NEWS RELEASE

Reg Technologies, Inc.
(the "Company" or "Reg")

REGI U.S., INC./REG TECHNOLOGIES, INC. DEMONSTRATES THE RAND CAM™ PLASTIC ELECTRIC MODEL AT THE WORLD MONEY SHOW IN ORLANDO, FLORIDA

For Immediate Release: February 2, 2005. Vancouver, BC – REGI U.S., Inc. (OTC BB: RGUS)/Reg Technologies, Inc. (TSX Venture Exchange: RRE, OTC BB: REGRF) are pleased to announce that the Rand Cam™ technology will be exhibited at the World Money Show, booth #406 –Gaylord Palms Resort, Orlando, Florida, February 2 - 5, 2005. The Company will be demonstrating a plastic electric model of its 42 H.P. Rand Cam™ engine, which is six inches long and six inches in diameter. This plastic electric model Rand Cam™ engine will provide an excellent example of the engine design and how it functions.

The World Money Show draws over 10,000 investors from all over the world. For more details please visit the website at www.moneyshow.com

REGI U.S., Inc. owns the U.S. rights and the parent company Reg Technologies, Inc. owns the worldwide rights to the Rand Cam™ rotary technology. The engine is a light weight rotary engine that has only two moving parts: the vanes (up to 12) and the rotor, compared to the 40 moving parts in a simple four-cylinder piston engine. This revolutionary design makes it possible to produce a total of 24 continuous power impulses per one rotation that is vibration –free and extremely quiet. The Rand Cam™ engine also has multi-fuel capabilities and is able to operate using fuels including natural gas, hydrogen, propane and diesel. Reg Technologies, Inc., together with REGI U.S., Inc., is in the process of testing a Rand Cam™ diesel engine for a generator application for hybrid electric cars. Additionally, our licensee for the 42 H.P. production model diesel Rand Cam™ is currently completing the engine for unmanned aerial applications for the U.S. military.
