Item 5. Full Description of Material Change:

The Company is pleased to announce, subject to regulatory approval, the acquisition of a 100% interest in the Centre Fire Lake Property, located in Lomond and McIlraith Townships, Patricia Mining Division, approximately 38 km northeast of Dryden, Ontario. Consideration for the Property consists of \$67,500 and 260,000 shares, payable over four years, and a work commitment of \$265,000 over four years. There is a 3% net smelter return payable, half of which (1.5%) may be purchased for \$1,000,000, and a further 0.5% for an additional \$1,000,000.

The property is accessible by road. In the late 1960s, Phelps Dodge Corp. intersected wide zones of low grade copper mineralization such as 270 feet averaging 0.16% copper from limited drilling. Anomalous gold and nickel values were also encountered in the thick sequences of mafic flows that locally contain semi massive to massive sulphide pods within intensely silicified and/or carbonate altered zones. No further work has been carried out on the property. Abitibi plans to complete compilation work on the property and conduct an airborne VTEM survey to locate potential volcanogenic massive sulphide bodies containing copper, zinc, silver or gold.
