BC FORM 53-901F

SECURITIES ACT

MATERIAL CHANGE REPORT UNDER SECTION 85(1) OF THE ACT

Item 1. Reporting Issuer

Titan Trading Analytics Inc.
200 – 675 West Hastings Street
Vancouver, BC
V3B 1N2

Item 2. Date of Material Change

August 6, 2003

Item 3. Press Release

Press Release dated August 6, 2003 and disseminated to the Vancouver Stockwatch Magazine, B.C. Securities Commission and Market News Publishing.

Place of Issuance: Vancouver, British Columbia.

Item 4. Summary of Material Change

The Issuer has successfully completed the initial test phase of its automated trading software and that larger scale trading activities have begun.

Item 5. Full Description of Material Change

The Issuer has successfully completed the initial test phase of its automated trading software and that larger scale trading activities have begun.

Over the past two months, the initial version of the trading system has been tested and exercised with well over a thousand live trades of 100 shares per trade. Many software improvements have been made during this period to improve the performance and reliability.

Recent testing confirms that the latest software is now working as intended and that it can consistently identify and execute trades in real-world conditions. Based on these findings, the Issuer has started to trade in larger quantities. On July 31, 2003, the system issued 308 trading orders, traded 84,100 shares and executed a total of $2.95 million worth of stock. This marks a new high in trading volume for the system.

The trading system logic has rules to handle a variety of entry techniques. It can follow long or short trends, trade short against resistance and buy at support levels. The recent focus has been on day trading, but a position-trading model that will hold stocks and futures overnight for up to several weeks is also nearing completion.

The Issuer's automated trading system is proprietary software technology that combines trading entry and trade management software with fully automated order execution software. The execution software, call the Titan Order Execution System, or TOES™, is separable from the Issuer's trading logic and can be interfaced to a wide variety of proprietary trading techniques. The Issuer plans to offer TOES™ to client trading firms in the near future and is presently in discussions with a number of New York trading firms to supply a version of TOES™ for their own proprietary trading.

Item 6. Reliance on Section 85(2) of the Act

The Issuer is not relying on Section 85(2) of the Act.

Item 7. Omitted Information

There is no omitted information.

Item 8. Senior Officers

Ken Powell, President - (780) 435-5546.

Item 9. Statement of Senior Officer

The foregoing accurately discloses the material change referred to herein.

DATED at the City of Vancouver, in the Province of British Columbia, this 12th day of September, 2003.

"Ken Powell"
Dr. Ken Powell, President
