### **DRILLING COMMENCES ON LONE MOUNTAIN PROJECT**

White Knight Resources Ltd. (WKR-V) announces that its partner, Kennecott Exploration Company, has commenced drilling at the Company's Lone Mountain property in Nevada. The program comprises 2,000 feet of drilling in 2 holes targeted to intersect the Roberts Mountains and Hansen Creek formations of the Lower Plate beneath a thin cap of Upper Plate Valmy/Vinini Formation.

The Lone Mountain property is located at the southern end of the Independence Range, 10 miles due south of the Independence Mining District in which AngloGold has delineated a total of 10 million ounces of gold reserves and resources. The rocks below the Lone Mountain property are nearly identical to the rocks in the Independence District.

On Behalf of the Board of Directors,

**WHITE KNIGHT RESOURCES LTD.**
