Dear Sirs/Mesdames:

RE: Material Change Report

1. The name of the reporting issuer is **Tribute Minerals Inc.** ("Tribute" or the "Company"), whose principal office is at 67 Yonge Street, Suite 808, Toronto, Ontario, M5E 1J8.
2. The material change occurred on August 15, 2006.
3. A Press Release was published on the CCN Matthews Newswire on August 15, 2006.
4. Tribute reported that the assays released on July 25, 2006 with respect to the Garnet Lake Property, Confederation Lake Belt, Northwestern Ontario, which included certain over limit assays, have significantly increased in gold values.
5. Hole GL2006-26 on the Garnet Lake Property encountered two previously reported VMS zones. The second lower zone contained over limit assays for gold and zinc.

The second zone from 320.5-323.0 metres down hole of 2.5 metres (1.9 metres true width) now grades 13.4% Zn, 0.67% Cu, 13.6 g/t Au, 55 g/t Ag and 29.6 g/t In. This is compared to the previously announced 13.2% Zn, 0.76 % Cu, 2.58 g/t Au, 55 g/t Ag and 29.6 g/t In.

The upper zone from 290.5-302.0 metres down hole of 11.5 metres (8.74 metres true width) grading 8.24% Zn, 0.25% Cu, 0.24 g/t Au, 30.1 g/t Ag and 10.7 g/t In remains unchanged.

Tribute also stated that the drill program had now moved to the western down plunge extension and drilling would be on going in this location. Tribute drilled a further five holes to the east of the two holes reported July 25, and assays are pending.

The over limit assay for zinc was completed by titration (Zn-VOL50). The over limit assay for Au plus re-analyses of two additional high Au samples were completed using a complete Au-screen fire assay - 100 um (Au-SCR21) requiring a 250 gm aliquot of sample. ALS Chemex in North Vancouver completed the analyses. The Garnet Lake exploration program is under the direction of Trevor Boyd, Ph.D., P.Geo., Consultant, Tribute Minerals; and a qualified person (QP) for the purposes of NI43-101.

6. The report is not being filed on a confidential basis in reliance on subsection 7.1(2) or (3) of National Instrument 51-102.
7. No information is omitted because it is to be kept confidential.
8. Mr. Ian Brodie-Brown, President and C.E.O. of the Company, may be contacted at 416-368-2929 concerning this report.
9. The foregoing accurately discloses the material change referred to herein.

DATED at Toronto, Ontario this 7th day of August, 2006.

TRIBUTE MINERALS INC.
