DISCLAIMER

Q1 2026 RESULTS

This document contains certain forward-looking statements particularly those regarding capital expenditure, development and management of oil and gas resources, dividends, share repurchases, allocation of future cash flow from operations, future operating performance, gearing, targets of production and sales growth, new markets and the progress and timing of projects. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that will or may occur in the future.

Actual results may differ from those expressed in such statements, depending on a variety of factors, including the impact of the pandemic disease, the timing of bringing new fields on stream; management's ability in carrying out industrial plans and in succeeding in commercial transactions; future levels of industry product supply, demand and pricing; operational issues; general economic conditions; political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations; development and use of new technology; changes in public expectations and other changes in business conditions; the actions of competitors and other factors discussed elsewhere in this document.

Due to the seasonality in demand for natural gas and certain refined products and the changes in a number of external factors affecting Eni's operations, such as prices and margins of hydrocarbons and refined products, Eni's results from operations and changes in net borrowings for the quarter of the year cannot be extrapolated on an annual basis.

CONCLUDING REMARKS

EXCELLENT DELIVERY

Solid Q1 earnings and cashflow generation. Proforma gearing at 15%

Exceptional exploration results adding new resources of ~1 Bln boe; major new FIDs; 9% y/y production growth

Capacity build out in Transition activities continues

IMPORTANT INITIATIVES

Completion of ACEA Energia purchase

Plenitude reorganization to support growth

RAISED PERFORMANCE OUTLOOK AND HIGHER DISTRIBUTIONS

CFFO outlook raised by ~20% on Scenario and underlying outperformance

Raised Buyback to €2.8 Bln

BACK UP

FOCUS ON MIDDLE EAST CONFLICT

LIMITED EXPOSURE AND RESILIENCE OF A DIVERSIFIED BUSINESS MODEL

UPSTREAM

2-3% PRODUCTION EXPOSURE

Mainly in UAE, while representing a smaller share of Upstream earnings and CFFO

2025 production in UAE was 60 kbb/d and 18.2 mmcf/d

In Iraq minor impact, with production from Zubair field supplying local market

2025 production in Iraq was 31 kbb/d and 82.2 mmcf/d

LNG VOLUMES

NO IMPACT

due to swap agreements and the high flexibility of Eni's portfolio

Leveraging diversified sourcing to ensure supply resilience

In 2025 LNG volumes supplied from Qatar were 1.15 bcm (3% of total supplies)

REFINING

CONTAINED IMPACT

Ruwais operations maintained at reduced levels, supported by local crude and domestic demand

Trading benefiting from market volatility, partly offsetting limited export capacity

No physical logistics effects

PLENITUDE DECONSOLIDATION

FOCUS ON THE SHAREHOLDING REORGANIZATION

PLENITUDE: A MATERIAL PLAYER

global presence with mature organization (>15 countries)

Fully integrated across renewable generation, retail supply and green energy services

RATIONALE FOR REORGANIZATION

efficient funding of accelerating growth profile

Strengthening Plenitude's independence in delivering its plan

Targeting investment grade credit rating

THE TRANSACTION

non-proportional capital increase of ~€1.5bln

with Ares committing to ≥€1bln

NEW GOVERNANCE FRAMEWORK

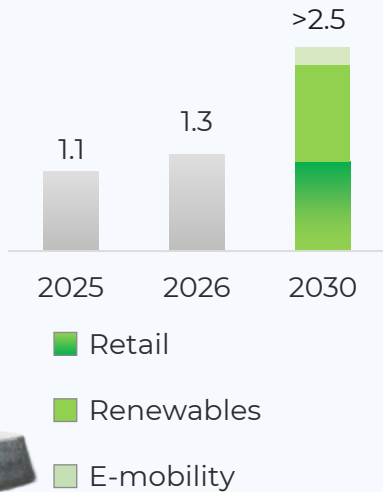

based on joint control between Eni and Ares
