial use strictly prohibited

Indebitamento finanziario

Politica finanziaria del Gruppo e indebitamento lordo

La gestione finanziaria è guidata da un approccio che mira alla massima efficienza e al conseguimento e mantenimento di una struttura finanziaria solida, mitigando, in misura particolarmente prudenziale, i potenziali rischi finanziari. Diversificazione delle fonti di finanziamento, bilanciamento tra strumenti a breve e a medio-lungo termine a copertura degli impieghi e gestione proattiva dell'indebitamento costituiscono i tratti distintivi della politica finanziaria del Gruppo.

L'**indebitamento lordo** al 31 dicembre 2024 ammonta complessivamente a circa **14 miliardi di euro**, costituito in particolare per circa 6,5 miliardi di euro da emissioni obbligazionarie, 5,5 miliardi di euro da prestiti bancari a medio lungo termine e 1,7 miliardi di euro da finanziamenti a breve termine. La *maturity* media dell'indebitamento a medio-lungo termine, per circa 84% a tasso fisso, risulta pari a circa 6 anni.

Il debito obbligazionario consta sia di emissioni di tipo pubblico sia di *private placement*, effettuati nell'ambito del Programma di Emissioni Obbligazionarie EMTN, incrementato da 9 a 12 miliardi di euro nel mese di giugno 2024 (a cui partecipano numerosi istituti bancari nazionali ed esteri), rivolti allo specifico comparto degli investitori qualificati e quotati presso la Borsa del Lussemburgo, i bond Terna presentano una *investor base* significativamente diversificata sia sotto il profilo dei settori sia sotto il profilo geografico.

Con riferimento al debito di matrice bancaria, il principale lender di Terna è la Banca Europea per gli Investimenti (BEI); il nozionale al 31 dicembre 2024, del debito in essere è pari a circa 4,1 miliardi di euro.

Grazie alla solidità del proprio profilo creditizio, Terna risulta in grado di effettuare provvista sul mercato finanziario a condizioni estremamente favorevoli, come testimoniato dall'emissione obbligazionaria a tasso fisso, del valore nominale di 850 milioni di euro lanciata a gennaio 2024, dall'emissione ibrida green perpetua effettuata ad aprile 2024 per 850 milioni di euro e dalla sottoscrizione di finanziamenti bancari. A riguardo si segnala che, nel corso del 2024, sono stati erogati 2,4 miliardi di euro, di cui 900 milioni di euro da parte della BEI. Terna, inoltre, può fare affidamento su tre linee di credito rotative committed per un totale di circa 4,2 miliardi di euro, di cui disponibili 3,9 miliardi di euro, e un programma di Euro Commercial Paper (ECP) da 2 miliardi di euro, di cui 830 milioni di euro disponibili.

Teleborsa: distribution and commercial use strictly prohibited

Indebitamento finanziario netto

L'indebitamento finanziario netto del Gruppo al 31 dicembre 2024 si attesta a 11.160,4 milioni di euro in aumento di 666,1 milioni di euro rispetto al 31 dicembre 2023.

(€/milioni)

	31.12.2024	31.12.2023	Δ

- Attività finanziarie	(446,1)	(376,4)	(69,7)
- Disponibilità liquide e mezzi equivalenti	(2.311,5)	(1.378,2)	(933,3)
Totale indebitamento finanziario netto	**11.160,4**	**10.494,3**	**666,1**
Indebitamento finanziario netto della attività destinate alla vendita	**(1,9)**	**(10,8)**	**8,9**

L'**indebitamento finanziario netto di Gruppo** rileva le seguenti variazioni:

- incremento dei prestiti obbligazionari pari a 57,2 milioni di euro principalmente a seguito dell'emissione obbligazionaria lanciata da Terna a gennaio 2024 pari a 850 milioni di euro e dell'adeguamento dei fair value degli strumenti finanziari, in parte compensato dal rimborso di un'emissione obbligazionaria per 800 milioni di euro avvenuto a ottobre 2024;
- incremento dei finanziamenti bancari a medio/lungo termine pari a 1.240,4 milioni di euro principalmente per effetto di nuovi utilizzi, per un importo complessivo di 2.400,0 milioni di euro, al netto dei rimborsi, per complessivi 1.000,0 milioni di euro e dei rimborsi delle quote di ammortamento dei finanziamenti BEI in essere;
- incremento dei finanziamenti a breve termine (455,4 milioni di euro) essenzialmente a seguito dell'utilizzo di linee di credito a breve termine e dell'emissione di Commercial Paper da parte della Capogruppo;
- decremento del fair value del portafoglio strumenti finanziari derivati (-86,5 milioni di euro) dovuto alla variazione del portafoglio e della curva dei tassi di interesse di mercato;
- incremento delle altre passività finanziarie nette (+2,6 milioni di euro) essenzialmente per la rilevazione degli interessi maturati sui prodotti finanziari;

582

Teleborsa: distribution and commercial use strictly prohibited

- incremento delle attività finanziarie pari a 69,7 milioni di euro, principalmente a seguito dell'investimento della maggiore liquidità disponibile in depositi, della riclassifica dei titoli di Stato italiani precedentemente esposti nelle attività finanziarie non correnti per 61,1 milioni di euro, e dalla movimentazione del portafoglio Titoli;
- incremento delle disponibilità liquide e mezzi equivalenti per 933,3 milioni di euro. Le disponibilità liquide al 31 dicembre 2024 ammontano a 2.311,5 milioni di euro, di cui 2.090,2 milioni di euro investiti in depositi a breve termine e prontamente liquidabili e 221,3 milioni di euro relativi a conti correnti bancari e cassa.

L'**indebitamento finanziario netto delle attività destinate alla vendita** pari a -1,9 milioni di euro al 31 dicembre 2024, è rappresentato dal valore delle disponibilità liquide e mezzi equivalenti di Terna Peru S.A.C.. Il decremento pari a 8,9 milioni di euro rispetto al 31 dicembre 2023 è dovuto al perfezionamento della cessione delle attività di SPE Transmissora de Energia Linha Verde I S.A..

Prospetto di raccordo fra il risultato d'esercizio e il Patrimonio netto di Gruppo con gli analoghi valori della Capogruppo

La riconciliazione del Patrimonio netto e del risultato consolidati dell'esercizio 2024 rispetto ai saldi della Capogruppo è di seguito illustrata.

Le performance
economiche, finanziarie e patrimoniali 2024 di Terna S.p.A.

Di seguito il commento ai dati economico-finanziari e patrimoniali della Capogruppo Terna S.p.A..

Si precisa che come precedentemente chiarito, sussistendo i requisiti previsti dal principio contabile internazionale IFRS 5, i saldi economici riferiti alla controllata in Uruguay dell'esercizio 2023 sono classificati nella voce "Risultato netto dell'esercizio delle attività cessate e destinate alla vendita" del prospetto di conto economico riclassificato.

Conto economico riclassificato di Terna S.p.A.

Il Conto economico gestionale di Terna S.p.A. per gli anni 2024 e 2023 è sintetizzato nel seguente prospetto, ottenuto riclassificando i dati esposti nel Conto economico.

** Rilevati in applicazione dell'interpretazione "IFRIC 12 – Accordi per servizi in concessione".*

Il **Margine Operativo Lordo (EBITDA)** dell'esercizio si attesta a **2.313,4 milioni di euro** e rileva un aumento di 333,2 milioni di euro rispetto ai 1.980,2 milioni di euro del 2023, imputabile principalmente all'impatto sui ricavi tariffari e incentivi (+355,4 milioni di euro) dell'aggiornamento del WACC riconosciuto per il 2024 e per l'ampliamento della Regulated Asset Base (RAB).

584

Teleborsa: distribution and commercial use strictly prohibited

I **ricavi** si attestano a **3.023,1 milioni di euro** e, al netto dei ricavi da costruzione per le attività in concessione (+32,3 milioni di euro), registrano un aumento pari a 356,0 milioni di euro rispetto all'esercizio precedente attribuibile principalmente:

- all'impatto sul Corrispettivo di trasmissione dell'incremento del WACC riconosciuto per il 2024 (ex Delibera n. 556/2023, passato dal 5% nel 2023 al 5,8% nel 2024), dell'ampliamento della Regulated Asset Base (RAB) e degli ammortamenti riconosciuti, considerati i nuovi criteri di Regolazione Tariffaria 2024-2027 introdotti con Delibera ARERA n. 615/2023 (+353,4 milioni di euro);
- ai maggiori ricavi per il Corrispettivo di dispacciamento (+26,6 milioni di euro), principalmente per maggiori costi riconosciuti in tariffa DIS;
- ai minori incentivi output-based (-24,6 milioni di euro) dovuti essenzialmente ai minori incentivi relativi all'incremento della capacità di trasporto tra le zone di mercato previsti dalla Delibera n. 567/2019, pari a -66,8 milioni di euro, al netto dei maggiori ricavi riferiti al sistema di incentivazione per la riduzione dei costi del mercato dei servizi di dispacciamento (Delibera n. 597/2021 e Delibera n. 132/2022), pari a +42,2 milioni di euro;
- ai maggiori ricavi relativi al meccanismo di incentivazione della qualità del servizio – ENSR (+9,3 milioni di euro), dovuto alla performance 2024 (6,8 milioni di euro) e alle sopravvenienze rilevate per la riqualificazione di alcuni eventi emersi nel corso dell'esercizio 2023 (2,5 milioni di euro);
- alle minori plusvalenze per alienazione cespiti (-4,5 milioni di euro, essenzialmente di rottami, trasformatori e autoveicoli).

Rilevano inoltre i minori ricavi per le attività conclusive alla realizzazione dell'interconnector privato Italia-Austria (-7,7 milioni di euro) e rimborsi per danni (-2,3 milioni di euro), in parte compensati dai maggiori ricavi derivanti dalle maggiori richieste e dai maggiori corrispettivi per i servizi di connessione alla RTN (+5,1 milioni di euro).

I **costi operativi** dell'esercizio, pari a **709,7 milioni di euro**, al netto dei costi di costruzione per le attività in concessione (+32,3 milioni di euro), rilevano un aumento di 22,8 milioni di euro rispetto all'esercizio precedente dovuto essenzialmente ai seguenti fenomeni:

- maggior costo del personale (+5,3 milioni di euro) principalmente per l'incremento della consistenza media del personale e delle incentivazioni straordinarie erogate nel 2024, al netto dei maggiori accantonamenti relativi alle incentivazioni effettuate nel primo semestre 2023 e delle maggiori capitalizzazioni;
- dai minori oneri relativi alla qualità del servizio (-2,8 milioni di euro), riconducibili principalmente ai maggiori oneri sostenuti per gli eventi di disalimentazione avvenuti nel primo semestre 2023;
- maggiori costi per canoni di attraversamento (+4,8 milioni di euro) e per la partecipazione di Terna nelle società GRIT e CORESO (+1,8 milioni di euro), al netto dei costi per formazione (-1,6 milioni di euro);
- aumento dei costi verso la controllata Terna Rete Italia S.p.A. per le minori attività e servizi effettuati su impianti di terzi per conto della Società (18,7 milioni di euro).

Gli **ammortamenti e svalutazioni** dell'esercizio sono pari a **795,0 milioni di euro**, crescono di 75,7 milioni di euro rispetto al 2023, principalmente per l'entrata in esercizio di nuovi impianti e per le maggiori svalutazioni effettuate.

L'**EBIT** (Risultato Operativo) si attesta a **1.518,4 milioni di euro**, in aumento di 257,5 milioni di euro rispetto all'esercizio 2023 (+20,4%).

Gli **oneri finanziari netti** dell'esercizio, pari a 131,2 milioni di euro rilevano un incremento di 40,4 milioni di euro rispetto ai 90,8 milioni di euro del 2023, riconducibile prevalentemente ai nuovi finanziamenti erogati nel corso del 2024, a tassi d'interesse più elevati rispetto alla media dei finanziamenti esistenti e alla mancata distribuzione dei dividendi da parte delle controllate. Tale incremento viene parzialmente compensato dai maggiori proventi sulle disponibilità liquide, dai maggiori oneri finanziari capitalizzati, dalla minore inflazione relativa al bond inflation linked (scaduto a settembre 2023) e dai minori oneri relativi al meccanismo dell'Uplift.

585

Teleborsa: distribution and commercial use strictly prohibited

Le **imposte sul reddito** a carico dell'esercizio sono pari a 416,8 milioni di euro, in aumento rispetto all'esercizio precedente di 81,4 milioni di euro (+24,3%), essenzialmente per il maggior risultato ante imposte e per i maggiori oneri indeducibili rilevati nel corso dell'esercizio. Il tax rate si attesta a 30,0%, rispetto al 28,7% del 2023, in crescita principalmente a causa dell'abolizione dell'Aiuto alla Crescita Economica (ACE) dal 2024.

L'utile netto dell'esercizio delle attività continuative raggiunge i **970,4 milioni di euro**, in crescita di 135,7 milioni di euro rispetto agli 834,7 milioni di euro del 2023.

Il risultato netto dell'esercizio delle attività cessate e destinate alla vendita è azzerato, sostanzialmente in linea con l'esercizio precedente.

L'utile netto dell'esercizio si attesta pertanto a **970,4 milioni di euro**, in crescita di 135,6 milioni di euro rispetto agli 834,8 milioni di euro del 2023.

Flussi finanziari

Il flusso di cassa delle attività operative e la variazione complessiva dell'indebitamento finanziario netto hanno coperto le esigenze di cassa legate agli investimenti dell'esercizio e alla distribuzione dei dividendi agli azionisti.

TOTALE	**17.957,3**	**16.235,7**	**1.721,6**

Di seguito sono commentate le principali variazioni rispetto al 31 dicembre 2023.

Il **Capitale Investito Netto** al 31 dicembre 2024, pari a 17.957,3 milioni di euro, rileva un incremento di 1.721,6 milioni di euro per effetto dell'aumento delle **Immobilizzazioni nette** (+1.746,4 milioni di euro), della liquidità generata dal **Capitale Circolante Netto** (-56,1 milioni di euro) e della riduzione dei Fondi diversi (+31,3 milioni di euro). Tale variazione è coperta dal patrimonio netto per 6.976,1 milioni di euro (in aumento di 1.105,1 milioni di euro a fronte dei 5.871,0 milioni di euro al 31 dicembre 2023) e dall'indebitamento finanziario netto per 10.981,2 milioni di euro (+616,5 milioni di euro rispetto ai 10.364,7 milioni di euro al 31 dicembre 2023).

Le **Immobilizzazioni nette** registrano un incremento di 1.746,4 milioni di euro principalmente attribuibile a:

- investimenti della Società (2.625,9 milioni di euro, di cui 2.598,3 milioni di euro rilevati alle Attività Regolate) e all'acquisizione in data 10 ottobre 2024 dalla controllata Rete S.r.l. di due elettrodotti 132 kV "Rosato RT - Pescara Porta Nuova RT" e 06 kV "Avezzano RT - Carrito RT" per un corrispettivo pari a 3,6 milioni di euro;
- minori attività finanziarie per 35,9 milioni di euro, sostanzialmente per la riclassifica a breve termine, nell'ambito dell'indebitamento finanziario, del valore dei BTP Italia (-119,1 milioni di euro con scadenza maggio 2025 e un tasso pari a 1,4%) e della svalutazione della partecipazione nella controllata Terna Plus (-3,9 milioni di euro), al netto dell'incremento dei depositi cauzionali ricevuti dagli operatori che partecipano al mercato della capacità ex Del. 98/2011/R/eel e successive modifiche e integrazioni (+68,3 milioni di euro) e del Fondo garanzia Interconnector istituito per la realizzazione delle opere di interconnessione di cui all'art. 32 della Legge 99/09 (+19,1 milioni di euro);
- ammortamenti dell'esercizio (780,0 milioni di euro);
- altri movimenti dell'esercizio della voce "Immobili, impianti e macchinari" e "Attività immateriali" per -67,2 milioni di euro che includono in particolare i contributi in conto impianti per -48,5 milioni di euro (prevalentemente per varianti verso terzi e per progetti finanziati dal MASE/UE) e i disinvestimenti e svalutazioni pari a -17,9 milioni euro.

587

Teleborsa: distribution and commercial use strictly prohibited

La variazione del **Capitale Circolante Netto**, pari a -56,1 milioni di euro, è principalmente riconducibile alla riduzione dei debiti netti di natura commerciale, essenzialmente relativi alle partite energia, al netto dei debiti tributari netti, dei depositi cauzionali ricevuti dagli operatori del mercato elettrico e del Fondo Garanzia Interconnector istituito in capo a Terna S.p.A..

I **fondi diversi** rilevano un decremento pari a 31,3 milioni di euro, principalmente attribuibile a:

- accantonamenti netti di attività per imposte anticipate nette per 43,3 milioni di euro, prevalentemente per l'effetto fiscale sulla movimentazione degli strumenti derivati in portafoglio, sugli ammortamenti e sulla movimentazione dei fondi rischi;
- accantonamenti netti dei fondi relativi al fondo esodo (-6,2 milioni di euro), ai depositi a custodia (-3,6 milioni di euro) e ai canoni di attraversamento (-7,5 milioni di euro), al netto degli utilizzi dei fondi relativi ai progetti di riqualificazione urbanistica e ambientale (+2,2 milioni di euro).

L'**indebitamento finanziario netto** si attesta a 10.981,2 milioni di euro in aumento di 616,5 milioni di euro.

(€ milioni)

	31.12.2024	31.12.2023	Δ
Indebitamento finanziario netto (per tipologia di strumento)			
- Prestiti Obbligazionari	6.547,6	6.490,6	57,2
- Finanziamenti	5.495,6	4.247,6	1.248,0
- Finanziamento a breve termine	1.631,2	1.190,4	440,8
- Altre passività finanziarie nette	108,9	106,4	2,5
- Strumenti finanziari derivati	58,8	147,3	(88,5)
Indebitamento finanziario lordo	**13.842,3**	**12.182,3**	**1.660,0**
- Attività finanziarie	(445,8)	(361,3)	(84,5)
- Disponibilità liquide e mezzi equivalenti (incluso il saldo netto dei c/c intersocietari)	(2.415,3)	(1.456,3)	(959,0)
Totale indebitamento finanziario netto	**10.981,2**	**10.364,7**	**616,5**

Come già precedentemente commentato nell'ambito dell'indebitamento del Gruppo, l'incremento dell'indebitamento finanziario lordo di 1.660,0 milioni di euro rispetto al 31 dicembre 2023 è attribuibile principalmente all'emissione obbligazionaria lanciata a gennaio 2024, al tiraggio di finanziamenti con la BEI e altri istituti bancari, all'emissione di Commercial paper e all'adeguamento del fair value degli strumenti finanziari. Quanto sopra al netto del rimborso di un prestito obbligazionario effettuato nel mese di ottobre 2024, delle quote di ammortamento dei finanziamenti BEI in essere dei finanziamenti bancari e della variazione del fair value degli strumenti derivati.

Le disponibilità liquide e mezzi equivalenti pari a 2.415,3 milioni di euro registrano un incremento di 959,0 milioni di euro e sono costituiti da 2.013,0 milioni di euro investiti in depositi a breve termine e prontamente liquidabili, 142,4 milioni di euro relativi a conti correnti bancari e cassa e 259,9 milioni di euro al saldo netto attivo dei conti correnti intercompany intrattenuti dalla Società con le sue controllate.

Le attività finanziarie presentano un incremento di 84,5 milioni di euro, riferibile essenzialmente a ulteriori depositi effettuati nel periodo, alla riclassifica dei Titoli di Stato italiani precedentemente esposti nelle attività finanziarie non correnti, per 61,1 milioni di euro e alla movimentazione del portafoglio Titoli.

Proposta all'Assemblea degli Azionisti in merito alla distribuzione del risultato di esercizio di Terna S.p.A.

Il Consiglio di Amministrazione di Terna S.p.A. propone di distribuire, per l'esercizio 2024, un dividendo complessivo di 796.358.830,40 euro pari a 0,3962 euro per azione, di cui 0,1192 euro per azione deliberato a titolo di acconto in data 6 novembre 2024.

Il Consiglio di Amministrazione propone pertanto di destinare l'utile netto dell'esercizio 2024 di Terna S.p.A., pari a 970.356.839,31 euro come segue:

- quanto a euro 239.591.046,40 a copertura dell'acconto sul dividendo messo in pagamento a decorrere dal 20 novembre 2024 per ciascuna azione ordinaria in circolazione al netto delle azioni proprie in portafoglio alla "record date" del 19 novembre 2024 (per un valore pari a euro 494.900,28 destinato alla riserva denominata "utili portati a nuovo");
- quanto a euro 556.767.784,00 a saldo del dividendo da distribuire nella misura di euro 0,2770 in relazione ad ognuna delle 2.009.992.000 azioni ordinarie rappresentative del capitale sociale alla data del presente Consiglio di Amministrazione da mettere in pagamento il 25 giugno 2025 con "data stacco" cedola n. 42 coincidente con il 23 giugno 2025 (record date ex art. 83-terdecies del Decreto legislativo 24 febbraio 1998 n. 58 "TUF": 24 giugno 2025). A tale saldo non concorrono le azioni proprie che risulteranno in portafoglio alla "record date" precedentemente indicata. L'ammontare del saldo del dividendo dell'esercizio 2024 spettante alle azioni proprie detenute dalla Società alla "record date" sarà destinato alla riserva denominata "utili portati a nuovo";
- quanto a euro 173.998.008,91 a Utili a Nuovo.

Teleborsa: distribution and commercial use strictly prohibited

L'andamento del titolo

Terna S.p.A. è quotata nel mercato telematico di Borsa italiana dal 23 giugno 2004. **Dalla data di quotazione a fine 2024, il titolo si è apprezzato del 348% (capital gain)** garantendo un ritorno complessivo per l'azionista (TSR[63]) pari al +1.203%, superiore sia rispetto al mercato italiano (FTSE Mib +162%), che all'indice europeo di riferimento settoriale (DJ Stoxx Utilities) che ha registrato +357%.

Le principali Borse europee hanno chiuso il 2024 segnando performance positive, a esclusione di Parigi che ha registrato -2,2%. Milano ha guadagnato il 12,6%, Francoforte e Madrid hanno segnato rispettivamente +15,4% e +14,8%, e Londra ha chiuso a +5,7%.

Il titolo Terna ha chiuso il 2024 a 7,620 €/azione, pari a una performance annua del +0,9%, sovraperformando l'indice europeo di riferimento settoriale (DJ Stoxx Utilities) che ha registrato -2,6%. La media giornaliera dei volumi contrattati nell'anno si è attestata a circa 3,9 milioni di pezzi. Il 18 ottobre il titolo ha registrato il prezzo massimo dell'anno, pari a 8,216 €/azione. Inoltre, si ricorda che il 18 novembre il titolo ha staccato l'acconto sul dividendo 2024, pari a 11,92 centesimi di euro per azione.

I principali rating e indici internazionali ESG

L'impegno di Terna a misurare e migliorare le proprie performance di sostenibilità trova positivo riscontro nei rating ESG (Environmental, Social, Governance) e, di conseguenza, negli indici borsistici internazionali ESG.

Rating ESG

AGENZIA	DESCRIZIONE
S&P GLOBAL	Il suo **Corporate Sustainability Assessment (CSA)** è una valutazione periodica delle pratiche di sostenibilità delle aziende. Le società che ottengono i risultati migliori sono incluse nel Dow Jones Sustainability Index (*the* 2025 Dow Jones Best-in-Class).
SUSTAINALYTICS	Pubblica periodicamente un **ESG Risk Rating Report** sull'Azienda. Nel 2024 Terna ha conformato il livello *Negligible Risk* (il migliore possibile).
MOODY'S ANALYTICS	Valuta periodicamente le **performance ESG** delle aziende. Il giudizio finale è suddiviso in quattro diverse fasce (*Advanced; Robust; Weak; Limited*). A ottobre 2024 è stato confermato a Terna il livello Advanced con un punteggio di 75/100.
MSCI	Pubblica periodicamente un **ESG Ratings Report** in cui analizza e valuta le società su una scala da "AAA" (il rating migliore) a "CCC". Il rating attribuito a Terna è pari a "AA".
CDP (CARBON DISCLOSURE PROJECT)	Il suo questionario **Climate Change**, elaborato periodicamente, si focalizza su tematiche legate al cambiamento climatico. Il questionario conduce a un rating espresso in lettere con scala da D ad A. Nel 2025 Terna ha ottenuto lo score "A-" ottenuto nel 2024, corrispondente alla fascia "Leadership".
ISS ESG	Valuta le performance di sostenibilità delle società sulla base di circa cento criteri. Le società con le migliori valutazioni, come Terna, ottengono lo status ***Prime***.
FTSE RUSSELL	I suoi rating ESG riflettono l'esposizione – e la relativa gestione – dell'Azienda alle **tematiche ESG** e costituiscono l'input primario per l'inclusione negli Indici FTSE4Good.
STANDARD ETHICS	Standard Ethics rilascia un giudizio sul **livello di compliance** da parte delle imprese in materia di sostenibilità e *corporate governance* sulla base di documenti e linee guida pubblicati da enti internazionali. A dicembre 2024 Terna ha migliorato il proprio rating ottenendo "EE+", su una scala di valutazione: da "EEE" (migliore) a "F" (peggiore), corrispondente alla fascia migliore, "Sustainable".
GRESB	GRESB (Global Real Estate Sustainability Benchmark) valuta, attraverso il proprio *assessment*, il **livello di disclosure**. Nel 2024 è stato confermato a Terna il massimo rating ottenibile pari a "A".

Indici ESG

INDICE	DESCRIZIONE
DOW JONES SUSTAINABILITY	Gli indici Dow Jones Sustainability (dal 2025 Dow Jones Best-in-Class) selezionano le imprese con le migliori performance di sostenibilità tra quelle a maggiore capitalizzazione. Terna è inclusa nel Dow Jones Sustainability World Index dal 2009.
FTSE4GOOD	Gli indici FTSE4Good si basano sulle analisi di FTSE Russel. Terna è presente nell'indice dal 2005.
MSCI	Terna è presente in oltre cento indici ESG di MSCI sia generici sia tematici.
STOXX® GLOBAL ESG LEADERS	Lanciati nel 2011, questi indici sono elaborati sulla base delle valutazioni dell'agenzia di rating Sustainalytics e selezionano i migliori titoli per performance ESG. Per essere inseriti nel Global ESG Leaders Index è necessario essere inclusi in almeno uno dei 3 indici specializzati (Global Environmental Leaders, Global Social Leaders e Global Governance Leaders); Terna dal 2011 è inclusa in tutti e tre gli indici.
EURONEXT VIGEO	Partendo dalla valutazione di Moody's Analytics, questi indici (denominati a partire dal 2025 Euronext Sustainable) si basano su un universo composto da imprese quotate nei mercati internazionali. Terna è presente nel World 120, Euro 120 e Europe 120 dal 2012.
ECPI	Realizzati da ECPI, sono indici di sostenibilità per integrare informazioni extra-finanziarie. Terna è presente, tra gli altri, nell' ECPI ESG Best in Class. Terna è inclusa dal 2007.
SOLACTIVE EUROPE CORPORATE SOCIAL RESPONSIBILITY	L'indice, che ha sostituito il precedente Ethibel Sustainability Index, include una rappresentanza di titoli europei selezionati da Forum Ethibel. Terna è inclusa dal 2009 (considerando anche il precedente Ethibel Sustainability Index).
MIB ESG	Lanciato nel 2021, è il primo indice blue-chip per l'Italia dedicato alle best practice ESG. L' indice si basa sull'esito dell'*assessment* periodico condotto dall'agenzia Moody's Analytics (sostituita da Sustainalytics a partire dal 2025).
S&P Global 1200 ESG	L'indice premia le migliori performance di sostenibilità delle imprese internazionali a maggiore capitalizzazione – presenti nel sottostante indice S&P Global 1200 – sulla base dei dati raccolti attraverso lo S&P Global CSA.
S&P GENDER EQUALITY & INCLUSION INDEX	Lanciato nel 2021, misura le performance delle società quotate rispetto ai temi della *gender equality* e dell'inclusione. L'indice include le società che hanno registrato i valori più alti dello S&P Global Gender Diversity Score, calcolato sulla base dei risultati ottenuti nello S&P Global CSA (*Corporate Sustainability Assessment*).
EURONEXT EQUILEAP GENDER EQUALITY EUROZONE 100 INDEX	Lanciato nel 2022, include 100 aziende dell'Eurozona che hanno dimostrato di avere un ruolo rilevante nella promozione della parità di genere.
S&P GLOBAL LARGEMIDCAP BIODIVERSITY	L'indice della biodiversità, lanciato nel febbraio 2024, misura la capacità delle aziende dell'S&P Global LargeMidCap di limitare gli impatti delle attività commerciali sugli ecosistemi.
EURONEXT ESG EUROZONE BIODIVERSITY LEADERS PAB INDEX	L'indice sulla biodiversità, lanciato nel 2022, seleziona tra le aziende con la migliore valutazione di Moody's Analytics, le *best performer* rispetto all'analisi della "Corporate Biodiversity Footprint" sviluppata da Iceberg Data Lab.

Teleborsa: distribution and commercial use strictly prohibited

La prevedibile evoluzione della gestione

Nel corso del 2025 si prevede una crescita economica globale debole resa ancora più incerta dalle tensioni commerciali tra le principali economie mondiali, acuite dall'accentuarsi del rischio dell'introduzione di nuove misure protezionistiche che potrebbero generare una nuova spinta inflazionistica. Inoltre, le tensioni geopolitiche potrebbero persistere o addirittura intensificarsi, con conflitti regionali, rivalità tra Stati e sfide alla sicurezza globale con impatti negativi sulla stabilità politica ed economica.

Nello scenario suddetto, il Gruppo Terna sarà focalizzato sulla realizzazione di quanto previsto nell'aggiornamento del Piano Industriale 2024-2028, presentato alla comunità finanziaria il 25 marzo 2025, che, con i suoi 17,7 miliardi di investimenti complessivi, conferma e rafforza il contributo di Terna come abilitatore della transizione energetica e digitale a supporto del raggiungimento dei target di decarbonizzazione e del progressivo incremento dell'indipendenza del sistema elettrico italiano.

In particolare, con riferimento alle **Attività Regolate**, viene confermata l'accelerazione degli investimenti finalizzati a conseguire gli obiettivi dei pacchetti europei Fit-for-55 e del RepowerEU, declinati in Italia nel Piano Nazionale Integrato Energia e Clima (PNIEC) del 2024. Tali interventi consentiranno l'integrazione delle fonti rinnovabili, lo sviluppo delle interconnessioni con l'estero, il miglioramento del livello di sicurezza e resilienza del sistema elettrico nonché la digitalizzazione della rete.

Tra i principali progetti di investimento in corso, si evidenzia l'avanzamento del Tyrrhenian Link, per il quale, sul ramo Est, si prevede il completamento delle pose marine di polo 1. Sul ramo Ovest, invece, si prevede il completamento delle forniture del cavo marino di polo 1 e la prosecuzione dei lavori in Sardegna e in Sicilia.

Relativamente al Sa.Co.I.3 sono stati avviati i cantieri per i punti di approdo dei cavi marini in Sardegna e Toscana ed è in corso la progettazione esecutiva dei cavi terrestri e delle stazioni di conversione di Suvereto e Codrongianos. Con riferimento ai cavi e alle linee aeree in Corsica, proseguono le attività di execution a seguito dell'apertura dei cantieri.

Per il progetto Adriatic Link, sono in corso le opere civili propedeutiche alla posa del cavo terrestre nelle Marche e si prevede l'apertura del cantiere delle opere civili cavi terrestri in Abruzzo, inoltre, nel corso dell'anno verranno aperti anche i cantieri delle stazioni di conversione.

Tra le principali infrastrutture della RTN, sono previste le entrate in esercizio dell'elettrodotto Pantano-Priolo, del compensatore sincrono di Aurelia e delle stazioni di Foiano e Ponte Caffaro.

Proseguiranno nell'anno 2025 gli interventi per la finalizzazione della nuova rete elettrica dei Giochi Olimpici e Paralimpici "Milano-Cortina 2026" con l'obiettivo di incrementare, con opere a ridotto impatto paesaggistico, l'affidabilità energetica nei luoghi interessati dall'evento. In particolare, per il 2025 sono previste le entrate in esercizio dei collegamenti di Livigno, Laion-Corvara e Moena-Campitello.

Infine, il Gruppo continuerà lo svolgimento delle attività finalizzate a conseguire gli obiettivi previsti da meccanismi di regolazione output-based definiti dall'ARERA, sia quelli relativi alla riduzione dei costi di dispacciamento (incentivi MSD, "Mercato dei Servizi di Dispacciamento" Delibera n. 554/2024/R/eel) sia quelli relativi all'incremento della capacità addizionale di trasporto interzonale (incentivi interzonali Delibera n. 55/2024/R/eel), impegnandosi a mantenere i livelli raggiunti nel corso del periodo di osservazione.

Teleborsa: distribution and commercial use strictly prohibited

Con riferimento alle **Attività Non Regolate**, si è concluso il processo di riorganizzazione nell'ambito delle controllate di Terna Energy Solutions S.r.l., società del Gruppo Terna che gestisce le attività sui mercati competitivi, che ha integrato competenze diversificate lungo tutta la catena del valore dell'energia attraverso la sua rete di società controllate, proponendosi come polo di riferimento per la transizione energetica e digitale delle imprese.

Il Gruppo Terna, di conseguenza, rafforzerà il suo ruolo nei vari segmenti della catena del valore della Energy Transition: Altenia (precedentemente denominata LT S.r.l., che dal mese di marzo 2025 ha modificato la propria denominazione sociale a seguito della suddetta riorganizzazione), system integrator con competenze specializzate e diversificate per la progettazione, costruzione e manutenzione di impianti elettrici e rinnovabili, il Gruppo Tamini, leader nella produzione di trasformatori e il Gruppo Brugg Cables, società operante nel settore dei cavi terrestri. Questi ultimi, funzionali anche alla realizzazione degli investimenti del Gruppo, svilupperanno attività ad alto valore aggiunto per le imprese, offrendo ai clienti soluzioni tecnologiche, innovative o digitali in ambito energetico e industriale e cogliendo le opportunità di crescita sia attraverso il consolidamento della leadership di mercato che attraverso l'incremento della capacità produttiva.

Il Gruppo continuerà, inoltre, lo sviluppo del business Connectivity basato sulle attività relative alla rete in fibra ottica.

Per quanto riguarda le **Attività all'estero**, il Gruppo proseguirà nel processo di valorizzazione del portafoglio di asset in America Latina, ponendo in essere tutte le azioni necessarie alla finalizzazione dell'operazione straordinaria in corso in Perù. In aggiunta, continuerà il monitoraggio del mercato estero, con un focus particolare nell'area del Mediterraneo, per analizzare le evoluzioni di scenario e di contesto e cogliere eventuali opportunità che garantiscano un basso profilo di rischio e un limitato assorbimento di capitale.

Nel corso dell'anno, il Gruppo intensificherà gli sforzi per migliorare l'efficienza operativa e la gestione della rete di trasmissione attraverso l'adozione di tecnologie innovative e la digitalizzazione degli asset della rete di trasmissione grazie all'implementazione di tecnologie IoT. Ciò includerà, a titolo esemplificativo, l'implementazione delle più avanzate tecnologie di rete mobile, il potenziamento di sistemi di monitoraggio e lo sviluppo di algoritmi predittivi avanzati al fine di ottimizzare la manutenzione delle infrastrutture e migliorare la resilienza della rete.

La gestione del business del Gruppo Terna continuerà a essere improntata sui valori di sostenibilità e sul rispetto dei criteri ESG, garantendo la minimizzazione degli impatti ambientali, il coinvolgimento degli stakeholder territoriali e il rispetto dei principi di integrità, responsabilità e trasparenza.

Per il 2025 è previsto che il Gruppo Terna possa conseguire ricavi per 4,03 miliardi di euro, un EBITDA pari a 2,70 miliardi di euro e un Utile netto pari a 1,08 miliardi di euro. Con specifico riferimento al Piano investimenti il Gruppo ha un target 2025 pari a circa 3,4 miliardi di euro. Tali obiettivi saranno perseguiti mantenendo l'impegno alla massimizzazione della generazione di cassa necessaria ad assicurare una sana ed equilibrata struttura finanziaria.

Teleborsa: distribution and commercial use strictly prohibited

I principali fattori di rischio e incertezza

Obiettivi aziendali e gestione dei rischi

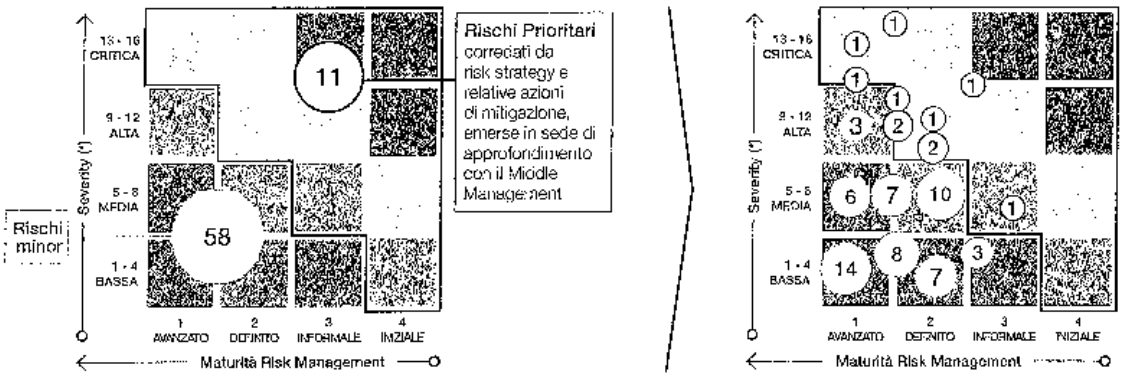
Il Sistema di Gestione dei Rischi ha la finalità ultima di supportare i processi decisionali e creare consapevolezza nell'organizzazione circa il livello di rischio assunto e la sua compatibilità con gli obiettivi aziendali, nonché diffondere e rafforzare la cultura del rischio a tutti i livelli dell'organizzazione.

Per la gestione coordinata dei rischi, condotta dal Management nei diversi ambiti, il Modello di Risk Governance del Gruppo Terna ha da tempo previsto l'adozione di un framework di riferimento comune e indicativo degli obiettivi che permettono la creazione o il mantenimento di valore del Gruppo. Il framework degli obiettivi è stato aggiornato nel 2024, al fine di allinearlo alle evoluzioni del contesto interno e/o degli obiettivi del Piano Industriale.

Il framework degli **obiettivi aziendali**, suddivisi tra **Strategici** (collegati al Piano Industriale) e **Recurring** (ovvero continuativi, legati alle attività da concessione, alla missione statutaria e ai codici di comportamento adottati), viene utilizzato annualmente come riferimento principale per l'**individuazione** degli eventi di rischio, anche emergenti, da parte del Management.

A partire dal framework Obiettivi, ciascun evento di rischio individuato passa alla fase di **valutazione** attraverso la combinazione di Impatto (declinato in quattro tipologie: economico-finanziaria, reputazionale, operativo e HSE & Sostenibilità), della Probabilità di accadimento sull'orizzonte di Piano e del Livello di Maturità dei sistemi di Risk Management esistenti. In relazione a tali elementi, viene selezionata la priorità e le specifiche modalità di **trattamento** dei rischi, attraverso l'individuazione di azioni di mitigazione o correttive.

Teleborsa: distribution and commercial use strictly prohibited



Il profilo di rischio di un'azienda non è statico, ma dinamico e può variare al cambiare del contesto esterno di riferimento e/o in funzione delle scelte organizzative e di business interne. L'attività di **monitoraggio**, quindi, è svolta con la finalità di verificare l'evoluzione del profilo di rischio del Gruppo, l'esposizione dei principali rischi, l'andamento degli indicatori di rischio (KRI) definiti, unitamente allo stato di avanzamento delle azioni di mitigazione definite.

Le fasi del processo di Risk Management, precedentemente descritte, vengono ripetute regolarmente (almeno annualmente).

In particolare, a partire dal mese di novembre 2024, è stato avviato l'aggiornamento del Risk Assessment, che in linea con gli anni precedenti, è stato svolto secondo un approccio Top Down e con il coinvolgimento del Middle e Top Management.

L'analisi svolta ha tenuto conto delle principali variazioni del contesto esterno (variabili macroeconomiche, crisi geopolitiche, etc.) e interno (organizzazione aziendale, processi, procedure, etc). Tali variabili, esogene e non, hanno contribuito a valutare con un certo peso gli eventi di rischio individuati, consentendo di aggiornare il profilo di rischio del Gruppo, come di seguito illustrato:

(#) Numero di rischi per quadrante

(*) Severity: prodotto (Impatto)x(Probabilità)

I rischi emersi dall'aggiornamento del Risk Assessment 2024-2025 sono, inoltre, correlati ai temi degli standard di rendicontazione *European Sustainability Reporting Standards* (ESRS), secondo quanto previsto dalla Direttiva UE 2022/2464 (*Corporate Sustainability Reporting Directive* – CSRD) e dal relativo decreto di recepimento italiano (decreto legislativo 6 settembre 2024, n. 125).

Per approfondimenti circa il processo di Doppia Rilevanza e il dettaglio dei rischi di sostenibilità del Gruppo Terna, si prega di far riferimento al paragrafo "La Doppia Rilevanza" presente all'interno della Rendicontazione Consolidata di Sostenibilità del Gruppo Terna.

Ciascun rischio identificato, oltre a essere valutato, viene anche classificato in base alla sua tipologia. Nel suo framework ERM, Terna ha identificato 6 categorie di rischio, come di seguito illustrate.

Teleborsa: distribution and commercial use strictly prohibited

Rischi di Contesto / Mercato

Terna opera in un contesto regolatorio caratterizzato dalla concessione governativa e dalle disposizioni dell'Autorità di Regolazione per Energia Reti e Ambiente (ARERA).

Data la specificità del business e dell'ambito in cui opera, Terna è, quindi, esposta a rischi che originano in ambito regolatorio e normativo, che possono impattare sui ricavi derivanti dall'attività in concessione, soprattutto in occasione delle revisioni tariffarie pluriennali. Si tratta in alcuni casi di vere e proprie sfide, che richiedono la necessità di un'attenta gestione del rischio per valutarne opportunamente le implicazioni per il Gruppo. Per maggiori dettagli in merito alle attuali dinamiche regolatorie si rinvia al paragrafo "Regolatorio" della sezione I contesti di riferimento, a cui si aggiungono ulteriori fattori di contesto, legati agli andamenti economico-finanziari dei mercati in cui Terna opera. Tra questi, l'oscillazione dei prezzi delle commodity, che negli ultimi anni sono stati influenzati dalle tensioni geopolitiche internazionali (guerre in Ucraina e Medio Oriente), e dei tassi di interesse, sia a breve che a lungo termine, rappresentano un aspetto rilevante che potrebbe incidere sui costi operativi, sugli investimenti e sulla gestione del debito. Questi elementi, insieme alle sfide regolatorie, richiedono un approccio strategico mirato e flessibile per garantire la resilienza e la sostenibilità nel lungo periodo.

Rischi Operativi

Gli investimenti sostenibili nella rete di trasmissione nazionale, essenziali per supportare la transizione energetica e garantire l'efficienza e la sicurezza del sistema elettrico, rappresentano il core business del Gruppo e vedono il coinvolgimento diretto dei territori, attraverso il confronto con tutti i principali stakeholder, le comunità locali, gli enti e le istituzioni.

Terna è, quindi, esposta a rischi operativi legati all'esecuzione delle opere previste dal Piano di Sviluppo, che dipendono da un lato dalle caratteristiche intrinseche di tipo ingegneristico e tecnologico dei progetti di realizzazione, spesso molto complessi e innovativi (come i grandi progetti HVDC e l'innovativo Hypergrid), dall'altro da problematiche esterne non facilmente controllabili (come l'ottenimento delle autorizzazioni ambientali e/o amministrative o le opposizioni da parte delle comunità locali), con conseguenti impatti sulle tempistiche e sull'integrità del piano di investimenti.

La gestione dei cantieri di realizzazione degli impianti di Terna impone, inoltre, grande attenzione agli aspetti legati alla sicurezza delle persone di Terna e delle ditte appaltatrici/subappaltatrici che vi lavorano, per non incorrere in rischi legati alla salute e sicurezza dei lavoratori.

Ulteriori aspetti che espongono il Gruppo a rischi operativi riguardano la gestione della rete di trasmissione nazionale (c.d. Dispacciamento), finalizzata a garantire la continuità e qualità, sicurezza, adeguatezza ed economicità del sistema elettrico. Eventi straordinari, malfunzionamenti e guasti, ma anche la crescente complessità di gestione del sistema stesso, sempre più interconnesso e integrato con le fonti rinnovabili, comportano una maggiore variabilità e incertezza nella gestione del bilanciamento del sistema elettrico e potrebbero mettere alla prova le capacità del sistema di mantenere gli standard di qualità e sicurezza.

In un contesto dove lo svolgimento delle attività aziendali è fortemente basato sull'utilizzo di tecnologie ICT e strumenti digitali, l'esercizio attento dei sistemi e delle infrastrutture tecnologiche preserva il Gruppo da problemi di malfunzionamento, guasti o blocchi dei sistemi, che potrebbero compromettere la continuità e causare inefficienze operative.

In ultimo, ma non meno importante, rientra la capacità del Gruppo di attrarre e trattenere persone e talenti con competenze tecniche / specialistiche, che, oltre a essere limitatamente disponibili, sono altamente ricercate sul mercato.

Teleborsa: distribution and commercial use strictly prohibited

Rischi Legali / Contrattuali

I rischi legali per Terna rappresentano le potenziali conseguenze negative del mancato rispetto obblighi contrattuali in relazione alle attività che il Gruppo svolge. Tali rischi possono manifestarsi attraverso sanzioni, contenziosi legali, ad esempio, a problematiche come inadempienze rispetto a quanto stabilito dalle clausole contrattuali.

L'accadimento di questi rischi potrebbe arrecare un danno patrimoniale e non, economico e/o reputazionale per il Gruppo.

Rischi di Compliance

Tale categoria di rischio si riferisce all'eventualità che vi siano violazioni, in parte o *in toto*, di leggi e regolamenti da parte di Terna, determinando sanzioni penali, civili, tributarie e/o amministrative, nonché un danno patrimoniale e non, economico e/o reputazionale.

Per gestire con efficacia questa tipologia di rischi, Terna ha inteso rafforzare i propri presidi di governance, definendo un Sistema di Gestione della Compliance efficace, da affiancare ai già presenti Sistemi di Gestione aziendali e agli altri strumenti di presidio della compliance (inclusi modelli di gestione centralizzati come il Modello Organizzativo D.Lgs. 231/01, Trade Compliance, Modello L.262/05, Tax Control Framework, etc.) e avere così un'ulteriore garanzia di gestione degli aspetti di conformità relativi a realtà complesse come quella del Gruppo.

A tal fine, sin dal 2022, Terna S.p.A. ha avviato un processo di prima implementazione del Sistema di Gestione della Compliance e adottato una Politica dedicata, ottenendo, il 4 febbraio 2023 e per prima in Italia, la certificazione secondo la Norma UNI ISO 37301:2021 del proprio Sistema per la Gestione della Compliance, estesa a tutte le "compliance obligation" rilevanti. Tale certificazione, rilasciata dall'Organismo di Certificazione IMQ, è stata ottenuta in pari data anche per le principali società del Gruppo Terna (le controllate Terna Rete Italia S.p.A., Terna Plus S.r.l. e Terna Energy Solutions S.r.l.).

Rischi di Controparte

Il Gruppo opera in un contesto complesso, caratterizzato da simultanei processi di transizione energetica avviati in Europa, che stanno mettendo a dura prova la capacità produttiva dei principali fornitori con cui Terna si interfaccia. Tra le principali criticità che si potrebbero riscontrare, infatti, si evidenzia un grande aumento degli investimenti legati alla transizione energetica dei TSO in Europa, che imprime ulteriore stress alla capacità produttiva dei fornitori e impone scelte industriali basate sulla domanda di mercato. Ne potrebbe conseguire una maggiore attrattività di altre geografie rispetto all'Italia o scelte di delocalizzazione della produzione dei fornitori chiave per Terna, già in numero ristretto. A ciò si aggiunge la possibile difficoltà di alcuni fornitori di soddisfare la crescente domanda del Gruppo, in un contesto in cui la disponibilità di risorse specializzata risulta limitata e la capacità produttiva di alcuni settori è ormai satura, ma anche il fallimento di fornitori critici, a causa delle sfavorevoli condizioni economiche.

La possibile conseguenza è quella di ritardi/extra-costi nell'esecuzione delle opere dei progetti pianificati.

Questa complessa combinazione di fattori richiede, quindi, una gestione proattiva dei rischi, attraverso un'attenta pianificazione, una diversificazione (laddove possibile) dei fornitori e un monitoraggio continuo del contesto di mercato.

Eventi Naturali e Dolosi

L'intensificazione di eventi atmosferici estremi (trombe d'aria, forti nevicate, ghiaccio, inondazioni) a causa del cambiamento climatico, rappresenta una minaccia globale al processo di decarbonizzazione e al raggiungimento dei relativi targot. Tali fenomeni tendono a essere sempre più frequenti e impattanti, la cui intensità è direttamente proporzionale ai potenziali danni che possono generare all'infrastruttura elettrica, compromettendo la continuità e qualità del servizio offerto da Terna.

Il Piano di Resilienza rappresenta una risposta a questi eventi e consiste nel rafforzamento della rete a cui sono dedicati ingenti investimenti.

620

Teleborsa: distribution and commercial use strictly prohibited

Terna è, però, non solo esposta a minacce naturali, ma anche a eventi dolosi come gli attacchi cyber (su cui influisce anche l'instabilità geopolitica con i conflitti in Ucraina e in Medio-Oriente), che potrebbero anche causare perdita di visibilità e manovrabilità degli impianti gestiti, indisponibilità temporanea di sistemi critici, perdita di dati e/o extra-costi per il ripristino, e, non ultimi, danni reputazionali.

Sono eventi su cui Terna pone grandissima attenzione e su cui è estremamente sensibile, data la portata delle possibili conseguenze, attraverso la predisposizione di presidi tecnologi, procedurali e organizzativi che pongono le misure di contenimento del rischio a livello massimo.

Attività di analisi e prevenzione dei rischi del Gruppo Terna in riferimento allo scenario macroeconomico

Il Gruppo Terna è costantemente impegnato nel monitoraggio dei possibili rischi connessi al perdurare della crisi tra Russia e Ucraina e del conflitto in Medio Oriente, anche considerando la continua evoluzione della normativa di riferimento relativa ai programmi sanzionatori internazionali avviati e aggiornati sin dall'inizio del conflitto.

A tal fine, si garantisce sia il monitoraggio costante della nuova normativa sanzionatoria sia il rafforzamento delle proprie due diligence e dei controlli ordinari. Le direttrici dei potenziali impatti, sulle quali sono stati attivati tavoli di costante monitoraggio, sono: **cyber security**, **economico-finanziari**, **sistema elettrico** e sul piano degli **approvvigionamenti**.

Con il perpetrarsi del conflitto russo-ucraino e della crisi in Medio Oriente, gli obiettivi oggetto di attacco si sono ampliati ed è stato registrato un aumento di **attacchi cyber** verso portali istituzionali e aziendali anche italiani. Le azioni non hanno ad oggi comportato significativi impatti distruttivi o *data breach*, con disservizi limitati nel tempo.

Grazie alla continua azione di *Infosharing* con gli Enti Istituzionali e ai flussi prioritari attivati presso i provider di Cyber Threat Intelligence, sui sistemi di protezione Cyber di Terna sono state implementate regole e policy specifiche per bloccare preventivamente azioni dannose. Sono state effettuate con esito positivo anche tutte le verifiche relative all'assenza di prodotti e servizi tecnologici di sicurezza informatica attivi su infrastruttura informatica di Terna, connessi alla Federazione Russa. Inoltre, è stata effettuata una analisi relativa alle tecnologie israeliane (o collegate) presenti nelle infrastrutture digitali Terna, in particolare in ambito Cyber, al fine di monitorare l'esposizione al rischio e indirizzare proattivamente eventuali misure atte a contenere impatti per Terna.

Sul fronte **economico-finanziario**, si segnala che la significativa variazione dei parametri macroeconomici cui è esposto il Gruppo (tassi di interesse, inflazione, rendimento dei titoli governativi italiani e indici relativi al costo del debito europeo), rilevata negli anni 2022- 2023, ha comportato per l'anno 2024 un incremento dello 0,8% del costo del capitale riconosciuto in tariffa, a compensazione degli impatti generati dalle variabili stesse. In seguito all'aggiornamento complessivo dei valori dei parametri utilizzati per il calcolo del WACC, ai sensi della delibera pubblicata a fine 2024 dall'ARERA (Delibera n. 513/2024), il WACC per il 2025 sarà pari al 5,5%. A tal riguardo il regolatore ha confermando l'inserimento di un meccanismo di aggiornamento del WACC nel 2026-2027 qualora, a valle dell'aggiornamento di alcuni parametri, il WACC subisca una variazione in incremento o decremento superiore ai 30 punti base.

601

Teleborsa: distribution and commercial use strictly prohibited

Inoltre, nel corso del 2024, la maggiore stabilità del contesto macroeconomico, caratterizzato dalla riduzione dell'inflazione e dalla minore volatilità del prezzo delle commodities, rispetto agli alti picchi rilevati nel 2022, ha comportato un cambio della politica monetaria perseguita dalla Banca Centrale Europea che, per la prima volta dal 2019, ha ridotto i tassi di deposito (per un totale di 100 punti base nel corso dell'anno). In generale, le decisioni della BCE si rifletteranno gradualmente sul costo del debito di Terna nei prossimi anni, in considerazione della durata media del debito esistente e dell'elevata percentuale di finanziamenti attualmente a tasso fisso (84%). Tra i principali rischi che potrebbero potenzialmente incrementare la volatilità dei mercati finanziari nei prossimi mesi si segnalano le politiche commerciali della nuova amministrazione Trump e l'estensione a livello globale di dazi e tariffe.

Sulla base dell'attuale regolazione di Terna, che prevede l'indicizzazione dei costi operativi riconosciuti in tariffa e della RAB, non si prevedono impatti economici negativi significativi derivanti dall'aumento dell'indice dei prezzi. Tuttavia, il riconoscimento regolatorio si riflette integralmente a bilancio con un ritardo temporale di circa un anno.

Infine, è utile sottolineare che il Gruppo Terna ad oggi dispone di fonti di finanziamento, suddivise tra liquidità e linee di credito *committed* (quindi immediatamente esigibili) che, unite alla capacità di generare flussi finanziari, sono in grado di coprire il fabbisogno finanziario di Gruppo per i prossimi 18/24 mesi, per far fronte a eventuali ulteriori stress sul mercato dei capitali.

Per il 2024, le evidenze ad oggi dimostrano che non risultano impatti sull'adeguatezza del **sistema elettrico**, grazie alle temperature miti e al percorso di diversificazione delle fonti di importazione del gas naturale, già intrapreso nel 2023.

Successivamente all'impennata dei prezzi gas registrata nel 2022, causata dallo scoppio della guerra in Ucraina, i prezzi gas sono progressivamente rientrati, anche se i valori ad oggi risultano superiori rispetto ai livelli pre-crisi. Infatti, il **prezzo del gas registrato nel 2024** nel Title Transfer Facility (TTF), uno dei mercati all'ingrosso del gas naturale più grandi d'Europa, **si è stabilizzato intorno ai 40-50 €/MWh**. Tuttavia, sia i prezzi che la relativa volatilità rimangono a livelli più alti rispetto ai valori pre-crisi (10-15 €/MWh), indicando che il mercato sia in un equilibrio fragile. Il mercato gas resta molto influenzato da tensioni geopolitiche, da timori di possibili rischi di approvvigionamento e da dinamiche climatiche di breve periodo (temperature invernali, eventi di "Dunkelflaute"). Analogamente a quanto osservato per il settore del gas, anche i prezzi dell'energia elettrica all'ingrosso sono diminuiti nel corso del 2024 rispetto allo stesso periodo dell'anno precedente. Infatti, **il PUN nel 2024 ha registrato una media dei prezzi spot di 109 €/MWh**, mentre nel 2023 era stato di 127 €/MWh. **Nonostante la diversificazione delle fonti di approvvigionamento, permane un tema legato alla sicurezza energetica, tenuto conto che quasi la totalità del gas consumato in Italia viene importato da Paesi terzi**.

Per quanto concerne il piano degli **approvvigionamenti**, allo stato attuale, tutti i fornitori qualificati sono soggetti a due diligence in ambito di sanzioni internazionali e non risultano più qualificati operatori economici russi.

Nonostante le continue perturbazioni sul fronte dell'offerta (disponibilità componenti e escursioni di prezzo, allungamento dei termini di consegna) gli impatti negativi sono mitigati con una gestione attiva dell'equilibrio domanda offerta per le principali forniture di linea e apparecchiature di stazione.

Sul fronte della variabilità dei prezzi, la previsione legislativa che rende obbligatoria la loro revisione è al momento mitigata dall'attuale quadro regolatorio.

Riguardo ai grandi progetti (es. Tyrrhenian Link, Adriatic Link, Sa.Co.I.3 ed Elmed), i cui contratti di fornitura per le stazioni sono oggetto di gare in corso o di esecuzione, non può escludersi un impatto derivante da possibili mutamenti dell'equilibrio economico dei fornitori che si traduce in richieste di incremento dei corrispettivi contrattuali o, nel caso di loro indicizzazione, in incrementi legati a formule predeterminate. La mitigazione di tali rischi avviene con una gestione ad hoc dei contratti stipulati con i fornitori.

Teleborsa: distribution and commercial use strictly prohibited

Il Sistema di Gestione Integrato

Lo strumento che ottimizza – attraverso i Sistemi certificati – il coordinamento di tutte le strutture preposte al governo dei processi aziendali è il **Sistema di Gestione Integrato** (di seguito anche SGI) poiché garantisce l'efficacia e l'efficienza dei Sistemi che, evidenziando i potenziali rischi negli ambiti osservati, rappresenta anche un importante strumento di Risk Management.

Il SGI è funzionale anche in chiave di stakeholder engagement poiché monitora e misura, con un obiettivo di costante miglioramento, tematiche di loro interesse contribuendo così a rafforzare la trasparenza e la fiducia nella loro relazione con il Gruppo.

Il Sistema di Gestione Integrato copre la totalità dei processi aziendali in Italia e all'estero di Terna S.p.A. e delle sue controllate (Terna Plus S.r.l., Terna Rete Italia S.p.A., Terna Energy Solutions S.r.l. e Terna Crna Gora d.o.o.).

Nel corso del 2024 il Gruppo Terna ha svolto con successo le attività necessarie al mantenimento e rinnovo di tutte le certificazioni/accreditamenti effettuando contestualmente il passaggio alle nuove versioni delle norme ISO/IEC 27001:2022 e UNI EN ISO 45001:2023, nonché l'adeguamento dei Sistemi agli indirizzi europei in tema di contrasto al cambiamento climatico.

Terna riceve la certificazione per la parità di genere

Nel marzo 2024 la Capogruppo Terna S.p.A. e le sue controllate Terna Rete Italia S.p.A., Terna Energy Solutions S.r.l. e Terna Plus S.r.l hanno ottenuto la Certificazione del Sistema di Gestione per la Parità di Genere, conforme alla UNI/PdR 125:2022.

Il raggiungimento di questo obiettivo evidenzia l'impegno del Gruppo per l'equità e le pari opportunità nella selezione, crescita, sviluppo e remunerazione, con l'obiettivo di creare un ambiente di lavoro inclusivo in cui le unicità di ogni persona vengono valorizzate. In coerenza con i valori fondanti del suo Codice Etico, Terna valorizza e tutela la diversità, prevenendo ogni tipo di discriminazione, incoraggiando il rispetto, la collaborazione, il talento e premiando il merito. Inoltre, in azienda sono attive numerose iniziative, a tutti i livelli, per aumentare la consapevolezza sugli stereotipi di genere, sul linguaggio inclusivo e sulle molestie sul luogo di lavoro. Qualsiasi forma di discriminazione, a partire dai processi di selezione per l'inserimento in azienda, è esplicitamente vietata dal Codice Etico e dalle Policy di Gruppo in materia di Diversity, Equity & Inclusion e di Rispetto dei Diritti Umani.

L'inclusione è uno dei valori del modello di leadership di Terna: in particolare il Gruppo promuove politiche e azioni di welfare volte a favorire la conciliazione vita-lavoro, la tutela della genitorialità e la condivisione delle responsabilità familiari e assistenziali. In tal senso sono stati implementati lo smart working e il co-working, in alternativa alla presenza nella propria sede di lavoro; presso la sede di Roma, è presente un asilo nido, MiniWatt; in alcune sedi i servizi per facilitare la conciliazione vita-lavoro sono integrati in azienda, quali, ad esempio, la palestra, il supermercato interno e la mobilità sostenibile, a livello nazionale sono invece previste convenzioni che consentono di usufruire di servizi di babysitting, caregiving e strutture sportive; dal 2021, Terna sostiene la Carovana della Prevenzione per la salute dell'Associazione Komen Italia, offrendo due volte l'anno la possibilità di accedere a screening gratuiti presso la sede aziendale.

La certificazione per i processi di Amministrazione, Finanza e Controllo

Terna conferma il suo impegno per l'eccellenza dei processi amministrativo contabili nel secondo anno dall'ottenimento, come prima azienda italiana, della **certificazione UNI Pdr 104 2021** relativa alla **gestione e al sistema dei controlli interni dei processi amministrativi e contabili** per la Capogruppo Terna S.p.A. e le Società controllate.

603

Teleborsa: distribution and commercial use strictly prohibited

La certificazione UNI Pdr 104 2021, valida per cinque anni e rilasciata da Intertek Italia, continua a valorizzare l'attenzione dell'azienda verso il perfezionamento delle procedure attinenti all'informativa finanziaria, attestando al contempo una governance solida e trasparente su tutti gli aspetti amministrativi, fiscali e sui relativi processi di controllo.

Parte del percorso che ha portato alla certificazione ha riguardato l'evoluzione e l'aggiornamento periodico della Relazione sull'Assetto Organizzativo, Amministrativo e Contabile per ciascuna società del Gruppo, la quale consente agli organi amministrativi di esprimere una valutazione sull'adeguatezza di tale assetto ai sensi dell'art. 2382, comma 5, del Codice civile e del Codice sulla Crisi d'Impresa.

L'azienda si è altresì dotata di una specifica Politica Amministrativo-Contabile, che rappresenta il quadro di riferimento nel quale sono stati delineati i principi cardine del corretto assetto amministrativo-contabile, prerequisito per l'ottenimento della certificazione e guida delle attività in ambito Amministrazione, Finanza e Controllo.

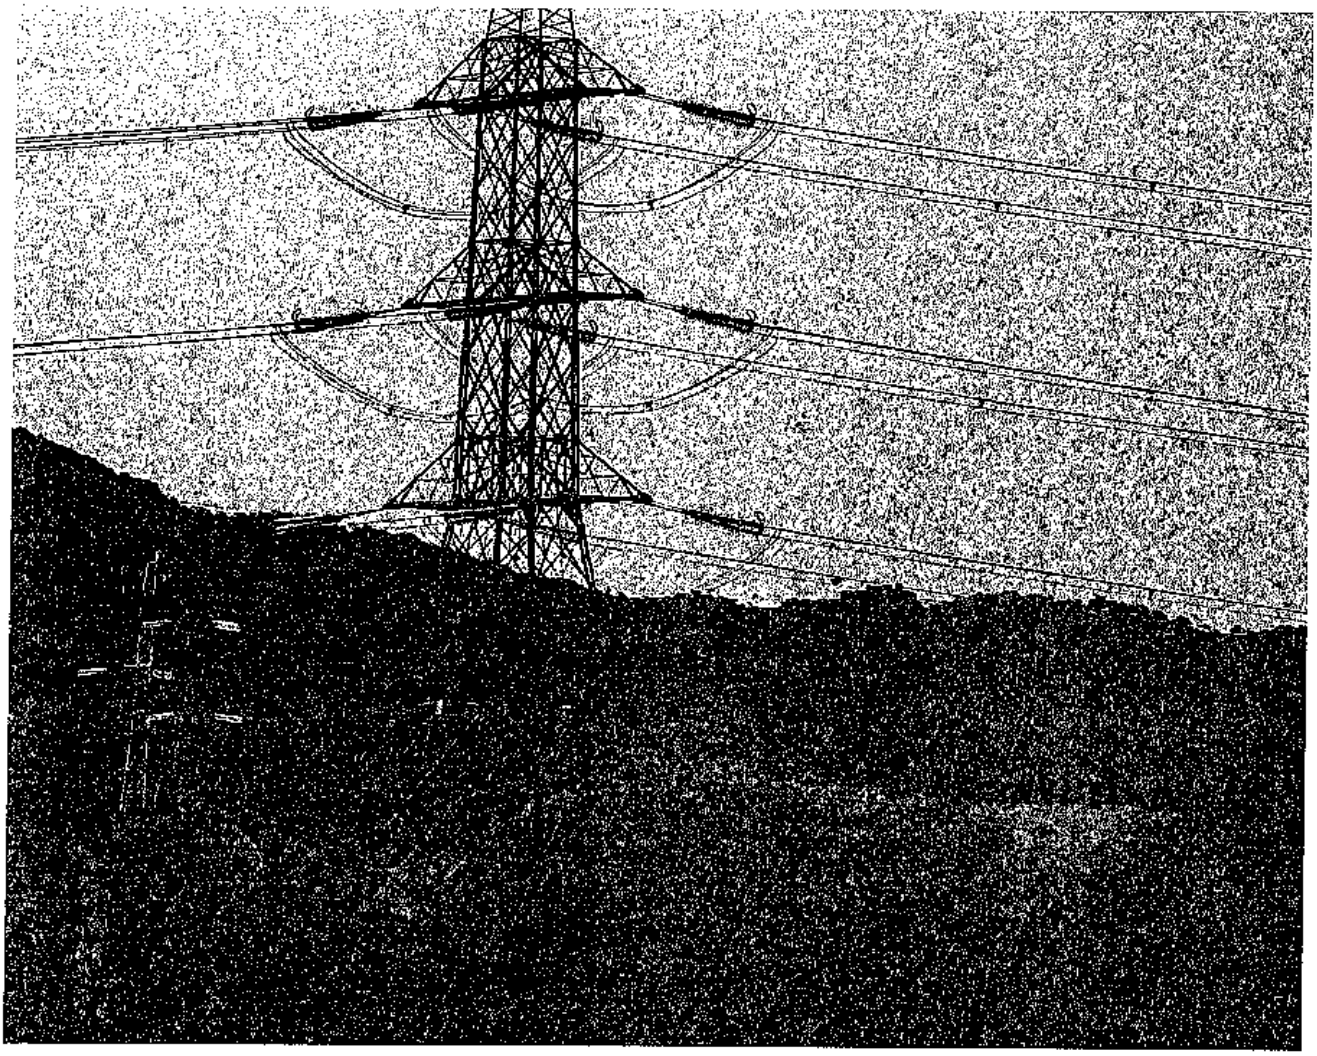
Teleborsa: distribution and commercial use strictly prohibited

Tax control framework

La gestione del rischio fiscale di Terna S.p.A.



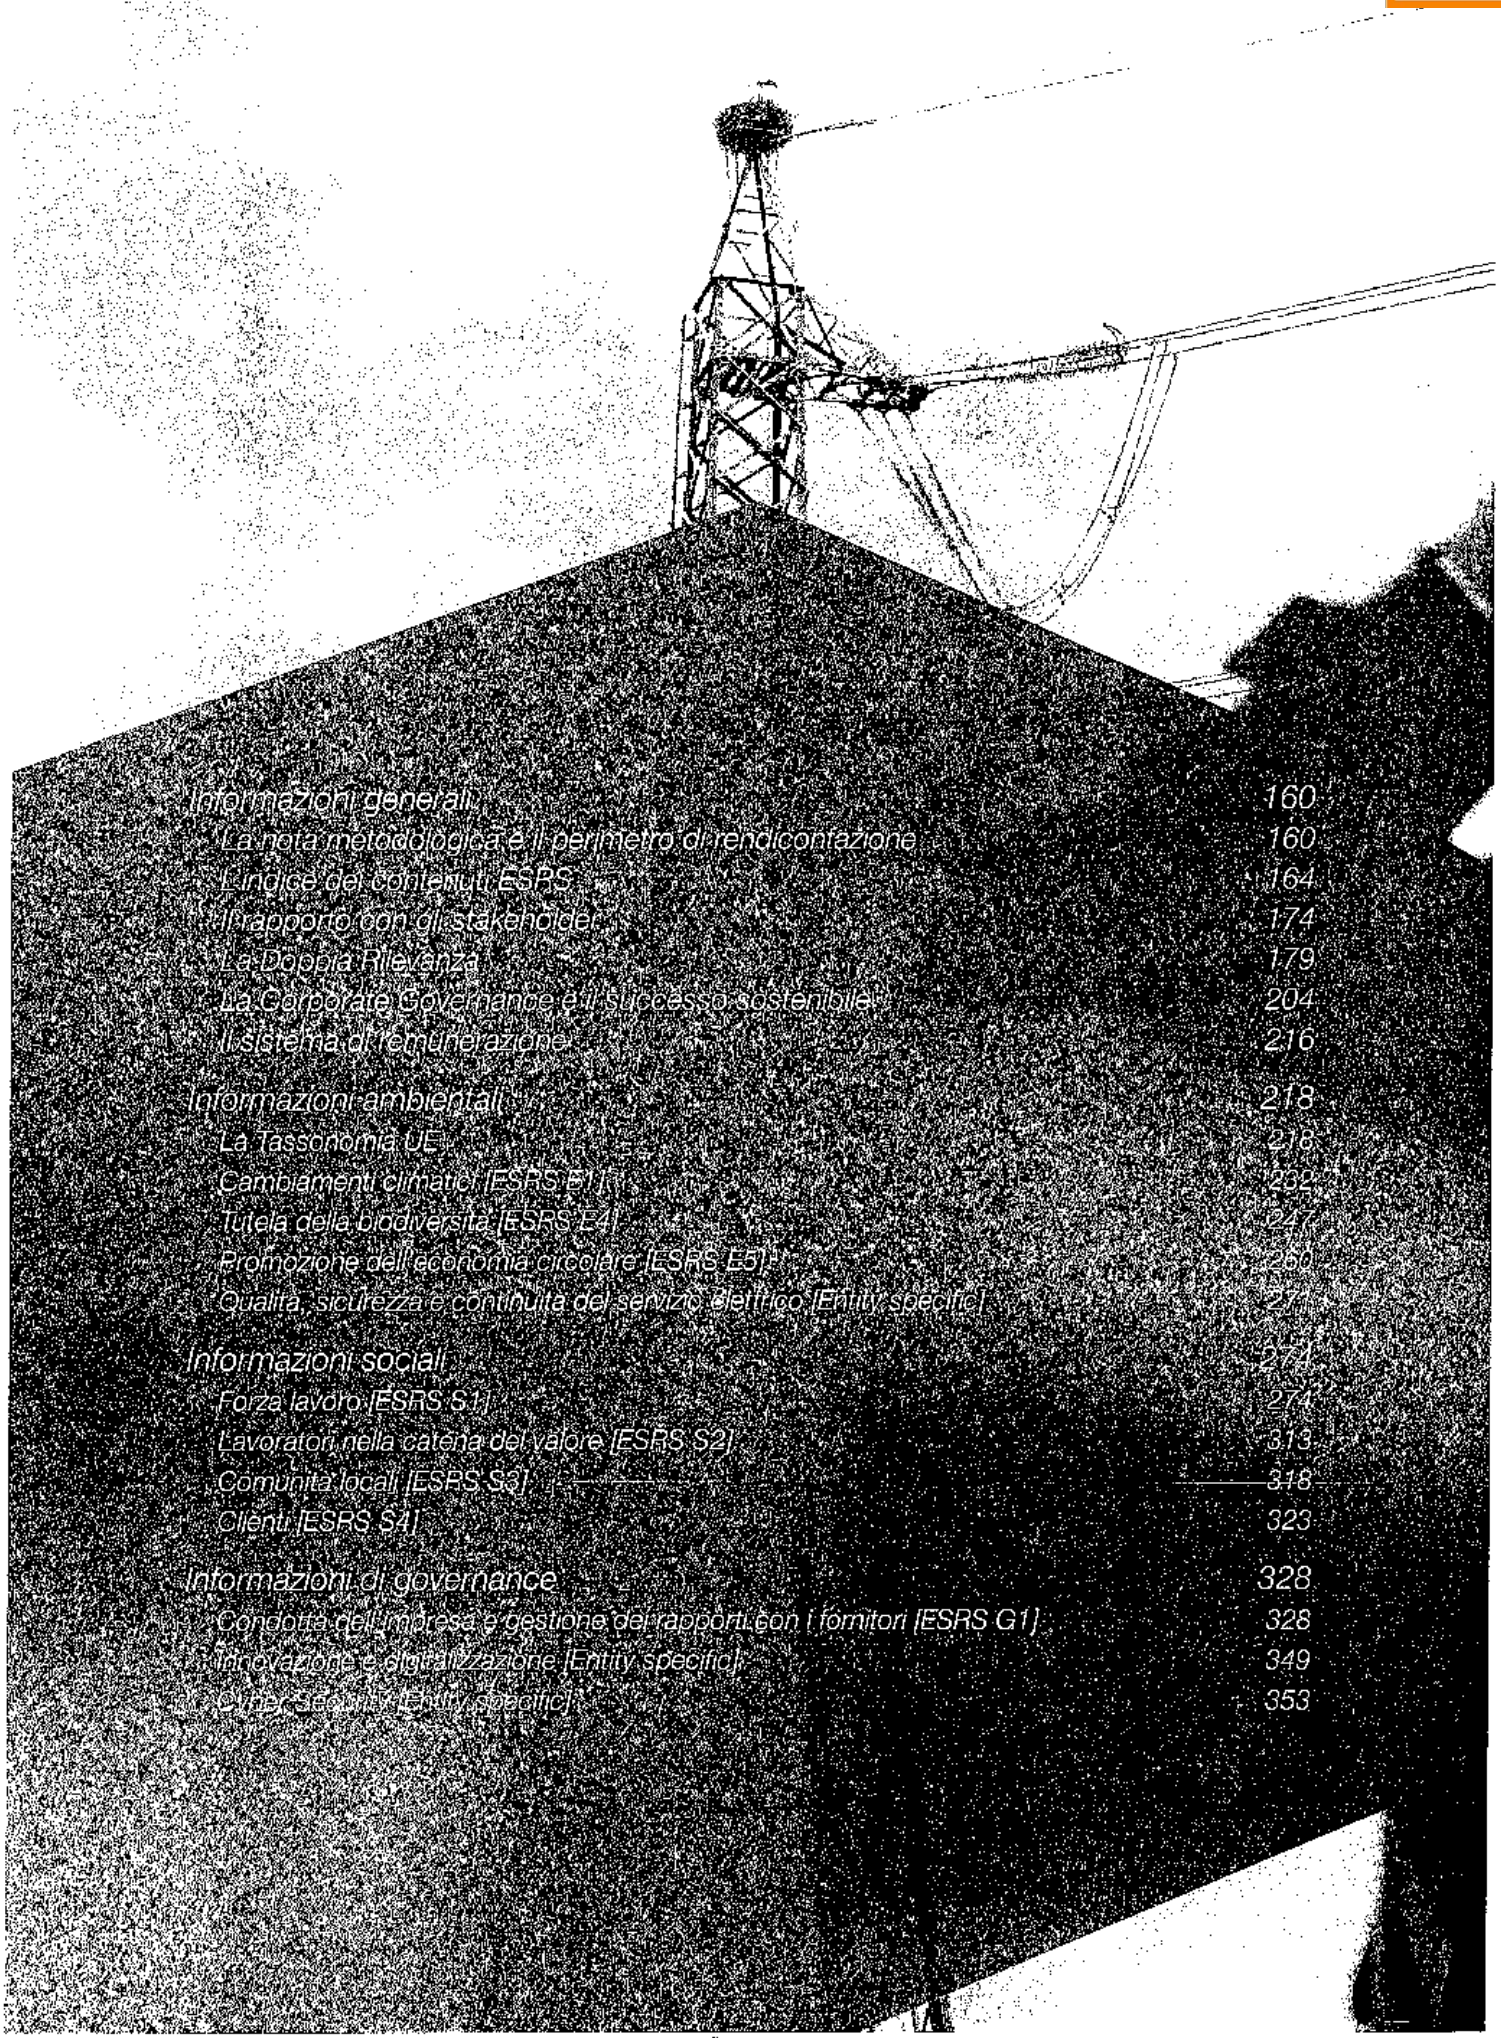
Il Gruppo Terna, in ottica di rafforzamento del proprio Sistema di Controllo Interno dei Rischi, ha adottato il **Tax Control Framework** (TCF), un modello organizzativo volto alla gestione del rischio fiscale, che è stato un passaggio propedeutico all'accesso al regime di Adempimento Collaborativo ("Cooperative Compliance" disciplinata con D. lgs. n. 128 del 5.8.2015 e successivi provvedimenti) a cui Terna S.p.A. è stata ammessa il 14 dicembre 2023.

Il regime dell'Adempimento Collaborativo è un istituto che si pone l'obiettivo di aumentare il livello di certezza sulle questioni fiscali rilevanti tramite interlocuzioni costanti e preventive con l'Autorità fiscale su elementi di fatto, finalizzate a una comune valutazione delle situazioni suscettibili di generare relativi rischi. L'ammissione di Terna S.p.A. al regime di Adempimento Collaborativo - riconoscimento assegnato previa valutazione positiva condotta dall'Agenzia delle Entrate, sul sistema di rilevazione, gestione, controllo e mitigazione del rischio fiscale - attesta sostanzialmente l'affidabilità delle procedure e dei sistemi di controllo di Terna S.p.A. e qualifica la società come interlocutore "privilegiato" nei rapporti con l'Amministrazione finanziaria.

Con delibera del 14 dicembre 2022, il Consiglio di Amministrazione di Terna S.p.A. ha approvato la **Strategia Fiscale** del Gruppo definendo gli obiettivi e i principi posti alla base della gestione dei rapporti con le Autorità

605

Teleborsa: distribution and commercial use strictly prohibited



fiscali, con l'impegno di promuovere una cultura di compliance fiscale tra i dipendenti. La Strategia Fiscale del Gruppo Terna - in coerenza con il Codice Etico - persegue lo scopo di assicurare la correttezza degli adempimenti fiscali nel rispetto dello spirito e della lettera delle norme tributarie dell'ordinamento interno e dei Paesi nei quali operano le società appartenenti al Gruppo Terna. Nel Gruppo Terna sono promossi comportamenti improntati alla collaborazione e alla trasparenza nei confronti dell'Amministrazione Finanziaria o dei terzi, al fine di minimizzare ogni impatto sostanziale in termini di rischio sia esso fiscale o reputazionale al fine di proteggere e distribuire valore a tutti gli stakeholders in un orizzonte di medio-lungo periodo.

Sotto il profilo operativo, Terna S.p.A. ha adottato un proprio sistema di gestione e controllo del rischio fiscale denominato "Tax Compliance Model", istituendo un insieme di regole, procedure, strutture organizzative e presidi volti a consentire la rilevazione, misurazione, gestione, controllo e monitoraggio del rischio fiscale.

La gestione del processo di rilevazione, misurazione, trattamento e controllo del rischio fiscale nel suo complesso è affidata al **Tax Risk Manager** che è responsabile operativamente del disegno, dell'implementazione e dell'aggiornamento del Modello Tax Control Framework.

5 Rendicontazione Consolidata di Sostenibilità 2024

Teleborsa: distribution and commercial use strictly prohibited

Informazioni generali

La nota metodologica e il perimetro di rendicontazione

BP-1 BP-2

Il Gruppo Terna a partire dall'anno di rendicontazione 2024 predispone la Rendicontazione Consolidata di Sostenibilità 2024 ai sensi del Decreto Legislativo 6 settembre 2024, n. 125 (il "Decreto"), che recepisce nell'ordinamento nazionale le disposizioni della Direttiva (UE) 2022/2464 Corporate Sustainability Reporting Directive ("CSRD"), in sostituzione di quanto precedentemente previsto in materia di dichiarazione non finanziaria (ex D. Lgs. 254/2016). Si precisa che, nel 2023 il Rapporto di Sostenibilità e la Dichiarazione consolidata di carattere Non Finanziario del Gruppo Terna erano inclusi nell'ambito del Rapporto Integrato.

Nella Rendicontazione Consolidata di Sostenibilità il Gruppo Terna ha l'obiettivo di fornire a tutti gli stakeholder le informazioni rilevanti in materia ESG, al fine di illustrare la strategia adottata, gli impegni e le iniziative messe in campo con riferimento all'anno 2024 (dal 1° gennaio 2024 al 31 dicembre 2024) e alle previsioni relative al medio e lungo termine, garantendo una comunicazione trasparente e strutturata, per consentire ai portatori di interesse la comprensione delle attività svolte dal Gruppo, del suo andamento, dei suoi risultati e degli impatti generati sull'ambiente e sulle persone.

La Rendicontazione Consolidata di Sostenibilità 2024, in linea con quanto previsto dalla Direttiva CSRD, è stata redatta in conformità con gli European Sustainability Reporting Standards (ESRS)[64] emanati dall'European Financial Reporting Advisory Group (EFRAG) e include nella sezione "Informazioni ambientali" le informazioni richieste ai sensi dell'Articolo 8 della Tassonomia UE e dei relativi atti delegati.

Perimetro di consolidamento

La Rendicontazione Consolidata di Sostenibilità 2024 è stata redatta su base consolidata con il medesimo perimetro di consolidamento applicato nella predisposizione del bilancio consolidato del Gruppo Terna. In particolare, le informazioni sono riferibili alla Capogruppo Terna S.p.A. e alle società controllate consolidate con il metodo integrale nel bilancio consolidato al 31 dicembre 2024, ovvero sulle quali la Capogruppo esercita un controllo[65], così come definito dall'IFRS10, nell'ambito del quale non rientrano le società collegate e a controllo congiunto che sono pertanto consolidate con il metodo del patrimonio netto. Per maggiori dettagli in merito alle società controllate e all'area di consolidamento, si rinvia alle informazioni riportate nella "Nota Illustrativa" del Bilancio consolidato.
Tutti i temi ESRS rilevanti sono rendicontati a livello di Gruppo Terna, con eventuali eccezioni riportate puntualmente all'interno dei relativi paragrafi.

Struttura del documento

La Rendicontazione Consolidata di Sostenibilità del Gruppo Terna è stata strutturata, come detto in precedenza, in conformità ai requisiti normativi stabiliti dalla Corporate Sustainability Reporting Directive (CSRD) e dagli European Sustainability Reporting Standards (ESRS), con particolare riferimento all'Appendice D dello Standard ESRS 1. Tale impostazione non solo garantisce trasparenza, coerenza e confrontabilità delle informazioni rendicontate, ma è anche in linea con le raccomandazioni dell'European Securities and Markets Authority (ESMA), che enfatizza l'importanza di una struttura chiara e coerente per facilitare la comprensione e l'accessibilità delle informazioni di sostenibilità da parte degli stakeholder.

[64] Tali standard si applicano per la prima volta con riferimento al 2024 e, pertanto, non è previsto un comparativo riferito al 2023.
[65] Il controllo esiste quando la controllante detiene il potere decisionale sulle entità partecipate, è esposta o ha il diritto ai rendimenti variabili derivanti dal rapporto con le controllate e ha la capacità di esercitare il proprio potere sulle controllate al fine di influenzare tali ritorni.

Teleborsa: distribution and commercial use strictly prohibited

La Rendicontazione Consolidata di Sostenibilità, dunque, è articolata in quattro sezioni fondamentali, ognuna delle quali risponde alle prescrizioni normative e agli orientamenti metodologici definiti dagli ESRS:

- Informazioni generali: la prima sezione fornisce un quadro introduttivo della Rendicontazione Consolidata di Sostenibilità, descrivendo il perimetro di applicazione, le entità incluse o i criteri metodologici adottati per l'elaborazione del report. Sono altresì riportate le informazioni richieste dall'ESRS 2, che comprendono la governance della sostenibilità, il rapporto del Gruppo Terna con i suoi stakeholder e il sistema di remunerazione. Inoltre, viene dettagliato il processo di Analisi di Doppia Rilevanza, elemento cardine di questa tipologia di rendicontazione, che permette di identificare le tematiche rilevanti in termini ambientali, sociali e di governance, al fine di guidare la rendicontazione dei contenuti.
- Informazioni ambientali: la seconda sezione si focalizza sugli aspetti ambientali della sostenibilità, conformemente agli ESRS della categoria "E" (Environmental). Sono rendicontate le informazioni relative alle seguenti tematiche rilevanti:
  - Tassonomia UE;
  - Cambiamenti climatici (ESRS E1);
  - Biodiversità ed ecosistemi (ESRS E4);
  - Economia circolare e uso delle risorse (ESRS E5);
  - Qualità, sicurezza e continuità del servizio elettrico (Terna entity specific).
- Informazioni sociali: la terza sezione affronta le questioni sociali, secondo gli ESRS della categoria "S" (Social), e include:
  - Forza lavoro (ESRS S1);
  - Lavoratori nella catena del valore (ESRS S2);
  - Comunità locali (ESRS S3);
  - Clienti (ESRS S4).
- Informazioni di governance: l'ultima sezione è dedicata alla governance della sostenibilità e alla condotta aziendale, in linea con gli ESRS della categoria "G" (Governance). Vengono trattati i seguenti temi rilevanti:
  - Condotta dell'impresa e gestione dei rapporti con i fornitori (ESRS G1);
  - Innovazione e digitalizzazione (Terna entity specific);
  - Cyber Security (Terna entity specific).

Al fine di rendere maggiormente fruibile il documento, ogni sezione dello stesso finalizzata alla copertura di uno o più obblighi di informativa ESRS, presenta in apertura una taggatura riportante il relativo codice. Infine, si specifica che, nell'ambito delle suddette sezioni, in linea con la struttura degli standard al fine di rappresentare al meglio le informazioni da rendicontare, il Gruppo Terna ha scelto di presentare le politiche, i target e le metriche adottate rispetto al tema di riferimento (es. cambiamenti climatici, forza lavoro propria, ecc.); mentre le azioni sono state organizzate guardando al relativo sottotema (es. adattamento e mitigazione ai cambiamenti climatici, condizioni di lavoro, ecc.)[66]. Infine, si segnala che sono state incluse, su base volontaria, all'interno della Rendicontazione Consolidata di Sostenibilità, delle informazioni che non rispondono a degli specifici obblighi di informativa ma che risultano necessarie al fine di fornire ai propri stakeholder una panoramica più chiara e completa degli impegni che il Gruppo Terna ha intrapreso in materia di sostenibilità. Di seguito il dettaglio puntuale delle stesse:

- informazioni di sintesi riguardo i canali di ascolto e comunicazione adottati dal Gruppo per rafforzare il dialogo con i propri stakeholder, rendicontate nell'ambito del capitolo "Informazioni generali", nella sezione "Il rapporto con gli stakeholder" (pag. 175-178);

[66] Rispetto alle informazioni relative alle Azioni e agli Obiettivi si segnala che in taluni casi si cita il cosiddetto "perimetro elettrico" facendo riferimento alle società Terna S.p.A., Rete S.r.l., Terna Rete Italia S.p.A., Terna Plus S.r.l. e Terna Energy Solutions S.r.l.. Inoltre, si specifica che le azioni che il Gruppo ha intrapreso al fine di gestire gli IRO risultati come rilevanti e di cui si è fornita opportuna evidenza nell'ambito delle informazioni tematiche, sono state intraprese e concluse nel corso dell'anno 2024, salvo specifiche eccezioni opportunamente segnalate.

Teleborsa: distribution and commercial use strictly prohibited

- informazioni che contestualizzano il sistema di Corporate Governance del Gruppo Terna, rendicontate nell'ambito del capitolo "Informazioni generali", nella sezione "La Corporate Governance e il successo sostenibile" (pag. 204);
- informazioni che contestualizzano il percorso di decarbonizzazione intrapreso dal Gruppo e le attività di gestione del gas SF_6 e di decarbonizzazione del mix energetico nazionale italiano, rendicontate nell'ambito del capitolo "Informazioni ambientali", nella sezione "Cambiamenti climatici" (pag. 232, 239, 240);
- informazioni che contestualizzano le azioni che il Gruppo Terna ha intrapreso con riferimento al tema della Cyber Security, rendicontate nell'ambito del capitolo "Informazioni di governance", nella sezione "Cyber Security" (pag. 356).

Nell'ambito della Rendicontazione Consolidata di Sostenibilità 2024, il Gruppo Terna ha fornito l'attuale configurazione della propria catena del valore, descrivendo gli attori a monte e a valle che la costituiscono e includendo, ove possibile, informazioni di dettaglio con riferimento agli stessi.

A tal proposito, si specifica che, nello svolgimento dell'analisi di doppia rilevanza degli impatti, rischi e opportunità (IRO), è stata indicata l'eventuale ricaduta sulla catena del valore (cfr. "Obbligo di informativa SBM-3 – Impatti, rischi e opportunità rilevanti e loro interazione con la strategia e il modello aziendale).

Con riferimento alle metriche, si segnala che il numero di decessi dovuti a lesioni e malattie connesse al lavoro per i lavoratori nella catena del valore, il calcolo delle emissioni di gas effetto serra (GES) scope 3, il numero di denunce presentate attraverso i canali predisposti dall'impresa e i casi di inosservanza dei Principi Guida delle Nazioni Unite su imprese e diritti umani considerano nella raccolta delle informazioni anche la catena del valore.

Con riferimento alla catena del valore si segnala, inoltre, che la mappatura, in termini di analisi di contesto (svolta a livello di analisi settoriale), ha considerato oltre ai fornitori diretti anche i subfornitori (tier 2). Più nello specifico, guardando alla disponibilità delle informazioni, i contenuti della Rendicontazione Consolidata di Sostenibilità 2024 si riferiscono ai fornitori di tipo diretto (tier 1). Anche allo scopo di rafforzare il presidio delle informazioni riferite alla catena del valore del Gruppo, si segnala che l'aggiornamento di Piano di sostenibilità 2024-2028 prevede un insieme di azioni che riguardano, da un lato, l'aggiornamento della mappatura dei comparti anche in ottica di allineamento progressivo alla Corporate Sustainability Due Diligence Directive e, dall'altro, l'implementazione degli step propedeutici all'adozione di un Science based target for nature (tra cui rientra anche la conclusione della fase di value chain assessment).

Nella Rendicontazione Consolidata di Sostenibilità 2024 il Gruppo Terna non si è avvalso dell'opzione di omettere specifiche informazioni riguardo brevetti, proprietà intellettuali, know-how o risultati dell'innovazione.

Il Gruppo Terna non si è avvalso dell'esenzione di comunicare al mercato informazioni concernenti gli sviluppi imminenti o le questioni oggetto di negoziazione, che possono influenzare il mercato o i suoi azionisti, come ad esempio novità finanziarie, modifiche sostanziali o altre questioni che sono in fase di negoziazione o sviluppo e che sono in corso di definizione.

Orizzonti temporali

Gli impatti, i rischi e le opportunità materiali del Gruppo sono stati valutati nel breve, medio e lungo termine. Questi orizzonti temporali, pur discostandosi da quanto disposto dall'ESRS 1 - 6.4 "Definizione di breve, medio e lungo periodo ai fini della rendicontazione", sono allineati al percorso strategico del Gruppo Terna, permettendo di valutare le informazioni rendicontate confrontando le stesse con quanto disposto dall'Aggiornamento del Piano Industriale 2024-2028 di Terna.

Gli orizzonti temporali sono, dunque, definiti come di seguito:

- breve periodo: 1 anno;
- medio periodo: dalla fine del periodo di riferimento di breve periodo fino alla conclusione del periodo di riferimento del Piano Industriale 2024-2028[67];
- lungo periodo: oltre l'orizzonte temporale di Piano.

[67] Nell'ambito nel documento si fa riferimento al Piano Industriale 2024-2028 approvato a marzo 2024 e al relativo aggiornamento, approvato a marzo 2025.

Teleborsa: distribution and commercial use strictly prohibited

Risorse finanziarie esposte e collegamento al Bilancio Consolidato

Il Gruppo Terna espone l'ammontare delle spese operative (OpEx) e spese in conto capitale (CapEx) riferibili all'anno 2024 nell'ambito delle aree tematiche che compongono il presente documento ove disponibili e significative, ovvero solo qualora queste siano superiori a una certa soglia di rilevanza del valore del patrimonio netto di Gruppo.
Si precisa che in merito all'impiego delle risorse finanziarie future associate alle medesime azioni, queste sono allineate agli importi previsti da Piano Industriale 2024-2028. Dunque, non sono esposte ulteriori spese di dettaglio, tenuto conto tra l'altro che la distribuzione delle risorse può subire variazioni in base alle dinamiche di mercato, agli sviluppi normativi e agli esiti delle valutazioni interne, inclusa l'analisi di doppia rilevanza.

Utilizzo di stime

Il Gruppo è ricorso all'utilizzo di stime per le metriche di performance all'E1-5 per i consumi indiretti di energia elettrica e l'E1-6 relative emissioni scope 2. Per il dettaglio circa le cause di incertezza e le ipotesi formulate, si rimanda al capitolo "Informazioni ambientali", in particolare alla sezione "Cambiamenti climatici - Le metriche legate ai cambiamenti climatici". Inoltre, le stime sono state effettuate relativamente ai flussi di risorse in entrata e ai rifiuti. Per il dettaglio circa le cause di incertezza e le ipotesi formulate, si rimanda al capitolo "Informazioni ambientali", in particolare alla sezione "Promozione dell'economia circolare - Le metriche relative alla promozione dell'economia circolare". Ulteriori specifiche in merito sono opportunamente trattate nei relativi paragrafi. Infine, con riferimento alla catena del valore, le stime sono state applicate per la determinazione di talune categorie di Scope 3.

Al fine di migliorare continuamente l'accuratezza rappresentativa, il Gruppo Terna si impegna ad aggiornare con cadenza periodica le metodologie e i dati alla base del computo delle metriche rendicontate.

Inoltre la rendicontazione delle informazioni prospettiche, quali i target e gli obiettivi futuri, potrebbero subire variazioni in base alle dinamiche di mercato e di contesto, agli sviluppi normativi e agli esiti delle valutazioni interne.

Informazioni incluse mediante riferimento

In relazione alle informazioni incluse mediante riferimento il Gruppo fornisce opportuna evidenza della sezione della Rendicontazione Consolidata di Sostenibilità e/o della Relazione sulla Gestione cui si rimanda. Per ulteriori dettagli, si prega di prendere visione della tabella "L'indice dei contenuti ESRS" nella sezione "Informazioni generali".

Disposizioni transitorie (phase-in)

Il Gruppo ha deciso di usufruire delle disposizioni di introduzione graduale elencate nell'Appendice C dell'ESRS 1 applicabili e di quelle previste anche con riferimento alla catena del valore, a eccezione delle richieste relative di seguito riportate, che ha valutato di includere già da quest'anno all'interno del documento: S1-7 "Caratteristiche dei lavoratori non dipendenti nella forza lavoro propria dell'impresa"; S1-8 "Copertura della contrattazione collettiva e dialogo sociale per i dipendenti nei Paesi non SEE"; S1-11 "Protezione sociale"; S1-12 "Percentuale di dipendenti con disabilità"; S1-13 "Metriche di formazione e sviluppo delle competenze"; S1-14 "Casi di malattia professionale e numero di giorni persi"; S1-15 "Equilibrio tra vita professionale e vita privata".

Il rapporto con gli stakeholder

Gli stakeholder del Gruppo

In coerenza con i valori di integrità e trasparenza espressi nel Codice Etico, l'attenzione attribuita dal Gruppo alle istanze e alla raccolta delle aspettative di tutti coloro che, a vario titolo, hanno un rapporto con esso (di seguito gli stakeholder[55]), soprattutto in termini di impatti riferibili ai temi di sostenibilità, si traduce nell'impegno costante a instaurare occasioni di **ingaggio e di ascolto periodico** e nel garantire l'**accessibilità ai canali** adibiti per reclami e segnalazioni. Questo anche al fine di agevolare la creazione e il consolidamento di relazioni ottimali considerando gli interessi dei propri stakeholder e analizzandone la compatibilità con gli obiettivi di business. A questo scopo il Gruppo aggiorna periodicamente la mappatura dei suoi stakeholder attraverso le modalità definite da una linea guida dedicata "Modello di gestione degli stakeholder".

Nello specifico i vari stakeholder, caratterizzati secondo i criteri di influenza e dipendenza nei confronti del Gruppo, sono raggruppati nelle categorie di stakeholder principali di seguito riportate, per le quali vengono riportate anche le principali attività di engagement:

- **Decisori dell'attività in concessione:** confronto periodico con l'ARERA, e con il Ministero dell'Ambiente e della Sicurezza Energetica;
- **Azionisti:** sezione "Investitori" del sito costantemente aggiornata e disponibilità di canali di ascolto ed e-mail;
- **Finanziatori:** incontri con le agenzie di rating in occasione dei management meeting;
- **Business partner:** accordi e partnership con grandi corporate, enti, istituti di ricerca nazionali e internazionali e Università;
- **Clienti:** coinvolgimento attivo dei clienti nelle diverse fasi di progettazione degli impianti e/o dei prodotti, per il dettaglio si rimanda al paragrafo "Il processo di coinvolgimento dei clienti";
- **Collettività:** sostegno a progetti in favore della collettività, sponsorizzazioni e liberalità;
- **Comunità locali:** coinvolgimento e ascolto delle comunità locali a livello istituzionale e diretto con i cittadini, per il dettaglio si rimanda al paragrafo "Il processo di coinvolgimento delle comunità locali";
- **Istituzioni e organizzazioni:** dialogo continuativo con le Istituzioni per valorizzare le competenze di Terna e partecipazione attiva ai lavori delle principali organizzazioni di riferimento nazionali e internazionali;
- **Fornitori:** coinvolgimento e ascolto tramite diversi canali di comunicazione con Terna, per il dettaglio si rimanda al paragrafo "Canali di ascolto e comunicazione";
- **Media e opinion maker:** canali di ascolto e comunicazione, diversificati per tipologia di pubblico, linguaggio e finalità;
- **Operatori del servizio elettrico:** costanti iniziative di confronto con gli operatori del settore elettrico, per il dettaglio si rimanda al paragrafo "Canali di ascolto e comunicazione";
- **Persone dell'organizzazione:** Iniziative di ascolto (survey online, focus group e iniziative di comunicazione interna), e di sensibilizzazione (es. Programma "Eccellenza in Sicurezza"), per il dettaglio si rimanda al paragrafo "Il processo di coinvolgimento della forza lavoro di Terna".

L'attività di stakeholder engagement di Terna è finalizzata a comunicare il valore ESG del Gruppo, rafforzando la fiducia e garantendo trasparenza nelle proprie attività, migliorando la qualità dei servizi offerti in un'ottica inclusiva e sostenibile. Mira a coinvolgere e valorizzare il personale, promuovendo il merito, la parità di genere e lo sviluppo dei talenti, e a integrare i principi ESG lungo la catena di fornitura. Attraverso un dialogo costante con le istituzioni, Terna, inoltre, favorisce l'inclusione sociale, la transizione energetica e la digitalizzazione, contribuendo al benessere delle comunità e allo sviluppo sostenibile del sistema elettrico nazionale.

[55] Termine anglosassone per indicare i portatori di interesse ovvero persone fisiche e/o organizzazioni che possono influenzare e/o essere influenzate dalle attività della Società.

623

Teleborsa: distribution and commercial use strictly prohibited

Alle attività di stakeholder engagement sopra menzionate, infatti, si affiancano anche i momenti di confronto periodici portati avanti nel contesto dell'analisi di Doppia Rilevanza e dell'aggiornamento del Modello di gestione degli stakeholder, con lo scopo di raccogliere opinioni e interessi attraverso un processo di engagement mirato a individuare le tematiche di sostenibilità più significative. Questo approccio consente di percepire tempestivamente le aspettative anche in relazione a trend e/o questioni emergenti legati ai temi di sostenibilità, fornendo al Gruppo le informazioni necessarie per una corretta gestione dei propri impatti, rischi e opportunità. Gli esiti del processo dell'Analisi di Doppia Rilevanza, dunque, influenzano le scelte strategiche del Gruppo, orientando la pianificazione di sostenibilità, integrata nella pianificazione industriale, e la gestione delle attività.

In linea generale, tutte le attività di stakeholder engagement sopra descritte dimostrano come il Gruppo integri gli interessi e le aspettative dei propri stakeholder nella definizione della strategia e del modello di business, assicurando un allineamento con le tematiche di sostenibilità più rilevanti.

Anche da un punto di vista metodologico, l'ingaggio di funzioni interne, esperti, opinion leader e stakeholder fruitori dei report supporta il Gruppo sia a valutare la materialità di impatti, rischi e opportunità, sia a validare e assicurare la completezza delle analisi svolte. I risultati di questa attività contribuiscono in modo determinante all'analisi di Doppia Rilevanza[69].

Nello specifico, nell'ambito del processo di Doppia Rilevanza condotto nel 2024 in applicazione del primo esercizio in conformità con i requisiti introdotti dalla Corporate Sustainability Reporting Directive, il coinvolgimento esterno ha previsto un questionario verso gli esperti di sostenibilità (includendo anche i rappresentanti dei principali TSO europei). Il coinvolgimento interno ha invece interessato le principali funzioni del Gruppo per l'identificazione e la valutazione delle questioni di sostenibilità, anche come proxy delle aspettative/esigenze delle rispettive categorie di stakeholder rappresentate.

I risultati del coinvolgimento dei portatori di interesse sono stati considerati nell'ambito della materialità d'impatto ai fini dell'individuazione degli impatti materiali per il Gruppo Terna, fornendo elementi chiave ed evidenze utili a guidare le scelte strategiche, formalizzate nel Piano di Sostenibilità.

Canali di ascolto e comunicazione

Il primo passo per favorire una maggiore interlocuzione con tutti gli stakeholder, ma anche la conoscenza del sistema elettrico e la diffusione di una cultura energetica, corrisponde alla definizione e adozione di vari **canali di ascolto e comunicazione**, diversificati per tipologia di pubblico, linguaggio e finalità (es. richieste di informazioni, suggerimenti, segnalazioni e reclami).

Il canale più diretto per entrare in contatto con Terna, accessibile dal sito www.terna.it (e, nel caso di tematiche interne, anche dalla intranet) è l'e-mail, diversificata per tema[70]. In particolare, nell'homepage del sito, sono presenti la voce **Contatti**, che orienta chi vuole entrare in relazione con la Società, e gli indirizzi di Posta Elettronica Certificata (PEC) per tutte le comunicazioni che richiedono tale requisito.

Come detto in precedenza, gli operatori del servizio elettrico e i fornitori – già contrattualizzati e potenziali – possono interagire con Terna attraverso diversi **portali dedicati**, accessibili anche dall'homepage del sito istituzionale di Terna. Di seguito si riporta una panoramica sintetica degli stessi, suddivisi per Portali con dati e informazioni sul sistema elettrico e portali messi a disposizione dal Gruppo ai propri fornitori:

[69] A partire dall'aggiornamento 2024, condotta in conformità agli standard ESRS 2 IRO-1.
[70] Ad esempio: azionisti.retail@terna.it; investor.relations@terna.it; sostenibilita@terna.it; ufficio.stampa@terna.it; etc.

Teleborsa: distribution and commercial use strictly prohibited

Portali con dati e informazioni sul sistema elettrico

- **Portale GAUDI:** accessibile a produttori, distributori, utenti del dispacciamento, ARERA e GSE, tale portale è stato realizzato al fine di razionalizzare i flussi informativi tra i vari soggetti operanti nel settore della produzione di energia elettrica.
- **T.E.R.R.A.:** piattaforma digitale integrata, online da giugno 2024, che Terna ha messo a disposizione di amministratori nazionali e locali, legislatori e soggetti proponenti per la consultazione di informazioni strategiche e rilevanti su Territorio, Reti, Rinnovabili e Accumuli.
- **Portale Dati:** piattaforma digitale integrata con tutti i dati di esercizio e statistici del sistema elettrico nazionale e di mercato, e per la prima volta anche quelli sui sistemi di accumulo.
- **MyTerna:** portale web dedicato ai referenti commerciali che consente di interagire direttamente con Terna, offrendo ad esempio, la possibilità di richiedere la connessione alla RTN, la gestione dei contratti, l'aggiornamento e la gestione della propria anagrafica.

Portali per i fornitori

- **Portale Acquisti:** attraverso il quale i fornitori (potenziali e non) possono conoscere le opportunità di business e i relativi bandi di gara, e partecipare a gare online.
- **Portale Qualificazione:** dedicato a tutti gli Operatori Economici che desiderano effettuare il procedimento di qualificazione per accedere all'Albo dei fornitori.

ALTRI PORTALI

Dall'homepage del sito www.terna.it è possibile accedere a ulteriori portali, tra cui: **Cantieri aperti & trasparenti**, **Terna Developer**, **Whistleblowing**, **Lightbox** (il web magazine con cui Terna racconta il processo di trasformazione del sistema energetico).

Il Gruppo Terna rafforza il dialogo con i propri stakeholder attraverso una strategia di comunicazione digitale integrata, valorizzando i canali social, le piattaforme audio e l'app aziendale. Nel 2024, la community online è cresciuta del 18%, con un aumento significativo delle visualizzazioni dei contenuti (+52%) e del coinvolgimento degli utenti (+67%). In particolare, il profilo TikTok ha raggiunto 84 milioni di visualizzazioni video, fidelizzando oltre 67.000 follower (+23%), avvicinando così i giovani e gli appassionati di discipline STEM.

Il Gruppo, inoltre, ha ampliato la propria presenza anche su Spotify e Spreaker, con la seconda stagione del podcast Nora, ritorno al futuro dell'energia, che racconta le sfide della twin transition con uno stile narrativo innovativo. Lanciato con una campagna interattiva su Instagram e TikTok, il podcast ha coinvolto la Generazione Z, con Sofia Viscardi come voce narrante.

L'app Terna, con oltre 19.600 utenti attivi nel 2024, offre un accesso in tempo reale ai dati del Sistema Elettrico Nazionale, al monitoraggio del risparmio di CO_2 e al Piano di Sviluppo 2025, rendendo disponibili informazioni strategiche e documenti multimediali.

Infine, attraverso progetti innovativi di data sharing come Terna4Green, il Gruppo promuove un'informazione trasparente sull'evoluzione del sistema elettrico e sul percorso di decarbonizzazione dell'Italia, rafforzando la propria corporate identity e reputation.

625

Teleborsa: distribution and commercial use strictly prohibited

Networking

Le relazioni con alcuni stakeholder, in particolare quelle con gli operatori di settore, si alimentano e si rafforzano anche attraverso la partecipazione attiva ai lavori delle principali organizzazioni di riferimento nazionali e internazionali, cui il Gruppo è associato.

Presenza attiva in associazioni internazionali

- **ENTSO-E (European Network of Transmission System Operators for Energy):** associazione che riunisce 40 operatori di sistemi di trasmissione di 36 Paesi europei. Si occupa della sicurezza del sistema elettrico interconnesso, dello sviluppo del mercato dell'elettricità e dell'integrazione delle rinnovabili. Terna è membro del Board dell'associazione.
- **RGI (Renewables Grid Initiative):** associazione che coinvolge 13 gestori di rete di trasmissione europei e 13 ONG ambientali per promuovere l'integrazione delle fonti rinnovabili attraverso lo sviluppo delle reti elettriche. Favorisce la pianificazione strategica e partecipata nella costruzione di nuove infrastrutture elettriche.
- **CIGRE (Conseil International des Grands Réseaux Electriques):** associazione internazionale no-profit dedicata alla ricerca sulle reti elettriche ad alta tensione. Conta oltre 90 Paesi membri, rappresentati da 60 Comitati Nazionali. Terna ricopre la Presidenza e la Vice Presidenza del Comitato Italiano.
- **GO15 (Grid Operator 15):** associazione internazionale che riunisce i 14 maggiori operatori di rete al mondo, al fine di condividere buone prassi sulla gestione delle reti di trasmissione dell'energia elettrica. Terna è presente nello Steering Board e nel Governing Board dell'Associazione.
- **Med-TSO (Mediterranean Transmission System Operators):** associazione che comprende i TSO di 20 Paesi del Mediterraneo, con l'obiettivo di promuovere l'armonizzazione dei Piani di Sviluppo e la gestione coordinata delle reti di trasmissione dell'energia elettrica, e di favorire la realizzazione di un quadro normativo e regolatorio che faciliti lo sviluppo dei progetti di interconnessione e rafforzi gli scambi di energia elettrica tra i sistemi elettrici del Mediterraneo. Terna ospita a Roma la sede dell'associazione e ne esprime il Segretario Generale.
- **RES4Africa Foundation (Renewable Energy Solutions for Africa):** fondazione senza scopo di lucro per la promozione dell'utilizzo delle fonti rinnovabili e della diffusione di misure di efficienza energetica, nonché per il supporto alla creazione di contesti favorevoli agli investimenti in energie rinnovabili nei Paesi del Sud ed Est del Mediterraneo e dell'Africa subsahariana. Ha sede legale a Roma.
- **WEC Italia (World Energy Council - Comitato Italia):** comitato nazionale che aderisce al WEC, organizzazione internazionale che riunisce operatori di oltre 90 Paesi con l'obiettivo di promuovere un sistema di energia sostenibile a livello mondiale. Terna è membro del Consiglio Direttivo.

La partecipazione attiva ad associazioni e a tavoli di lavoro congiunti ha favorito la realizzazione di iniziative internazionali di cui, a seguire, si riporta una sintesi.

626

Teleborsa: distribution and commercial use strictly prohibited

Principali iniziative internazionali dell'anno

Tra le iniziative sviluppate da Terna nel corso del 2024 si segnalano:

- L'inserimento dell'interconnessione elettrica tra Italia e Tunisia tra i progetti pilota del Piano Mattei;
- Lo sviluppo del **Terna Innovation Zone Tunisia**;
- L'organizzazione dell'**Innovation Zone Forum** a San Francisco (28/29.10.2024);
- La prosecuzione di azioni comuni tra TSO per stimolare e orientare l'industria europea verso le sfide della transizione energetica.

Al fine di costruire e gestire al meglio le **relazioni con le Istituzioni europee**, dal 1° luglio 2018 il Gruppo Terna è presente a Bruxelles con un ufficio situato nel quartiere europeo.

L'obiettivo è instaurare un dialogo continuativo con il Parlamento Europeo, la Commissione e la Rappresentanza Permanente per valorizzare l'esperienza e le competenze di Terna.

I principali temi che Terna ha seguito nel corso del 2024 sono identificabili nell'ambito dello *European Green Deal*, e in particolare nel pacchetto *Fit for 55* e dell'*EU Grid Action Plan*, oltre ai programmi europei di finanziamento previsti nel quadro finanziario 2021-2027.

Nel corso del 2024 è proseguita l'altrettanto intensa attività di confronto e collaborazione con le principali organizzazioni di riferimento nazionali e internazionali focalizzate su temi di sostenibilità. Di seguito si porta l'elenco delle organizzazioni cui Terna è associata.

Presenza in associazioni su temi di sostenibilità

Anima per il sociale nei valori dell'impresa: Associazione no profit che raccoglie manager e aziende unite dalla volontà di diffondere sul territorio una cultura imprenditoriale che coniughi profitto con creazione di benessere per la comunità.

Global Compact: La partecipazione di Terna al Global Compact comporta una presenza sia a livello internazionale sia locale. Terna è presente sin dal 2011 nello Steering Committee del network italiano ed è un Socio fondatore della Fondazione Global Compact Network Italia.

Kyoto Club: Organizzazione no profit costituita da imprese, enti, associazioni e amministrazioni locali, impegnati nel raggiungimento degli obiettivi di riduzione delle emissioni di gas serra assunti con il Protocollo di Kyoto e nella promozione di iniziative di sensibilizzazione, informazione e formazione nei campi dell'efficienza energetica, dell'utilizzo delle rinnovabili e della mobilità sostenibile.

Sustainability Makers: Rebranding del CSR Manager Network, è l'associazione di riferimento per professionisti che si occupano di sostenibilità e di responsabilità sociale d'impresa in qualità di manager d'azienda, consulenti e ricercatori.

Transparency International Italia: Capitolo italiano dell'organizzazione internazionale che ha come obiettivo la lotta alla corruzione (si veda anche pagg. 341-345) che promuove il **Business Integrity Forum (BIF)**, una iniziativa rivolta alle grandi imprese italiane per aumentare la trasparenza, l'integrità e la responsabilità del settore economico del nostro Paese attraverso la loro collaborazione.

Valore D: È la prima associazione di imprese in Italia che si impegna per l'equilibrio di genere e per una cultura inclusiva nelle organizzazioni.

La Doppia Rilevanza

IRO-1
SBM-3

L'Analisi di Doppia Rilevanza, oltre a orientare la Rendicontazione Consolidata di Sostenibilità, rappresenta per il Gruppo un fondamentale strumento di analisi che guida l'aggiornamento del Piano di sostenibilità così come le attività portate avanti ogni giorno.

Gli impatti, i rischi e le opportunità rilevanti rappresentati in questo paragrafo derivano dall'analisi di Doppia Rilevanza condotta nel 2024, che incorpora le novità introdotte dal D. Lgs. 125/2024, il decreto legislativo che recepisce la CSRD nell'ordinamento italiano. Per conformarsi alle disposizioni della CSRD e del D. Lgs. 125/2024, il Gruppo Terna ha sviluppato un processo di analisi in linea con i requisiti della nuova normativa, integrando le linee guida previste dagli standard di rendicontazione ESRS[71].

Il processo di Doppia Rilevanza

Il Gruppo Terna, in linea con le indicazioni dei nuovi standard applicati, a partire dall'analisi di Doppia Rilevanza 2024[72], ha previsto un processo ripartito nelle seguenti fasi:

- **Analisi del contesto:** comprensione del contesto interno ed esterno del Gruppo Terna in relazione alle attività e relazioni di business e al contesto normativo e mappatura della Catena del valore;
- **Individuazione Impatti, Rischi e Opportunità (IRO):** aggiornamento dell'albero dei temi di sostenibilità secondo quanto indicato dalle Linee Guida e dagli Standard ESRS e l'individuazione degli impatti, rischi e opportunità, attuali e potenziali, connessi a tali tematiche;
- **Valutazione degli IRO:** valutazione di impatti, rischi e opportunità attraverso il coinvolgimento di stakeholder esperti interni ed esterni;
- **Determinazione degli IRO rilevanti,** attraverso l'elaborazione dei risultati e l'individuazione di soglie di materialità.

La prima fase del processo ha previsto un'analisi di documenti normativi relativi al settore del Gruppo, congiuntamente a documenti interni ed esterni caratteristici dei trend di sostenibilità maggiormente rappresentativi per l'ambito di business, prendendo anche in considerazione un confronto rispetto ai principali peers e player del settore. È stata inoltre analizzata la catena del valore del Gruppo al fine di mapparne le principali fasi e i principali stakeholder impattati, tramite lo studio di fonti documentali per approfondire il modello di business di Terna e delle società controllate all'interno del perimetro di rendicontazione.

In particolare, i principali **elementi di input** impiegati nell'ambito dell'analisi hanno riguardato:

- attività e rapporti commerciali del Gruppo, attraverso uno studio delle principali fonti documentali del Gruppo Terna relative alle strategie, attività e relazioni di business significative, quali: Piano di sviluppo 2023, Piano industriale 2024-2028, Rapporto Integrato 2023, Piano di sostenibilità 2024-2028;
- mappatura della catena del valore, al fine di identificare e comprendere le aree chiave dove il Gruppo genera o può generare impatti, rischi e opportunità relativamente alle tematiche di sostenibilità, condotta partendo da un'analisi del modello di business del Gruppo, attraverso l'esame della documentazione disponibile e momenti di confronto con le funzioni interne di riferimento. Per maggiori dettagli circa la stessa, si rimanda al paragrafo "La catena del valore del Gruppo Terna" nell'ambito della sezione "Il processo di creazione del valore" della Relazione sulla Gestione;
- ulteriori informazioni contestuali, come la mappatura del contesto normativo in cui l'Azienda opera;
- benchmark di settore, prendendo in considerazione i player del settore energetico e i peers del Gruppo;
- documenti esterni nazionali e internazionali del settore, quali, a titolo esemplificativo e non esaustivo: ERM - 2024 Annual Trends Report - The Next Steps for Sustainable Businesses; MSCI - ESG and Climate Trends to Watch for 2024; S&P Global - Key sustainability trends that will drive decision-making in 2024; ARERA - Quadro Strategico 2022-2025; The TNFD Nature-Related Risk and Opportunity Management and Disclosure Framework;

[71] L'approccio metodologico adottato si è basato sulle indicazioni dell'EFRAG contenute nelle Linee guida "EFRAG IG 1: Materiality Assessment Implementation Guidance" e "EFRAG IG 2: Value Chain Implementation Guidance".
[72] In coerenza con l'approccio metodologico indicato all'interno delle Implementation Guidance "EFRAG IG 1: Materiality Assessment Implementation Guidance" (in breve, EFRAG IG 1).

628

Teleborsa: distribution and commercial use strictly prohibited

- Modello di Gestione degli stakeholder interno del Gruppo (aggiornato nel corso del 2023) ai fini dell'identificazione degli "affected stakeholder", ovvero gli individui o gruppi i cui interessi sono o potrebbero essere influenzati – positivamente o negativamente – dalle attività dell'impresa e dalle sue relazioni commerciali dirette e indirette lungo la sua catena del valore;
- momenti di confronto con i referenti delle Società controllate interne al perimetro di rendicontazione, supportati da un'analisi di contesto interno ed esterno, ai fini dell'identificazione dei temi di sostenibilità potenzialmente rilevanti per il Gruppo.

Con riferimento alla mappatura della catena del valore, l'attività ha previsto anche il coinvolgimento dei referenti delle principali società controllate in perimetro, nel corso del quale è stata illustrata l'ipotesi di mappatura elaborata, al fine di arricchirla e integrarla con i dettagli relativi alle peculiarità delle singole società, con l'obiettivo di sviluppare una mappatura rappresentativa delle attività svolte complessivamente dal Gruppo. Infine, per ciascuna fase della catena del valore sono stati identificati gli attori chiave tenendo conto della mappa di dettaglio delle categorie di stakeholder del Gruppo in linea con il Modello di Gestione degli Stakeholder.

L'analisi del contesto ha fornito gli elementi necessari per procedere all'elaborazione di una lista di impatti positivi e negativi, associando a ciascuno le fasi e gli attori della catena del valore. Per ciascun tema, sottotema e sotto-sottotema ESRS[73] associabile alle attività del Gruppo e alla sua catena del valore sono stati quindi identificati dei possibili impatti.

La lista degli impatti è stata valutata attraverso il **coinvolgimento** delle principali **funzioni interne** competenti per area tematica e i referenti delle Società controllate, tramite interviste e Focus Group dedicati. A livello esterno il coinvolgimento ha previsto la somministrazione di una survey verso una selezione di **esperti di sostenibilità** e dei referenti dei principali **gestori delle reti di trasmissione europee.**

Il processo di valutazione degli impatti è stato condotto secondo i parametri specifici stabiliti dall'EFRAG e le relative modifiche di calcolo in base alla positività o alla negatività dell'impatto considerato. In particolare, per quanto riguarda la valutazione sulla materialità d'impatto, con riferimento agli impatti negativi effettivi, la rilevanza è stata valutata in base alla gravità dell'impatto, mentre per gli impatti negativi potenziali, oltre alla gravità si è presa in considerazione anche la probabilità[74]. Con riferimento agli impatti positivi, la rilevanza è stata valutata in base ai fattori di entità e portata, per quanto riguarda gli impatti effettivi; e di entità, portata e probabilità per quanto riguarda gli impatti potenziali.

Le valutazioni attribuite sono state ricondotte a un punteggio di impatto in una scala da 1 a 5, ed è stata identificata una soglia di materialità. La determinazione della soglia si è basata sulla distribuzione dei valori ottenuti dalle valutazioni con particolare riferimento a media e mediana dei punteggi emersi dal coinvolgimento interno ed esterno, nell'ottica di garantire il massimo livello di trasparenza e di inclusività. Ciò ha portato all'identificazione di 34 impatti materiali.

Il processo di monitoraggio degli impatti è garantito attraverso gli strumenti di rendicontazione adottati dal Gruppo Terna e attraverso il monitoraggio trimestrale di KPI e target inclusi nel Piano di Sostenibilità 2024-2028, aggiornato tenendo conto dei principali esiti della Doppia Rilevanza 2024.

Il processo di **analisi dei rischi** legati alle questioni di sostenibilità ha seguito negli anni un **progressivo allineamento** con l'analisi dei rischi di Gruppo, facendo leva sulle metodologie consolidate nell'ambito del **modello di Risk Governance** adottato. Per il 2024, al fine di garantire coerenza con i processi di Risk Analysis già in essere, è stato evoluto ulteriormente il processo di allineamento tra l'analisi dei rischi e i temi, integrando i risultati del Risk Assessment di Gruppo con le metodologie previste dagli ESRS e dalle linee guida dell'EFRAG.

In particolare, l'analisi dei rischi di Gruppo è guidata dai principali obiettivi strategici del Piano Industriale, inclusi quelli di sostenibilità e dai fattori chiave per la creazione di valore aziendale, e viene anche arricchita dai contributi derivanti dalle analisi specifiche condotte dalle funzioni di controllo nelle rispettive aree di specifica responsabilità, al fine di garantire una visione organica d'insieme del profilo di rischio del Gruppo. Il processo di analisi e gestione dei rischi garantisce coerenza con l'analisi di Doppia Rilevanza prevedendo allineamenti e scambi informativi durante tutto il periodo di elaborazione delle due analisi.

Con riferimento all'analisi di Doppia Rilevanza 2024, il processo ha previsto una prima fase di correlazione tra i rischi censiti nell'ambito del Risk Assessment 2023-2024 e temi, sottotemi e sotto-sottotemi ESRS, includendo anche l'associazione alle

[73] Secondo la lista riportata dall'Appendice A, RA 16 dello standard ESRS 1.
[74] La gravità si è basata sui seguenti fattori: i) entità; ii) portata; e iii) rimediabilità dell'impatto. Nel caso di un potenziale impatto negativo sui diritti umani, la gravità dell'impatto è prevalsa sulla sua probabilità.

629

Teleborsa: distribution and commercial use strictly prohibited

fasi della catena del valore. Si è poi proceduto a una riconduzione dei risultati emersi dall'aggiornamento del Risk Assessment 2024-2025 con i parametri previsti dagli standard ESRS[75]. Tale analisi ha portato alla determinazione di 12 rischi materiali.

Per quanto riguarda le **opportunità**, il processo di individuazione, valutazione e gestione delle opportunità ESG è integrato nel processo di pianificazione pluriennale del Gruppo attraverso il Piano di Sostenibilità. A partire dall'edizione 2024-2028, il Gruppo Terna ha infatti integrato gli **obiettivi di sostenibilità** all'interno del proprio Piano Industriale.

Con riferimento all'identificazione e la valutazione delle opportunità, nel contesto dell'analisi di Doppia Rilevanza 2024, è stata svolta un'analisi preliminare prendendo in considerazione la documentazione strategica (es. Piano Industriale 2024-2028, Piano di sostenibilità 2024-2028) e altri documenti nei quali sono illustrati gli obiettivi dell'Azienda (Politica di sostenibilità; Rapporto Integrato 2023).

L'analisi ha portato all'identificazione di una lista estesa di opportunità che è stata sottoposta alla valutazione delle funzioni interne competenti, anche al fine di affinarne le descrizioni e integrare l'elenco proposto. L'attribuzione dei punteggi ha preso in considerazione i parametri definiti dagli standard ESRS, tenendo conto dei due criteri di probabilità e magnitudo potenziale. Per questo primo anno di rendicontazione in conformità con la CSRD, la valutazione è stata effettuata prendendo in considerazione parametri qualitativi. Le valutazioni attribuite sono state ricondotte a un punteggio aggregato su una scala da 1 a 5, applicando la stessa soglia utilizzata per la materialità d'impatto. Complessivamente sono emerse 14 opportunità rilevanti.

L'analisi di rischi e opportunità ha preso in considerazione il possibile collegamento con gli impatti generati e l'eventuale rilevamento di dipendenze dell'organizzazione, indagando le potenziali concatenazioni identificate anche sulla base dell'analisi di fonti documentali quali, ad esempio, il Piano Industriale 2024-2028 e le linee guida settoriali della Task Force on Nature-related Financial Disclosures (TNFD).

Il processo di Doppia Rilevanza è affidato alla **funzione Sostenibilità** che si occupa dell'aggiornamento periodico dell'analisi. In particolare, al fine di garantire la robustezza del processo in questo primo anno di applicazione della CSRD, la verifica della corretta applicazione delle Linee guida EFRAG e delle richieste definite dallo standard ESRS 2 è stata oggetto di un confronto con un Gruppo di lavoro con i principali TSO europei ed è inoltre stata sottoposta a un'ulteriore valutazione esterna da parte di specialisti con l'obiettivo di assicurarne la corretta interpretazione.

Gli esiti finali dell'aggiornamento sono condivisi con la **Direzione Strategia, Digitale e Sostenibilità** e, come previsto dalla prassi aziendale, le principali evidenze che esprimono anche gli esiti delle attività di coinvolgimento degli stakeholder sono riportati al **Comitato del Consiglio di Amministrazione Sostenibilità, Governance e Scenari**.

Nel corso dell'analisi 2024 le attività hanno previsto un aggiornamento progressivo, fino alla condivisione degli esiti finali del processo a conclusione dell'analisi. La condivisione dei risultati dell'attività, oltre alla rappresentazione sintetica dei temi materiali; delle fasi della catena del valore a essi associati e degli impatti, i rischi e le opportunità rilevanti, ha previsto un'illustrazione di ciascuna fase del processo e del relativo coinvolgimento degli stakeholder nell'ambito della valutazione, come passaggio metodologico fondamentale.

Per l'esercizio 2024, il Gruppo Terna ha condotto la valutazione della rilevanza di impatti, rischi e opportunità seguendo un approccio in continuità con il processo adottato nel periodo precedente, ma con significativi aggiornamenti metodologici e contenutistici per garantirne il pieno allineamento alla normativa vigente e agli standard ESRS. Già nel precedente esercizio, il processo era stato strutturato con l'obiettivo di un progressivo adeguamento alla CSRD e agli ESRS. In particolare, il processo e la metodologia di valutazione degli impatti e opportunità è stato aggiornato anche tenendo conto dell'esperienza che il Gruppo ha ottenuto nell'ambito degli esercizi precedenti, mentre per quanto riguarda l'identificazione e valutazione dei rischi quest'anno si è proceduto a un rafforzamento della metodologia, che ha visto l'integrazione delle analisi svolte dalla funzione ERM nel contesto del risk assessment 2024-2025.

Le principali modifiche del processo di materialità si sono concentrate all'interno della fase di analisi del contesto, prevedendo attività di benchmarking aggiuntive, la mappatura della catena del valore del Gruppo e l'identificazione di impatti, rischi e opportunità connessi alle fasi della catena del valore e collegati a temi, sottotemi e sotto-sottotemi ESRS indicati nell'Appendice A, RA 16 dell'ESRS 1.

[75] La metodologia seguita nel contesto dell'analisi ERM valuta i rischi secondo le tre variabili di: Probabilità, Impatto, Maturità dei sistemi di Risk Management. Al fine dell'elaborazione dei risultati nel contesto della Doppia Rilevanza, è stato valutato di considerare solamente le variabili di Probabilità e Impatto e considerando una scala da 1 a 5, è stata applicata la stessa soglia utilizzata per la materialità d'impatto.

630

Teleborsa: distribution and commercial use strictly prohibited

Nella tabella di seguito riportata sono rappresentati gli impatti, i rischi e le opportunità emersi come materiali dall'analisi di Doppia Rilevanza 2024[76].

Impatti, rischi e opportunità del Gruppo Terna

	IMPACT MATERIALITY					FINANCIAL MATERIALITY			
TEMA	DESCRIZIONE DELL'IMPATTO	TIPOLOGIA DI IMPATTO (POSITIVO/ NEGATIVO)	ATTUALE/ POTENZIALE	ORIZZONTE TEMPORALE	FONTE DELL'IMPATTO (UPSTREAM/ OWN OPERATION/ DOWNSTREAM)	RISCHI	FONTE DEL RISCHIO (UPSTREAM/ OWN OPERATION/ DOWNSTREAM)	OPPORTUNITÀ	FONTE DELL'OPPORTUNITÀ (UPSTREAM/ OWN OPERATION/ DOWNSTREAM)
Cambiamenti climatici	Mancata continuità del servizio in conseguenza di eventi metereologici di natura ordinaria	Negativo	Attuale	Breve termine	Own operations	Aumento della severità dei fenomeni atmosferici con conseguenti interruzioni di attività / servizio / danni su asset	Own operations	Incremento della remunerazione di Terna grazie agli investimenti per aumentare la resilienza fisica degli asset	Own operations
						Incidente rilevante sulla rete di trasmissione europea e conseguente separazione rete/ disalimentazioni	Own operations	Incremento della remunerazione di Terna grazie a un miglioramento delle performance di continuità del servizio	Own operations

[76] Il Gruppo Terna rende pubbliche le informazioni sugli IRO considerati materiali, in conformità agli obblighi di rendicontazione relativi alle tematiche di sostenibilità a cui tali IRO sono collegati, seguendo la classificazione di temi, sottotemi e sotto-sottotemi definita da ESRS 1 RA 16. Per gli IRO rilevanti connessi alle tematiche Entity-specific dell'organizzazione, il Gruppo fornisce dettagli su politiche, azioni, obiettivi e metriche, ove disponibili.
In linea generale, vengono divulgate le informazioni sugli IRO che hanno superato le soglie di materialità stabilite nell'analisi di doppia rilevanza, senza l'applicazione di ulteriori criteri selettivi per determinare i dati da comunicare. L'analisi di materialità condotta dal Gruppo Terna nel 2024 recepisce le novità introdotte dalla normativa CSRD e dal D. Lgs. 125/2024. Essendo il primo anno di rendicontazione conformemente ai requisiti CSRD, il processo di analisi di materialità è stato condotto secondo i criteri stabiliti nell'ambito delle Linee Guida pubblicate dall'EFRAG, pervenendo a una lista di impatti, rischi e opportunità non confrontabile con i risultati relativi agli esercizi precedenti. Con riferimento agli impatti, rischi e opportunità risultati materiali dall'analisi condotta che sono oggetto degli obblighi di informativa previsti dagli ESRS di seguito si rimanda alla tabella "IMPATTI, RISCHI E OPPORTUNITÀ DEL GRUPPO TERNA".

Nel perseguire la realizzazione della **transizione energetica**, favorendo il passaggio a un'**economia decarbonizzata**, le attività del Gruppo generano dei benefici sistemici in grado di influenzare positivamente l'ambiente e la collettività nel suo complesso.

La presenza capillare del Gruppo su tutto il territorio nazionale, oltre a determinare impatti diretti sulla forza lavoro propria, sui lavoratori della catena del valore e sui clienti, sia attraverso le sue attività sia per mezzo dei suoi rapporti commerciali[77], si estende anche alle comunità locali interessate dalle operazioni legate alla realizzazione e alla manutenzione degli asset e al capitale naturale che questo ospitano.

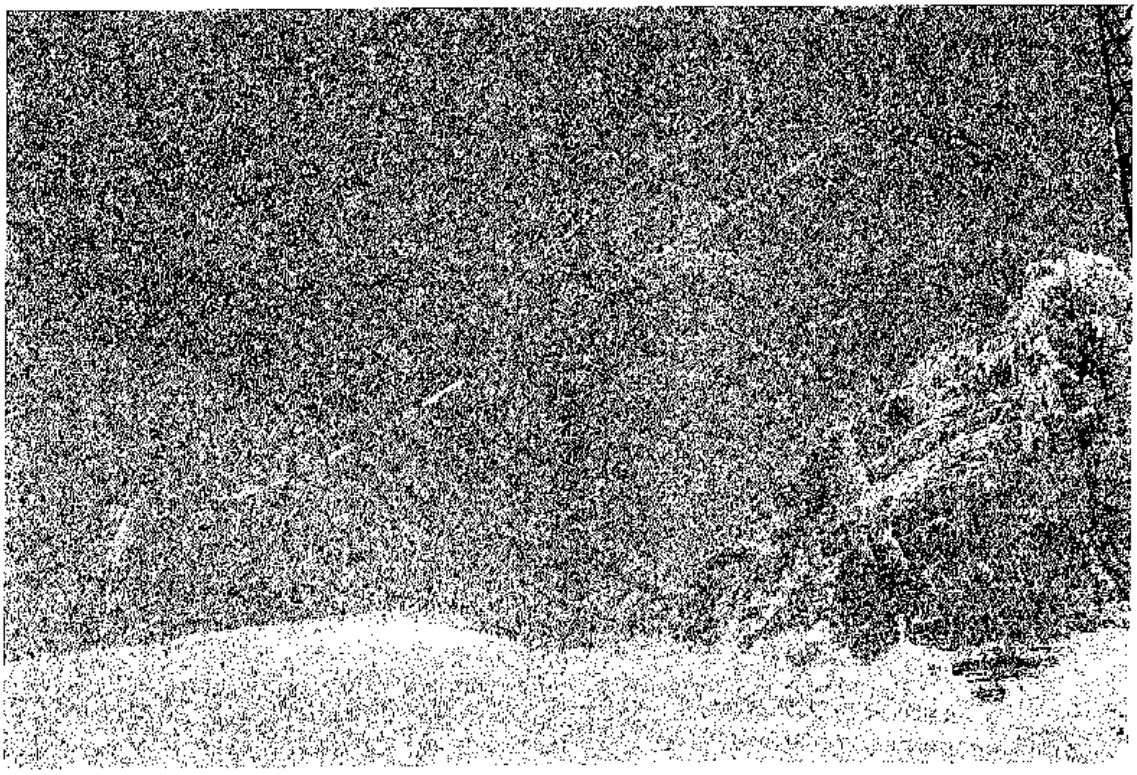
La complessità del contesto di riferimento, alimentata dalla necessità di **bilanciare** gli **obiettivi di business** con gli **impatti** delle proprie attività sulla società e l'ambiente, richiede una grande responsabilità che il Gruppo si è impegnato ad affrontare attraverso un approccio orientato alla realizzazione di una **Just Transition**. Nell'ambizione di realizzare una transizione energetica che sia anche equa e inclusiva, considerando le possibili ricadute sociali e gli impatti che essa può determinare.

Con questa consapevolezza, a partire dal Piano Industriale 2024-2028, il Gruppo Terna ha scelto di **integrare** all'interno

[77] Per approfondimenti relativi alla natura delle attività e dei rapporti commerciali del Gruppo, si rimanda a quanto riportato in risposta allo standard ESRS 2 SBM-1.

635

Teleborsa: distribution and commercial use strictly prohibited



del **Piano Industriale** un **Piano di sostenibilità** che mira alla gestione degli impatti, dei rischi e delle opportunità rilevanti, orientando la strategia aziendale verso la **creazione di valore nel tempo.**

Al fine di garantire una gestione del business che mira al raggiungimento del **successo sostenibile** e alla **creazione** di valore nel tempo, il Gruppo adotta, infatti, un approccio che parte dalla considerazione dei possibili impatti sulle categorie di stakeholder rilevanti e sull'ambiente, che mitiga e gestisce attraverso una pianificazione di sostenibilità integrata nella strategia aziendale, volta alla minimizzazione degli impatti ambientali, al coinvolgimento degli stakeholder territoriali e, più in generale, al rispetto dei principi di integrità, responsabilità e trasparenza.

In questo contesto, l'analisi di **Doppia Rilevanza**, tramite il monitoraggio periodico di impatti, rischi e opportunità rilevanti, rappresenta la **bussola** del **Piano di sostenibilità** del Gruppo, guidando, in tal senso, l'adattamento della strategia aziendale. Questo approccio consente di intercettare e gestire in modo tempestivo eventuali criticità e di incrementare la **resilienza del modello di business** in relazione a eventuali effetti negativi correlati alle questioni di sostenibilità. In ottica di miglioramento continuo, l'aggiornamento di Piano di sostenibilità 2024-2028 prevede un insieme di azioni volte a garantire la piena considerazione degli esiti della Doppia Rilevanza anche in ottica di implementazione di quanto previsto dalla **Corporate Sustainability Due Diligence Directive**. Attraverso tale roadmap, sarà possibile porre le basi necessarie all'ulteriore rafforzamento di un'analisi di resilienza strutturata e puntuale riferibile a tutti gli IRO risultati rilevanti.

Infine, alla luce della rilevanza del tema, con riferimento specifico agli impatti e i rischi legati al cambiamento climatico, il Gruppo ha sviluppato un'opportuna metodologia di analisi di resilienza con un approccio basato su dati scientifici, al fine di verificare la resilienza dei propri asset ai cambiamenti climatici.

Per la quantificazione degli effetti finanziari attuali di rischi e opportunità rilevanti, dall'analisi condotta dal Gruppo Terna non sussistono le condizioni, in linea a quanto previsto dai principi contabili internazionali di riferimento, per la rilevazione nell'ambito dei dati di bilancio consolidato 2024 di effetti finanziari riconducibili a rischi e opportunità ESG in quanto, ad oggi, tali rischi corrispondono a obbligazioni possibili e non probabili.

FOCUS

Cambiamenti climatici

In virtù della particolare importanza che il tema dei cambiamenti climatici riveste per il Gruppo, nell'ambito del processo di Doppia Rilevanza, sono individuati e valutati gli impatti, i rischi e le opportunità specificatamente riferibili al tema in oggetto.

Con particolare riferimento al processo di individuazione degli impatti, il Gruppo Terna ha integrato metodicamente l'analisi attraverso una **valutazione delle proprie attività e della propria catena del valore**. In particolare, si è proceduto con un approfondimento delle proprie attività operative e strategiche, valutando sia le **attività dirette** che quelle **indirette** riferibili alla catena del valore, considerandone le relative **fonti di emissioni di gas serra (GHG) attuali** e potenziali fonti **future**. A tal proposito, la valutazione degli impatti climatici del Gruppo si è basata sulla **quantificazione dell'impronta carbonica** misurata attraverso l'inventario delle emissioni totali di GHG, che prevede la rendicontazione sia delle emissioni dirette (Scope 1) che di quelle indirette (Scope 2 e 3), in linea con le principali metodologie riconosciute a livello internazionale (es. GHG Protocol). Il **monitoraggio continuo** e l'adozione di **strumenti di valutazione avanzati** consentono all'Azienda di affinare il proprio modello di gestione climatica, supportando **strategie di riduzione delle emissioni** e di **mitigazione dei rischi climatici**.

Come già richiamato al paragrafo "I principali fattori di rischio e incertezza", la **gestione dei rischi** viene applicata in tutta l'Azienda secondo un approccio strutturato e sistemico e prevede un **Modello di Risk Governance** (modello), inserito nel più ampio **Sistema di Controllo Interno e di Gestione dei Rischi** (SCIGR), che definisce ruoli e responsabilità dei principali attori coinvolti. Questo processo dinamico si basa su un **modello articolato su tre livelli di controllo** e prevede il coinvolgimento sia delle Funzioni di Controllo sia del Chief Risk Officer. Si consideri, inoltre, che la funzione "Sostenibilità", inserita nella Direzione "Strategia, Digitale e Sostenibilità", cui fanno capo le attività di identificazione, gestione e monitoraggio dei temi di sostenibilità (tra cui anche il climate change), è inserita, come secondo livello di controllo, all'interno del modello. In questo contesto, i **rischi legati al cambiamento climatico** rappresentano rischi strettamente **correlati all'ambito operativo e strategico del Gruppo**, pertanto il processo che porta all'identificazione, **valutazione e gestione** di questi rischi è **integrato** nel generale **processo di risk management aziendale** e nella gestione corrente delle attività dell'impresa (per maggiori dettagli si rimanda al paragrafo "Il processo di Doppia Rilevanza").

In linea con le **raccomandazioni della Task Force on Climate-related Financial Disclosures**, i rischi legati al cambiamento climatico sono stati distinti tra rischi fisici (eventi meteorologici estremi, variazioni climatiche a lungo termine) e rischi legati alla transizione (evoluzioni normative, tecnologiche e di mercato):

- **Rischi legati alla transizione:** la transizione verso un'economia a basse emissioni di carbonio può comportare rischi a livello politico e legale, dovuti a differenti necessità regolatorie che possono presentarsi a livello geografico, o a nuovi effetti e/o incertezze rispetto alle politiche messe in atto. Possono manifestarsi rischi anche a livello tecnologico, dovuti alle incertezze rispetto al ruolo delle tecnologie emergenti e anche rischi di mercato, legati alle nuove dinamiche, ai mutamenti che possono impattare su domanda e offerta e a un aumento della complessità del contesto, che può condurre anche a rischi reputazionali per le aziende;
- **Rischi legati agli impatti fisici:** questi rischi possono essere acuti (event-driven) o cronici (cambiamenti a lungo termine). I rischi fisici possono avere implicazioni finanziarie per le aziende, come danni diretti agli asset, e impatti indiretti dovuti all'interruzione della catena di approvvigionamento.

Il Gruppo Terna, al fine identificare e valutare i rischi relativi al tema in oggetto, adotta un **approccio integrato** e **basato su analisi di scenario**, con l'obiettivo di garantire la sicurezza, l'affidabilità e la resilienza della Rete di Trasmissione Nazionale (RTN). Il processo di valutazione considera sia i rischi fisici legati a eventi meteorologici, estremi e non, sia i rischi di transizione derivanti dall'evoluzione del sistema energetico verso la decarbonizzazione.

Nell'ambito dell'identificazione e valutazione dei rischi fisici legati al clima, il Gruppo, a partire dal 2020, si è dotato di uno strumento, la **Metodologia Resilienza**, il cui **carattere prospettico** per intercettare l'evoluzione e l'impatto del clima nei prossimi decenni, nonché il carattere **probabilistico** necessario a valutare guasti e contingenze multiple e il conseguente rischio di energia non fornita sulla rete a seguito del verificarsi di eventi meteorologici severi, consentono di implementare una **pianificazione efficace** ed **efficiente** degli **interventi per l'incremento della resilienza della rete di trasmissione**.

63F

Teleborsa: distribution and commercial use strictly prohibited

Nel corso di questi anni, la Metodologia Resilienza è stata oggetto di continue evoluzioni e affinamenti per consolidare le analisi sugli eventi climatici neve e vento forte, con l'avvio anche delle analisi sui fenomeni climatici legati al dissesto idrogeologico. L'analisi dell'esposizione della rete di trasmissione alle minacce meteo, valutate a livello di singola campata, combinata con la vulnerabilità dell'infrastruttura di rete consente di individuare le porzioni di rete critiche a rischio di disservizio e, a valle di analisi di rete, gli impianti a rischio di disalimentazione.

Nel definire il suo approccio metodologico, il Gruppo ha tenuto in considerazione uno **scenario climatico RCP 8.5** (le Rappresentative Concentration Pathways, RCP, sono scenari climatici espressi in termini di concentrazioni di gas serra piuttosto che in termini di livelli di emissione). In particolare, lo scenario RCP 8.5 prevede che non venga preso alcun provvedimento significativo in favore della protezione del clima e che, quindi, le emissioni di gas a effetto serra aumentino in modo continuo per tutto il 21° secolo. L'utilizzo di questo scenario climatico risponde a una duplice necessità: da un lato, nel breve/medio termine, **tale scenario è quello più probabile**, in quanto replica, nel prossimo futuro, la situazione attuale (si consideri anche che al 2030 i diversi scenari RCP non presentano significativi scostamenti tra loro); dall'altro lato, tale scelta sottende un **approccio prudenziale del Gruppo Terna** nel definire gli strumenti e le azioni necessari per garantire la resilienza della rete di trasmissione nazionale, ponendosi nella peggiore delle ipotesi al fine di essere in grado di far fronte a qualsiasi livello di minaccia derivante da eventi climatici estremi. Altri modelli e dataset climatici utilizzati per mappare la pericolosità climatica futura sugli asset aziendali sono i seguenti: **CESM- LENS** (modello climatico che include 40 simulazioni climatiche per il periodo 2018-2100); **Euro-CORDEX** (insieme di 12 modelli climatici usati per produrre proiezioni regionali avanzate sui cambiamenti climatici fino al 2100); **ERA 5** (dataset di rianalisi meteorologica con profondità maggiore di 30 anni su diverse variabili meteo); il dataset **MERIDA** (Meteorological Reanalysis Italian Dataset, sviluppato da RSE S.p.A.).

Tutte le iniziative finalizzate a prevenire e/o ridurre i danni sulla rete elettrica provocati da eventi meteorologici sempre più severi in intensità e frequenza sono definite nel Piano per l'incremento della resilienza della Rete di Trasmissione Nazionale (c.d. Piano di Resilienza, aggiornato ogni anno) che comprende interventi preventivi di tipo infrastrutturale - valutati con la Metodologia Resilienza - ma anche interventi di mitigazione, ripristino e monitoraggio, con i relativi investimenti previsti su un orizzonte temporale di cinque anni.

Terna S.p.A. pubblica, annualmente, anche il **Rapporto Adeguatezza Italia** (RAI), al fine di analizzare - in un orizzonte di medio termine e lungo termine (rispettivamente 5 e 10 anni) - l'impatto della variabilità delle condizioni climatiche e dei cambiamenti climatici sul sistema elettrico italiano (maggiori informazioni infra).

Con riguardo all'**identificazione e valutazione delle opportunità e dei rischi di transizione** legati al clima, si fa presente che il Gruppo Terna, nel delineare la propria strategia di sviluppo e, quindi, in fase di redazione del Piano di Sviluppo, valuta **costi e benefici dei progetti di sviluppo della rete di trasmissione** in funzione degli scenari elaborati su un orizzonte di 5-15 anni. L'elaborazione di tali scenari costituisce pertanto un tassello fondamentale della strategia di business del Gruppo Terna, in quanto sulla base degli stessi vengono definite le direttrici di sviluppo della rete elettrica nazionale e orientati i relativi investimenti.

Nello specifico, Terna S.p.A., insieme al gestore del sistema gas Snam, elabora il **Documento di Descrizione degli Scenari (DDS)**, un documento propedeutico alla predisposizione dei piani di sviluppo delle reti di trasmissione e di trasporto nei settori dell'energia elettrica e del gas a livello nazionale. Tale documento è stato pubblicato per la prima volta nel 2019 ed è sottoposto a un processo di revisione con cadenza almeno biennale; l'ultimo aggiornamento è della seconda metà del 2024 ed è pubblicamente disponibile sul sito Terna.

Gli scenari del **DDS 2024** recepiscono le ultime indicazioni del governo, fra cui il testo definitivo del **Piano Nazionale Integrato Energia e Clima (PNIEC)** che declina a livello nazionale gli obiettivi dei pacchetti legislativi europei **"Fit-for-55"** e **"RepowerEU"**. In particolare, con il PNIEC vengono stabiliti gli obiettivi nazionali al 2030 sull'efficienza energetica, sulle fonti rinnovabili e sulla riduzione delle emissioni di CO_2, nonché gli obiettivi in tema di sicurezza energetica, interconnessioni, mercato unico dell'energia e competitività, sviluppo e mobilità sostenibile, delineando per ciascuno di essi le misure che saranno attuate per assicurarne il raggiungimento. Inoltre, in continuità con i precedenti DDS, Snam e Terna hanno sviluppato

638

Teleborsa: distribution and commercial use strictly prohibited

>> *continua* **FOCUS Cambiamenti climatici**

scenari tenendo conto sia degli obiettivi politici del PNIEC che degli scenari europei elaborati da ENTSO-E e ENTSOG, le due associazioni di categoria per la gestione della rete elettrica e della rete gas a livello europeo ("ENTSOs").
Al fine di elaborare gli scenari, sono considerati i seguenti elementi informativi utili a definire il contesto di transizione in cui il Gruppo Terna si troverà a operare, avendo come orizzonti temporali il 2030, il 2035 e il 2040:

- le ipotesi relative all'**evoluzione macroeconomica**, come andamento del PIL, trend demografici, prezzi dei combustibili e della CO_2 per i tre orizzonti temporali di riferimento;
- la descrizione del **fabbisogno energetico** e della **domanda di energia elettrica** esistenti e su un orizzonte temporale di circa venti anni, la cui durata è definita in coerenza con l'orizzonte temporale degli scenari utilizzati nella pianificazione decennale (TYNDP - Ten Years Network Development Plan) degli ENTSOs;
- la descrizione dell'**offerta di energia elettrica** esistente e prevista in Italia per tipo di fonte o combustibile, con una sezione dedicata all'evoluzione attesa delle fonti rinnovabili, nell'orizzonte temporale di cui al punto precedente;
- la descrizione di **domanda e offerta** esistenti e previste nei **sistemi interconnessi** rilevanti ai fini delle valutazioni del Piano decennale nell'orizzonte temporale di cui al secondo punto, oppure opportuni riferimenti agli scenari utilizzati nel TYNDP di ENTSO-E, la quantificazione delle capacità di trasporto interzonali e delle capacità di interconnessione assunte negli anni oggetto di studio del Piano decennale, anche in considerazione delle prospettive di interconnessione e delle richieste di interconnessione mediante interconnector e mediante merchant lines;
- le ipotesi riguardanti gli **scambi di energia elettrica** con sistemi esterni al perimetro dello studio;
- le risultanze di attività di pianificazione energetica sia a livello comunitario sia a livello nazionale, di studi e di altre analisi che supportano le ipotesi assunte nel Piano decennale;
- i risultati delle **simulazioni di mercato sui modelli di riferimento** per ciascuno scenario e anno studio, in termini almeno di scambi previsti di energia elettrica con l'estero, di scambi previsti di energia elettrica tra zone della rete rilevante e di volumi di generazione per tipo di fonte o combustibile, tenuto conto del soddisfacimento del fabbisogno di energia e della copertura minima di servizi ancillari.

Sulla base di questi ed altri elementi, il documento definisce:

- **scenari che raggiungono i target di policy**, allineati, pertanto, agli obiettivi degli scenari internazionali che considerano un target net zero per il 2050 e sono, quindi, coerenti con lo scenario definito "1,5°C", il più ambizioso obiettivo relativo alla temperatura stabilito dall'Accordo di Parigi, che raccomanda una limitazione dell'innalzamento del riscaldamento globale al di sotto di 1,5 gradi centigradi:
  - al 2030 uno scenario PNIEC Policy (coerente con il PNIEC pubblicato a giugno 2024);
  - per il 2035 e 2040 due scenari in linea con quelli elaborati a livello europeo dagli ENTSOs;
- **scenari contrastanti** (elaborati al fine di valutare l'impatto delle infrastrutture pianificate su scenari differenti come richiesto dalla regolazione vigente):
  - al 2030, 2035 e 2040 uno scenario PNIEC Slow, rappresentativo di una transizione più lenta (rispetto agli scenari di policy) verso i target di decarbonizzazione.

Nello scenario di policy 2030 le fonti rinnovabili elettriche arrivano a coprire il 63% del fabbisogno nazionale di elettricità, mentre i gas verdi arrivano a coprire circa il 16,4 % della domanda di gas negli usi finali. Per il 2040, il DDS si basa sugli scenari europei elaborati dalle due associazioni delle reti che descrivono due percorsi possibili per il raggiungimento della Carbon Neutrality nel 2050 e che Snam e Terna hanno declinato con maggiore dettaglio per l'Italia. Pertanto, per il 2040 sono

639

Teleborsa: distribution and commercial use strictly prohibited

stati sviluppati gli scenari Distributed Energy Italia (DE-IT) e Global Ambition Italia (GA-IT) che sono allineati alle storyline degli analoghi scenari elaborati a livello europeo dagli ENTSOs.

Nello scenario DE-IT, è prevista una maggiore penetrazione del vettore elettrico in tutti i settori (civile, trasporto e industria) massimizzando così l'utilizzo della generazione solare ed eolica, che diventa lo strumento principale per il raggiungimento degli obiettivi di decarbonizzazione arrivando a coprire il 76% del fabbisogno elettrico. Viceversa, nel GA-IT è prevista la decarbonizzazione dei consumi attraverso la maggiore penetrazione dell'idrogeno in tutti i settori, un diverso utilizzo di tecnologie e vettori energetici nei settori della mobilità (elettricità, idrogeno, e-liquidi e biocarburanti) e un impiego più importante della cattura e stoccaggio della CO_2, sia nei settori hard-to-abate che nel termoelettrico.

Infine, i due gestori di rete hanno elaborato anche uno scenario PNIEC Slow rappresentativo di una transizione più lenta (rispetto agli scenari di policy) verso gli obiettivi di decarbonizzazione con un ritardo di alcuni anni sulla diffusione delle tecnologie che impattano sul percorso di decarbonizzazione. L'elaborazione di uno scenario contrastante come il PNIEC Slow è funzionale ai requisiti regolatori che richiedono di valutare le infrastrutture pianificate in contesti differenti. Queste analisi "costi-benefici" sono poi riportate nel Piano di Sviluppo. Tutti gli scenari considerati si radicano all'interno dello stesso contesto macroeconomico, caratterizzato da una crescita sostenuta del PIL, nonostante il calo demografico atteso. Tali ipotesi sono coerenti con l'evoluzione attesa del quadro macroeconomico e demografico riportato nel PNIEC 2024 e sviluppato dalla Commissione Europea per tutti gli Stati Membri.

Gli **scenari illustrati** sono le **fondamenta** su cui viene predisposto il **Piano di Sviluppo della Rete di Trasmissione Nazionale** (RTN), che definisce le iniziative di sviluppo della rete previste nei successivi dieci anni, nonché lo stato di avanzamento delle opere di sviluppo previste negli anni precedenti. L'analisi dei flussi di energia elettrica sulla rete, l'elaborazione di previsioni della domanda e dell'offerta e gli scenari basati sulla crescente produzione da fonti rinnovabili consentono a Terna di individuare le crescenti esigenze di adeguamento della rete e, di conseguenza, di programmare le nuove opere necessarie.

Gli interventi previsti nel Piano di Sviluppo sono fondamentali per il raggiungimento della transizione energetica dell'Italia verso un'economia neutrale dal punto di vista climatico; a testimonianza di ciò, si ricorda, l'allineamento quasi totale del CapEx del Gruppo rispetto all'obiettivo di mitigazione del cambiamento climatico (per maggiori informazioni si veda la sezione dedicata alla Tassonomia ai sensi del regolamento delegato (UE) 2021/2139 della Commissione).

Tale allineamento indica chiaramente come il tema del cambiamento climatico rappresenti anche un'opportunità per il Gruppo Terna. In virtù del quadro regolatorio - che lega la remunerazione del Gruppo anche all'ammontare degli investimenti effettuati oltre che alla qualità del servizio offerto - la necessità di maggiori investimenti per adeguare la rete alle esigenze della transizione energetica e per aumentare la resilienza fisica degli asset, che a loro volta influiscono positivamente sulla qualità del servizio, implica un incremento della remunerazione del Gruppo e un impatto positivo, quindi, sul conto economico consolidato. In questo contesto, anche le Attività Non Regolate contribuiscono e contribuiranno a generare nuove opportunità di business grazie allo sviluppo di soluzioni tecnologiche innovative e digitali in coerenza con il ruolo istituzionale del Gruppo Terna a supporto della transizione energetica.

Per il dettaglio circa la categorizzazione dei rischi - rischio fisico o di transizione - collegati al cambiamento climatico si rimanda alla sezione "Informazioni ambientali".

Si specifica che gli scenari climatici dettagliati in precedenza sono alla base delle considerazioni svolte dalla direzione aziendale con riferimento al cambiamento climatico e riportate nella nota illustrativa "A. Informazioni rilevanti sui principi contabili e criteri di valutazione – Cambiamento Climatico", a cui si rimanda, del Bilancio Consolidato.

Teleborsa: distribution and commercial use strictly prohibited

>> *continua* **FOCUS Cambiamenti climatici**

La resilienza del business ai cambiamenti climatici

Terna ha sviluppato un'**analisi approfondita** della **resilienza** della propria strategia e del proprio modello aziendale rispetto ai cambiamenti climatici, con un approccio basato su dati scientifici e scenari climatici avanzati, che aggiorna annualmente in occasione della stesura del Piano di Resilienza. Come indicato di seguito, sono stati analizzati tutti i principali eventi storici collegabili ai rischi fisici. Con riferimento ai principali aspetti di transizione tenuti in considerazione, questi sono esposti nell'ambito delle analisi descritte nel paragrafo "Focus | Cambiamenti climatici".

A livello sistemico, Terna pubblica, annualmente, il **Rapporto Adeguatezza Italia (RAI)**, al fine di analizzare l'impatto della variabilità delle condizioni climatiche e dei cambiamenti climatici sul sistema elettrico italiano. L'elemento su cui si concentra il RAI è la **capacità del sistema elettrico italiano**, in un orizzonte di medio termine e lungo termine (rispettivamente 5 e 10 anni), **di assicurare che le risorse disponibili**, intese come gli impianti di generazione dell'energia elettrica, le importazioni e gli accumuli, siano **sufficienti a soddisfare la domanda di energia elettrica oraria** richiesta **in ogni zona di mercato elettrico del Paese**, considerando al contempo l'impatto dei primi effetti del cambiamento climatico sul sistema elettrico. Le variabili climatiche adottate nelle analisi di adeguatezza sono infatti ricavate sulla base di dati storici e opportunamente aggiornate per considerare i fenomeni di cambiamento climatico.

A livello operativo, l'aumento della frequenza di eventi meteo critici, registrato negli ultimi anni nel nostro paese, rende necessaria una maggiore capacità di resilienza della rete di trasmissione. La crescente intensità degli eventi metereologici severi strettamente connessa al cambiamento climatico genera infatti, a cascata, una più alta probabilità di danni significativi per le infrastrutture del paese, comprese quelle di trasmissione elettrica.

Nello specifico, **l'analisi degli eventi storici degli ultimi anni** che hanno colpito la rete di trasmissione nazionale evidenzia tra i **principali fattori all'origine di disservizi**:

- formazione di **manicotti di neve umida sulle linee** che appesantendole provocano cortocircuiti o cedimenti strutturali;
- **vento forte** in particolare per la conseguenza della caduta delle piante;
- **alluvioni, smottamenti, frane, trombe d'aria** e altri fenomeni estremi che possono provocare cortocircuiti o il collasso dei sostegni o altri cedimenti strutturali;
- **l'aumento dei depositi inquinanti legati a periodi di lunga siccità** (come l'inquinamento salino) che causano una maggiore probabilità di scarica superficiale;
- **incendi boschivi**, innescati anche dalle alte temperature che possono coinvolgere direttamente gli asset provocando guasti o che richiedono il fuori servizio per favorirne le attività di spegnimento.

È, quindi, fondamentale per il Gruppo Terna, identificare le aree in cui le infrastrutture di rete sono maggiormente esposte a tali eventi e intervenire con investimenti efficaci ed efficienti per prevenire e mitigare i rischi di disalimentazione. La rete elettrica deve essere in grado di resistere a sollecitazioni crescenti e, in caso di disservizi, occorre mettere in atto interventi e strumenti per gestire l'emergenza, ripristinando in tempi rapidi le normali condizioni di funzionamento.

A supporto del processo di pianificazione degli interventi per l'incremento della resilienza vi è, la **Metodologia Resilienza** (allegato A76 del Codice di Rete), che si caratterizza per **3 elementi chiave**:

- elaborazione di **scenari climatici previsionali** per identificare le aree del territorio maggiormente esposte agli effetti di eventi meteorologici severi di diversa natura, associando a essi la relativa probabilità di accadimento;
- **stima della vulnerabilità dei componenti delle linee elettriche** a sollecitazioni dirette e indirette causate da eventi meteorologici severi, attraverso la determinazione di specifiche curve di vulnerabilità definite mediante l'utilizzo di parametri tecnico-orografici reali;

Teleborsa: distribution and commercial use strictly prohibited

- **approccio probabilistico "n-k" per le analisi dei disservizi** multipli e simultanei prodotti da eventi meteorologici, al fine di poter quantificare la probabilità di accadimento di tali contingenze multiple e valutare il loro impatto sulla porzione del sistema elettrico esposta all'evento meteo severo.

Nel dettaglio, la **Metodologia Resilienza** si articola in **sei fasi principali**:

1. **analisi dell'esposizione agli eventi meteorologici severi:** valutazione della probabilità di accadimento di fenomeni meteorologici in funzione di soglie di intensità predefinite, basata su modelli climatici avanzati.
2. **analisi della vulnerabilità delle infrastrutture:** valutazione della vulnerabilità delle linee di alta tensione rispetto a sollecitazioni dirette e indirette degli eventi meteorologici, attraverso lo sviluppo di curve di vulnerabilità specifiche.
3. **calcolo del tempo di ritorno del disservizio delle linee prima dell'intervento:** determinazione della probabilità di guasti alla rete in assenza di interventi, combinando i dati climatici e le curve di vulnerabilità.
4. **calcolo del tempo di ritorno di disalimentazione e del rischio di Energia Non Fornita attesa prima dell'intervento:** applicazione di un algoritmo di contingency analysis per quantificare il rischio di disservizio simultaneo di più elementi di rete con un approccio probabilistico.
5. **calcolo del tempo di ritorno del disservizio delle linee e del rischio di Energia non Fornita attesa dopo l'intervento:** valutazione dell'efficacia degli interventi di rafforzamento della rete nel ridurre la vulnerabilità agli eventi climatici estremi.
6. **calcolo del beneficio per l'incremento della resilienza:** determinazione del miglioramento della rete elettrica attraverso il confronto tra l'energia non fornita attesa prima e dopo gli interventi pianificati.

Nel corso di questi anni, la Metodologia Resilienza, sviluppata inizialmente per le valutazioni sugli eventi climatici neve e vento forte, è stata oggetto di continue evoluzioni e affinamenti al fine di migliorare la modellizzazione di fenomeni complessivi come quelli meteoclimatici, alla luce del climate change, e di valutare il contributo di nuove soluzioni tecnologiche che consentono di apportare un beneficio in termini di resilienza. A tal fine svolge un ruolo chiave la collaborazione con enti di ricerca e università quali RSE - Ricerca sul Sistema Elettrico e Politecnico di Milano.

Sono, inoltre, in corso le analisi dei fenomeni meteoclimatici legati al dissesto idrogeologico con l'obiettivo di individuare la tipologia di eventi potenzialmente più impattante per la Rete di Trasmissione Nazionale (RTN) e di introdurne la modellizzazione all'interno della Metodologia Resilienza.

Attraverso l'applicazione della Metodologia Resilienza, è, quindi, possibile implementare una pianificazione efficace ed efficiente degli interventi per l'incremento della resilienza della rete.

A tal proposito, gli **interventi per l'incremento della resilienza della rete** possono essere classificati nelle seguenti **quattro categorie**:

- **interventi preventivi**, finalizzati a incrementare la magliatura della rete, migliorare l'affidabilità e la robustezza degli asset esistenti, ridurre l'esposizione alle minacce meteorologiche potenzialmente impattanti o che prevedono rifacimenti di porzioni di infrastrutture esistenti;
- **interventi di mitigazione** che permettono di contenere i rischi sul sistema elettrico e ridurre i danni dell'evento critico;
- **interventi per il ripristino**, finalizzati a ridurre il tempo di ripristino del disservizio e/o della disalimentazione a seguito dell'accadimento di eventi meteo avversi impattanti il sistema elettrico. In tale categoria rientrano tutti

Teleborsa: distribution and commercial use strictly prohibited

quei provvedimenti per ridurre i tempi del disservizio e riportare il sistema elettrico nello stato di funzionamento normale;

- **interventi di monitoraggio** a supporto sia delle attività preventive che di ripristino.

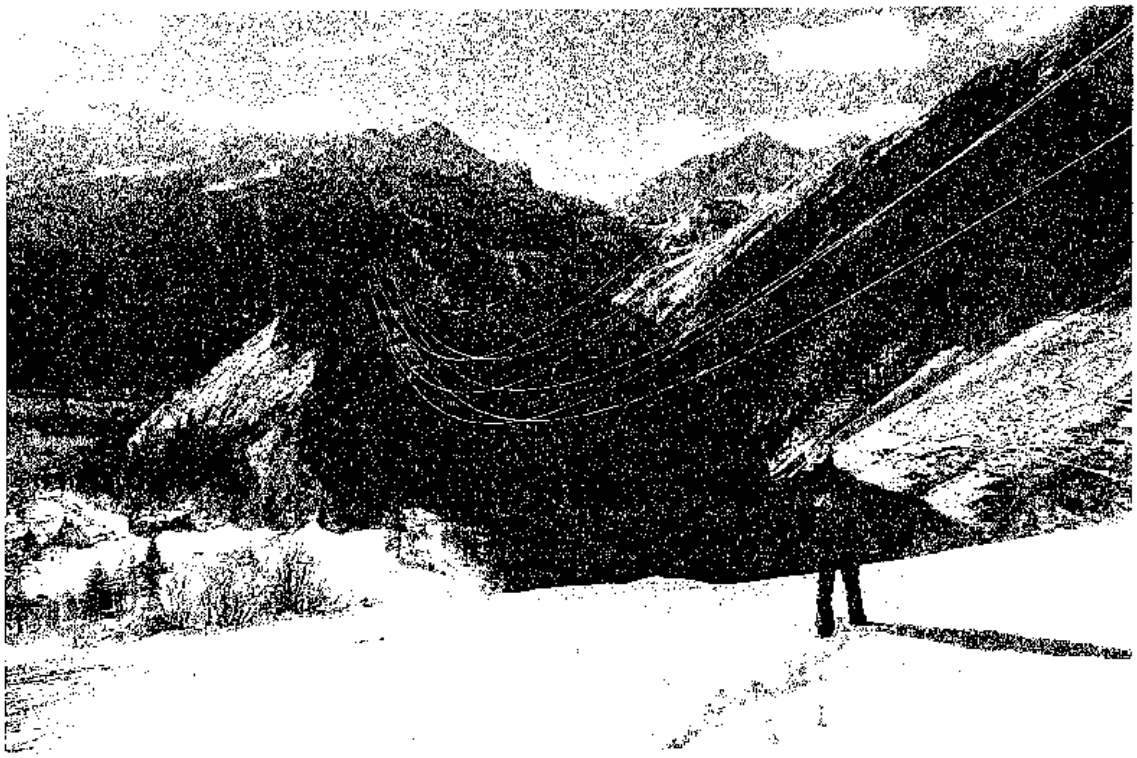
Tali interventi sono descritti, annualmente, nel **Piano Resilienza**, piano aziendale trasversale che **definisce** tutte le **iniziative finalizzate a prevenire e/o ridurre i danni sulla rete elettrica** provocati da eventi meteorologici sempre più severi in intensità e frequenza. Come sovra indicato, l'analisi di resilienza è in continua evoluzione e per tale ragione sono in corso ulteriori valutazioni, come ad esempio le analisi dei fenomeni meteoclimatici citate in precedenza. Quanto fin qui descritto e di seguito esposto, risulta essere la base di sviluppo del suddetto piano, orientato a garantire la resilienza e la sicurezza dell'infrastruttura del Gruppo Terna, oltre che un servizio affidabile e senza interruzioni.

In particolare, il Piano Resilienza include interventi preventivi infrastrutturali per l'incremento della resilienza per neve e vento, individuati con la Metodologia Resilienza, ma anche interventi presenti nel Piano di Sviluppo e/o in Allegato Connessioni che, valutati con la nuova metodologia, sono in grado di ridurre i rischi di disalimentazione per tali eventi. Ulteriore **soluzione innovativa** di tipo infrastrutturale è rappresentata dagli **Organi di Manovra su Palo**, una **tecnologia concepita in Terna** e **brevettata**, che consiste nel dotare i sostegni a traliccio che caratterizzano le linee RTN di sistemi di manovra, consentendo di incrementare la resilienza e flessibilità di esercizio di porzioni di rete a ridotta magliatura, rappresentando altresì una soluzione a ridotto impatto visivo e ambientale.

Tra gli interventi preventivi, sempre riconducibili alla resilienza, vi sono anche gli interventi afferenti al **"Piano di Rinnovo"** quali il rinforzo degli elettrodotti e il taglio piante, per prevenire disservizi legati a interferenze arboree sulle linee elettriche a seguito, ad esempio, di eventi di forte vento.

Nel Piano Resilienza, inoltre, sono incluse tutte le iniziative afferenti al **Piano Sicurezza** (di cui è un allegato) aventi la finalità di mitigare gli effetti sulla rete causati in particolare dagli eventi neve, quali ad esempio gli antirotazionali e i distanziatori interfasici, e l'adozione di soluzioni e strumenti tecnologici per il monitoraggio della rete e per prevenire il verificarsi di eventi severi e rendere più rapida la ripresa del servizio.

Completano il Piano Resilienza, infine, le iniziative per l'incremento della resilienza anche per altre tipologie di eventi quali, ad esempio, l'inquinamento salino, atmosferico e il rischio incendi, incluse sempre nel Piano Sicurezza. Il Piano Resilienza 2024, inoltre, amplia il portfolio di iniziative per incrementare la resilienza della RTN grazie al supporto della digitalizzazione, prevedendo l'utilizzo di tecniche IoT finalizzate alla raccolta capillare delle informazioni sugli asset e che, unitamente ad algoritmi complessi di calcolo, garantiscono un funzionamento ottimale e resiliente del sistema elettrico.



A supporto degli investimenti per la sicurezza e resilienza della RTN vi sono, poi, i finanziamenti pubblici nell'ambito del Piano Nazionale di Ripresa e Resilienza (PNRR) e della relativa revisione con il capitolo del RepowerEu, rispetto ai quali il Gruppo Terna ha avuto un riconoscimento rispettivamente di 150 Mln€ per il PNRR e 140 Mln€ per il RepowerEU, con l'obiettivo, da un lato, di incrementare la resilienza di 1.500 km di linee della RTN per eventi climatici severi e, dall'altro, di avviare la digitalizzazione della RTN garantendo un funzionamento sicuro e resiliente.

63

Teleborsa: distribution and commercial use strictly prohibited

Si fa presente che il Piano Resilienza è un allegato del più ampio Piano di Miglioramento dei Sistemi di Difesa per la Sicurezza del Sistema Elettrico Nazionale (Piano Sicurezza) che Terna predispone annualmente. Il **Piano Sicurezza 2024** rappresenta l'edizione n. 21 e aggiorna le iniziative a tutela della sicurezza del sistema elettrico previste per il quadriennio 2024-2027 con investimenti per oltre 1,3 miliardi di euro. Nel Piano Sicurezza 2024 Terna rafforza i propri investimenti e iniziative per interpretare al meglio il suo ruolo di abilitatore della transizione energetica, sulla base di **3 indirizzi strategici**:

- **l'adozione di soluzioni tecnologiche** fondamentali per affrontare le esigenze di regolazione della tensione e di stabilità del sistema elettrico, quali compensatori sincroni, reattori e resistori stabilizzanti;
- **l'evoluzione digitale del sistema elettrico**, che coinvolge trasversalmente diversi ambiti della gestione della rete, dalla supervisione, controllo e difesa del sistema fino alla sicurezza delle infrastrutture a protezione dei rischi fisici e di cybersecurity;
- **l'incremento della resilienza della rete** di fronte all'intensificarsi di eventi meteorologici estremi che attraverso iniziative di tipo preventivo, di ripristino e monitoraggio mirano, anche grazie al supporto offerto dalla digitalizzazione, a garantire sempre più elevati standard di continuità del servizio elettrico.

FOCUS

Tutela della biodiversità

L'interazione delle attività del Gruppo nei confronti della biodiversità è correlata principalmente alla **presenza** fisica delle **linee** e delle **stazioni elettriche**[78] e dal loro impatto sull'ambiente circostante, che può essere sia naturale che antropizzato. In particolare, con riferimento alla fase di realizzazione delle opere, viene posta grande attenzione alla scelta delle aree e delle piste di accesso, selezionate, quando possibile, in zone di minor valore naturalistico.

Nel caso di elettrodotti in cavo sottomarino gli impatti riguardano l'integrità dei fondali sui quali sono posati i cavi, per le attività relative alla posa e alle operazioni di manutenzione, gli impatti si concentrano sulle specie di flora acquatica come, ad esempio, la posidonia oceanica.

In questo contesto, la scelta del tracciato costituisce la fase più delicata della progettazione poiché determina il futuro impatto sull'ambiente e sulla biodiversità di tutto l'intervento di sviluppo. Per questo Terna, fatta salva la necessità di individuare un tracciato che permetta il regolare esercizio e la manutenzione dell'elettrodotto, ricerca le soluzioni progettuali che minimizzino l'occupazione di suolo, l'interferenza con zone di pregio ambientale, naturalistico, paesaggistico e archeologico, con aree urbanizzate o di sviluppo urbanistico, e gli asservimenti sulle proprietà interessate[79]. Nella ricerca delle **localizzazioni sostenibili** (corridoi) per gli interventi di sviluppo della Rete di Trasmissione Nazionale (RTN), è fondamentale il supporto della **tecnologia GIS** ("Geographic Information System"), che consente di considerare in maniera integrata tutti gli strati informativi relativi alle diverse tipologie di uso del suolo e ai vincoli di tutela (territoriale, naturalistica, culturale, paesaggistica, etc.), al fine di individuare le ipotesi localizzative più coerenti con il territorio interessato. L'interazione tra le linee e le stazioni e le aree protette o comunque di interesse naturalistico è costantemente monitorata. Pertanto, tutti gli asset del Gruppo sono valutati tramite il supporto della tecnologia GIS e complessivamente il monitoraggio comprende tutte le stazioni (915 nel 2024) e le linee elettriche (68.374 km nel 2024).

Con il supporto di questa banca dati, viene effettuato l'inventario delle possibili **interferenze** tra gli asset e le **aree protette** o a **elevata biodiversità**, incrociando i dati relativi alla rete elettrica con quelli di natura territoriale (nel 2024 erano 7.276,24 i km di linee e 34 le stazioni elettriche interferenti con aree protette, per maggiori dettagli si vedano le tabelle di approfondimento a pag. 259, nell'ambito del paragrafo "Le metriche relative alla tutela della biodiversità"). Considerando che gli interventi in aree protette sono ridotti al minimo in virtù dell'applicazione delle **procedure ERPA**, per le opere di nuova realizzazione vengono applicate le misure di mitigazione previste dalla normativa e disposte dagli enti locali.

L'analisi di Doppia Rilevanza per il 2024 ha identificato e considerato gli impatti che complessivamente possono riguardare le attività del Gruppo nei confronti della biodiversità, non si è ritenuto necessario procedere a una ripartizione degli impatti per siti specifici. Tale dettaglio è svolto seguendo le prescrizioni o la valutazione di impatto ambientale per la realizzazione del Piano di Sviluppo.

L'analisi di Doppia Rilevanza ha preso in considerazione gli impatti diretti e indiretti delle attività del Gruppo sulla biodiversità e sugli ecosistemi, valutando sia gli impatti effettivi che quelli potenziali. Partendo da un'analisi delle fonti documentali interne ed esterne all'azienda, considerando nello specifico anche linee guida settoriali della **Task Force on Nature-related Financial Disclosures (TNFD)**, si è quindi proceduto all'identificazione di una serie di impatti correlati ai temi e sottotemi indicati dagli standard ESRS. Gli impatti individuati sono stati sottoposti alle funzioni aziendali competenti e a esperti esterni di sostenibilità, che hanno valutato la loro rilevanza sulla base dei criteri di significatività e probabilità. Il contributo delle funzioni coinvolte nel contesto dell'analisi di Doppia Rilevanza è di particolare rilievo poiché le stesse hanno la responsabilità di **garantire l'ascolto degli stakeholder** come elemento fondamentale delle attività propedeutiche all'aggiornamento e della realizzazione del Piano di Sviluppo. Il Gruppo, infatti, si impegna costantemente nella definizione

[78] Per un elenco dei siti si vedano le tabelle "Dettaglio su elettrodotti di proprietà del Gruppo Terna" e "Dettaglio su stazioni elettriche di proprietà del Gruppo Terna" a pagina 388.

[79] La progettazione di Terna include lo studio di piani di cantierizzazione mirati all'utilizzo di viabilità e piste esistenti per ridurre al minimo l'apertura di nuove piste, soprattutto in aree boschive o tutelate, e la valutazione delle problematiche legate al taglio della vegetazione, adottando metodologie e strumenti atti a ridurre al minimo l'interferenza quali l'ottimizzazione dell'altezza dei sostegni e della loro localizzazione. Uno degli strumenti più efficaci per selezionare i corridoi territoriali meno impattanti è dato dalla condivisione dei criteri localizzativi in base ai quali si riconosce la maggiore o minore idoneità di un territorio a ospitare le nuove infrastrutture elettriche. Terna e le Regioni hanno concordato un sistema di criteri ERPA "Esclusione; Repulsione: Problematicità; Attrazione", basato su quattro classi, da adottare nella localizzazione delle nuove opere elettriche. Le aree protette, incluse le categorie IUCN che con queste coincidono, ricadono nella categoria "Repulsione" che impegna Terna a non operare, se non in assenza di alternative o in presenza di sole alternative a minore compatibilità ambientale.

645

Teleborsa: distribution and commercial use strictly prohibited

e nell'attuazione delle più opportune forme di coinvolgimento e **progettazione partecipata**, con particolare attenzione alle comunità locali interessate dalle attività di sviluppo della rete. Nel concreto, l'azione del Gruppo segue alcuni principi operativi generali, in merito alle attività di stakeholder engagement da svolgere, nelle diverse fasi in cui si articola il processo di sviluppo della RTN, dalla pianificazione, alla Valutazione Ambientale Strategica del Piano, dalla progettazione dei singoli interventi, alla relativa autorizzazione fino alla realizzazione. Si segnala, in particolare, tra le attività nei territori interessati dallo sviluppo della rete i **Terna incontra**, descritti nel paragrafo dedicato alle comunità locali.

Le dipendenze dalla biodiversità, dagli ecosistemi e dai relativi servizi sono state individuate e valutate attraverso un processo che considera le sinergie tra natura e clima, considerando anche quanto indicato dalle linee guida settoriali della TNFD.

Nello specifico, la TNFD non identifica dipendenze relative alla natura direttamente collegate alle attività di trasmissione e dispacciamento dell'energia elettrica, pur individuando una **potenziale dipendenza** in alcuni **servizi ecosistemici**[80] in relazione alla sempre più frequente **manifestazione di eventi metereologici estremi** per via del cambiamento climatico, tra cui la mitigazione di rischi naturali come alluvioni e mareggiate, il controllo dell'erosione e la stabilizzazione del suolo e dei pendii. La valutazione ha preso quindi in considerazione le dipendenze dai servizi ecosistemici che regolano il clima, e come questi influenzano l'integrità delle infrastrutture di trasmissione dell'energia. Ad esempio, il servizio ecosistemico di regolazione del clima contribuisce a proteggere le infrastrutture da eventi climatici estremi, come precipitazioni anomale e variazioni di temperatura, che potrebbero danneggiarle. Fenomeni come la perdita di vegetazione o il degrado degli ecosistemi aumentano invece il rischio di danni causati da inondazioni ed eventi meteorologici estremi, con effetti negativi sugli asset aziendali.

L'approccio di Terna nei confronti della biodiversità si riflette anche in un potenziale incremento dell'attrattività del Gruppo sui mercati finanziari, questo anche in considerazione del crescente interessamento degli investitori e delle agenzie di rating specializzate sui temi ESG, aspetti analizzati e monitorati costantemente dalla funzione Sostenibilità del Gruppo. Per ciò che concerne il processo di individuazione e valutazione delle opportunità relative alla biodiversità, esso è stato incluso nel contesto dell'analisi di Doppia Rilevanza a cui si rimanda per ulteriori dettagli (pag.179).

[80] Per servizi ecosistemici si intendono i contributi derivanti dalle risorse degli ecosistemi a beneficio dell'attività economica e di altre attività umane. Ad esempio, la fornitura di legname e legna da ardere di una foresta, l'acqua dolce di un fiume, le opportunità ricreative o turistiche di una foresta o di una barriera corallina e l'impollinazione dei raccolti. I servizi ecosistemici rientrano in tre categorie: servizi di approvvigionamento, come la fornitura di raccolti, legno o acqua; servizi di regolazione e manutenzione, come la regolazione del flusso d'acqua e la regolazione del clima e servizi culturali, come attività ricreative o opportunità turistiche. Per ulteriori approfondimenti si vedano le "Raccomandazioni della Task Force on Nature-related Financial Disclosures" pag. 26 (https://tnfd.global/wp-content/uploads/2023/08/ Recommendations_of_the_Taskforce_on_Nature-related_Financial_Disclosures_September_2023.pdf?v=1695118661). Secondo quanto riportato dalle "Addictional sector guidance - Electric utilities and power generators" di TNFD, l'integrità operativa dell'infrastruttura di trasmissione e distribuzione potrebbe dipendere dal: (i) servizio ecosistemico di regolazione climatica globale, per proteggere l'infrastruttura di trasmissione e distribuzione, da modelli instabili di precipitazioni e temperature, che possono influire sulla manutenzione e sull'integrità; (ii) servizio ecosistemico di regolazione delle precipitazioni e mitigazione degli eventi meteorologici estremi, come cicloni tropicali o inondazioni, per garantire la stabilità e il funzionamento ininterrotto dei sistemi di trasmissione e distribuzione dell'energia elettrica; (iii) servizio ecosistemico di ritenzione del suolo e dei sedimenti, principalmente fornito da diversi tipi di vegetazione e altri asset ambientali. Attraverso la ritenzione del suolo e dei sedimenti, si mitigano gli impatti e i danni causati da frane ed erosione.

Teleborsa: distribution and commercial use strictly prohibited

FOCUS

Promozione dell'economia circolare

L'analisi di Doppia Rilevanza ha preso in considerazione gli impatti diretti e indiretti delle attività del Gruppo legati all'uso delle risorse e all'economia circolare, valutando sia gli impatti effettivi che quelli potenziali. Partendo da un'analisi delle fonti documentali interne ed esterne all'azienda, considerando nello specifico anche le analisi ambientali, come, ad esempio, l'analisi **Life Cycle Assessment** con metodologia EF 3.0[1] promossa dalla Commissione Europea[a)], vengono valutati gli **impatti ambientali di linee aeree**, **linee in cavo** e **stazioni elettriche** per tutto il loro **ciclo di vita**, inclusi gli **impatti a valle**. Si è quindi proceduto all'identificazione di una serie di impatti correlati ai temi e sottotemi indicati dagli standard ESRS. Gli impatti individuati sono stati quindi sottoposti alle funzioni aziendali competenti e a esperti esterni di sostenibilità, che hanno valutato la loro rilevanza sulla base dei criteri di significatività e probabilità.

FOCUS

Forza lavoro propria

La qualità del capitale umano è fondamentale per la crescita del Gruppo Terna e per favorire la creazione di valore nel tempo. Le persone, con la loro formazione, le competenze sviluppate nel corso degli anni, le capacità manageriali, la motivazione, la lealtà e il senso di appartenenza, rappresentano un elemento centrale in tutte le attività aziendali. Inoltre, sono individui i cui diritti devono essere rispettati e valorizzati. Terna, con la **People Strategy** persegue l'obiettivo di mettere le **persone al centro** di un ecosistema caratterizzato da **rispetto reciproco**, **inclusività**, **benessere** diffuso, senso di **responsabilità** e orientamento al risultato. Questa visione guida il cambiamento culturale dell'azienda, che si realizza attraverso iniziative e strumenti volti a promuovere modalità di lavoro più efficienti, a sviluppare le competenze, a valorizzare il merito e a misurare le performance con un approccio di miglioramento continuo. Il dialogo con la forza lavoro si sviluppa all'interno di un consolidato sistema di relazioni industriali, che prevede il coinvolgimento delle Organizzazioni Sindacali, e attraverso periodiche iniziative di ascolto diretto dei dipendenti, come survey online, focus group e altre attività di engagement interno. Tale approccio permette di integrare gli interessi e le opinioni dei lavoratori nelle attività aziendali. In questo modo, ogni persona ha l'opportunità di contribuire alla crescita collettiva e al raggiungimento degli obiettivi aziendali.

Gli impatti rilevanti sulla forza lavoro propria, individuati dall'analisi di Doppia Rilevanza, derivano direttamente dall'approccio del Gruppo nei confronti delle proprie persone, in linea con la sua People Strategy, e sono anche influenzati dalla solidità del modello aziendale. In particolare, gli impatti includono benefici legati a un'**occupazione sicura**, all'adozione di **misure che migliorano le condizioni lavorative**, come contratti collettivi che garantiscono

a) Questo metodo si basa su una serie di indicatori ambientali standardizzati che coprono diverse categorie di impatto, tra cui quelli su natura e biodiversità. Gli impatti sono valutati utilizzando specifici modelli e fattori di caratterizzazione che considerano pressioni ambientali come il cambiamento dell'uso del suolo, l'inquinamento, il cambiamento climatico e l'estrazione delle risorse.

64

Teleborsa: distribution and commercial use strictly prohibited

diritti e salari adeguati, e alla promozione di **politiche di welfare** e **conciliazione vita-lavoro**. Questi impatti positivi sono sostenuti, da un lato, dal contesto in cui l'Azienda opera, e, dall'altro, sono ulteriormente potenziati dal Gruppo, che mette al centro il benessere delle persone, promuovendo un impegno reciproco per la crescita collettiva. Per quanto riguarda la **valorizzazione delle competenze**, essa si riflette in una strategia che incentiva la formazione continua, l'aggiornamento delle competenze e l'anticipazione dei cambiamenti. Investendo in competenze emergenti e favorendo modalità di lavoro più efficaci, anche grazie all'uso della tecnologia, l'Azienda mira a valorizzare il merito, accelerare la crescita organizzativa e raggiungere l'eccellenza nei risultati.

Il rispetto dei diritti umani e la promozione della diversità e dell'inclusione sono altresì centrali, come sottolineato nella Policy Diversity, Equity & Inclusion, che si traduce in iniziative concrete per **ridurre il gender pay gap** e favorire un ambiente di lavoro inclusivo e sicuro. Inoltre, l'**attenzione alla salute e alla sicurezza** dei dipendenti considera il rischio di eventi infortunistici attraverso attività di prevenzione e iniziative per migliorare il benessere psicofisico, ed è integrata nel modello aziendale che include anche obiettivi di performance per il Management correlati al tema della sicurezza.

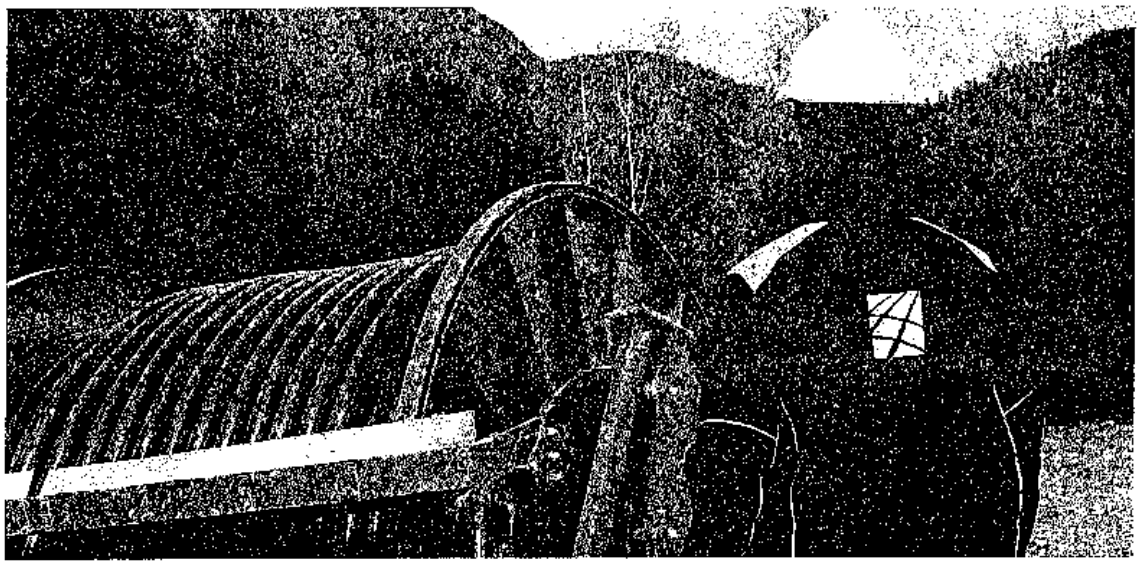
La strategia aziendale mira anche a far fronte alle dipendenze connesse alla disponibilità di forza lavoro idonea a consentire la realizzazione degli obiettivi del Piano Industriale. Questo al fine di prevenire il rischio connesso all'eventuale difficoltà nel recruiting di risorse con competenze tecniche specialistiche, e nell'attraction e retention data la crescente competizione per i talenti (in considerazione, ad esempio, della forza lavoro altamente qualificata) che Terna previene attraverso iniziative di **employer branding** e collaborazioni con scuole e mondo accademico, politiche di valorizzazione e sviluppo delle competenze e di **mobilità interna**, adottando misure per garantire la formazione e lo sviluppo delle competenze necessarie, nonché la gestione della forza lavoro attraverso un **sistema di valutazione delle performance** e **opportunità di crescita professionale**.

Le **opportunità** legate **all'attrattività sui mercati finanziari**, derivanti dalla **strategia di riduzione del gender pay gap** e dalla promozione dell'inclusione e della diversità, sono connesse direttamente agli impatti della forza lavoro, poiché un ambiente di lavoro equo e inclusivo contribuisce al miglioramento del capitale reputazionale dell'Azienda nel lungo periodo, oltre a rivelarsi una leva fondamentale anche in relazione ai rischi e alle dipendenze correlate alla disponibilità di personale qualificato. Porre le proprie persone al centro, generando impatti positivi attraverso la promozione dell'inclusività e il miglioramento del benessere del personale, si traduce in un'opportunità per attrarre e mantenere talenti, contribuendo anche al rafforzamento della propria competitività sul mercato.

Gli impatti coinvolgono tutta la forza lavoro propria ripartita nelle tipologie di contratto rappresentate nell'ambito del paragrafo "Le metriche legate alla forza lavoro"[82]. L'impatto negativo identificato fa riferimento a singoli incidenti connessi a episodi di eventi infortunistici che in via potenziale possono coinvolgere la forza lavoro. La valutazione nell'ambito dell'analisi di Doppia Rilevanza ha tenuto anche conto delle performance degli anni precedenti e, dell'analisi delle tipologie di infortuni. Si segnala che le principali cause registrate hanno riguardato "urto, schiacciamento e taglio" legati prevalentemente a attività operative.

[82] Nello specifico, per le informazioni afferenti alle tipologie di contratto, si vedano le tabelle "Caratteristiche dei dipendenti dell'impresa" e "Caratteristiche dei lavoratori non dipendenti nella forza lavoro propria dell'impresa".

Teleborsa: distribution and commercial use strictly prohibited



FOCUS

Lavoratori nella catena del valore

Terna riconosce che una catena del valore sostenibile deve essere in grado di identificare e gestire gli impatti negativi, puntando a massimizzare i benefici per i lavoratori. Questo approccio contribuisce all'affermazione di modelli di produzione che rispettano i diritti umani delle persone coinvolte.

Con questo obiettivo vengono adottate una serie di misure preventive e di mitigazione per affrontare i potenziali impatti legati alle condizioni di lavoro dei dipendenti lungo la catena del valore che possono essere correlati al verificarsi di singoli incidenti, come, ad esempio, eventuali violazioni dei codici di condotta, con conseguenti problematiche relative all'orario di lavoro e alla stabilità occupazionale o episodi infortunistici. Nello specifico, il rischio legato a infortuni o incidenti ai danni dei lavoratori può anche risultare in gravi ripercussioni in termini reputazionali.

Al fine di prevenire tali episodi, **si impone contrattualmente l'osservanza di specifiche condizioni che tutelano i diritti dei lavoratori**. L'impegno a adottare particolari cautele, ai fini dell'osservanza dei requisiti richiesti per la contrattualizzazione e per la qualificazione, **può condurre le ditte appaltatrici a migliorare le proprie prassi interne di gestione dei lavoratori**, determinando un **contributo positivo** in termini di condizioni di lavoro e parità di trattamento. Tali impegni non solo favoriscono il rafforzamento della sostenibilità e della resilienza del modello di business, ma contribuiscono anche a garantire la sostenibilità delle sue filiere di riferimento, generando possibili impatti positivi anche nei confronti dei lavoratori. In questo contesto, i lavoratori della catena del valore rappresentano un gruppo di portatori di interesse centrale, cui sono anche correlati obiettivi specifici del Piano di Sostenibilità del Gruppo[83].

[83] Considerando i dati disponibili al 31.12.2024 per ciò che concerne la mappatura e le azioni relative a impatti e rischi rilevanti si riferisce ai fornitori delle Società Terna, Terna Rete Italia, Terna Plus e Terna Energy Solutions.

Teleborsa: distribution and commercial use strictly prohibited

Tra questi si considerano per le attività a monte della catena del valore: i lavoratori delle ditte impegnate nell'approvvigionamento di materiali e di prodotti finiti (in cui rientrano l'acquisto dei materiali necessari per i processi produttivi delle Società controllate e l'acquisto dei prodotti finiti necessari per le altre attività del Gruppo), includendo anche l'approvvigionamento di lavoro da parte di imprese terze per le attività core di Terna (mediante contratti di appalti di lavoro e servizi) e delle Società controllate. Inoltre, il Gruppo Terna considera lavoratori appartenenti alla propria catena del valore anche i lavoratori che esercitano la propria attività presso la sede dell'impresa ma che non fanno parte della forza lavoro propria. Guardando invece alle attività a valle della catena del valore, sono da considerarsi i lavoratori impiegati in ditte che si occupano di attività di trasporto e logistica e di gestione dei rifiuti e del fine vita degli asset e delle opere.

Le evidenze fin qui emerse in fase di due diligence sui diritti umani e le analisi di Doppia Rilevanza non hanno evidenziato forniture a rischio significativo di lavoro minorile, di lavoro forzato o coatto, anche grazie alla **forte prevalenza di fornitori nazionali determinata dalla specificità del business**.

Per quanto riguarda i fornitori esteri, viene **valutato il rischio-Paese** ossia la possibilità di avere un danno al verificarsi di fatti o eventi collegabili al contesto economico, sociale e politico del Paese in cui il fornitore opera abitualmente. È un rischio al momento contenuto vista la prevalenza di fornitori nazionali e comunitari, ma che potrebbe assumere rilevanza maggiore in funzione del possibile ampliamento all'estero dei mercati di riferimento. Per l'analisi e la **valutazione dei fattori di rischio** più rilevanti, che si riferiscono ai macro-temi della governance economica e politica dei vari Paesi, e al **rispetto dei diritti umani sanciti a livello internazionale**, sono utilizzati elementi oggettivi, tra cui la ratifica delle convenzioni ONU e ILO, combinati con le valutazioni espresse dalle principali Organizzazioni Non Governative (ONG) internazionali e dalle più importanti agenzie di rating attive sui temi in oggetto. Tali valutazioni sono aggiornate periodicamente e costituiscono quindi una fonte di monitoraggio costante dell'evoluzione effettiva del contesto. A queste valutazioni si aggiunge la segnalazione dei provvedimenti restrittivi emessi dalle autorità italiane e internazionali, sia europee che extraeuropee, che comportano limitazioni alla libera circolazione dei beni (embarghi commerciali) o regole di comportamento nel caso di transazioni con Paesi a fiscalità agevolata (paradisi fiscali).

Nel caso di **fornitori appartenenti a comparti rilevanti ai fini ESG** si richiedono **requisiti sociali** e **ambientali di qualifica più stringenti**. Questi specifici comparti sono periodicamente identificati sulla base dei Gruppi Merceologici di cui si valuta la rilevanza per il business (importo approvvigionato, potenziali criticità per il core business) e degli aspetti sociali (salute e sicurezza e condizioni di lavoro) e ambientali (impatti ambientali significativi nella filiera produttiva, nell'utilizzo da parte di Terna, e nella fase di fine vita utile)[84]. L'appartenenza a questa categoria comporta una particolare attenzione in fase di qualifica e nella messa a punto delle specifiche tecniche, e l'impegno a adottare particolari cautele nel caso di comparti non soggetti a qualifica. Infine, **considerato il significativo utilizzo di manodopera esterna nei cantieri di Terna, gli appalti di lavoro sono sottoposti a regole più rigorose** non solo in sede di qualificazione, ma anche nella gestione, sono state infatti introdotte ulteriori misure in tema di salute e sicurezza.

[84] Come, ad esempio, l'appartenenza a gruppi merceologici relativi a settori "labour-intensive" con bassa qualificazione e specializzazione delle risorse o a filiere classificate come inquinanti sulla base di liste e database stilati da organismi esterni.

FOCUS

Comunità interessate

Il Gruppo Terna considera le opinioni, gli interessi e i diritti delle comunità locali come un elemento centrale nella sua strategia. L'Azienda svolge, infatti, un'intensa **attività di engagement con le comunità** che vivono nei territori destinati a ospitare le nuove infrastrutture elettriche, riconoscendo l'importanza che il rapporto con queste comunità ricopre nel suo modello aziendale. La condivisione delle esigenze di sviluppo della rete elettrica con le amministrazioni e le comunità locali e l'ascolto dei cittadini sono azioni attuate allo scopo di **identificare le migliori scelte progettuali e localizzative** delle nuove opere: una vera e propria **progettazione partecipata** con il territorio che tiene conto delle esigenze specifiche dei vari portatori di interesse. La centralità di questi aspetti per la strategia del Gruppo si riflette nella scelta di includere obiettivi dedicati al coinvolgimento degli stakeholder all'interno del Piano di sostenibilità, integrato nel Piano Industriale.

Gli impatti delle attività del Gruppo sulle comunità interessate possono riguardare eventuali disagi legati alla viabilità interessata (in particolare durante la fase realizzativa), al rumore provocato durante le fasi di cantiere e alla percezione visiva e paesaggistica legata alla presenza delle opere realizzate. In considerazione del verificarsi di queste eventuali interferenze l'Azienda determina le proprie modalità operative, orientandosi verso un approccio improntato all'ascolto e alla concertazione con le comunità locali. Per tale ragione il Gruppo Terna lavora costantemente per trovare soluzioni condivise che possano eliminare o ridurre al minimo tali impatti.

Il modello aziendale di Terna si basa, infatti, sulla progettazione partecipata, coinvolgendo attivamente le comunità nelle scelte localizzative e progettuali delle infrastrutture, permettendo alle comunità di partecipare e contribuire alla definizione delle soluzioni progettuali che, in questo modo, perseguono una maggiore accettazione e comprensione delle opere da parte del territorio. Questo anche nella consapevolezza che intrattenere relazioni ottimali con le comunità interessate dalle proprie attività rappresenti un'opportunità, in termini reputazionali, per il consolidamento della cosiddetta **licenza sociale a operare** come premessa fondamentale anche per assicurare la realizzazione degli investimenti di Gruppo nei tempi stabiliti dai Piani aziendali[85].

La strategia di Terna, quindi, considera gli impatti derivanti dalla realizzazione delle infrastrutture, strutturando il proprio modello di business in modo da favorire opportunità di dialogo e di miglioramento continuo.

L'analisi di Doppia Rilevanza 2024 ha considerato le comunità che vivono o lavorano nei pressi delle opere elettriche o di cantieri propedeutici alla realizzazione delle stesse. Gli impatti negativi riguardano la realizzazione delle opere che il Gruppo è tenuto a condurre in modo continuativo nell'ambito delle proprie attività core, propedeutiche al raggiungimento della transizione energetica.

All'interno della categoria delle comunità locali sono ricomprese diverse sottocategorie, considerate nel contesto della Doppia Rilevanza, individuate tenendo conto della mappa di dettaglio degli stakeholder che comprende soggetti di diversa natura interessati lungo tutte le fasi dell'attività del Gruppo Terna sul territorio, dallo sviluppo della RTN, alla gestione delle linee esistenti. Nella categoria sono inclusi, ad esempio, cittadini e proprietari di immobili interessati alle attività di Terna e organismi locali in grado di influenzare il processo decisionale.

[85] L'opportunità si riferisce in via generale alle comunità interessate dalle attività di Terna.

Clienti

GRI 3-3
GRI 3-3

Le società Terna Energy Solutions S.r.l., LT S.r.l., Tamini Trasformatori S.r.l. e Brugg Kabies Services AG del Gruppo Terna, per la natura del loro business, non intrattengono rapporti con consumatori o utenti finali intesi come persone fisiche, le attività sono infatti indirizzate a clienti industriali. I clienti hanno la capacità di influenzare economicamente l'attività in quanto permettono al Gruppo di differenziare i propri ricavi aziendali e rappresentano pertanto un gruppo di stakeholder i cui interessi sono considerati e monitorati anche attraverso il Modello di Gestione degli stakeholder che include i clienti tra le categorie principali (di primo livello) della propria mappatura. In questo contesto, i **clienti** sono potenzialmente influenzati dall'attività di Terna in relazione al servizio fornito e pertanto sono anche **impattati positivamente dalla capacità del Gruppo di divulgare informazioni di qualità rispetto ai propri prodotti e servizi**, utilizzando i canali di comunicazione accessibili e disponibili al pubblico quali i siti internet aziendali, attraverso il costante aggiornamento dei cataloghi, delle proprie certificazioni e comunicando i principali progetti realizzati, in linea con i principi di trasparenza e rispetto che guidano le attività del Gruppo come sancito dal Codice Etico. L'approccio volto alla trasparenza e la divulgazione di informazioni di qualità determinano non solo un impatto positivo nei confronti dei clienti, ma anche un'opportunità fondamentale in termini di maggiore attrattività sul mercato[86]. Per ciò che concerne l'impatto connesso a eventuali singoli incidenti di episodi di uso illecito dei dati personali dei clienti (per cui si intendono in via principale i rappresentanti delle società clienti come, ad esempio, i referenti degli uffici commerciali) si rimanda alla sezione dedicata al tema della riservatezza nel paragrafo "Forza lavoro".

GOVT
GOVS

La Corporate Governance e il successo sostenibile

In linea con i principi del Codice di Corporate Governance, che assegna al Consiglio di Amministrazione, tra gli altri, il compito di promuovere nelle forme più opportune, il dialogo con gli azionisti e gli altri stakeholder rilevanti per la Società, Terna adotta tutti i migliori strumenti per creare, mantenere e consolidare un rapporto di reciproca fiducia con i propri *stakeholder*, funzionale alla creazione di valore per l'Azienda, la società e l'ambiente.

Il sistema di governo societario è orientato alla creazione di valore per gli azionisti, nella consapevolezza della rilevanza sociale delle attività del Gruppo. Inoltre, lo stesso è sostanzialmente in linea con i principi contenuti nel Codice di Corporate Governance delle Società quotate, cui Terna ha aderito il 27 gennaio 2021, con le raccomandazioni formulate dalla CONSOB in materia e, più in generale, con le best practice internazionali con cui la Società si confronta.

Il Sistema di corporate governance

L'Assemblea degli azionisti del 9 maggio 2023 ha deliberato la nomina del Consiglio di Amministrazione, prevedendo una composizione di 13 membri, il cui mandato terminerà con l'approvazione del bilancio relativo all'esercizio 2025.

Il Consiglio di Amministrazione del 9 maggio 2023 ha nominato l'Amministratore Delegato, conferendole apposite deleghe, definendone contenuto, limiti ed eventuali modalità di esercizio. Le attività del Consiglio di Amministrazione sono coordinate dal Presidente e supportate dal Segretario.

Il Consiglio di Amministrazione presentava, sino al 23 ottobre 2024, i seguenti Comitati endo-consiliari, tutti con funzioni istruttorie, propositive e consultive, così da garantire un efficace svolgimento delle funzioni consiliari:

- Comitato per la Remunerazione;
- Comitato Controllo e Rischi e Sostenibilità;
- Comitato per le Nomine, Governance e Scenari;
- Comitato Operazioni con Parti Correlate.

A far data dal 23 ottobre 2024, al fine di rafforzare il presidio sui temi di sostenibilità e garantire l'integrazione della stessa con le tematiche di governance e con la strategia di lungo periodo, il Consiglio di Amministrazione ha deliberato di ridefinire la composizione dei Comitati come segue:

- Comitato Sostenibilità, Governance e Scenari;
- Comitato Controllo e Rischi;
- Comitato Remunerazione e Nomine;
- Comitato Operazioni con Parti Correlate.

Si precisa che la composizione degli Organi di Governance al 31 dicembre 2024 corrisponde a quella in forza alla data di approvazione del Relazione Finanziaria Annuale 2024, esposta nell'ambito del paragrafo "Organi Sociali" cui si rinvia.

Sulla scorta di quanto auspicato dalla legislazione speciale in materia di società quotate, lo Statuto di Terna ha introdotto una specifica disposizione volta ad agevolare la raccolta delle deleghe di voto presso gli azionisti dipendenti della Società stessa e delle sue controllate, favorendo in tal modo il relativo coinvolgimento nei processi decisionali assembleari (art. 11.1 dello Statuto sociale).

Alla data dell'Assemblea del 9 maggio 2023, non era stata notificata alla Società la costituzione di alcuna associazione di azionisti dipendenti. Di conseguenza, con riferimento al Consiglio di Amministrazione di Terna S.p.A., al momento non vi sono rappresentanze di dipendenti o lavoratori all'interno dello stesso.

Presenza di consiglieri indipendenti

Dettaglio Composizione del Consiglio di Amministrazione (numero e qualifica)

** Indipendenti ai sensi del TUF che ai sensi del Codice di Corporate Governance.*

Tra gli aspetti degni di nota si segnalano:

- una elevata partecipazione dei consiglieri alle riunioni del Consiglio e dei Comitati endo-consiliari;
- la presenza di obiettivi di sostenibilità nella remunerazione dell'Amministratore Delegato e dei dirigenti;
- la particolare attenzione ai temi ESG in occasione sia delle riunioni del Comitato Controllo e Rischi e Sostenibilità[67] e del Comitato per la Remunerazione sia di apposite sessioni di *induction* per l'intero Consiglio di Amministrazione. L'attenzione al tema della sostenibilità risulta altresì dalla diversa articolazione dei Comitati in seguito alla decisione del Consiglio di Amministrazione di Terna S.p.A. del 23 ottobre 2024 che ha deliberato di attribuire maggior spazio agli obiettivi ESG, ampliando le competenze del Comitato Governance e Scenari, rinominandolo "Comitato Sostenibilità, Governance e Scenari" e attribuendogli, appunto, le competenze in materia di Sostenibilità.

[67] Sino alla data del 23 ottobre 2024.

Competenze ed esperienze dei membri del Consiglio di Amministrazione

Gli amministratori di Terna sono dotati di adeguata competenza o professionalità (art. 2. Principio 5, Codice di Corporate Governance). Nello specifico, accanto a professionisti operanti nel campo legale e finanziario, vi sono profili dotati di esperienza nel settore ingegneristico, dell'energia e della gestione dei rischi. Il respiro internazionale è garantito, oltre che dalla presenza di componenti di nazionalità straniera, anche da membri che hanno maturato solide esperienze in contesti internazionali. Inoltre, le competenze informatiche sono possedute oltreché dall'Amministratore Delegato, da alcune professionalità operanti nel settore. Con particolare riferimento al tema della sostenibilità, vi sono profili dotati di esperienze e competenze in materia di investimenti sostenibili, risk management, digital innovation, cybersecurity e di governance, attinenti tra le altre anche agli impatti, rischi e opportunità rilevanti dell'impresa. Inoltre, al fine di garantire all'Organo opportune competenze e capacità in ambito ESG, lo stesso si avvale del ricorso a esperti o prendere parte a specifiche attività di *induction*.

Caratteristiche del funzionamento del Consiglio di amministrazione

Il Consiglio di Amministrazione di Terna, in coerenza con le previsioni statutarie e normative, riveste un ruolo centrale nel presidio della condotta etica dell'impresa e nell'assicurare che le attività del Gruppo si svolgano nel rispetto della legalità, della trasparenza e dell'integrità. In linea con i principi del Codice di Corporate Governance e in osservanza delle migliori prassi in materia, il Consiglio esercita le proprie responsabilità in modo da orientare la gestione aziendale verso obiettivi di successo sostenibile, integrando le dimensioni economica, sociale e ambientale nella definizione delle strategie e delle scelte operative.

Nell'ambito delle sue prerogative, il Consiglio esamina e approva il Piano Industriale di Terna e delle società del Gruppo, tenendo conto anche dei temi rilevanti per la creazione di valore nel lungo periodo, dell'evoluzione del contesto normativo e delle aspettative degli stakeholder. Inoltre, il Consiglio definisce gli obiettivi aziendali, le modalità di monitoraggio dei processi e l'analisi dei rischi, con l'obiettivo di garantire un bilanciamento tra sostenibilità, redditività e gestione dei rischi. Tra le sue responsabilità fondamentali rientrano anche l'approvazione del Codice Etico del Gruppo e delle principali politiche aziendali che definiscono e regolano i principi di condotta dell'impresa a tutti i livelli dell'organizzazione. Tali strumenti costituiscono il riferimento per garantire comportamenti coerenti con i valori di integrità, legalità e responsabilità sociale, e orientano l'azione quotidiana di tutti i collaboratori e stakeholder del Gruppo.

Il Consiglio approva inoltre il Modello di Organizzazione, Gestione e Controllo ai sensi del D.Lgs. 231/2001 e i successivi aggiornamenti, assicurandone la coerenza con l'evoluzione normativa e organizzativa della Società, nonché l'efficacia nel prevenire i reati presupposti. Il Modello 231 rappresenta uno degli strumenti fondamentali per la diffusione di una cultura aziendale improntata alla legalità, alla prevenzione dei rischi e alla responsabilizzazione diffusa. Il Consiglio riceve periodicamente informative sull'attuazione del Modello e, tramite i flussi informativi provenienti dall'Organismo di Vigilanza, ha la possibilità di valutare l'adeguatezza e il grado di applicazione del sistema adottato.

A supporto delle proprie responsabilità, il Consiglio riceve costantemente informazioni dall'Amministratore Delegato sull'andamento della gestione e sulle operazioni rilevanti, inclusi i soggetti coinvolti, le caratteristiche delle operazioni e gli eventuali rischi associati. Il Consiglio definisce le linee guida del Sistema di Controllo Interno e di Gestione dei Rischi, valutandone annualmente l'adeguatezza e l'efficacia, anche alla luce del profilo di rischio del Gruppo. Tale attività è svolta con il supporto del Chief Executive Officer, del Comitato Controllo e Rischi e del Collegio Sindacale, che esercita funzioni di vigilanza sull'osservanza della legge, dello Statuto e dei principi di corretta amministrazione. Il Collegio verifica inoltre l'adeguatezza dell'assetto organizzativo, amministrativo e contabile della Società e del Gruppo, e il funzionamento del sistema di controllo interno.

Infine, a tutela della correttezza e della trasparenza nella gestione delle informazioni, il Consiglio ha adottato una procedura specifica per la gestione e comunicazione delle informazioni societarie, con particolare attenzione alle informazioni privilegiate. Questo sistema contribuisce a rafforzare la fiducia degli stakeholder e a garantire un comportamento aziendale coerente con i principi etici e di conformità normativa.

Comitati interni al Consiglio di Amministrazione

Comitato Controllo e Rischi

Al Comitato sono attribuite le competenze previste dal Codice di Corporate Governance. Ha funzioni consultive e propositive di supporto al Consiglio nelle valutazioni e decisioni relative al sistema di controllo interno e di gestione dei rischi. A tal proposito, si specifica che il Comitato è preposto alla sorveglianza dei rischi aziendali, tra cui rientrano anche i rischi di natura ESG. Ne verifica periodicamente l'adeguatezza rispetto alle caratteristiche dell'impresa e al profilo di rischio assunto, oltre che l'efficacia. Valuta, unitamente al Dirigente Preposto alla redazione dei documenti contabili societari, sentiti il revisore legale e il Collegio Sindacale, il corretto utilizzo dei principi contabili e la loro omogeneità ai fini della redazione del bilancio consolidato. Valuta, inoltre, l'idoneità ed esamina il contenuto dell'informazione periodica, finanziaria e non finanziaria, rilevante ai fini del Sistema di Controllo Interno e Gestione dei Rischi (SCIGR), a rappresentare correttamente il modello di business, le strategie della Società e del Gruppo. Esamina i contenuti della Rendicontazione Consolidata di Sostenibilità sottoposta annualmente al Consiglio di Amministrazione. Riferisce al Consiglio di Amministrazione, almeno in occasione dell'approvazione della relazione finanziaria annuale e della relazione finanziaria semestrale, sull'attività svolta e sull'adeguatezza del SCIGR.

Al 31 dicembre 2024, il Comitato Controllo e Rischi risulta avere la seguente composizione:

- Marco Giorgino (Presidente)
- Enrico Tommaso Cucchiani (indipendente)
- Karina Audrey Litvack (indipendente)
- Jean-Michel Aubertin (indipendente)
- Francesco Renato Mele (non indipendente)

Si segnala che, prima del 23 ottobre 2024, data in cui è avvenuta una riorganizzazione dei comitati endo-consiliari, il presente Comitato era denominato "Comitato Controllo e Rischi e Sostenibilità", con particolari competenze in ambito ESG, le quali, attualmente, risultano anche in capo al Comitato Sostenibilità, Governance e Scenari. Il Comitato Controllo e Rischi e Sostenibilità, prima del 23 ottobre 2024, si è riunito 10 volte, di cui 2 congiuntamente con il Comitato per le Operazioni con parti correlate.

Dalla data di costituzione fino al 31 dicembre 2024, il Comitato si è riunito 2 volte, toccando, tra gli altri, i seguenti aspetti di sostenibilità:

- informativa in merito agli aggiornamenti normativi relativi alla Corporate Sustainability Reporting Directive (CSRD), al progetto di adeguamento alla CSRD del Gruppo Terna, nonché alla nuova struttura della Relazione sulla gestione e alla relativa formalizzazione dei processi, procedure e sistemi di controllo.

Comitato Sostenibilità, Governance e Scenari

Al Comitato sono attribuite competenza nell'ambito della sostenibilità, con particolare riferimento:

- all'esame e alla valutazione delle politiche di sostenibilità con l'obiettivo di assicurare la creazione di valore nel lungo termine a beneficio degli azionisti, tenendo conto degli interessi degli altri stakeholder rilevanti per Terna, anche ai fini dell'esame e dell'approvazione del piano industriale della Società e del Gruppo;
- alla definizione degli indirizzi e dei piani di sostenibilità e della matrice di materialità che individua i temi più rilevanti per il Gruppo e per gli stakeholder alla luce delle strategie della Società e del Gruppo stesso;
- al monitoraggio periodico delle modalità di attuazione dei piani di sostenibilità e il conseguimento dei relativi obiettivi, oltre che l'inclusione della Società negli indici di sostenibilità.

Al Comitato sono inoltre attribuite competenze relative al sistema di Corporate Governance; monitora infatti l'evoluzione della normativa di legge e della best practice nazionale e internazionale in materia, oltre che l'allineamento del governo societario della Società e del Gruppo alle stesse.

Infine, il Comitato provvede anche alla raccolta di informazioni, analisi e approfondimenti sugli scenari di riferimento utili alla miglior comprensione dei trend globali che possono impattare sulle strategie aziendali.

Teleborsa: distribution and commercial use strictly prohibited

Al 31 dicembre 2024 il Comitato ha, a partire dal 23 ottobre 2024, la seguente composizione:

- Igor De Biasio (indipendente)
- Jean-Michel Aubertin (indipendente)
- Qinjing Shen (non indipendente)
- Simona Signoracci (indipendente)
- Anna Chiara Svelto (indipendente)

Si segnala che, a partire dal 23 ottobre 2024, data in cui è avvenuta una riorganizzazione dei comitati endo-consiliari, il presente comitato ha ereditato responsabilità e competenze in materia di sostenibilità dal Comitato precedentemente nominato "Comitato Controllo Rischi e Sostenibilità".

Dalla data di costituzione fino al 31 dicembre 2024, il Comitato si è riunito 4 volte, toccando, tra gli altri, i seguenti aspetti di sostenibilità:

- approfondimento, attraverso una specifica sessione di induction, degli scenari energetici italiani;
- approfondimento dell'evoluzione normativa del Reporting ESG, dell'ambito di applicazione e delle principali novità della Corporate Sustainability Reporting Directive (CSRD), incentrando l'attenzione sul percorso di adeguamento che l'Azienda ha intrapreso, confrontandolo con le altre prassi aziendali.

Comitato Remunerazione e Nomine

Al Comitato sono attribuite le competenze previste dal Codice di Corporate Governance. Svolge compiti di natura propositiva e consultiva nei confronti del Consiglio di Amministrazione, tra cui:

- valutare e decidere in merito alla dimensione e alla composizione del Consiglio stesso, oltre che a eventuali cooptazioni;
- coadiuvare il Consiglio nell'elaborazione della politica per la remunerazione degli Amministratori, dei componenti del Collegio Sindacale e dei dirigenti con responsabilità strategiche e nella predisposizione della Relazione sulla politica in materia di remunerazione e sui compensi corrisposti prevista dall'art. 123-ter del TUF;
- presentare proposte o esprimere pareri per la remunerazione degli Amministratori esecutivi e degli altri Amministratori che ricoprono particolari cariche, nonché sulla fissazione degli obiettivi di performance correlati alla componente variabile di tale remunerazione che includono indicatori relativi ai fattori ESG;
- elaborare, sottoporre al Consiglio di Amministrazione e monitorare l'applicazione di sistemi di incentivazione (inclusi i piani di azionariato) rivolti agli Amministratori esecutivi di Terna e/o a dirigenti con responsabilità strategiche e/o ad altri dirigenti della Società e/o del Gruppo.

Al 31 dicembre 2024, il Comitato Remunerazione e Nomine, operativo dal 23 ottobre 2024, risulta avere la seguente composizione:

- Enrico Tommaso Cucchiani (Presidente, indipendente);
- Gian Luca Gregori (indipendente)
- Regina Corradini D'Arienzo (non indipendente)
- Karina Audrey Litvack (indipendente)
- Simona Signoracci (indipendente)

Si segnala che, a partire dal 23 ottobre 2024, data in cui è avvenuta una riorganizzazione dei comitati endo-consiliari, il presente comitato ha ereditato responsabilità e competenze in materia di nomine dal comitato precedentemente denominato Comitato Nomine, Governance e Scenari. Il Comitato Nomine, Governance e Scenari, prima del 23 ottobre 2024, si è riunito 13 volte.

Dalla data di costituzione fino al 31 dicembre 2024, il Comitato non si è riunito.

65E

Teleborsa: distribution and commercial use strictly prohibited

Comitato Operazioni con Parti Correlate

Al Comitato sono attribuiti compiti e poteri istruttori e consultivi nelle valutazioni e decisioni relative alle Operazioni con Parti Correlate, sia di maggiore rilevanza che di minore rilevanza, indicate nella "Procedura Operazioni con Parti Correlate" di Terna. Al Comitato sono inoltre attribuiti compiti e poteri istruttori e consultivi in merito a eventuali proposte di modifica della citata Procedura. Infine, il Comitato riceve flussi periodici sulle Operazioni con Parti Correlate escluse dall'applicazione della Procedura (anche se di minore rilevanza) per verificarne la corretta applicazione.

Il Comitato al 31 dicembre 2024 ha la seguente composizione:

- Anna Chiara Svelto (Presidente, indipendente)
- Angelica Krystle Donati (indipendente)
- Marco Giorgino (indipendente)
- Gian Luca Gregori (indipendente)
- Simona Signoracci (indipendente) – a partire dall'8 maggio 2024.

Il Collegio Sindacale

Il Collegio Sindacale in carica, nominato dall'Assemblea ordinaria del 9 maggio 2023, ha un mandato destinato a scadere in occasione dell'approvazione del bilancio dell'esercizio 2025.

In forza di quanto deliberato dalla suddetta Assemblea sulla base delle due liste presentate, il Collegio Sindacale è risultato così composto: Mario Matteo Busso (Presidente del Collegio Sindacale eletto dalla lista di minoranza presentata da un raggruppamento di azionisti formato da società di gestione del risparmio e altri investitori istituzionali come elencati nell'apposito comunicato stampa della Società relativo alla pubblicazione delle Liste del 14 aprile 2023), Lorenzo Pozza e Antonella Tornei (Sindaci effettivi eletti dalla lista di maggioranza formulata da CDP Reti S.p.A.).

Sono altresì stati eletti Sindaci supplenti: Barbara Zanardi (indicata dalla lista di minoranza presentata da un raggruppamento di azionisti formato da società di gestione del risparmio e altri investitori istituzionali come elencati nell'apposito comunicato stampa della Società relativo alla pubblicazione delle Liste del 14 aprile 2023), Antonello Lillo e Lucrezia Iuliano (indicati dalla lista di maggioranza presentata da CDP Reti S.p.A.).

I Sindaci eletti rappresentano entrambe le liste presentate per l'indicata Assemblea. Ulteriori informazioni in merito alle liste dei candidati presentate e al risultato delle votazioni sono disponibili sul sito Internet della Società www.terna.it nell'ambito della sezione Governance – Assemblea degli azionisti. A seguito delle dichiarazioni rese per la nomina, delle operazioni di scrutinio e a conclusione delle operazioni di voto, un componente effettivo è risultato eletto dai soci di minoranza non collegati, neppure indirettamente, con i soci che hanno presentato o votato la lista risultata prima per numero di voti.

Dalla nomina, avvenuta con l'Assemblea del 9 maggio 2023, la composizione del Collegio Sindacale è rimasta invariata.

Il Collegio Sindacale svolge le tipiche attività di vigilanza che sono previste dall'ordinamento nazionale per il Collegio Sindacale. Nello specifico, tale Organo si occupa, tra gli altri, di vigilare sull'osservanza dei principi di corretta amministrazione nello svolgimento delle attività sociali, sull'adeguatezza della struttura organizzativa, del Sistema di Controllo Interno e di Gestione dei Rischi e del processo di informativa finanziaria e di revisione legale. In virtù dei nuovi aggiornamenti normativi in ambito di Rendicontazione Consolidata di Sostenibilità, anche per il Collegio Sindacale è stato previsto un ampliamento di ruolo e compiti, in linea con la relativa politica interna del Gruppo Terna. In particolare, lo stesso è informato periodicamente sui flussi informativi che riguardano la Rendicontazione Consolidata di Sostenibilità e prende parte alle riunioni del Comitato Controllo e Rischi (fino al 23 ottobre denominato Comitato Controllo Rischi e Sostenibilità), ivi incluse le modalità di gestione che il Gruppo Terna ha adottato al fine di prevenire, mitigare e correggere gli impatti, affrontare i rischi e/o perseguire opportunità rilevanti. Di seguito la composizione del Collegio Sindacale relativa ai soli sindaci effettivi.

658

Teleborsa: distribution and commercial use strictly prohibited

COMPOSIZIONE DEL COLLEGIO SINDACALE AL 31 DICEMBRE 2024

	UNITÀ	
Uomini	%	66,6
Donne	%	33,3
Di età inferiore a 30 anni	%	
Tra i 30 e i 50 anni	%	-
Oltre i 50 anni	%	100

Il Collegio Sindacale, in linea con quanto previsto dalla regolamentazione in materia di autodisciplina, nell'ambito dei compiti a esso attribuiti dalla legge, ha verificato la corretta applicazione dei criteri definiti e delle procedure di accertamento adottate dal Consiglio per la valutazione di indipendenza dei propri membri non esecutivi.

Il Collegio Sindacale ha riferito la sussistenza del requisito dell'indipendenza in capo a tutti i Sindaci, ai sensi dell'art. 2, Raccomandazione 9, del Codice di Corporate Governance, verificata nel corso della riunione del 7 febbraio 2024 in applicazione del Regolamento del Collegio Sindacale.

Competenze ed esperienze dei membri del Collegio Sindacale

Il Collegio Sindacale, alla stregua di quanto già esposto con riferimento al Consiglio di Amministrazione, è coinvolto in uno specifico programma di induction, che vede l'approfondimento di tematiche legate al settore di attività in cui opera la Società, alle dinamiche aziendali e alla loro evoluzione, nonché al quadro normativo e autoregolamentare di riferimento al fine di garantire ai Sindaci e agli Amministratori un'adeguata conoscenza. Tale programma nell'arco del 2024 ha visto anche l'approfondimento di tematiche legate alla sostenibilità, quali l'approfondimento delle novità normative introdotte dalla CSRD. Inoltre, il Collegio Sindacale, oltre ad avvalersi di esperti in materia di sostenibilità qualora ritenuto necessario, vanta delle competenze in ambito risk management, climate change, rendicontazione di sostenibilità, diversità di genere, governance, attinenti tra le altre anche agli impatti, rischi e opportunità rilevanti dell'impresa.

GOV-1 GOV-2 GOV-5

La governance degli impatti, rischi e opportunità

Il Consiglio di Amministrazione svolge i compiti e le funzioni raccomandati dal Codice di Corporate Governance e in particolare definisce le strategie e ne monitora l'attuazione, approvando il piano industriale della Società e del Gruppo a essa facente capo, anche in base all'analisi dei temi rilevanti per la generazione di valore nel lungo termine, nonché individuando la natura e il livello di rischio compatibile con gli obiettivi strategici, nell'ottica del perseguimento del successo sostenibile. Il Consiglio di Amministrazione, inoltre, esamina preventivamente o autorizza le operazioni poste in essere dalla Società direttamente o per il tramite di società controllate che siano qualificabili come "significative". In materia di ESG, il Consiglio di Amministrazione, con il supporto dei Comitati competenti e delle alte figure manageriali, ha funzioni istruttorie, propositive e consultive in merito agli obiettivi di sostenibilità, supervisionando le attività promosse dal Gruppo volte al loro conseguimento e monitorandone costantemente i risultati.

Inoltre, con riferimento alle responsabilità in materia di sostenibilità del Consiglio di Amministrazione, si specifica che lo stesso, attraverso i propri Comitati interni dedicati, ovvero il Comitato Sostenibilità, Governance e Scenari e il Comitato Controllo e Rischi, sorveglia gli impatti, i rischi e le opportunità di sostenibilità emersi come rilevanti anche dall'Analisi di Doppia Rilevanza. Nello specifico, al Comitato Sostenibilità, Governance e Scenari è stata fornita informativa circa il processo di Analisi di Doppia Rilevanza del Gruppo e dei relativi impatti, rischi e opportunità emersi come rilevanti, dettagliati all'interno della sezione" La Doppia Rilevanza" cui si rinvia. A tal proposito, si specifica che prima del 23 ottobre 2024, data in cui è avvenuta una riorganizzazione dei Comitati endo-consiliari, tale informativa veniva fornita al Comitato Controllo e Rischi e Sostenibilità. Inoltre, la responsabilità del Consiglio di Amministrazione in materia di sostenibilità si riflette anche nelle politiche ambientali, sociali e di governance adottate dal Gruppo le quali sono sottoposte ad approvazione formale dello stesso organo.

Il Gruppo Terna, infatti, consapevole della fondamentale importanza di un costante e proficuo flusso informativo indirizzato al Consiglio di Amministrazione con riferimento agli impatti, ai rischi e alle opportunità rilevanti, e alla conseguente gestione degli stessi attraverso politiche e azioni, mette in atto un approccio che permette al Consiglio di Amministrazione, attraverso i Comitati competenti, di essere sempre informato circa le questioni di sostenibilità rilevanti per il Gruppo.

GSP

Teleborsa: distribution and commercial use strictly prohibited

In generale, infatti, i Comitati competenti in materia di sostenibilità si riuniscono periodicamente, interfacciandosi, ove necessario, con le altre figure manageriali per aggiornamenti e approfondimenti. Con riferimento al 2024, si segnala che tali Comitati hanno ricevuto tali aggiornamenti e approfondimenti con cadenza almeno trimestrale. Ciò permette di presentare con cadenza periodica un report informativo indirizzato al Consiglio di Amministrazione, che contiene, tra le altre, le analisi effettuate relativamente, in modo che il Consiglio possa tenerne conto nel controllare la strategia del Gruppo Terna e nelle decisioni in merito a operazioni importanti. A livello di strutture aziendali, invece, l'identificazione e la gestione di temi e progetti di sostenibilità e la conseguente definizione di adeguate Politiche, Linee guida e Istruzioni Operative sono in capo alla Direzione denominata "Strategia, Digitale e Sostenibilità", che periodicamente riferisce al "Comitato Sostenibilità, Governance e Scenari" interno al Consiglio di Amministrazione. Si specifica che nel 2024 tale informativa è stata condotta con cadenza almeno trimestrale. In particolare, la struttura ha compiti sia di pianificazione strategica, monitoraggio, reporting, relazioni con le agenzie internazionali di rating di sostenibilità e con gli investitori ESG sia di sviluppo di progetti e relative azioni attuative, funzionali al raggiungimento degli obiettivi strategici del Gruppo.

In linea con le indicazioni del Codice di Corporate Governance[88] di Borsa Italiana e delle best practice nazionali e internazionali[89], il Gruppo ha adottato uno specifico **Sistema di Controllo Interno e di Gestione dei Rischi (Sistema** o **SCIGR**) costituito dall'insieme della cultura, delle capacità, delle regole, delle procedure e delle pratiche aziendali e delle strutture organizzative volte a definire un sistema di *accountability* per l'effettiva ed efficace identificazione, misurazione, gestione, mitigazione e monitoraggio dei principali rischi, al fine di contribuire al successo sostenibile del Gruppo, mantenendo di conseguenza alta la fiducia degli stakeholder con riferimento al governo e al controllo del Gruppo medesimo.

Il Sistema fornisce uno strumento gestionale per una conduzione dell'impresa coerente con gli obiettivi della Società e colloca il processo di gestione dei rischi al centro della catena del valore, a partire da elementi fondativi quali la mission, la vision, i valori e il contesto di riferimento, integrandoli nella definizione e sviluppo della strategia e delle performance, al fine di supportare i processi decisionali attraverso l'esplicitazione degli elementi di rischio e incertezza e la definizione di risposte consapevoli. Uno degli elementi che costituiscono il Sistema è il **Sistema di Gestione dei Rischi,** anch'esso allineato alle raccomandazioni del Codice di Corporate Governance per le Società Quotate e alle best practice internazionali.

La Governance dei rischi prevede, a supporto delle valutazioni e decisioni del Consiglio di Amministrazione in merito al Sistema di Controllo Interno e di Gestione dei Rischi, il contributo di uno specifico Comitato endoconsiliare, composto da consiglieri indipendenti – il **Comitato Controllo e Rischi** – che si interfaccia periodicamente con le strutture aziendali più direttamente coinvolte in tali processi.

Il Comitato ha, inoltre, un rapporto diretto con il **Chief Risk Officer (CRO)**, la cui nomina è approvata dal Consiglio di Amministrazione su proposta dell'Amministratore Delegato, previo parere del Comitato, con il compito di supportare il Vertice aziendale nell'efficace implementazione e gestione del processo di Risk Management a livello di Gruppo, nonché di garantire un adeguato coordinamento delle strutture preposte alle attività di controllo. Il CRO riferisce all'Amministratore Delegato e al Comitato i risultati dell'attività di Risk Management ed è supportato operativamente dalla struttura Enterprise Risk Management, a suo diretto riporto con un ruolo di coordinamento trasversale nel Modello di Risk Governance di seguito descritto.

Nel Sistema di Controllo Interno e di Gestione dei Rischi, infine, la Direzione Audit ha il compito di verificare il funzionamento e l'adeguatezza del Sistema stesso, e di verificare che lo stesso sia coerente con le linee di indirizzo definite dal Consiglio di Amministrazione. L'attività di audit è estesa a tutti i processi aziendali (incluso quello di Gestione dei Rischi), con una particolare attenzione ai processi di maggior rilievo per la loro incidenza sul valore della Società e per il grado di rischio che essi hanno sugli obiettivi aziendali o per l'influenza su aspetti di interesse trasversale all'Azienda.

Da un punto di vista operativo, la gestione dei rischi viene applicata in tutta l'Azienda secondo un approccio strutturato e sistemico, e prevede un **Modello di Risk Governance (Modello)**, che definisce ruoli e responsabilità dei principali attori coinvolti nel Sistema di Gestione dei Rischi integrando, negli assetti organizzativi aziendali, i tre livelli di controllo previsti dal Codice di Corporate Governance, ciascuno con diversi obiettivi e specifiche responsabilità associati:

[88] In particolare, si fa riferimento all'Art. 1 – Ruolo dell'organo di amministrazione – Raccomandazioni – c) *definisce la natura e il livello di rischio compatibile con gli obiettivi strategici della società, includendo nelle proprie valutazioni tutti gli elementi che possono assumere rilievo nell'ottica del successo sostenibile della società; d) definisce il sistema di governo societario della società e la struttura del gruppo a essa facente capo e valuta l'adeguatezza dell'assetto organizzativo, amministrativo e contabile della società e delle controllate aventi rilevanza strategica, con particolare riferimento al sistema di controllo interno e di gestione dei rischi.*

[89] Modello ERM emesso dall'organismo americano C.O.S.O. "Committee of Sponsoring Organizations of the Treadway Commission".

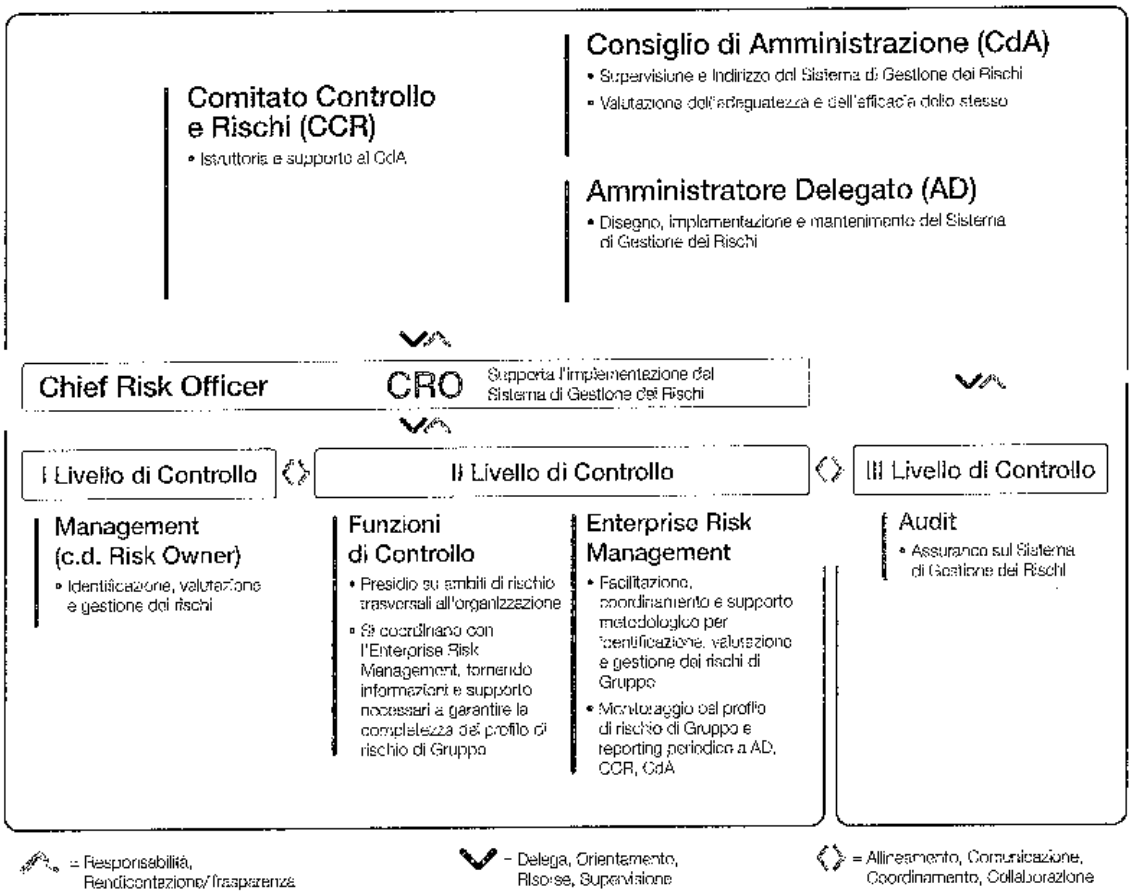
Teleborsa: distribution and commercial use strictly prohibited

- **Primo livello di controllo:** è il primario responsabile dell'identificazione, valutazione e gestione dei rischi afferenti alle proprie aree di competenza;
- **Secondo livello di controllo:** è affidato a strutture organizzative (es. Health & Safety, Compliance, Presidio 262, Tutela dell'Ambiente, Fraud Management, Privacy, Cybersecurity, etc.) autonome, indipendenti e distinte rispetto alle strutture aziendali incaricate delle attività operative. Presidiano i cambiamenti normativi esterni e l'evoluzione delle best practice di riferimento e concorrono alla definizione delle politiche di governo e del processo di gestione delle categorie di rischi di competenza. Al contempo, forniscono supporto al Primo livello di controllo per la loro implementazione, anche attraverso la progettazione e l'erogazione di attività di *awareness* e *training*;
- **Terzo livello di controllo:** prerogativa dell'Audit, fornisce una valutazione indipendente sul disegno e sul funzionamento dello SCIGR (c.d. *assurance*). È caratterizzato dal più alto grado di indipendenza interna all'organizzazione, gerarchica e funzionale.

Una buona governance dei rischi deve garantire una visione olistica e coordinata di tutti gli attori coinvolti, affinché gli stessi collaborino, identifichino e valutino i rischi, identificandone i possibili impatti e, conseguentemente, abbiano a disposizione le informazioni giuste per prendere le decisioni più appropriate.

I diversi elementi del Sistema di Gestione dei Rischi danno l'idea della complessità del Modello e di come i soggetti e le strutture coinvolte, contribuiscano, ciascuno con le proprie specificità, a quella visione olistica su citata, operando in sinergia e secondo un approccio strutturato e organizzato.

A tal fine, Terna mette in atto procedure e processi volti a coordinare le relazioni e le attività dei soggetti che esercitano il controllo ai diversi livelli. Particolare rilevanza al riguardo assume il **coordinamento fra le attività delle strutture di controllo di secondo livello,** per minimizzare duplicazioni di attività e massimizzare l'efficienza del Sistema di Gestione dei Rischi, nel rispetto dei rispettivi ruoli e responsabilità, e dei necessari requisiti d'indipendenza.



664

Teleborsa: distribution and commercial use strictly prohibited

Il Modello, quindi, prevede una gestione dei rischi diffusa nell'organizzazione in quanto coinvolge una pluralità di organi e strutture aziendali a ogni livello dell'organizzazione, come di seguito illustrato:

Il Modello di Risk Governance

Con riferimento alle modalità di gestione degli impatti e delle opportunità, si prega di far riferimento a quanto esposto nell'ambito del paragrafo "La Doppia Rilevanza".

Nel 2024 Terna, nell'ambito del progetto aziendale di adeguamento alla nuova normativa in materia di reporting di sostenibilità, ha avviato la definizione e la progressiva implementazione di un modello di controllo finalizzato all'istituzione e il mantenimento di un Sistema di Controllo Interno sull'Informativa di Sostenibilità (SCIIS), volto a presidiare l'attendibilità di tale informativa e la conformità della stessa agli standard di rendicontazione previsti a livello europeo (ESRS) e alle specifiche adottate a norma dell'articolo 8, paragrafo 4, del regolamento UE 2020/852 (c.d. Tassonomia UE).

Il SCIIS ha inoltre l'obiettivo di supportare l'Amministratore Delegato e il Dirigente Preposto alla redazione dei documenti contabili societari del Gruppo Terna nel rilasciare le attestazioni al Mercato in merito alla conformità della Rendicontazione Consolidata di Sostenibilità del Gruppo Terna.

Il SCIIS è parte integrante del Sistema di Controllo Interno e Gestione dei Rischi del Gruppo Terna, costituito dall'insieme delle regole, delle procedure e delle strutture organizzative che, attraverso un adeguato processo di identificazione, misurazione, gestione e monitoraggio dei principali rischi, consentono una gestione aziendale corretta e coerente con gli obiettivi prefissati dalla Società.

662

Teleborsa: distribution and commercial use strictly prohibited

Il modello di controllo sull'informativa di sostenibilità è basato, sotto il profilo metodologico, sul framework elaborato dal Committee of Sponsoring Organizations of the Treadway Commission (c.d. "CoSO Report") che, a marzo 2023, ha pubblicato una specifica guida supplementare dedicata al reporting di sostenibilità, intitolata "Achieving Effective Internal Control of Sustainability Reporting (ICSR)".

Coerentemente con i principi del CoSo Report, il processo di gestione del SCIIS è strutturato nelle seguenti principali fasi:

- Definizione del perimetro di riferimento (Scoping);
- Analisi dei rischi e dei controlli;
- Monitoraggio;
- Valutazione e reporting.

L'individuazione delle aree a maggior rischio per l'informativa di sostenibilità viene effettuata nell'ambito della fase di scoping attraverso un'analisi di rischio/rilevanza dei dati (KPI) inclusi nella Rendicontazione Consolidata di Sostenibilità del Gruppo Terna, sulla base dei driver di valutazione che tengono conto di fattori di rischio endogeni ed esogeni.

Per i KPI valutati a maggior rischio/rilevanza e per le società del Gruppo che a questi contribuiscono in maniera significativa è prevista, secondo un approccio top-down e risk based, un'ulteriore analisi di rischio afferente i processi aziendali da cui tali KPI traggono origine.

In particolare, l'analisi dei rischi a livello di processo consiste nell'identificare gli eventi che possono compromettere le caratteristiche qualitative (pertinenza, rappresentazione fedele, comparabilità, verificabilità e comprensibilità) che i dati e le informazioni presentate nella Rendicontazione Consolidata di Sostenibilità redatta conformemente agli standard ESRS, devono soddisfare.

In tale ambito, le analisi svolte hanno evidenziato le seguenti principali categorie di rischi: i) completezza e integrità dei dati; ii) disponibilità e tempestività dei dati; iii) tracciabilità e ripercorribilità dei dati; iv) autorizzazione dei dati e delle informazioni; v) conformità alla normativa di riferimento.

Al fine del corretto presidio di tali rischi sono previsti le seguenti principali tipologie di controlli:

- controlli approvativi e di management review;
- controlli di riconciliazione dei dati;
- controlli di coerenza della Rendicontazione Consolidata di Sostenibilità rispetto agli standard di riferimento ESRS;
- controlli sugli accessi logici e di tracciabilità delle operazioni effettuate sul sistema utilizzato per la Rendicontazione Consolidata di Sostenibilità;
- controlli di coerenza attraverso analisi dello scostamento dei dati rispetto alle serie storiche disponibili.

Si evidenzia inoltre che il processo di raccolta e consolidamento dei dati e delle informazioni di sostenibilità e di redazione della Rendicontazione Consolidata di Sostenibilità è supportato dall'utilizzo di un applicativo informatico che rappresenta un ulteriore fattore intrinseco di mitigazione dei rischi abilitando flussi di raccolta dati strutturati, controlli automatici e dashboard di monitoraggio.

Un ulteriore elemento generale di mitigazione rischi sulla Rendicontazione Consolidata di Sostenibilità è rappresentato dall' "ambiente di controllo" del Gruppo Terna, costituito dall'insieme dei "valori etici" e culturali, dal modello di governance e organizzativo, dallo stile di Leadership esercitato dal Vertice aziendale e dal Management e dalle politiche di gestione del personale, finalizzati a stabilire un contesto generale volto ad assicurare che le attività di processo siano eseguite e controllate in accordo con i principi e gli obiettivi definiti dal management.

Il SCIIS prevede una fase di valutazione periodica di adeguatezza del disegno ed effettiva applicazione dei controlli che lo compongono. I risultati di tali valutazioni vengono analizzati e valutati dal management al fine di definire, se del caso, le azioni correttive da attuare nei processi di competenza. In tale ambito, è stato attuato un sistema di attestazioni "a catena" da parte del management di Terna e degli organi amministrativi delegati delle società consolidate in merito

663

Teleborsa: distribution and commercial use strictly prohibited

alla conformità agli standard di rendicontazione dei dati e delle informazioni di sostenibilità da questi forniti ai fini della redazione della Rendicontazione Consolidata di Sostenibilità, alle specifiche del Regolamento 2020/852 (c.d. Tassonomia UE) e alla progressiva e continua adozione di adeguati processi di controllo interno.

A partire dal terzo trimestre del 2024 sono stati avviati flussi informativi specifici verso gli Organi di amministrazione, direzione e controllo e la società di revisione al fine di illustrare lo stato di avanzamento del programma di Terna di adeguamento alla Direttiva CSRD ivi incluse le attività di sviluppo dei processi di controllo interno in relazione alla Rendicontazione Consolidata di Sostenibilità.

Il processo di due diligence del Gruppo Terna

GOV-4

Il processo di due diligence è fondamentale per il Gruppo Terna, in quanto permette di identificare e gestire i rischi e le opportunità legati alle proprie operazioni e alla catena del valore. Questo approccio assicura che l'Azienda agisca in modo responsabile e sostenibile, nel rispetto delle normative vigenti e degli standard internazionali. Le Linee guida OCSE per le imprese multinazionali sulla condotta aziendale responsabile e i Principi guida delle Nazioni Unite su imprese e diritti umani forniscono il quadro di riferimento per la due diligence, rappresentando la base delle attività svolte dal Gruppo.

La tabella di seguito fornisce una sintesi dei principali aspetti relativi alla due diligence richiamati nella Rendicontazione Consolidata di Sostenibilità.

ELEMENTI FONDAMENTALI DEL DOVERE DI DILIGENZA	PARAGRAFI DELLA RENDICONTAZIONE CONSOLIDATA DI SOSTENIBILITÀ 2024
A) Integrare il dovere di diligenza nella governance, nella strategia e nel modello aziendale	ESRS 2 GOV-2 ESRS 2 GOV-3 ESRS 2 SBM-3 (compresi i focus relativi a questioni di sostenibilità specifiche E1-E4-S1-S2-S3-S4)
B) Coinvolgere i portatori di interessi in tutte le fasi fondamentali del dovere di diligenza	ESRS 2 MDR-P ESRS 2 GOV-2 ESRS 2 SBM-2 ESRS 2 IRO-1 (compresi i focus relativi a questioni di sostenibilità specifiche E1-E4-E5)
C) Individuare e valutare gli impatti negativi	ESRS 2 IRO-1 (compresi i focus relativi a questioni di sostenibilità specifiche E1-E4-E5) ESRS 2 SBM-3 (compresi i focus relativi a questioni di sostenibilità specifiche E1-E4-S1-S2-S3-S4)
D) Intervenire per far fronte agli impatti negativi	ESRS 2 MDR-A ESRS E1-3 ESRS E4-3 ESRS E5-2 ESRS S1-4 ESRS S2-4 ESRS S3-4 ESRS S4-4
E) Monitorare l'efficacia degli interventi e comunicare	ESRS 2 MDR-T ESRS E1-4 ESRS E4-4 ESRS E5-3 ESRS S1-5 ESRS S2-5 ESRS S3-5 ESRS S4-5

666

Teleborsa: distribution and commercial use strictly prohibited

Il sistema di remunerazione

In coerenza con il modello di governance del Gruppo Terna, al Consiglio di Amministrazione spetta la definizione, l'aggiornamento degli obiettivi e l'approvazione dei risultati aziendali dei sistemi di incentivazione ai quali è connessa la determinazione della remunerazione variabile dell'Amministratore Delegato e Direttore Generale, oltre alla definizione dei criteri generali per la remunerazione dei Dirigenti con Responsabilità Strategiche.

In linea con le raccomandazioni contenute nel Codice di Corporate Governance, per quanto riguarda le tematiche di remunerazione, il Consiglio di Amministrazione è supportato dal Comitato Remunerazione e Nomine composto da Amministratori non esecutivi indipendenti, aventi funzioni propositive e consultive in materia.

Politica di remunerazione

Il Gruppo Terna definisce la sua Politica di remunerazione in linea con le aspettative degli stakeholder, le best practice di mercato e in ottemperanza ai principi e ai criteri riportati nel Codice di Corporate Governance, assicurando il massimo allineamento tra azionisti e management sia con riguardo alla creazione di valore che al profilo di rischio definito.

Il Consiglio di Amministrazione verifica che l'Amministratore Delegato e Direttore Generale sia destinatario di una Politica in linea con i principi definiti nel Codice di Corporate Governance e in particolare che una parte significativa della remunerazione sia legata al raggiungimento di specifici obiettivi di performance, anche di natura non economica (es. indicatori ESG). Si ricorda inoltre che nel pay-mix definito l'incentivo di lungo termine ha sempre un maggior peso dell'incentivo di breve termine.

Analoghi principi ispirano anche la Politica per i Dirigenti con Responsabilità Strategiche.

A sostegno del conseguimento degli obiettivi strategici e delle performance aziendali, tra cui sono inclusi anche **obiettivi di natura ESG**, sono stati realizzati sistemi di incentivazione variabile diversificati per tipologia di figure aziendali:

- **STI *(Short Term Incentive)*** per il management aziendale, che collega l'importo di premi individuali:
  - al grado di raggiungimento di obiettivi quantitativi, sia di livello aziendale sia di tipo individuale, parte dei quali riconducibili agli impegni ambientali e sociali del Gruppo (es. indice di sicurezza sul lavoro);
  - alla valutazione qualitativa della performance, basata sui comportamenti manageriali.
- **LTI *(Long Term Incentive)***, piani di incentivazione di lungo termine, legati a obiettivi aziendali pluriennali, anche di sostenibilità, per i manager che ricoprono le funzioni più rilevanti, ai fini del conseguimento dei risultati strategici.

In particolare, con riferimento alla scelta degli indicatori sottostanti ai sistemi di incentivazione di breve e lungo termine, la Politica retributiva è indirizzata verso il raggiungimento di obiettivi ESG anche riferiti ad azioni di contrasto al cambiamento climatico. In primis il riferimento è all'obiettivo, introdotto nel piano LTI nel 2023 e confermato nel 2024, direttamente collegato alla realizzazione della transizione energetica che premia la massimizzazione della produzione da fonti rinnovabili non programmabili e ne favorisce l'integrazione nel Sistema Elettrico Nazionale, minimizzando l'Overgeneration. Tale obiettivo è orientato quindi a garantire l'efficiente penetrazione delle fonti rinnovabili non programmabili nel mix produttivo immesso in rete; è perciò determinante e collegabile anche alla riduzione del fattore emissivo che incide sull'obiettivo Science Based Target di Terna. In particolare, per il raggiungimento del target per le emissioni scope 2 che pesano per il 96% sul valore considerato per l'anno base (2019)[99]. Sono stati, inoltre, confermati anche nel 2024 altri obiettivi - per l'Amministratore Delegato/Direttore Generale e per i dirigenti con responsabilità strategica - relativi allo sviluppo dell'infrastruttura di rete come, ad esempio, la qualità del servizio, gli incentivi Output (MSD e interzonali) e gli investimenti e le entrate in esercizio legati al comparto regolato, che sono alla base della transizione del Paese verso un'economia decarbonizzata.

Meccanismi di incentivazione riconducibili al contrasto del cambiamento climatico sono previsti, da tempo, oltre che per la prima linea, anche per il resto della popolazione incentivata, con obiettivi di remunerazione che, oltre a replicare quanto sopra indicato per il top management, hanno riguardato anche, ad esempio, lo sviluppo della mobilità elettrica,

[99] Per ulteriori informazioni si veda anche pag. 243.

Teleborsa: distribution and commercial use strictly prohibited

l'utilizzo del gas climalterante SF_6, il monitoraggio delle azioni di adattamento al cambiamento climatico (resilienza), lo sviluppo di una metodologia per l'analisi della resilienza della rete rispetto a eventi climatici, e la sua applicazione all'interno della pianificazione aziendale.

Sempre in materia di obiettivi ESG, si ricorda la presenza, da lungo tempo, anche di obiettivi di breve termine legati alla sicurezza dei lavoratori di Terna e degli appaltatori. In particolare, la sicurezza di Terna è monitorata tramite un Indice di Sicurezza sul lavoro, calcolato come media aritmetica ponderata dell'Indice di frequenza degli infortuni e dell'Indice di gravità e valorizzato rapportando l'andamento dell'anno all'andamento medio dei tre anni precedenti. La sicurezza degli appaltatori è monitorata sugli infortuni occorsi al personale delle imprese appaltatrici che operano presso i siti Terna. Si segnala che la Politica di remunerazione 2024 prevedeva un peso pari al 20% con riferimento all'Indice di Sicurezza sul lavoro e un peso pari al 5% con riferimento al tasso di crescita dell'Indice Frequenza Infortuni delle imprese appaltatrici che operano presso i siti Terna in Italia.

Con riferimento ai piani di incentivazione di lungo termine sono in essere tre Piani di Performance Share in favore del Direttore Generale, dei Dirigenti con Responsabilità Strategiche, di una selezione di Manager, siano essi Dirigenti o Quadri del Gruppo Terna che svolgono funzioni rilevanti per il conseguimento dei risultati strategici del Gruppo:

(i) **Piano Performance Share 2022-2026** - include un KPI ESG con un peso pari al 25% che fa riferimento all'inclusione in un paniere di indici ESG selezionati (Dow Jones Sustainability Index World, Stoxx ESG Leaders, MIB 40 ESG e Bloomberg GEI[91]) per rappresentare la capacità del Gruppo di garantire la performance di sostenibilità a 360°.

(ii) **Piano Performance Share 2023-2027** - include un KPI ESG (con un peso del 15%) collegato, in continuità con il Piano 2022-2026, all'inclusione in un paniere di indici ESG selezionati, e un nuovo indicatore, l'Overgeneration (con un peso del 15%), che, come anticipato in precedenza, rappresenta la riduzione del ricorso alla modulazione della produzione da generazione da Fonti Rinnovabili Non Programmabili (FRNP) richiesta da Terna per esigenze di sicurezza del Sistema Elettrico Nazionale.

(iii) **Piano Performance Share 2024-2028** – include, in continuità con il Piano 2023-2027, l'indicatore Overgeneration con aumento del peso al 30%, che rappresenta la riduzione del ricorso alla modulazione della produzione da generazione da Fonti Rinnovabili Non Programmabili (FRNP) richiesta da Terna per esigenze di sicurezza del Sistema Elettrico Nazionale.

Il Regolamento del nuovo Piano Performance Share 2024-2028 è stato approvato dal Consiglio di Amministrazione il 26 giugno 2024, in attuazione dei termini fissati dall'Assemblea ordinaria degli Azionisti, nella riunione del 10 maggio 2024.

Tale Piano prevede l'assegnazione del diritto all'attribuzione di un numero di azioni Terna S.p.A. (Performance Share) a titolo gratuito alla fine del periodo di performance purché siano raggiunti gli obiettivi di performance cui il piano è collegato.

Per ulteriori dettagli si rimanda a quanto riportato nel Documento Informativo sul Piano di Performance Share 2024-2028, pubblicato sul sito internet della Società (www.terna.it).

Il 23 settembre 2024 Terna ha comunicato il completamento del programma di acquisto azioni proprie a supporto del Piano, per un controvalore complessivo di circa 8 milioni di euro.

Completano l'offerta iniziative di *welfare* e *benefit* che promuovono un solido e continuo miglioramento del *work-life balance* delle persone di Terna, in una logica di pacchetti retributivi e welfare aziendale sostanzialmente migliori rispetto alla media dalle aziende italiane.

Per ogni dettaglio sulla nuova politica di remunerazione del Gruppo Terna per il 2025 si rimanda alla Relazione sulla Politica di Remunerazione e sui Compensi corrisposti approvata dal Consiglio di Amministrazione - su proposta del Comitato Remunerazione e Nomine - in data 25 marzo 2025 e che è pubblicata in adempimento a quanto disposto dall'art. 123-ter, del TUF come da ultimo aggiornato.

[91] A partire dal 2024 l'indice FTSE4Good ha sostituito il Bloomberg GEI non più attivo.

Informazioni ambientali

La Tassonomia UE
Regolamento UE 852/2020

Introduzione

Gli obiettivi climatici ed energetici che l'Unione Europea si è posta per il 2030 e 2050 allo scopo di concretizzare il Green Deal Europeo, richiedono il coinvolgimento anche del settore privato, con lo scopo di orientare gli investimenti verso progetti e attività sostenibili. In quest'ottica le istituzioni europee hanno introdotto una tassonomia delle attività economiche considerabili come "sostenibili", ovvero potenzialmente in grado di contribuire agli obiettivi ambientali prefissati dall'Unione Europea. In questo contesto, il sistema di classificazione introdotto attraverso il Regolamento UE 2020/852 (anche "EU Taxonomy Regulation" o "Regolamento") si pone l'obiettivo di fornire agli investitori, alle imprese e alle istituzioni pubbliche, criteri e modalità affidabili e condivise per identificare le attività economiche sostenibili. Inoltre, il Regolamento consente di misurare il grado di adesione e di contribuzione delle singole attività aziendali agli obiettivi prefissati, garantendo una maggiore trasparenza a tutti gli stakeholder.

Secondo quanto riportato nel Regolamento, un'attività economica è definibile come "ecosostenibile", se:

- **rispetta i criteri di vaglio tecnico definiti, su basi scientifiche, per ciascuna attività**. La conformità ai criteri di vaglio tecnico, garantisce che un'attività:
  - **contribuisca in modo sostanziale al raggiungimento di almeno uno dei sei obiettivi ambientali** definiti nell'art. 9 dello stesso Regolamento: Mitigazione dei cambiamenti climatici, Adattamento ai cambiamenti climatici, Uso sostenibile e protezione delle acque e delle risorse marine, Transizione verso un'economia circolare, Prevenzione e riduzione dell'inquinamento, Protezione e ripristino della biodiversità e degli ecosistemi;
  - **non arrechi un danno significativo** (Do No Significant Harm - DNSH) a nessuno dei restanti cinque obiettivi ambientali;
- **rispetta le garanzie minime di salvaguardia**, riconoscendo l'importanza dei Diritti Umani e delle norme internazionali nella gestione della propria organizzazione e lungo la catena di fornitura.

La pubblicazione dell'informativa ai sensi della Tassonomia all'interno della propria Relazione sulla gestione è un obbligo, a partire da gennaio 2022, per le imprese precedentemente sottoposte agli obblighi espressi dalla Direttiva UE 2014/95 sulla rendicontazione non finanziaria. Per il primo anno di applicazione della normativa, riferito all'esercizio 2021, era stato richiesto alle aziende di pubblicare esclusivamente la quota in termini di Fatturato, spese in conto capitale (CapEx) e spese operative (OpEx), delle attività "Taxonomy eligible" (anche definite come "ammissibili") e "non-eligible" ("non ammissibili") connesse agli obiettivi relativi al cambiamento climatico, ovvero quelle attività ricomprese all'interno degli allegati 1 e 2 del Regolamento Delegato 2021/2139[62] (o "Climate Delegated Act"), senza che fosse verificato il rispetto dei criteri di vaglio tecnico e delle garanzie minime di salvaguardia e fossero pubblicati i relativi dati sull'allineamento. Dal 2022 la normativa è stata applicata integralmente per i soli obiettivi climatici, e ha previsto la pubblicazione della quota, in termini di Fatturato, CapEx e OpEx, delle attività ecosostenibili; è quindi richiesto alle aziende di svolgere un'analisi di allineamento. Per ciascuna attività ammissibile, occorre quindi verificare il rispetto dei criteri di vaglio tecnico e delle garanzie minime di salvaguardia, ai sensi dell'articolo 18 del Regolamento. A partire dall'esercizio 2024, l'analisi di allineamento è richiesta per tutte le attività ammissibili, non solo ai primi due obiettivi climatici, ma anche in relazione alle attività che contribuiscono ai restanti quattro obiettivi ambientali introdotte dall'Environmental Delegated Act (Regolamento Delegato (UE) 2023/2486) e a quelle richiamate dal Regolamento Delegato (UE) 2023/2485, che integra i primi due obiettivi climatici.

[62] L'allegato 1 elenca le attività connesse all'obiettivo di mitigazione al cambiamento climatico, mentre l'allegato 2 le attività connesse all'obiettivo di adattamento ai cambiamenti climatici.

667

Teleborsa: distribution and commercial use strictly prohibited

Valutazione della conformità al Regolamento

Con riferimento all'esercizio 2024, in linea con quanto svolto per gli anni precedenti, è stata effettuata una mappatura delle attività svolte dal Gruppo descritte nel capitolo il business del Gruppo Terna, considerando le Attività Regolate, le Attività Non Regolate e le Attività all'estero, al fine di identificare le attività ammissibili ai sensi della Tassonomia, ovvero potenzialmente in grado di contribuire ai sei obiettivi:

- Mitigazione dei cambiamenti climatici;
- Adattamento ai cambiamenti climatici;
- Uso sostenibile e protezione delle acque e delle risorse marine;
- Transizione verso un'economia circolare;
- Prevenzione o riduzione dell'inquinamento;
- Protezione e ripristino della biodiversità e degli ecosistemi.

A valle di tale analisi, le attività del Gruppo sono state associate alle seguenti attività economiche:

- **3.20 CCM Fabbricazione, installazione e manutenzione di apparecchiature elettriche ad alta, media e bassa tensione per la trasmissione e la distribuzione di energia elettrica che contribuiscono o consentono di contribuire in maniera sostanziale alla mitigazione dei cambiamenti climatici:** questa categoria comprende l'attività svolta dal Gruppo Tamini con riferimento alla produzione di trasformatori per la generazione e trasmissione di energia elettrica, al pari dell'attività caratteristica del Gruppo Brugg Cables legata alla fabbricazione di cavi elettrici destinati ai sistemi di trasmissione e distribuzione dell'energia elettrica. Si segnala che tale attività è stata introdotta per l'anno corrente, ricomprendendo le voci di ricavi, investimenti e costi operativi attribuibili all'attività caratteristica.
- **4.1 CCM Produzione di energia elettrica mediante tecnologia solare fotovoltaica:** include tutte le attività legate all'installazione, manutenzione e riparazione di tecnologie per le energie rinnovabili, per impianti fotovoltaici a terra. In particolare, quanto svolto dal Gruppo LT verso clienti terzi è suddivisibile in termini di ricavi e costi tra questa attività (per parchi fotovoltaici a terra) e per l'attività 7.6 CCM per gli impianti fotovoltaici installati su edifici. Come specificato dal "Climate Delegated Act", per l'attività in oggetto, se relativa all'installazione, manutenzione e riparazione di tecnologie per le energie rinnovabili, si applicano i criteri di vaglio tecnico definiti per l'attività 7.6.
- **4.9 CCM/CCA Trasmissione e distribuzione dell'energia elettrica:** include le attività riconducibili all'ambito delle **Attività Regolate**, quindi principalmente attività di sviluppo, esercizio, manutenzione e realizzazione della Rete di Trasmissione Nazionale (RTN), facente parte del sistema europeo interconnesso, oltre che le attività di dispacciamento e misura. Nell'ambito dell'attività 4.9 confluiscono altresì **Attività Non Regolate,** inerenti a interventi sui sistemi subordinati al Sistema Europeo Interconnesso, l'attività di O&M sui cavi della Rete di Trasmissione Nazionale e l'attività di installazione di trasformatori di trasmissione e distribuzione conformi ai requisiti imposti dal Regolamento UE 2014/548 e dalla norma EN 50588-1, e **Attività all'estero,** relative ad attività di trasmissione e distribuzione effettuate dalle controllate estere del Gruppo in Brasile e in Perù. Le altre attività all'estero sono riclassificate in applicazione del principio IFRS 5 come attività nette cessate o destinate alla vendita[83].

[83] Coerentemente con quanto indicato nella FAQ n.17 pubblicata il 19 dicembre 2022 relativa all'interpretazione dell'Art.8 del Regolamento UE sulla Tassonomia, per le società classificate come «discontinuod operations» viene rendicontato il solo KPI CapEx, mentre per le società classificate come «hold for sale» vengono rendicontati sia Fatturato che CapEx.

Teleborsa: distribution and commercial use strictly prohibited

- **6.5 CCM Trasporto mediante moto, autovetture e veicoli commerciali leggeri:** include l'acquisto, finanziamento, noleggio, leasing e gestione di veicoli appartenenti alla categoria M1 (veicoli a motore progettati per il trasporto di persone, con al massimo otto posti a sedere oltre al conducente), N1 (veicoli a motore progettati per il trasporto di merci, con una massa massima autorizzata fino a 3,5 tonnellate), che rientrano entrambe nell'ambito di applicazione del regolamento (CE) n. 715/2007 del Parlamento europeo e del Consiglio (255), o L (veicoli a due o tre ruote e quadricicli). Nello specifico, sono ricompresi i costi (CapEx e OpEx) legati alla gestione (leasing) dei veicoli della flotta aziendale, i quali sono oggetto di fringe benefit per i dipendenti del Gruppo Terna. Tali costi includono non solo l'acquisto e il finanziamento dei veicoli, ma anche le spese operative necessarie per mantenere e gestire la flotta.
- **7.2 CCM Ristrutturazione di edifici esistenti:** include tutte le opere edilizie e di ingegneria su edifici o la loro preparazione. In particolare, si fa riferimento alle attività di ristrutturazione e le operazioni di rifacimento eseguite dal Gruppo Tamini presso le proprie sedi.
- **7.4 CCM Installazione, manutenzione e riparazione di stazioni di ricarica per veicoli elettrici negli edifici (e negli spazi adibiti a parcheggio di pertinenza degli edifici):** include le attività di installazione, manutenzione e riparazione di stazioni di ricarica per veicoli elettrici negli edifici e nei parcheggi di pertinenza degli edifici. Nello specifico, si valorizzano le attività di installazione di colonnine di ricarica elettrica svolte dal Gruppo Tamini all'interno delle proprie sedi, contribuendo così a creare un'infrastruttura sostenibile e accessibile per la ricarica dei veicoli elettrici.
- **7.6 CCM Installazione, manutenzione e riparazione di tecnologie per le energie rinnovabili:** rientrano le attività di manutenzione, monitoraggio di impianti e altri servizi per terzi operanti nei settori della produzione di energia da fonte rinnovabile. In particolare, sono incluse le attività non regolate svolte da Terna S.p.A., Terna Rete Italia S.p.A., Terna Energy Solutions S.r.l e dal Gruppo LT nell'ambito della realizzazione e manutenzione di impianti solari fotovoltaici e delle attrezzature tecniche.
- **9.3 CCM Servizi professionali connessi alla prestazione energetica degli edifici:** in cui confluiscono le attività relative a servizi di consulenza, analisi di fattibilità, contratti di rendimento energetico, titoli di efficienza energetica (TEE o certificati bianchi) e le prestazioni svolte da Avvenia in qualità di società di servizi energetici (ESCO, Energy Service Company).

Ai fini di valutare l'allineamento, per ciascuna attività ammissibile identificata nei punti di cui sopra, sono state svolte le analisi per accertare il rispetto dei criteri di Contributo Sostanziale e i criteri "Do No Significant Harm", al netto delle attività 6.5 CCM, 7.2 CCM e 7.4 CCM. Per queste ultime, infatti, non è stata svolta l'analisi di allineamento in conformità con quanto stabilito dalla FAQ 13 della Comunicazione 2023/305 della Commissione Europea, secondo cui "[...] Se, per mancanza di dati o elementi, non sono in grado di accertare la conformità ai criteri di vaglio tecnico delle attività ammissibili alla tassonomia che non sono rilevanti per il loro business, le imprese interessate dovrebbero indicare che tali attività non sono allineate alla tassonomia senza ulteriori valutazioni [...]".

Le attività sopracitate, infatti, sono considerate "non rilevanti" per il business del Gruppo Terna, in quanto si manifestano solamente sottoforma di CapEx e sono valorizzate per un totale aggregato di 0,15% del CapEx totale di Gruppo.

In linea con quanto richiesto dal Regolamento, il Gruppo Terna ha calcolato le percentuali di Fatturato, CapEx, OpEx correlate alle proprie attività allineate alla Tassonomia e ammissibili ma non allineate, riportate all'interno delle tabelle allegate all'informativa[54]. Si precisa che, all'interno delle tabelle, se l'attività economica contribuisce in modo sostanziale a più obiettivi ambientali, è indicato in grassetto l'obiettivo ambientale più importante al fine del calcolo dei KPI, evitando il doppio conteggio. Inoltre, al fine di essere in linea con quanto richiesto dagli emendamenti apportati dall'Environmental Delegated Act, sono state introdotte le tabelle complementari che indicano le percentuali di ammissibilità e allineamento per ciascun obiettivo ambientale, considerando separatamente, come nel caso del CapEx, la quota di KPI che contribuisce a più obiettivi ambientali.

Si segnala che, non essendo risultate ammissibili le attività relative alla produzione energetica tramite fonti di gas fossili e nucleare, comprese nel Complementary Delegated Act (Regolamento Delegato 2022/1214) che integra il Regolamento Delegato (UE) 2021/2139, sarà riportata la sola tabella relativa al Modulo 1, in appendice alle tabelle relative ai tre KPI.

[54] Si fa riferimento ai "Modelli per gli indicatori fondamentali di prestazione (KPI) delle imprese non finanziarie" di cui al Regolamento Delegato (UE) 2021/2178, aggiornato dal Regolamento Delegato (UE) 2023/2486.

669

Teleborsa: distribution and commercial use strictly prohibited

Attività 3.20 Mitigazione dei cambiamenti climatici - Fabbricazione, installazione e manutenzione di apparecchiature elettriche ad alta, media e bassa tensione per la trasmissione e la distribuzione di energia elettrica che contribuiscono o consentono di contribuire in maniera sostanziale alla mitigazione dei cambiamenti climatici

Contributo sostanziale

Le attività del Gruppo Tamini e del Gruppo Brugg Cables contribuiscono in modo sostanziale alla mitigazione dei cambiamenti climatici, con particolare riferimento al punto 1 (b) *"apparecchiature di cablaggio portatrici di corrente e non portatrici di corrente per la trasmissione e la distribuzione destinate al cablaggio di circuiti elettrici, e trasformatori conformi ai requisiti della fase 2 (1° luglio 2021) per i grandi trasformatori di potenza di cui all'allegato I del regolamento (UE) 548/2014 della Commissione, e trasformatori di potenza medi la cui tensione d'uscita massima è pari o inferiore a 36 kV, conformi ai requisiti di livello AA0 relativi alle perdite a vuoto di cui alle norma della serie EN 50708, a condizione che tali apparecchiature e trasformatori contribuiscano ad aumentare la quota di energia rinnovabile nel sistema o migliorino l'efficienza energetica"*. In relazione alla produzione di dispositivi di cablaggio svolta dal Gruppo Brugg Cables, i cavi prodotti sono considerati conformi al criterio di contributo sostanziale perché migliorano per loro natura l'efficienza energetica nel sistema in quanto impiegati in parte per rimpiazzare cavi e impianti obsoleti, contribuendo a minimizzare possibili dispersioni di energia, e in parte per potenziare le reti volte all'integrazione di nuova capacità rinnovabile installata. Quanto ai trasformatori del Gruppo Tamini, invece, questi rispettano i requisiti tecnici in termini di potenza descritti nel criterio di contributo sostanziale solo per una quota parte di quelli fabbricati, venduti e installati. Di conseguenza, il criterio si considera rispettato solo per questi ultimi.

Il criterio di contributo sostanziale inoltre prevede che queste apparecchiature non siano utilizzate per connettere o espandere una connessione diretta tra una sottostazione o una rete e una centrale elettrica con un'intensità di gas a effetto serra superiore a 100 g CO_2e/kWh misurata sulla base del ciclo di vita. Considerando che sia il Gruppo Brugg Cables che il Gruppo Tamini vendono i loro prodotti a un numero molto ampio di acquirenti, non è stato possibile effettuare un'analisi dettagliata sulla funzione di ciascuna vendita. Pertanto, è stata adottata una semplificazione metodologica, focalizzandosi sulle percentuali di vendita delle due società suddivise per nazione. Per ogni nazione, è stata analizzata la percentuale di capacità installata di energia rinnovabile rispetto alla capacità totale installata al 2023, utilizzando i dati riportati nel report "Renewable Energy Statistics 2024" di IRENA[86], tenendo conto che la produzione di energia da fonti rinnovabili produce emissioni inferiori rispetto ai requisiti stabiliti dai criteri di vaglio tecnico. Si specifica che il criterio è stato considerato rispettato solamente per la quota di KPI proporzionata per la media delle percentuali di energia rinnovabile installata per ciascuna nazione in cui le società operano.

DNSH

I criteri Do No Significant Harm per la valutazione dell'attività 3.20 CCM, in relazione all'obiettivo di adattamento ai cambiamenti climatici, richiedono di che vengano mappati e valutati i rischi fisici climatici che gravano sull'attività. Per le attività svolte dal Gruppo Brugg Cables e dal Gruppo Tamini, data l'assenza di tale analisi, si considera il criterio non è rispettato. Di conseguenza, l'attività in oggetto si considera ammissibile ma non allineata alla Tassonomia. Quanto al criterio DNSH relativo all'uso sostenibile e protezione delle acque e delle risorse marine e a quello relativo alla protezione e ripristino della biodiversità e degli ecosistemi, risulta che le due società non sono dotate di analisi ambientali come VIA/VAS che includano prescrizioni e disposizioni in termini di tutela della risorsa idrica e protezione della biodiversità. Quanto ai criteri per la transizione verso un'economia circolare, le società operano nel rispetto delle normative vigenti sul piano nazionale, prediligendo l'invio dei rifiuti a riutilizzo piuttosto che a smaltimento ove possibile. Non emergono piani di impiego di materie prime secondarie e di componenti riutilizzati nella fabbricazione dei prodotti. Si fa presente che la Roadmap di Gruppo per l'Economia Circolare comprende anche le società Brugg e Tamini; nell'ambito della Roadmap sono in fase di avvio iniziative volte a incrementare il livello di circolarità delle operazioni di business. Infine, con riferimento alla valutazione dei criteri circa la prevenzione e riduzione dell'inquinamento, le due società risultano conformi alle disposizioni del Regolamento REACH circa la fabbricazione, l'immissione in commercio e l'utilizzo delle sostanze chimiche richiamate dall'Appendice C.

[86] IRENA_Renewable_Energy_Statistics_2024: https://www.irena.org/-/media/Files/IRENA/Agency/Publication/2024/Jul/IRENA_Renewable_Energy_Statistics_2024.pdf

Teleborsa: distribution and commercial use strictly prohibited

Attività 4.1 Mitigazione dei cambiamenti climatici – Produzione di energia elettrica mediante tecnologia solare fotovoltaica

Contributo sostanziale

Come richiamato dal Regolamento, in relazione all'attività in oggetto, per le attività svolte dal Gruppo LT si applicano i criteri di vaglio tecnico contenuti nella sezione 7.6 in quanto l'attività consiste nell'installazione, manutenzione e riparazione in loco di tecnologie per le energie rinnovabili, per gli impianti che non insistono su edifici. L'attività contribuisce in modo sostanziale alla mitigazione dei cambiamenti climatici con riferimento al criterio 1 (a) *"Installazione, manutenzione e riparazione di sistemi solari fotovoltaici e delle attrezzature tecniche accessorie"*.

DNSH

Per l'analisi di allineamento dell'attività 4.1, come richiamato nella sezione precedente, si applicano i criteri previsti per l'attività 7.6. Per tale attività, i criteri DNSH esclusivamente riferimento all'obiettivo di adattamento ai cambiamenti climatici, richiedendo una valutazione dei rischi climatici fisici che pesano sull'attività. È importante notare che la valutazione dei rischi climatici svolta da Terna sugli asset di trasmissione, come descritta nell'informativa sul Cambiamento Climatico, non copre né l'attività 7.6 né l'attività 4.1. Inoltre, tutti gli interventi di installazione, manutenzione e riparazione avvengono su asset di soggetti terzi. In questo contesto, il Gruppo LT, non avendo individuato rischi climatici specifici riferiti all'attività 4.1, adotta un approccio conservativo e ritiene di considerare tale attività, seppure ammissibile, non allineata al criterio di DNSH previsto dal Regolamento.

Attività 4.9 Mitigazione dei cambiamenti climatici – Trasmissione e distribuzione di energia elettrica

Contributo sostanziale

L'attività principale del Gruppo (in particolare quelle svolte da Terna S.p.A., Terna Rete Italia S.p.A., Rete S.r.l., Terna Crna Gora d.o.o. e Terna Interconnector S.r.l.) è relativa alla progettazione, realizzazione, gestione, sviluppo, esercizio e manutenzione della Rete di trasmissione nazionale (RTN) in alta e altissima tensione. La RTN soddisfa il criterio di contributo sostanziale per l'attività 4.9 in quanto risulta parte del sistema europeo interconnesso, vale a dire le zone di controllo interconnesse degli Stati membri, della Norvegia, della Svizzera e del Regno Unito, e dei suoi sistemi subordinati. A tale attività è riconducibile anche il Gruppo Tamini per le attività di *Operation & Maintenance*, effettuate per garantire il funzionamento della rete di trasmissione e parte delle attività non regolate svolte da Terna S.p.A., Terna Rete Italia S.p.A. e Terna Energy Solutions S.r.l..

All'interno dell'attività 4.9, è inoltre ricompresa anche l'installazione di trasformatori di trasmissione e distribuzione (4.9 – criterio 2.c) svolta dal Gruppo Tamini. In questo caso, è stata verificata la corrispondenza dei requisiti dei trasformatori installati dal Gruppo Tamini a quanto specificato nei criteri di vaglio tecnico[96], escludendo di conseguenza dal perimetro le attività di installazione verso il mercato extra-UE.

All'interno dei KPI Turnover e CapEx relativi all'attività 4.9, sono state incluse le attività di costruzione e gestione di infrastrutture di trasmissione di energia elettrica riconducibili alle controllate sudamericane. In particolare, tali attività sono state considerate ammissibili, ma non allineate, in quanto non è stato possibile valutarne la conformità rispetto ai criteri DNSH.

DNSH[97]

Il Gruppo Terna ha effettuato una valutazione dei rischi climatici che possono avere un impatto sugli asset di trasmissione, descritta nell'ambito dell'informativa sul Cambiamento Climatico, che si prefigge l'obiettivo di individuare e valutare i rischi climatici connessi agli impianti di Terna e alle attività svolte. Le valutazioni climatiche sono alla base della definizione del Piano Resilienza di Terna, un piano aziendale trasversale che include tutte le iniziative per incrementare la resilienza della rete elettrica verso eventi climatici severi che si verificano con sempre maggiore intensità o frequenza.

[96] I trasformatori di trasmissione e distribuzione sono conformi ai requisiti della fase 2 (1° luglio 2021) di cui all'allegato I del Regolamento UE n. 548/2014 della Commissione e ai requisiti di livello AA0 relativi alle perdite a vuoto di cui alla norma EN 50588-1.

[97] Con riferimento al principio di Do No Significant Harm si segnala che il Regolamento Delegato (UE) 2021/2139 della Commissione del 4 giugno 2021 definisce l'obiettivo "Uso sostenibile e protezione delle acque e delle risorse marine" non pertinente all'attività di Trasmissione o distribuzione di energia elettrica.

Teleborsa: distribution and commercial use strictly prohibited

Relativamente all'obiettivo di transizione verso un'economia circolare, nel corso del 2024 il Gruppo Terna ha proseguito le attività di monitoraggio della Roadmap di azioni al 2023 relativamente alla Strategia di Economia Circolare per l'approvvigionamento dei materiali e il loro corretto impiego, un uso sostenibile delle risorse comprensivo del ricorso a materie prime seconde e la gestione dei rifiuti. Si veda al riguardo il paragrafo dedicato all'interno della sezione "Informazioni ambientali".

Con riferimento all'obiettivo di prevenzione e riduzione dell'inquinamento, il Gruppo Terna segue le linee guida generali dell'IFC in materia di Ambiente, Salute e Sicurezza e le norme e i regolamenti applicabili per limitare l'impatto delle radiazioni elettromagnetiche sulla salute umana. Inoltre, dai controlli periodici interni sui dati ambientali, nel 2024 non è stata rilevata traccia di policlorobifenili (PCB) all'interno dei trasformatori utilizzati o installati dalle società del Gruppo.

Infine, il Gruppo ha condotto per l'attività di trasmissione, ove previsto, delle valutazioni di impatto ambientale (VIA) relativamente ai singoli progetti. Qualora sia stata effettuata una VIA, sono state attuate le necessarie misure di mitigazione e di compensazione per la protezione dell'ambiente. Inoltre, a completamento del Piano di Sviluppo della rete elettrica è stata predisposta una procedura di Valutazione Ambientale Strategica (VAS), che ha corroborato le scelte di pianificazione del Gruppo.

Per i siti/le operazioni situati in aree sensibili sotto il profilo della biodiversità o in prossimità di esse (compresi la rete Natura 2000 di aree protette, i siti del patrimonio mondiale dell'UNESCO e le principali aree di biodiversità, nonché altre aree protette) è stata condotta, ove applicabile, un'opportuna valutazione del rischio ambientale. Ove possibile, il Gruppo ha effettuato una valutazione volta ad attuare interventi di mitigazione, compensazione e ripristino al fine di riportare lo status originario dei luoghi interessati dai lavori.

Attività 4.9 Adattamento ai cambiamenti climatici – Trasmissione e distribuzione di energia elettrica

Dal momento che l'attività 4.9, con riferimento agli interventi contenuti all'interno del Piano di Resilienza, risulta ammissibile anche all'obiettivo di adattamento ai cambiamenti climatici[88] (CCA) con riferimento ai soli CapEx, il Gruppo ha svolto l'analisi di allineamento anche rispetto a quest'ultimo obiettivo, al fine di poter indicare i risultati in termini di KPI della tabella riportata nel seguito. In merito, si chiarisce che il 6% dei CapEx è ammissibile, oltre all'obiettivo di mitigazione ai cambiamenti climatici, anche all'obiettivo di adattamento. Tale percentuale, riferita esclusivamente all'attività 4.9 CCA, è stata riportata nella tabella complementare del CapEx introdotta dall'Environmental Delegated Act a partire da dallo scorso anno di rendicontazione. Si segnala, che l'obiettivo principale di contribuzione per la presente attività è quello di Mitigazione dei cambiamenti climatici. Di conseguenza, nelle tabelle dei tre KPI è riportato il valore di ammissibilità ed allineamento all'obiettivo CCM. Le tabelle supplementari previste dall'ultimo aggiornamento dell'Environmental Delegated Act, invece, riporteranno anche la quota di ammissibilità per l'obiettivo di Adattamento ai cambiamenti climatici.

Contributo sostanziale

Il Gruppo Terna ha effettuato una valutazione dei rischi climatici che possono avere un impatto sugli asset di trasmissione, descritta nell'ambito dell'informativa sul Cambiamento Climatico. Il criterio di contributo sostanziale richiede anche l'implementazione di soluzioni di adattamento per rispondere ai rischi climatici fisici identificati. All'interno del Piano Resilienza, il Gruppo identifica e conferma la pianificazione di interventi infrastrutturali quale soluzione preventiva per incrementare la resilienza della Rete di Trasmissione Nazionale nei confronti di fenomeni severi come ghiaccio-neve e vento forte, con l'obiettivo di aumentare la magliatura della rete e ridurre il rischio di disalimentazione degli impianti connessi alla rete a fronte di eventi meteorologici severi. Oltre alle soluzioni fisiche, il Piano prevede anche soluzioni non fisiche come iniziative di monitoraggio del sistema elettrico e di ripristino del funzionamento, strumenti operativi finalizzati a mitigare i possibili danni causati da eventi meteorologici severi sulla rete e, allo stesso tempo, a ridurre i tempi di disalimentazione.

Il Regolamento stabilisce alcuni criteri rispetto alle soluzioni di adattamento implementate (e.g. che non influiscano negativamente sugli sforzi di adattamento o sul livello di resilienza ai rischi climatici fisici di altre persone o attività economiche, oppure che risultino coerenti con i piani e le strategie di adattamento nazionali). Le soluzioni di adattamento implementate dal Gruppo Terna rispettano tali criteri previsti dal Regolamento per gli interventi di manutenzione che rispondono ai rischi climatici fisici.

[88] In linea con quanto disposto dalla FAQ 18 della Commission Notice 305/2025. Il Gruppo risulta ammissibile all'obiettivo di Adattamento ai Cambiamenti Climatici (CCA) in quanto ha svolto una valutazione del rischio climatico e della vulnerabilità rispetto ai principali rischi climatici fisici.

Teleborsa: distribution and commercial use strictly prohibited

DNSH

Per il rispetto dei criteri DNSH si rimanda alle analisi effettuate per i DNSH dell'attività 4.9 del CCM. L'unico criterio che differisce riguarda il DNSH per l'obiettivo di mitigazione dei cambiamenti climatici, che richiede che l'infrastruttura non sia *"dedicata alla creazione di una connessione diretta o all'espansione di una connessione diretta esistente a una centrale elettrica con emissioni dirette di gas a effetto serra superiori a 270 g CO_2e/kWh"*. A fronte dell'ambiguità interpretativa del criterio e del perimetro di analisi cui fa riferimento, il Gruppo preferisce adottare un criterio prudenziale e considerare il criterio di vaglio tecnico non soddisfatto dal momento che l'emissione media della rete risulta superiore al valore soglia indicato dal Regolamento. Si specifica al contempo che tale valore relativo all'intensità emissiva della rete non è nel controllo del Gruppo.

Attività 7.6 Mitigazione dei cambiamenti climatici - Installazione, manutenzione e riparazione di tecnologie per le energie

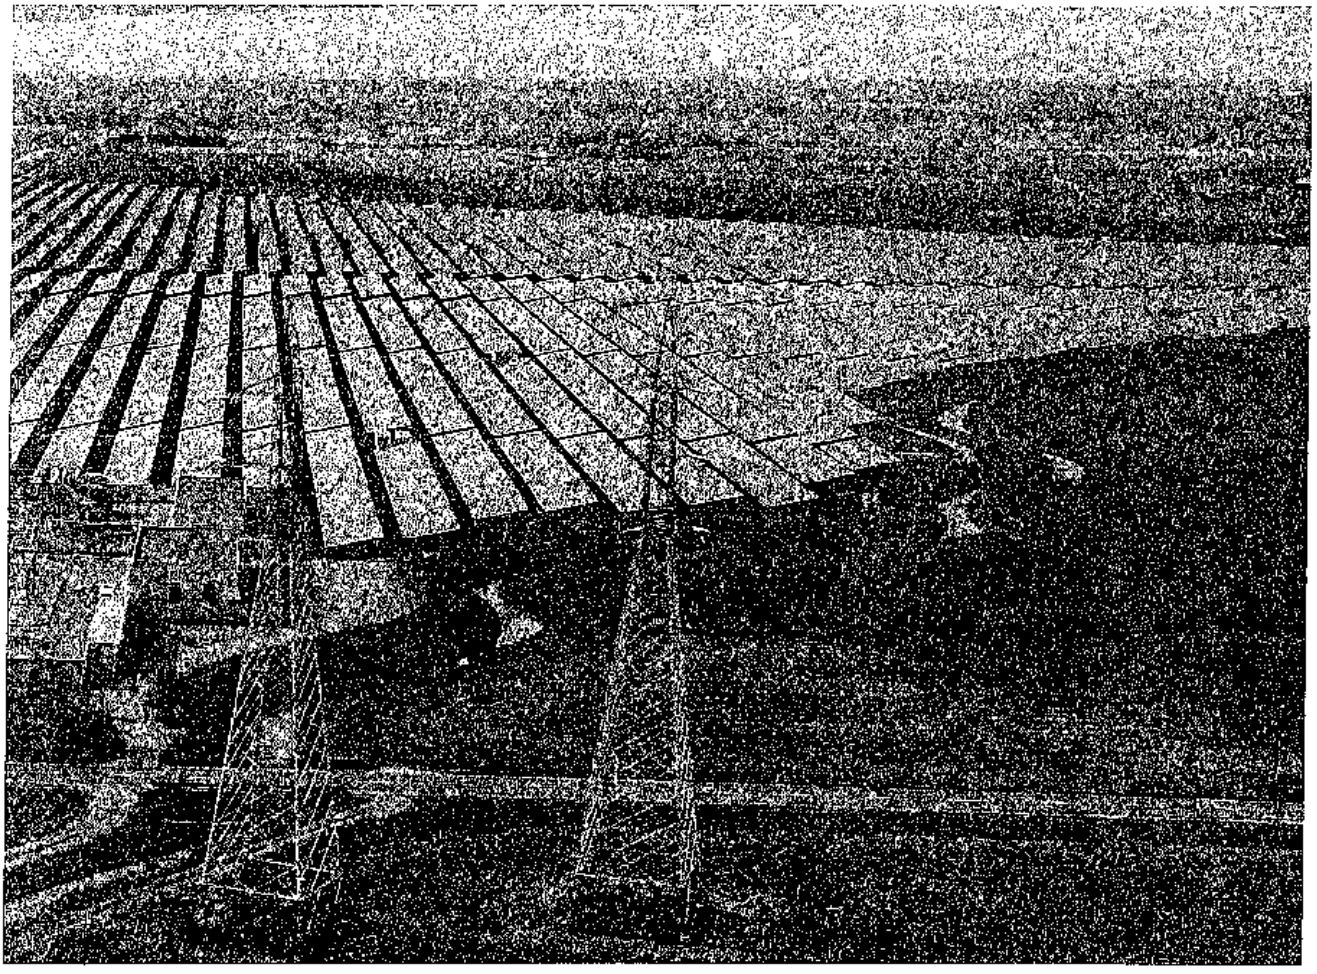
Contributo sostanziale

Le attività di Terna S.p.A., Terna Rete Italia S.p.A., Terna Energy Solutions S.r.l. e del Gruppo LT contribuiscono in modo sostanziale alla mitigazione dei cambiamenti climatici, con particolare riferimento al punto (a) "installazione, manutenzione e riparazione di sistemi solari fotovoltaici e delle attrezzature tecniche accessorie", in quanto realizzano interventi di revamping e repowering di sistemi solari fotovoltaici di soggetti terzi.

673

Teleborsa: distribution and commercial use strictly prohibited

DNSH



Per l'attività 7.6, la normativa prevede criteri DNSH esclusivamente rispetto all'obiettivo di adattamento ai cambiamenti climatici, richiedendo una valutazione dei rischi climatici fisici che pesano sull'attività. La valutazione dei rischi climatici svolta da Terna sugli asset di trasmissione, descritta nell'Informativa sul Cambiamento Climatico, non copre anche l'attività 7.6. Inoltre, tutti gli interventi di installazione, manutenzione e riparazione avvengono su asset di soggetti terzi.

In questo caso quindi il Gruppo Terna, non avendo individuato rischi climatici specifici riferiti all'attività 7.6, adottando un approccio conservativo, ritiene di considerare tale attività, seppure ammissibile, non allineata al criterio di DNSH previsto dal Regolamento.

Attività 9.3 Mitigazione dei cambiamenti climatici - Servizi professionali connessi alla prestazione energetica degli edifici

Contributo sostanziale

Attraverso la controllata Avvenia S.r.l., il Gruppo Terna fornisce molteplici dei servizi previsti per il criterio di contributo sostanziale per l'attività 9.3. In particolare, Avvenia opera come Energy Service Company (ESCO), attraverso servizi di consulenza, analisi di fattibilità e trading di Titoli di Efficienza Energetica (TEE o Certificati Bianchi).

Teleborsa: distribution and commercial use strictly prohibited

DNSH

Anche per l'attività 9.3, la normativa prevede criteri DNSH esclusivamente rispetto all'obiettivo di adattamento ai cambiamenti climatici, richiedendo una valutazione dei rischi climatici fisici che pesano sull'attività. La valutazione dei rischi climatici svolta dal Gruppo Terna sugli asset di trasmissione, descritta nell'Informativa sul Cambiamento Climatico, non copre anche l'attività 9.3. Inoltre, tutti i progetti di consulenza, analisi di fattibilità e compravendita di certificati bianchi si riferiscono ad asset di soggetti terzi. In questo caso quindi, non avendo individuato rischi climatici specifici riferiti all'attività 9.3, adottando un approccio conservativo, il Gruppo Terna ritiene di considerare tale attività, seppure ammissibile, non allineata al criterio di DNSH previsto dal Regolamento.

Garanzie minime di salvaguardia

Ai fini di verificare l'allineamento delle attività del Gruppo Terna, è stata condotta un'analisi sull'adeguatezza delle misure in essere a livello di Gruppo rispetto ai principi richiamati dall'articolo 18 del Regolamento, ovvero le Linee Guida OCSE destinate alle Imprese Multinazionali, i Principi guida delle Nazioni Unite su Imprese e Diritti Umani, inclusi i principi e i diritti stabiliti dalle otto convenzioni fondamentali individuate nella dichiarazione dell'Organizzazione Internazionale del Lavoro sui principi e i diritti fondamentali nel lavoro e dalla Carta internazionale dei diritti dell'uomo. Ai fini dell'analisi, il Gruppo ha anche tenuto conto delle indicazioni fornite dalla Platform on Sustainable Finance (PSF) nel suo Final Report on Minimum Safeguards pubblicato a ottobre 2022 e la Comunicazione della Commissione Europea di giugno 2023, rispetto ai cosiddetti "indicatori degli effetti negativi sulla sostenibilità".

In considerazione della diversità culturale, sociale ed economica dei vari Paesi in cui il Gruppo Terna opera, la Capogruppo richiede alle singole società controllate di adottare e di integrare il proprio Codice Etico, oltre ai propri documenti di indirizzo, con criteri di condotta specifici delle loro attività e del loro contesto operativo. In tal modo i criteri di condotta risultano per tutte le società del Gruppo coerenti con gli standard più elevati in tema di protezione ambientale, di sicurezza e di diritti umani e dei lavoratori.

Il presidio dei temi sottostanti le garanzie minime di salvaguardia è assicurato dalla presenza di strumenti prescrittivi, quali politiche di Gruppo, linee guida e strumenti organizzativi/operativi, quali strutture preposte, procedure, sistemi di gestione e controllo. Il Gruppo Terna dispone di presidi e controlli sufficienti ad assicurare la conformità all'articolo 18 del Regolamento, grazie alla presenza, in particolare di:

- Codice Etico, i cui principi devono essere rispettati da tutte le procedure del Gruppo;
- Linee Guida sul rispetto dei diritti umani nel Gruppo Terna;
- Procedura di Due Diligence sul rispetto dei diritti umani, a cui sono seguite eventuali azioni correttive;
- Regolamento sulla qualificazione di imprese, che comporta il rispetto dei principi del Codice Etico;
- Comunicazione efficace e pubblica sulle tematiche relative ai diritti umani;
- Procedura sul Whistleblowing;
- Meccanismi di reclamo accessibili agli stakeholder tramite il sito internet del Gruppo;
- Linee Guida sull'Anticorruzione.

Per ulteriori dettagli circa i presidi relativi alle garanzie minime di salvaguardia, si rimanda ai capitoli "I principali fattori di rischio e incertezza" della Relazione sulla Gestione, "Informazioni sociali" e "Informazioni di governance" della Rendicontazione Consolidata di Sostenibilità, in cui sono dettagliati, tra gli altri aspetti, la tutela della legalità, integrità e lotta alla corruzione, il Sistema di Gestione integrato e le misure per assicurare il rispetto dei diritti umani.

65

Teleborsa: distribution and commercial use strictly prohibited

Inoltre, è da sottolineare l'impegno da parte del Gruppo Terna in attività di sensibilizzazione a tutti i livelli, mirate al superamento degli stereotipi e dei pregiudizi inconsapevoli (unconscious bias) e alla promozione di politiche e azioni di welfare volte a favorire la conciliazione vita-lavoro, la tutela della genitorialità, la condivisione delle responsabilità familiari e assistenziali (caregiving) e la rimozione di potenziali ostacoli alla parità salariale. Per maggiori dettagli in merito alla diversità di genere negli organi amministrativi si rimanda al paragrafo "La Corporate Governance e il successo sostenibile" nell'ambito delle "Informazioni generali".

Il Gruppo ha, inoltre, deciso di ottenere e mantenere la Certificazione della Parità di Genere ai sensi della Norma UNI/PdR 125:2022, costituendo il "Comitato Guida per la Parità di Genere" deputato a garantire nel Gruppo Terna l'adozione e continua applicazione della politica per la parità di genere e a definire il "Piano Strategico per la Parità di Genere". Questi strumenti rafforzano l'impegno di Terna per garantire l'equità in tutte le sue operazioni. Inoltre, al fine di ridurre il divario di genere, Terna adotta percorsi di selezione equi basati sulle competenze e sull'adeguatezza al ruolo, programmi di sviluppo e politiche retributive basate su equità e performance, misurandone periodicamente i risultati. L'applicazione di questi principi di pari opportunità all'interno del Gruppo Terna si riflette anche nelle politiche di remunerazione adottate, con un'attenzione specifica alla differenza salariale tra i sessi. Per maggiori dettagli in merito si rimanda al paragrafo "Forza lavoro [ESRS S1] - Le metriche legate alla forza lavoro" in particolare la metrica S1-16 nell'ambito delle "Informazioni sociali".

Al termine dell'analisi di allineamento, il Gruppo Terna ha determinato come segue le quote di attività ammissibili e allineate alla Tassonomia per ciascun indicatore. Al fine di evitare doppi conteggi al numeratore dei KPI al momento di assegnare il Fatturato, le spese in conto capitale e le spese operative alle tre attività economiche, i KPI sono stati determinati a partire dai dati riportati nel bilancio consolidato del Gruppo Terna.

Come richiesto dal Regolamento, nella tabella di seguito sono riportati i tre KPI del Gruppo Terna per l'esercizio 2024, riferiti alle attività ammissibili ("taxonomy eligible") e non ammissibili ("taxonomy non-eligible"), così come quelle allineate e non allineate.

Al fine di riepilogare i risultati delle analisi di cui sopra, si riportano di seguito i valori di ammissibilità e di allineamento, per l'esercizio corrente e per quello precedente, per i tre KPI richiesti dal Regolamento con riferimento al solo obiettivo di mitigazione dei cambiamenti climatici.

KPI	2023		2024	
	QUOTA DELLE ATTIVITÀ AMMISSIBILI	*Quota delle attività Allineate*	QUOTA DELLE ATTIVITÀ AMMISSIBILI	*Quota delle attività Allineate*
Fatturato	89%	85%	99%	86%
CapEx	99%	99% *di cui contributo Emissioni obbligazionarie green* 16%	100%	99% *di cui contributo Emissioni obbligazionarie green* 12%
OpEx	95%	95%	100%	95%

676

Come richiesto dall'Allegato III del Regolamento Delegato (UE) 2022/1214 (c.d. "Complementary Climate Delegated Act"), si riporta il primo modulo obbligatorio con le valutazioni in materia di attività legate al nucleare e ai gas fossili:

Modello 1 – Attività legate al nucleare e ai gas fossili

RIGA	ATTIVITÀ LEGATE ALL'ENERGIA NUCLEARE	
1.	L'impresa svolge, finanzia o ha esposizioni verso la ricerca, lo sviluppo, la dimostrazione e la realizzazione di impianti innovativi per la generazione di energia elettrica che producono energia a partire da processi nucleari con una quantità minima di rifiuti del ciclo del combustibile.	NO
2.	L'impresa svolge, finanzia o ha esposizioni verso la costruzione e l'esercizio sicuro di nuovi impianti nucleari per la generazione di energia elettrica o calore di processo, anche a fini di teleriscaldamento o per processi industriali quali la produzione di idrogeno, e miglioramenti della loro sicurezza, con l'ausilio delle migliori tecnologie disponibili.	NO
3.	L'impresa svolge, finanzia o ha esposizioni verso l'esercizio sicuro di impianti nucleari esistenti che generano energia elettrica o calore di processo, anche per il teleriscaldamento o per processi industriali quali la produzione di idrogeno a partire da energia nucleare, e miglioramenti della loro sicurezza.	NO
	ATTIVITÀ LEGATE AI GAS FOSSILI	
4.	L'impresa svolge, finanzia o ha esposizioni verso la costruzione o la gestione di impianti per la produzione di energia elettrica che utilizzano combustibili gassosi fossili.	NO
5.	L'impresa svolge, finanzia o ha esposizioni verso la costruzione, la riqualificazione e la gestione di impianti di generazione combinata di calore/freddo ed energia elettrica che utilizzano combustibili gassosi fossili.	NO
6.	L'impresa svolge, finanzia o ha esposizioni verso la costruzione, la riqualificazione e la gestione di impianti di generazione di calore che producono calore/freddo utilizzando combustibili gassosi fossili.	NO

Principi contabili e informazioni contestuali

L'accounting policy, ovvero la modalità di calcolo delle quote di Fatturato, CapEx e OpEx associate alle attività ammissibili e quelle allineate identificato dal Gruppo, si basa su quanto riportato nell'allegato 1 all'Atto Delegato 2178/2021.

Ai fini dell'allocazione degli importi di Fatturato, CapEx e OpEx alle attività ammissibili e allineate, Terna ha definito una metodologia chiara e ripercorribile in risposta alle esigenze informative sia di natura quantitativa che qualitativa. Nello specifico, il Gruppo ha ricostruito gli indicatori utilizzando le informazioni presenti nella contabilità generale, industriale e regolatoria.

Di seguito il dettaglio della metodologia utilizzata per il calcolo dei singoli indicatori:

Per il calcolo della quota di **Fatturato** sono stati considerati, al numeratore, i ricavi netti consolidati generati dalla vendita di prodotti o servizi, anche immateriali, associati ad attività economiche ammissibili e allineate alla tassonomia, e al denominatore il totale dei ricavi netti (in base ai criteri esposti al punto 1.1.1. dell'Allegato 1 all'Atto Delegato 2178/2021). I ricavi netti sono stati individuati ricorrendo ai dati del bilancio consolidato redatto secondo i principi contabili internazionali e fanno riferimento a quanto previsto dal principio IAS 1, punto 82, lett. a) considerando quanto direttamente riconducibile alla vendita di beni e/o prestazione di servizi. Non sono presenti, nei valori riportati, importi connessi ad attività economiche incluse nella tassonomia condotte per il consumo interno del Gruppo.
