Solars Appoints New President

Rick Ridding former Technology Director of Sabre Canada promoted to President

Vancouver, BC, September 30, 2002 Solars (SCS Solars Computing Systems Inc.; TSX-V: SCS and OTC US: SCSIF), a leading provider of business-to-business information management and electronic distribution solutions for the travel industry, announced today the promotion of Rick Ridding to President of the Company, effective immediately.

Ridding succeeds Andrew O'Leary, who will continue to serve the Company as CTO. Ridding will assume the responsibilities of President of the Company and continue his duties as Director of Business Development and Technology.

"Rick's appointment as President is an important and exciting step in the next stage of our Company's growth and development," said Frank Wells, Chairman of Solars.

Mr. Ridding brings more than 18 years of software, data communication and travel industry experience to the Solars team. Prior to Mr. Ridding's tenure as Director of Business Development and Technology with Solars, he held the position of Technology Director for the Canadian division of Sabre, Inc., the leading provider of technology, distribution and marketing services for the travel industry. In that position, he was responsible for liaising and consulting on technology issues and planning for some of Canada's top retail consortia, including American Express, Rider/BTI and Air Miles (The Loyalty Group) in relation to Global Distribution System (GDS) business solutions. His responsibilities in evaluating new technologies and e-commerce opportunities for the travel industry included major roles in projects such as the design of Virtual Private Network WAN technology for Sabre's largest Canadian account and the integration of wireless applications with RIM. He was also heavily involved in integrating API based initiatives with Internet entrepreneurs. Prior to his position with Sabre, Mr. Ridding was Manager/Director of EDI Comnet's Travel Division, overseeing marketing and sales of web application software and data communication network services to Canada's largest leisure tour operators.

"With the mercurial changes in the travel industry today due to 9-11 and advancing technologies, Solars is in the perfect position to take on a major role in Application development and content Integration for the Travel Community Desktop," stated Mr. Ridding. The multi-channel distribution capability of SolarNet, encompassing the Internet and every major GDS, and the TourTek tour operator management system has created a global travel distribution platform that is unparalleled in the world today. I am excited to be able to contribute to the Solars team and look forward to pursuing significant industry opportunities for the Company."

About Solars: Based in Vancouver, BC, Solars' is a supply chain intermediary linking travel industry suppliers with retail channels. Solars' core competency is the ability to electronically gather and compile travel product content from disparate sources. And, facilitate the

management, distribution and booking of that content via both the Internet and the major Global Distribution Systems. Solars' proprietary products include: SolarNet & TourTek
