FogChain's RadJav Rapid Application Development Platform Completes Integration with Apple Mac OSX

Vancouver, Canada and San Carlos, CA – June 26, 2018 – FogChain Corp. ("FogChain" or the "Company") (CSE: FOG) is pleased to announce that its rapid application development platform, RadJav ("RadJav"), has completed its integration with Apple's Mac OSX Operating System. RadJav was recently acquired by the Company as previously announce.

FogChain, a next generation application lifecycle management company, advances the RadJav platform by completing the integration with the second most popular and widely used operating systems in the world – Mac OSX. Mac OSX is the computer operating system for Apple's Mac family of computers. A popular feature of its latest version, Mac OS X, is a desktop interface which includes 3-D display capabilities. OS X has a modular design intended to make it easier to add new features to the operating system in the future. It is also able to run Unix applications as well as older Mac applications. James Cerna – the CEO of FogChain commented, "The addition of Mac OSX rounds out our product offering and allows us to go to market faster than previously thought."

"With Mac support, we are now fully compatible with all three major operating systems (Microsoft Windows, Linux, and Mac), as well as HTML5, giving developers the most flexibility for creating their applications," said Nathanael Coonrod, the creator of the RadJav platform and VP of Engineering at FogChain. "This latest release is a testament of our commitment to the developer community and our focus on creating the most robust application development platform in the market." RadJav previously announced that it has an aggressive pipeline of new applications, tools and features that it will be rolling out over the next few months, which will further enhance its reach and capabilities across the entire software and application development landscape.

About FogChain Corp.

FogChain is exactly as it sounds - the event horizon, where application lifecycle management meets the decentralized Fog (edge network), providing the most secure and efficiently distributed platform for software development on any platform. With the recent explosive demand for more edge computing and security within the Micro-Service, IoT and Driverless Vehicle space, FogChain's platform provides a software tool kit leveraging the best of both worlds. The inherent security of Blockchain combined with the ubiquity and performance of the Fog is the only logical and scalable path. Led by a team of Cloud and SaaS veterans, FogChain is uniquely positioned to be the next super wave for the $500 billion software development market.

About RadJav

RadJav is a unified software development platform and next generation blockchain built for developers by developers to provide the rapid development of Apps, Dapps, and Smart Contracts for commercial enterprises on a global scale. RadJav and its XRJ utility token is a breakthrough technology based upon a unique blockchain, rapid application development platform, decentralized datacenter, and Proof of Competition network. RadJav's current version of its platform and blockchain can be downloaded and used today to start building applications. Using just a few lines of code, developers have the ability to create native Windows and HTML5 apps that utilize the same JavaScript code, with full support for mobile apps coming soon.

FORWARD LOOKING STATEMENTS

This news release contains "forward-looking information" and "forward-looking statements" (collectively, "forward-looking statements") within the meaning of the applicable Canadian securities legislation. All statements, other than statements of historical fact, are forward-looking statements and are based on expectations, estimates and projections as at the date of this news release. Any statement that involves discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions, future events or performance (often but not always using phrases such as "expects", or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "budget", "scheduled", "forecasts", "estimates", "believes" or "intends" or variations of such words and phrases or stating that certain actions, events or results "may" or "could", "would", "might" or "will" be taken to occur or be achieved) are not statements of historical fact and may be forward-looking statements. In this news release, forward-looking statements relate, among other things, to: the terms and conditions of the Transaction; use of funds; and the business and operations of the Company. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable, are subject to known and unknown risks, uncertainties, and other factors which may cause the actual results and future events to differ materially from those expressed or implied by such forward-looking statements. Such factors include, but are not limited to: general business, economic, competitive, political and social uncertainties; and the delay or failure to receive board, shareholder or regulatory approvals. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on the forward-looking statements and information contained in this news release. Except as required by law, the Company assumes no obligation to update the forward-looking statements of beliefs, opinions, projections, or other factors, should they change, except as required by law.
