The foregoing accurately discloses the material change referred to herein.

Dated this 12th Day of June, 2018.

"Karan Thakur"

Karan Thakur
Name

Director
Position / Title

Vancouver, B.C.
Place of Declaration

FogChain's RadJav Platform Provides Full Linux Support

Vancouver, Canada and San Carlos, CA – June 12, 2018 – FogChain Corp. ("FogChain" or the "Company") is pleased to announce that its rapid application development platform, RadJav ("RadJav"), has finalized its build to connect with the Linux Operating System. RadJav was recently acquired by the Company as previously announced last week.

FogChain, a next generation application lifecycle management company, recently acquired the RadJav platform which enables developers with rapid development tools and resources for the creation of Apps, smart contracts, and Apps, has completed the integration with Linux, the most popular open source operating system in the world. As an operating system, Linux is software that sits underneath all of the other software on a computer, receiving requests from those programs and relaying these requests to the computer's hardware. In fact, many of the devices people own, such as Android phones, digital storage devices, personal video recorders, cameras, wearables, and the like, also run Linux. Jim Cerna, FogChain's President, commented "We are excited to integrate Linux into our platform as part of our vision to reach all devices and enhance Fog computing."

Nathanael Coonrod, VP of Engineering for FogChain, stated "supporting a major operating system such as Linux gives developers greater access to create complete software solutions for their customers, allows them to quickly develop software for embedded devices, and enhances their ability to build secure and reliable server software, all within the RadJav platform." Mr. Coonrod further stated, "Radjav continues to democratize and streamline software development into a unified platform, and this is another big step towards supporting the developer community."

About FogChain Corp.

FogChain is exactly as it sounds - the event horizon, where application lifecycle management meets the decentralized Fog (edge network), providing the most secure and efficiently distributed platform for software development on any platform. With the recent explosive demand for more edge computing and security within the Micro-Service, IoT and Driverless Vehicle space, FogChain's platform provides a software tool kit leveraging the best of both worlds. The inherent security of Blockchain combined with the ubiquity and performance of the Fog is the only logical and scalable path. Led by a team of Cloud and SaaS veterans, FogChain is uniquely positioned to be the next super wave for the $500 billion software development market. Learn more at www.FogChainInc.com

About RadJav

RadJav is a unified software development platform and next generation blockchain built for developers by developers to provide the rapid development of Apps, Dapps, and Smart Contracts for commercial enterprises on a global scale. RadJav and its XRJ utility token is a breakthrough technology based upon a unique blockchain, rapid application development platform, decentralized datacenter, and Proof of Competition network. RadJav's current version of its platform and blockchain can be downloaded and used today to start building applications. Using just a few lines of code, developers have the ability to create native Windows and HTML5 apps that utilize the same JavaScript code, with full support for mobile apps coming soon.

FORWARD LOOKING STATEMENTS

This news release contains "forward-looking information" and "forward-looking statements" (collectively, "forward-looking statements") within the meaning of the applicable Canadian securities legislation. All statements, other than statements of historical fact, are forward-looking statements and are based on expectations, estimates and projections as at the date of this news release. Any statement that involves discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions, future events or performance (often but not always using phrases such as "expects", or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "budget", "scheduled", "forecasts", "estimates", "believes" or "intends" or variations of such words and phrases or stating that certain actions, events or results "may" or "could", "would", "might" or "will" be taken to occur or be achieved) are not statements of historical fact and may be forward-looking statements. In this news release, forward-looking statements relate, among other things, to: the terms and conditions of the Transaction; use of funds; and the business and operations of the Company. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable, are subject to known and unknown risks, uncertainties, and other factors which may cause the actual results and future events to differ materially from those expressed or implied by such forward-looking statements. Such factors include, but are not limited to: general business, economic, competitive, political and social uncertainties; and the delay or failure to receive board, shareholder or regulatory approvals. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on the forward-looking statements and information contained in this news release. Except as required by law, the Company assumes no obligation to update the forward-looking statements of beliefs, opinions, projections, or other factors, should they change, except as required by law.
