Telephone: 416-623-0565

Item 9 Date of Report

January 13, 2011

NEWS RELEASE

AuRo Resources Provides El Tesoro Pre-Drill Campaign Update

Vancouver, British Columbia, January 13, 2011 – AuRo Resources Corp. (TSX-V: ARU) (the “Company”) provides today an update on its flagship *El Tesoro* gold project in the Department of Antioquia, Colombia.

AuRo recently completed a detailed soil geochemical program over an area of approximately 1.1 km by 2.2 km. Given the proximity, similar and distinct geology of *El Tesoro* and B2 Gold/AngloGold’s 2.4 Million Oz Au *Gramalote* project, the Company will now be utilizing a comparable exploration strategy, and immediately following up on any potentially anomalous areas with deeper soil samples, prior to drill testing any potential targets. AuRo expects to release initial results from its soil geochemical program imminently.

Mark Lawson, President & CEO of AuRo, stated: “Given the unique climate and geology in Colombia in many areas such as Antioquia the host rock often turns to clay, and the clay is so acidic it leaches all metals which then migrate down to the saprolite horizon. Since the geology is similar to that of B2 Gold/AngloGold’s *Gramalote* Project, where deeper geochemical exploration was successful, we will exploit this new opportunity by also undertaking deeper soil samples.”

ON BEHALF OF THE BOARD

(sgd.) “Mark Lawson”, President & CEO
