This is the form of material change report required under section 85(1) of the *Securities Act* and section 151 of the *Securities Rules*.

FORM 53-901F
(Previously Form 27)

MATERIAL CHANGE REPORT UNDER
SECTION 85(1) OF THE *SECURITIES ACT* (BRITISH COLUMBIA)

NOTE: This form is intended as a guideline. A letter or other document may be used if the substantive requirements of this are complied with.

NOTE; If this report is filed on a confidential basis, put at the beginning of the report in block capitals "CONFIDENTIAL – SECTION 85", and file in an envelope marked "Confidential – Attention: Supervisor, Financial Reporting".

1 Reporting Issuer

WHITE TIGER MINING CORP.
2489 Bellevue Avenue
West Vancouver, British Columbia V7V 1E1

Telephone (604) 922-2030

(the "Company" or "White Tiger")

2 Date of Material Change

December 1, 2010

3 Press Release

Issued in West Vancouver, B.C. on December 1, 2010 under Section 85 (1) of the Act and disseminated through the facilities of Market News, Stockwatch and Marketwire.

4 Summary of Material Change

The Company announced that recent assays from the Marshall Lake Property have confirmed that the RM Zone is open to depth, as well as along strike, in both the eastern and western extensions of the Zone.

5 Full Description of Material Change

The Company announced that recent assays from the Marshall Lake Property have confirmed that the RM Zone is open to depth, as well as along strike, in both the eastern and western extensions of the Zone.

The Marshall Lake Property is located 30 km west of Nakina, Ontario. Access is by all weather gravel road from Hwy 11 and the main CNR rail line is within 22 km to the south of the Property.

White Tiger's initial Phase 1 drill program of approximately 2,400 metres successfully expanded a new discovery (the "RM Zone") for a strike length of 125 metres while confirming the potential to increase and expand the deposit to the east, west and down dip to depth. A more significant Phase 2 drill program is currently being planned for early 2011. This Phase 2 program will focus on expanding the RM Zone in all directions, developing the RM Zone into a resource estimate and exploring the high potential additional targets and zones such as those discovered in the 2006-2008 drill programs completed by Rainy Mountain Royalty Corp. and Marshall Lake Mining PLC.

“We are extremely pleased to have been able to define such a significant zone of mineralization in our initial Phase 1 drill program. The fact that the RM Zone is still open in all directions is very encouraging and we are excited at the potential of expanding this Zone and developing a resource estimate during our Phase 2 drill program in the upcoming months", says Ronald Coombes, President and CEO of White Tiger Mining Corp.

Drill Hole Summary

Drill hole GAZN-10-14; a 25 metre southern step out from GAZN-10-13 and 50 metre southern step out from GAZN-08-08, has extended the mineralization to depth on the east side of the RM Zone. This hole has confirmed the presence of mineralization to the east over a significant width and will be followed up in the Phase 2 program in an effort to further extend the RM Zone strike length to the east. GAZN-10-14 intersected a wide zone of mineralization assaying 0.41% Cu, 2.46g/t Ag and 0.10g/t Au over 56 metres, including a higher grade intersection of 0.71% Cu, 4.35g/t Ag and 0.19g/t Au over 19 metres.

Drill hole GAZN-10-16; a 50 metre southern step out from GAZN-10-12 and 25 metre western step-out from GAZN-10-15, has traced the high grade zone further west of GAZN-10-15 and has provided continuity between the high grade zone and the mineralization encountered in the most western holes to date (GAZN-10-17 and GAZN-10-19). GAZN-10-16 intersected 12 metres of 0.44% Cu. 2.39g/t Ag and 0.04g/t Au, including 0.97%Cu, 5.60g/t Ag and 0.10g/t Au over 3 metres.

Drill hole GAZN-10-18; a 25 metre southern step out from GAZN-10-15, has extended the mineralization to depth and will be followed up in the Phase 2 program in an effort to further extend the RM Zone to depth. GAZN-10-18 intersected a high grade zone of mineralization assaying 0.86%Cu, 4.78g/t Ag and 0.09g/t Au over 10 metres including 1.27% Cu, 6.96g/t Ag and 0.11g/t Au over 6.13 metres.

Drill hole GAZN-10-19; a 25 metre northern step out from GAZN-10-17, extends the mineralization to surface above hole GAZN-10-17 and confirms the continued western extension of the RM Zone. The Phase 2 drill program will follow up on these western step outs and explore whether the RM Zone continues for another 200 metres in strike length west towards the Lease Zone. Hole GAZN-10-19 intersected 0.39%Cu, 1.99g/t Ag and 0.07g/t Au over 28 metres close to surface, including 0.49% Cu, 2.49g/t Ag and 0.08g/t Au over 19 metre.

The assay results for drill holes GAZN-10-14, GAZN-10-16, GAZN-10-18 and GAZN-10-19 are as follows:

Hole Number	From (metres)	To (metres)	Width (metres)	Cu (%)	Ag (g/tonne)	Au (g/tonne)
GAZN-10-14	117	173	56	0.41	2.46	0.10
Including	117	136	19	0.71	4.35	0.19
GAZN-10-16	11	12	1	0.91	4.2	0.23
And	16	19	3	0.61	3.16	0.09
And	159	171	12	0.44	2.39	0.04
Including	163	166	3	0.97	5.60	0.10
Including	164	165	1	1.80	11.20	0.22
GAZN-10-18	166	167	1	0.90	2.1	0.22
And	173	178	5	0.59	3.12	0.05
And	200	210	10	0.86	4.78	0.09
Including	201	207.13	6.13	1.27	6.96	0.11
GAZN-10-19	31	59	28	0.39	1.99	0.07
Including	40	59	19	0.49	2.49	0.08
Including	44	49	5	0.65	2.86	0.10
And	51	57	6	0.59	3.28	0.09

Drill core was split at a secure facility in Thunder Bay, Ontario and sample preparation was done by ALS Chemex in Thunder Bay, Ontario. Pulp samples (<75 microns) were then sent by secure courier to ALS Chemex in North Vancouver, British Columbia and analyzed by ICP spectrometer("ICP") using a 0.5g representative pulp dissolved in Aqua Regia (3 acid) digestion. All samples grading over 1.0% Cu were re-assayed with ore grade ICP and Aqua Regia digestion. Gold analysis was done by fire assay with AA ("Atomic Absorption") finish.

White Tiger has the option to earn a 50% interest in the Marshall Lake Property project from Rainy Mountain Royalty Corporation ("RMO") and Marshall Lake Mining PLC ("MLM") by spending $4 million in exploration expenditures over 5 years and issuing 2 million shares over 4 years to RMO. As well, White Tiger has the additional option to increase its interest to 75% by incurring such additional expenditures as are necessary to take the project to bankable feasibility stage.

This news release has been reviewed and approved by Robert Middleton, P.Eng., who is acting as Qualified Person for the Company's Marshall Lake Property project in accordance with regulations under NI 43-101.
