GALAXY ONLINE ANNOUNCES NEW PRESIDENT

Former AT&T WorldNet executive accepts position of President and Chief Operations Officer of Galaxy Online Inc.

INDIANAPOLIS, IN (February 23, 2000) Galaxy Online Inc. (CDN:GOLI) Galaxy Online announced today that Mr. Glen Kaiser has been named as President and Chief Operations Officer. Mr. Kaiser has had an extensive career in the telecommunications and Internet industry in key executive roles with AT&T, NCR, Bell South, Bell Labs, and Lucent Technologies. Most recently Mr. Kaiser was the Chief Operating Officer of "Electric SchoolHouse", a new innovative Internet company targeting the school and home market, which he helped design and launch in the spring of 1999. Mr. Kaiser was one of the key operational executives to design and launch AT&T's WorldNet National ISP services in 1996, and helped build it to become the second largest ISP within the first 12 months of operation.

"We are very fortunate to announce today that Mr. Glen Kaiser has joined Galaxy Online as the President and Chief Operations Officer. Mr. Kaiser brings considerable experience in the national ISP market and a deep background across the consumer and business communications field. His range of expertise in all operations asset to **Galaxy Online**," said Jim Eiteljorg, Chairman of the Board.

Major accomplishments during Mr. Kaiser career include the very successful market introduction of Lucent's Definity PBX system, Conversant Voice Response Systems, and Audix Voice Mail system. In addition, his concept development of the Unified Messaging market, his major work on the original PicturePhone Video Conferencing service, and major work on the Data Warehousing market while at NCR provide a deep background across the consumer and business communications and internet market. Mr. Kaiser completed his under graduate work at Jacksonville University and did graduate work at the University of North Florida.

About Galaxy Online

Galaxy OnLine Inc., d.b.a. **Galaxy Internet**, is an Internet Access and Services provider specializing in delivery of high quality Internet access to rural and metropolitan areas. **Galaxy Internet** also provides a co-branded "**Powered by Galaxy**" connectivity solution for technology companies, media companies, school systems, and entrepreneurs. **Galaxy Internet** is positioned through partnerships with top level hardware, software, and infrastructure companies to offer affordable high speed internet access via bi-directional satellite, wireless, and traditional land lines.

Galaxy Online is presently in the process of installing ISP "Points of Presence" in the Midwest, Southeastern states, and Ontario, offering service to many areas that until now had limited or no Internet access available. The Company plans to make Internet access available to additional regions in the US, Canada, China, Caribbean, and Central and South Americas. **Galaxy OnLine** has 51,431,034 shares outstanding and is currently quoted on the Canadian Dealing Network (CDN) under the symbol **GOLI**.
