**Red Pine Expands Drill Program: Second Drill in Operation at its Wawa Gold Project**

**Toronto, Ontario – May 17, 2017** – Red Pine Exploration Inc. (TSX-V: RPX) (“Red Pine” or the “Company”) has expanded its drill campaign on its Wawa Gold Project by mobilizing a second drill to carry out an additional 10,000 metres of drilling. The aggregate 20,000 metres diamond drill program will be designed to potentially expand the size of the existing gold resource on the large Wawa Gold Project property.

One of the drills currently on site is attempting to expand the existing inferred gold resource while the other will potentially connect other zones of gold mineralization (the Wawa Gold Corridor) recently discovered through drilling and other exploration techniques.

The exploration budget for the upcoming season has been approved by the Management Committee of the Joint Venture Agreement (“JVA”) between Red Pine Exploration Inc. and Citabar LLP.

The current exploration program includes three different activities:

- a) A geophysical program intended to potentially connect some or all of the historic gold mines that have a deep rooted geologic structure that is the likely source of the gold mineralization of these deposits (*April 20, 2017 News Release*);
- b) An independent third party exploration target review that will summarize the tonnage and grade range potential for the Wawa Gold Corridor, including the 1.1 million ounces at 1.71 g/t Surluga Deposit<sup>1</sup> (*April 4, 2017 News Release*);
- c) Metallurgical testing of representative ore samples to help determine the most efficient ore processing methods for the future recovery of gold and silver (*April 13, 2017 News Release*).

The results of the first two studies, (a) and (b), will become available over the next few months and should be helpful in further optimizing drill targets to best reflect the potential for an increase in the current gold resource.

The results of the third study, (c), will provide invaluable data for preliminary economic analyses of the ore body which is an important de-risking step in the advancement of the project.

### **About the JVA**

Red Pine has a 60% interest in the Wawa Gold Project with Citabar LLP holding the remaining 40%. This partnership has been extremely valuable to Red Pine as the manager of the operations aggressively advances exploration on the property.

Quentin Yarie, P.Geo., President, CEO, and Director, stated *“Citabar has proven to be an excellent partner in the Wawa Gold Project. Citabar supports our exploration program wholeheartedly and is able to contribute monetarily in a significant manner to the ongoing exploration program. Citabar shares Red Pine’s objective to develop the project and increase shareholder value.”*

### **About the Wawa Gold Project**

#### Highlights

- 100% owned land position between JVA
- 2 km southeast of the Municipality of Wawa, Ontario, close to roads, power and other infrastructure
- 8 past producing mines on property with historical production of 120,000 oz gold at 9.04 g/t average grade<sup>2</sup>

#### **> 1M oz Inferred Gold Resource at 1.71 g/t (0.5 g/t cut-off)<sup>1</sup>**

- Near surface mineralization
- Open in all directions

#### **Considerable Growth Potential**

- Potential for multi-million ounces resource
- Newly discovered high-grade gold zones in many areas on property
- Gold mineralization extends 5 km in length

#### **Preliminary Metallurgical Study Underway**

- Optimization of gold and silver recoveries

### **Qualified Person**

Quentin Yarie, P. Geo. is the qualified person responsible for preparing, supervising and approving the scientific and technical content of this news release.

### **About Red Pine Exploration Inc.**

Red Pine Exploration Inc. is a gold and base-metals exploration company headquartered in Toronto, Ontario, Canada. The Company's common shares trade on the TSX Venture Exchange under the symbol "RPX".
