

BC FORM 51-102F3
Material Change Report

Item 1. Name and Address of Company

State the full name and address of your company and the address of its principal office in Canada.

REG TECHNOLOGIES INC.
1103 – 11871 Horseshoe Way
Richmond, BC V7A 5H5
Phone: (604) 278-5996

Item 2. Date of Material Change

State the date of the material change.

November 30, 2005

Item 3. News Release

State the date and method(s) of dissemination of the news release issued under section 7.1 of National Instrument 51-102.

November 30, 2005

The press release relating to this material change was distributed and filed by Stockwatch and Businesswire on November 30, 2005.

Item 4. Summary of Material Change

Provide a brief but accurate summary of the nature and substance of the material change.

The Company announced that the modifications for the 42 H.P. diesel engine have been completed by Ebco Industries Ltd. (www.ebco.com). This version includes six additional cam designs with a special coating to ensure durability, which will be tested for diesel, gasoline, hydrogen, pump and compressor applications.

Item 5. Full Description of Material Change

Supplement the summary required under Item 4 with the disclosure that should be sufficient disclosure to enable a reader to appreciate the significance and impact of the material change without having to refer to other material. Management is in the best position to determine what facts are significant and must disclose those facts in a meaningful manner. See also Item 7.

Some examples of significant facts relating to the material change include: dates, parties, terms and conditions, description of any assets, liabilities or capital affected, purpose, financial or dollar values, reasons for the change, and a general comment on the probable impact on the issuer or its subsidiaries. Specific financial forecasts would not normally be required.

Other additional disclosure may be appropriate depending on the particular situation.

For a full description of the material change, see Schedule "A".

Item 6. Reliance on section 7.1(2) or (3) of National Instrument 51-102

If this report is being filed on a confidential basis in reliance on section 7.1(2) or (3) of National Instrument 51-102, state the reasons for that reliance.

Not applicable.

Instruction:

Refer to subsections 7.1(4), (5) and (7) of National Instrument 51-102 concerning continuing obligations in respect of reports filed under subsection 7.1(2) or (3) of National Instrument 51-102.

Item 7. Omitted Information

State whether any information has been omitted on the basis that it is confidential information.

In a separate letter to the applicable regulator or securities regulatory authority marked "Confidential" provide the reasons for your company's omission of confidential significant facts in the Report in sufficient detail to permit the applicable regulatory or securities regulatory authority to determine whether to exercise its discretion to allow the omission of these significant facts.

Not applicable.

Instruction:

In certain circumstances where a material change has occurred and a material change report has been or is about to be filed but section 85 (3) of the Act will no longer or will not be relied upon, a reporting issuer may nevertheless believe one or more significant facts otherwise required to be disclosed in the material change report should remain confidential and not be disclosed or not be disclosed in full detail in the material change report.

Item 8. Executive Officer

Give the name and business telephone number of an executive officer of your company who is knowledgeable about the material change and the Report, or an officer through whom the executive officer may be contacted.

*John G. Robertson
President
(604) 278-5996*

Item 9. Date of Report

DATED at Richmond, British Columbia this 8th day of December 2005.

NEWS RELEASE

Reg Technologies Inc. / REGI U.S., Inc.
(the "Company" or "Reg" or "REGI")

**REG TECHNOLOGIES INC. / REGI U.S., INC.
ANNOUNCES THE COMPLETION STAGE FOR THE
MODIFIED VERSION OF THE RAND CAM™ ENGINE**

For Immediate Release: November 30, 2005. Vancouver, BC – Reg Technologies Inc. (TSX Venture Exchange: RRE, OTC BB: REGRF) and its subsidiary REGI U.S., Inc. (OTC BB: RGUS, Berlin Stock Exchange: RGJ) wish to announce that the modifications for the 42 H.P. diesel engine has been completed by Ebco Industries Ltd. (www.ebco.com). This version includes six additional cam designs with a special coating to ensure durability, which will be tested for diesel, gasoline, hydrogen, pump and compressor applications. Shane Kabisch states, "REGI U.S., Inc. can now test several applications for the Rand Cam™ technology by interchanging the appropriate cam design." The first application to be tested will be the diesel version for an unmanned aerial application for a large military contractor and a generator application for a hybrid car application.

Ebco Industries Ltd. has the capability to manufacture additional prototypes for other applications, as required, for potential end users.

Testing has commenced this week by Shane Kabisch, REGI's rotary engine specialist.

ABOUT EBCO INDUSTRIES LTD.

Ebco Industries Ltd. of Richmond B.C. operates one of the largest custom manufacturing facilities in western Canada. Ebco's unique capabilities provide a "one-stop" operation for customer requirements that include Heavy Metal Fabrication, Heavy Machining, Assembly and Light Precision Machining and Fabrication. Ebco is a ISO 9001:2000 registered manufacturer of equipment, machinery and related components for the forestry, pulp and paper, mining, power generation, petro-chemical, nuclear, aerospace and defense industries.

ABOUT REG TECHNOLOGIES INC. / REGI U.S., INC.

REGI U.S., Inc. owns the U.S. rights and the parent company Reg Technologies Inc. owns the worldwide rights to the Rand Cam™ rotary technology. The engine is a light weight rotary engine that has only two moving parts: the vanes (up to 12) and the rotor, compared to the 40 moving parts in a simple four-cylinder piston engine. This revolutionary design makes it possible to produce a total of 24 continuous power impulses per one rotation that is vibration-free and extremely quiet. The Rand Cam™ engine also has multi-fuel capabilities and is able to operate using fuels including natural gas, hydrogen, propane and

diesel. Reg Technologies Inc., together with REGI U.S., Inc., is in the process of testing a Rand Cam™ diesel engine for a generator application for hybrid electric cars and for unmanned aerial applications for the U.S. military. For more information please visit www.regtech.com.

ON BEHALF OF THE BOARD OF DIRECTORS
