News Release

FOR IMMEDIATE RELEASE

SCS Solars Reacquires 100% Ownership of TourTek

VANCOUVER, CANADA (January 10, 2000) - SCS Solars Computing Systems Inc. ("Solars") announces that it has reacquired 100% ownership of its proprietary software better known as "TourTek", an online booking software product for the leisure travel industry, pursuant to an agreement with Orbit Network, Inc. ("Orbit"). Solars initiated development of TourTek in 1996. In 1998 the Company entered into a Joint Development and Marketing Agreement with Orbit whereby Orbit agreed to fund completion of the development of the TourTek product in exchange for acquiring a 51% ownership interest, leaving Solars with a 49% interest, in a newly incorporated joint venture company. This joint venture company, known as TourTek Solutions Ltd., was established to complete development and marketing of the TourTek product. New management of Orbit recently advised Solars that Orbit and TourTek Solutions Ltd. were unable and unwilling to meet their obligations under their respective agreements with Solars.

Under the termination agreement, Orbit has relinquished its 51% ownership interest in TourTek Solutions Ltd., as well as its licensing rights to the TourTek product. In addition, TourTek Solutions Ltd. has relinquished its interests in the TourTek product. As a result Solars has reacquired sole and full ownership of the TourTek product with full and exclusive licensing rights. In return, Solars has released Orbit from certain outstanding obligations and any further obligations respecting TourTek Solutions Inc. and has agreed in principle to enter into a future agreement to grant Orbit a license to use the TourTek product in the development of its TravelFile product. Solars is now completing the development of the TourTek product and will commence marketing shortly.

In addition to TourTek Solars, through its Solarnet Travel Network, improves the productivity and profitability of travel vendors and travel retailers worldwide by developing and delivering Internet, Intranet and GDS / CRS online travel information automated solutions. SCS Solars Computing Systems Inc. is a public company, trading on the Canadian Venture Exchange under the symbol SCS.
